Amend the bill by relettering or renumbering any nonconsecutive Part letter or section number to read consecutively.

SUMMARY

This amendment, which is the majority report of the committee, makes the following changes to the bill.

1. It changes the effective date of the Maine Online Data Privacy Act from July 1, 2026 to September 1, 2026.

2. It clarifies that the term "process" does not include the collection of personal data and makes technical changes throughout the bill to address the difference between collection and processing of personal data and sensitive data.

3. It amends the definition of "publicly available information" to exclude any information used to create a consumer profile, any information made available for sale and inferences derived from these types of information.

4. It clarifies the types of consumer financial information that are considered "sensitive data" under the Act.

5. It provides that the Act does not prohibit the transfer of personal data as part of the transfer of assets to a 3rd party in the context of a merger, acquisition or bankruptcy as long as the controller provides an affected consumer with a notice describing the transfer, including the name of the entity acquiring the personal data and the entity's privacy policies as well as a reasonable opportunity for the consumer to withdraw any previous consent related to the consumer's personal data and to request deletion of the consumer's personal data.

6. It exempts personal data collected and used pursuant to the federal Controlled Substances Act, 21 United States Code, Section 830, from the scope of the Act.

7. It provides that, although a controller must limit the collection of personal data to what is reasonably necessary and proportionate to provide or maintain a specific product or service requested by the consumer, such services include routine administrative, operational, website or account-servicing activities that are consistent with the reasonable expectations of the consumer under the circumstances, including collection of the consumer's personal data to provide advertising to the consumer based on the consumer's activities within the controller's own websites or online applications.

8. It removes the provision of the bill that requires a processor to provide a controller an opportunity to object to the processor's engaging of a subcontractor, but retains the provision of the bill requiring the processor to require any subcontractor to assist with processing only in accordance with a written contract that requires the subcontractor to meet the processor's obligations regarding the personal data under the processor's contract with the controller.

9. It removes the provision of the bill requiring 3rd parties to provide specific notices to consumers.

COMMITTEE AMENDMENT "A" to H.P. 1220, L.D. 1822

10. It removes the requirement that controllers conduct data protection assessments for each algorithm used on personal data.

11. Unlike the bill, which requires only a single report on February 1, 2027, it requires the Attorney General to submit, beginning February 1, 2027, an annual report to the joint standing committee of the Legislature having jurisdiction over judiciary matters regarding the implementing and operation of the Act.
