25 **SUMMARY**

26 Current law requires the attending physician of a woman seeking an abortion to
27 obtain the informed written consent of the woman and requires specific information, such
28 as the number of weeks elapsed from the time of conception, the risks associated with the
29 abortion and, at the woman's request, alternatives to abortion. This bill specifies that the
30 information must also be conveyed to the woman orally, removes the requirement that the
31 woman request information about alternatives and requires additional information to be
32 conveyed, including the name of the physician performing the abortion, scientifically
33 accurate information about the fetus and the father's liability for support.
