Augusta:

WILLIAM T. JOHNSON, PRINTER TO THE STATE.

1849.

ANNUAL REPORT

OF THE

LAND AGENT

OF THE

STATE OF MAINE.

DECEMBER 31, 1847.

~~~~~  
Published agreeably to Resolve of March 22, 1836.  
~~~~~

AUGUSTA:

Wm. T. JOHNSON,.....PRINTER TO THE STATE.

1848.

REPORT.

LAND OFFICE, December 31, 1847.

To the Governor and Executive Council of the State of Maine :

I have the honor herewith to submit this my annual report, which with the accompanying account and schedules exhibits the transactions of this department during the past year.

Of the lands holden by this state in severalty, there have been sold thirty-two thousand eight hundred and twenty-six acres for the sum of thirteen thousand six hundred and thirty-nine dollars forty-four cents. See schedule marked A.

There have also been sold four thousand nine hundred and fifty acres, which had reverted to the state, for the non-performance of the conditions of previous sales, for the sum of two thousand eight hundred seventy-seven dollars nineteen cents. See schedule marked B.

The quantity of land owned by this state in common with Massachusetts, which has been sold, is one hundred thirty-five thousand six hundred and ninety-four acres, the purchase money for the same amounting to one hundred fifty thousand three hundred twenty-two dollars and eighty-two cents, one half of which sum, viz. seventy-five thousand one hundred sixty-one dollars and forty-one cents is receivable by Maine. See schedule marked C.

In obedience to the resolve in favor of the trustees of Thomaston Academy, I have conveyed to them the west half of township numbered seven in the fourth range of townships west from the east line of the state, satisfactory evidence having been adduced of

their compliance with the conditions upon which the grant was made.

The amount paid by this department into the state treasury during the past year is one hundred fifteen thousand one hundred seventy-one dollars and sixty-seven cents, which has been received upon notes, stumpage bonds, and from the sales of lands. The past year has been peculiarly prosperous for the lumbering in common with other business interests, and in consequence the receipts of this office have been larger than anticipated at its commencement.

The following townships of undivided lands have been surveyed, viz: townships numbered nine, ten, eleven, twelve and thirteen, in the eleventh, twelfth and thirteenth ranges west from the east line of the state. The timber upon territory equal to about five townships of this survey, may, by means of the improvements of the Lake Heron Dam Company, be brought down the Penobscot waters, although all of the above townships are located upon the Allagash river, one of the large tributaries of the St. John; this circumstance is regarded as giving large additional value to this portion of the survey over those townships the timber upon which must find its way to market down the river St. John.

Mr. Jacob W. Stinchfield was employed to explore the above townships, at the same time for the purpose of estimating the timber thereon, and making examinations necessary to fix the value of the same. This duty he has thoroughly performed upon all excepting townships number thirteen, in the eleventh, twelfth and thirteenth ranges, which he had not time to examine, and by his report there is upon the twelve townships explored, ninety-one millions eight hundred thousand feet board measure of pine timber, suitable for board logs, nearly one-half of which, it is believed, may be floated down the Penobscot.

Township letter E, in the first range of townships west from the east line of the state, has also been lotted for sale and settlement.

The land agent of Massachusetts and the undersigned, contemplate making further surveys the ensuing season, in that portion of

the public domain lying between the west line of the seventh range and the east line of the eleventh range, constituting an area of about twenty-five townships. Preparations will be made to start surveying parties as early in the spring as the business can be commenced with advantage.

The legislature at its last session, authorized the land agent of this state to expend upon the Fish River Road, three thousand dollars, provided Massachusetts should expend a like amount for the same purpose.

The agent of Massachusetts, with his usual liberality, concurring in the propriety of the expenditure, we have applied to that object nearly the amount allowed.

Mr. Nathaniel Blake was appointed to superintend the outlay upon the road beyond township number eleven in the sixth range. Under his superintendence the road from that township to Portage Lake has been turnpiked, with the exception of about one mile through cultivated land. Beyond the Portage Lake he was directed to expend so much as should be indispensably necessary to render the road passable, the amount being unavoidably left to his discretion.

In addition to the foregoing, the land agents of the two states, under an arrangement with Ira Fish, Esq., have caused a bridge to be erected across the Aroostook river, on the line of the Fish River Road, in township number eleven, range five, and an alteration to be made in the location of the road of about one mile and a half.

The cost of the bridge will be twenty-eight hundred dollars, of which sum eighteen hundred dollars are to be paid by this state and the commonwealth of Massachusetts, and the residue by means of private subscriptions made for that purpose by the citizens of that township, whose liberality and enterprise are entitled to much commendation.

The bridge is a valuable and permanent structure, the want of which heretofore has been much felt by the citizens of that portion of our state, and by those having occasion to travel in that quarter. The alteration in the road has not yet been completed, but will be

early the ensuing summer. When this is finished, the amount expended will be some less than that authorized by the legislature at its last session; the precise sum I am not able to state, in consequence of the vouchers not being yet returned to this office, and the settlement of these accounts must, therefore, be postponed to the ensuing year.

I will add, that passing as the Fish River Road does in its almost entire length, through lands not taxable, it will be incumbent on the legislature to authorize expenditures, from time to time, to open it more thoroughly, and to keep it in repair, as otherwise the benefit of previous expenditures will be in a great measure lost.

Upon the Military Road, three hundred and eighty-five dollars have been expended in making the ordinary repairs; the entire amount authorized being five hundred dollars. The balance will probably be called for before the meeting of the legislature, and I would recommend that the expenditure of a like amount be authorized for repairing this road the ensuing year.

A bridge has likewise been constructed over the Mattawamkeag river, where the road from Smyrna to the Aroostook Road, crosses the same, at a cost of six hundred dollars. This was done by contract with John Rollins, Esq., and at the joint charge of Maine and Massachusetts.

The appropriation for the repair of the Baring and Houlton Road through the town of Baileyville, has been expended under the superintendence of John N. Farrar, Esq., whose accounts have been settled. The appropriation for the repair of the same road through the Indian township, has been expended under the supervision of Putnam Rolf, Esq., whose accounts have likewise been audited, allowed and paid.

John V. Putnam, Esq., was appointed the agent to expend the sum appropriated for the repair of the road through township number eleven, at the monument, which service has been performed, and the bills paid.

A contract has been made with Putnam Rolf, Esq., to rebuild the Lewy's Island Bridge, for nine hundred and seventy-five dollars,

which work by the terms of the contract is to be completed by the 20th of March next, so that no interruption will occur to the travel upon the Houlton and Baring road.

Under the resolve providing for building a road through Dunn's Notch, in Andover north surplus, I have contracted with John J. Bragg, Esq., to construct the same in conformity with the provisions of said resolve, and for the sum authorized thereby to be paid.

Andrew Hall, Esq., was appointed by my predecessor, to expend the appropriation for repairing the Moosehead Lake Road, and a large part of the appropriation has been advanced to him, but his accounts have not yet been received.

No expenditures have been made upon the Eastern Aroostook Road the past year.

During the year past, but few sales have been made of settling lands, owing, in no small degree, to the great depression of the lumbering interest upon the St. John. The farmers upon the Aroostook in former years have found a ready market for their surplus products among the lumbermen in that region and at richly remunerating rates. The decline in the price of timber in 1846, induced the passage of a resolve prohibiting the granting of permits to cut timber upon the St. John and its tributaries, which has to a very large extent arrested the lumbering business in that quarter and thereby seriously affected the agricultural interest.

It is confidently hoped that ere long it will be proper once more to open the Aroostook and St. John valleys to lumbering operations, which will again afford a vent for the surplus agricultural products of that region, and in no small degree stimulate the settlement of the public domain. I would not, however, recommend a change of the law at present, any further than to authorize the granting of permits to cut and haul timber sufficient for domestic consumption and manufacture; that this is expedient must appear from the fact that upon the St. John and its tributary streams there are twenty mills for the manufacture chiefly of small lumber which depend for their stock almost entirely upon the public domain. Sound policy dictates that these mills should not be compelled to lie idle, as without a change in the law they soon must.

The past year, permits have been granted to gather up and haul the down pine upon various townships, being the refuse left by those who have heretofore made square timber upon the same. It was conceived that this course did not militate with the terms of the law, and it is clearly the dictate of a judicious economy to make sale of that, now, which in a short time must decay and become of no value; no serious inconvenience will therefore arise the present year to the mill owners, from the existing prohibition upon the granting of permits in that quarter, but this source of supply is but limited, and hence I recommend the change in the law above referred to. The intent of the resolve prohibiting the granting of permits upon the St. John and its tributaries was undoubtedly to put a stop to the cutting of square timber for the British market, and the proposed alteration would not in the least conflict with that line of policy.

In relation to amounts due to this state for stumpage of timber cut upon the rivers St. John and Aroostook, under permits granted in 1845, I have to say that the commission created by resolve of the legislature at its last session, met and heard the parties and fixed upon a basis for settlement, all which will be submitted in a report of that body.

The meeting was held in October last and measures were taken to notify persons interested and to secure our demands, but owing to the lateness of the season and the financial disasters occurring at that time in Great Britain seriously affecting the business of the province of New Brunswick, but little progress has been made in obtaining additional security, though it is confidently expected that nearly all may be adjusted in the course of the next season.

The quantity of lands at this time belonging to Maine, including her interest in the undivided territory, is about two millions three hundred thousand acres, but it cannot be stated with precise accuracy, for the reason that an area supposed to contain about fifty townships as yet remains unsurveyed.

It is impossible to fix the actual value of the public domain, but it is believed that it may be safely stated at half a dollar per acre, as being within the amount which the state will realize for it. Many

tracts are worth much more than that sum while others are worth less.

I deem it proper to suggest that by the terms of the charter of the Heron Lake Dam Company granted in 1846, the legislature is authorized to fix the amount of toll which that corporation may demand for passing its works ; this power has not yet been exercised ; but inasmuch as the lumber upon several of the townships surveyed the past season will use the erections of that company in its transit to market, it will be proper to adjust this toll before sale is made of those tracts or operations permitted thereon.

The receipts of the land office are necessarily affected by the same general causes which influence all other kinds of business ; but should the spring prove propitious for bringing to market the lumber cut the ensuing season, the payments of this department into the treasury for the year 1848 will not fall short of one hundred thousand dollars.

SAM'L CONY, *Land Agent.*
