STATE OF MAINE.

ADJUTANT GENERAL'S OFFICE, }
Augusta, Dec. 31, 1837. }

His Excellency ROBERT P. DUNLAP, *Governor and Com-
mander-in-Chief.*

SIR :—I have the honor of making herewith the General Inspection Return of the Militia of the State, for the year 1837. A return will also be made to the President of the United States.

By this return it appears that the number of our military force is forty one thousand five hundred and fifteen, viz :

Cavalry, one thousand five hundred and forty six,	1,546
Artillery, two thousand and five,	2,005
Infantry, thirty two thousand one hundred and seventy eight,	32,178
Light Infantry, four thousand one hundred and eighty nine,	4,189
Riflemen, one thousand five hundred and ninety seven,	1,597

Total, 41,515

being a decrease from last year, of nine hundred and fifty three.

Although the number is not so large as was exhibited by the last annual return, yet it is believed that our Militia is as numerous as it has ever been. During the present year, and previous to, the May inspection, several Companies

were disbanded, and other Companies of Cavalry, Artillery, Light Infantry and Riflemen were directed to be organized in their stead. All companies disbanded previous to the first of May, were, of course, not returned the present year; and as but few of the new volunteer Companies were organized by that time, a portion of those liable to enrolment were omitted in the returns. The returns for many years past have been very defective, and in making up the general return, it has been the practice, in cases where Companies were omitted in the Regimental returns, to go back to those of previous years, to ascertain their numbers. In some cases those Companies may have been divided, and a portion of their members returned in other Companies; and in other instances a part of the men enrolled at the time of the last return of such Companies, have since been returned as members of the volunteer Companies.

The return of 1836 was more perfect than any previous one since 1830. Out of six hundred and thirty six Companies, three hundred and seventy two were returned. By the table annexed it will be found that four hundred and eighty six have been returned the present year.

Except from the Regiment of Cavalry in the first Brigade of the second Division, and from the Battalions of Cavalry and Artillery in the first Brigade of the fifth Division, returns have been received this year from every Regiment and Battalion in the State, although from the negligence of officers commanding Companies, the returns of many of the Regiments are incomplete.

The number of Companies returned this year is	486
Number not returned this year . . . ,	152
	<hr/>
Whole number of Companies . . . , .	638
	<hr/>

Number returned the present year	486
Number returned the last year	372

Number returned this year more than the last, 114

The *Annual Brigade Returns* have been received from fifteen of the sixteen Brigades, and it is believed that the *Annual Field Inspection* has been faithfully performed by the several Brigade Inspectors; and from the returns it appears that the troops passed the inspection as well as in any former year. There appears to have been more attention paid to discipline, the past season, than for several years previous, and a general improvement seems to have been made in military knowledge by both officers and privates. An unusual number of volunteer Companies have been organized since the last return, and in most of these corps great progress has been made in acquiring a knowledge of the duties of the soldier.

Thirty-eight companies have been ordered to be organized during the past year, viz :

Cavalry, six companies	- - - -	6
Artillery, one, " - - - -	- - - -	1
Infantry, twelve, " - - - -	- - - -	12
Light Infantry, fifteen, - - - -	- - - -	15
Riflemen, four, " - - - -	- - - -	4
TOTAL, - - - -	- - - -	38

Thirteen companies have been disbanded, viz :

Cavalry, four companies, - - - -	- - - -	4
Infantry, eight, " - - - -	- - - -	8
Light Infantry, one, " - - - -	- - - -	1
TOTAL, - - - -	- - - -	13

One thousand and sixty-one officers have been commissioned the past year, exceeding in number those of

any previous year, nearly two hundred. Five hundred and forty three officers have been discharged, being also more than in any former year.

There have been eleven General and Division Courts Martial held since the last report, at which thirty-six officers have been tried, thirty-five of whom were found guilty, and thirty-one were removed from office. The most of them were sentenced to pay fines and costs, the aggregate amount of which is eight hundred and seventy-eight dollars and twenty one cents, and which the several Division Advocates have been directed to collect.

The appropriations for military purposes by the last Legislature, and for the expenditure of which the acting Quartermaster General was made accountable, were the following, viz:

For alteration and repair of Gun Carriages,	\$900
For transportation and laboratory stores,	200
For Musical Instruments and Colors,	600
For equipping two new Companies of Artillery in Danville and St. Albans, - - -	325
For the erection of a Gun House in East Machias, - - - -	300
For the erection of a Gun House in Calais,	300
For the erection of a Gun House in Danville,	200
For the erection of a Gun House in Bangor, including an appropriation of 1836, -	400
For the erection of a Gun House in St. Albans,	200
For finishing the Gun House in Wiscasset,	100
For finishing the Gun House in Wilton,	100
For the purchase of a site and the erection of a State Arsenal in Bangor, including the appropriation of the previous year,	4,000
The sum appropriated for alteration and repair of Gun	

carriages, has been expended on the three Companies of Artillery in the first Brigade of the seventh Division, which are located in the towns of East Machias, Eastport and Calais. The cost of repairs for these companies has exceeded the amount of the appropriation, by nearly one hundred dollars. With the exception of three companies in the first Division, and two companies in the first Brigade of the fifth Division, all the Artillery on the sea board has been thoroughly repaired, and altered so as to conform to the United States service.

The sum appropriated for transportation and laboratory stores, has been expended for the purposes, and a balance is due me on that account.

There is a balance unexpended of the appropriation for Musical Instruments and Colors, in consequence of not being able to procure suitable material for standards.

The Companies of Artillery in Danville and St. Albans have been equipped for a less sum than was assigned. The St. Albans Company has been armed with iron six pounders, and there is now no field Artillery in the Arsenals, suitable to the use of the Militia.

Gun houses have been erected in Danville and St. Albans, for the sums respectively appropriated, and one has been erected in East Machias, the cost of which, including the services of the agent appointed to superintend its erection, is three hundred fifty-five dollars and ninety-nine cents. This exceeds the appropriation more than fifty dollars, but the old Gun House has been sold at public auction, and the net amount received therefor, is forty-eight dollars, which I have paid into the Treasury of the State. The agent, in his report, says, "I have exchanged the State's right to the site where the old house stood, for a similar right (a lease) to another site, of much larger dimensions and a better location. Upon the new site I

have caused a Gun House to be erected twenty-four feet wide and forty feet long, of one story, nine feet posts, and finished on the outside." If, therefore, the Legislature should allow the Company the balance of the cost of this house, it would not take from the Treasury so much, exclusive of the services of the agent, as they have paid in by the sale of their old house.

The agent appointed to build a Gun House at Calais, informs me he has contracted to have one erected, and that it was to have been finished before this time, but I am not informed of its completion.

The Gun Houses in Wiscasset and Wilton have been finished for the several sums appropriated.

No Gun House has been erected in Bangor in consequence of the difficulty in obtaining a suitable lot, in exchange for the one now owned by the State, and the State's lot not being a good location for the purpose. In the course of the ensuing year a site will probably be obtained, and the building erected.

In consequence of your application to the commonwealth of Massachusetts, pursuant to the provisions of a "Resolve respecting Gun House sites," passed the last session, the Legislature of that State has directed the Land Agent of Massachusetts "to release to the State of Maine, all the right, title and interest of the Commonwealth, in and to certain parcels of land, formerly conveyed to Massachusetts for the purpose of being occupied as sites for Gun Houses, within the limits of the State of Maine." By your directions I have applied to the Land Agent for a deed of release, and shall probably receive the conveyance in a few days, so that no further difficulty will arise in disposing of, or exchanging these lots, in consequence of defect in the State's title to the land.

No progress has been made in the erection of a State Arsenal in Bangor. I have examined several lots of land in that city, with a view of procuring a site, but have not been able to procure one at a price I felt authorised in paying. The best location for the purpose is Thomas' Hill, and the price asked for two acres there, is three thousand dollars. This being a larger sum than the appropriation would permit of being expended for the land, I made a statement of the facts to the Governor and Council, at their session in August last, informing them that I should wait instructions from them before making any expenditure; and having received no further direction on the subject, no part of the appropriation has been drawn from the Treasury. It is highly important that a new Arsenal should be erected, but I am of opinion that this town would be a better location than Bangor. This is more central, and the troops in the interior could better be supplied from this point, than from Bangor; while the eastern part of the State, including Bangor and vicinity, could be furnished with great convenience from the Arsenal at Portland, by means of water communication. No one can doubt, that the general oversight of the military property of the State, could better be had by the Executive officers of the Government, should the principal depot be at Augusta. The United States' Arsenal being established here, is, to my mind, a strong reason for locating ours on the Kennebec, rather than on the Penobscot, as much valuable information in the preservation of the property would be obtained. And should that be made an Arsenal of Construction, as it probably will be, there would be still stronger reasons for locating our principal Arsenal in this town. Another and a good reason for changing the location is, the difference in cost to the State. A lot of land well situated and sufficiently large,

can probably be purchased here, for from three to five hundred dollars, which will be quite as valuable for the purpose wanted, as the lot mentioned in Bangor, which cannot be obtained for less than three thousand dollars. The cost of erecting the building, would also be less here than in Bangor. For the reasons named, I am decidedly of the opinion, that the interest of the State requires a change in the location of the proposed Arsenal, from Bangor to Augusta.

Accounts of all the beforementioned expenditures, have been audited and settled by the Governor and Council.

The following appropriations for military purposes are deemed necessary for the ensuing year, viz :

For alteration and repair of Artillery,	\$900,00
For transportation and laboratory stores,	250,00
For purchase of musical instruments and colors,	600,00
For finishing the gun house in East Machias, including the services of the agent	55,99
For erecting a Gun House in Hallowell,	300,00

I have several times examined the Arsenal at Portland, during the past year. The military storekeeper has been faithful in taking the necessary measures for the preservation of the State's property under his charge. The military property in the Arsenal at Bath is also in good order.

The amount of the State's proportion, for the years 1835 and 1836, of the annual appropriation by Congress, for arming the Militia, is twelve thousand two hundred and one dollars. Requisition was made on the War Department, for Hall's patent Rifles for this amount, during the year 1836, and I have received a part of them. I have been notified of the shipment of another portion of them, but they have not yet arrived at the Arsenal. No requi-

sition has been made for the State's proportion of the appropriation for 1837, and I would respectfully suggest the expediency of procuring Brass Field Artillery, for the amount which may become due for the years 1837 and 1838. There are several parts of our State where Artillery is much wanted, and where there are men anxious to form themselves into such companies, but we have now no means of arming them. It is understood that the General government is now taking measures to procure Brass Ordnance, and the State can probably be supplied in the course of the coming year.

I annex a list of the military property in the Arsenal at Portland, as returned by the military store keeper; and also a schedule of the public property in the Arsenal at Bath, which remains the same as reported by my immediate predecessor.

The Field Tents which were in the Arsenal, have been delivered to volunteer Companies, pursuant to a resolve of 1836. The number was not sufficient to enable me to supply all the companies which made application.

From information received from intelligent officers in different parts of the State, as well as from personal observation, I am led to believe, that the operation of the present militia law is favorable to the prosperity of the militia. Although there are portions of our State where little or no attention is paid to the performance of military duty, yet those places are few, and the law is very generally carried into effect. It is believed that public opinion is decidedly in favor of a well organized and disciplined militia; and although there are evils and hardships attending the present organization, which can be remedied only by the General Government, still our patriotic yeomanry deem the establishment of our NATIONAL GUARD of too much importance, to suffer the inconveniences and unequal-

ities of the present law, to destroy an institution so necessary to the preservation of civil liberty.

Should Congress so change the present organization, as to include those only between the ages of twenty-one and thirty, and make suitable provisions for arming those enrolled, it would greatly relieve the existing burdens; and if, in addition, the General Government would furnish suitable means for instructing those who are required to perform duty, our militia would soon become efficient, and capable of giving that protection which is so essential to the permanence of our free institutions. But frequent changes are attended with much inconvenience. Our citizens are now becoming well acquainted with the duties required of them, and are generally disposed to render the service contemplated by the law. It is therefore believed that, until Congress make those important changes in the laws organizing the Militia, any essential alteration in the law of our State, would be injurious rather than beneficial.

In closing this communication, you will permit me to bear testimony to the faithful manner in which the officers of the militia generally, have performed their several duties during the time I have been associated with them, in the station I now hold, so far as my official connection with them has enabled me to judge. The duties devolving upon most of them are arduous and responsible, attended with great expense, and, in most cases, rendered without compensation, and are such in their nature as to attract but little the attention of those around them; so that none but those who hold commissions are aware of the amount of duty devolving on those who accept offices in the militia. It gives me great pleasure to be able to say, that with some exceptions, the gentlemen who have been in commission, have performed their duty faithfully and promptly,

and are deserving great credit for their exertions in support of this highly important institution.

With great respect,

I have the honor to be,

Your obedient servant,

A. B. THOMPSON.

Adjutant General.
