PRINTED BY ORDER OF

THE LEGISLATURE

OF THE

STATE OF MAINE,

DURING THE

EXTRA SESSION OF 1853, AND SESSION OF 1854.

Augusta:

WILLIAM T. JOHNSON, PRINTER TO THE STATE.

1854.

REPORT

OF THE

TREASURER OF MAINE,

ON THE

STATE OF THE TREASURY,

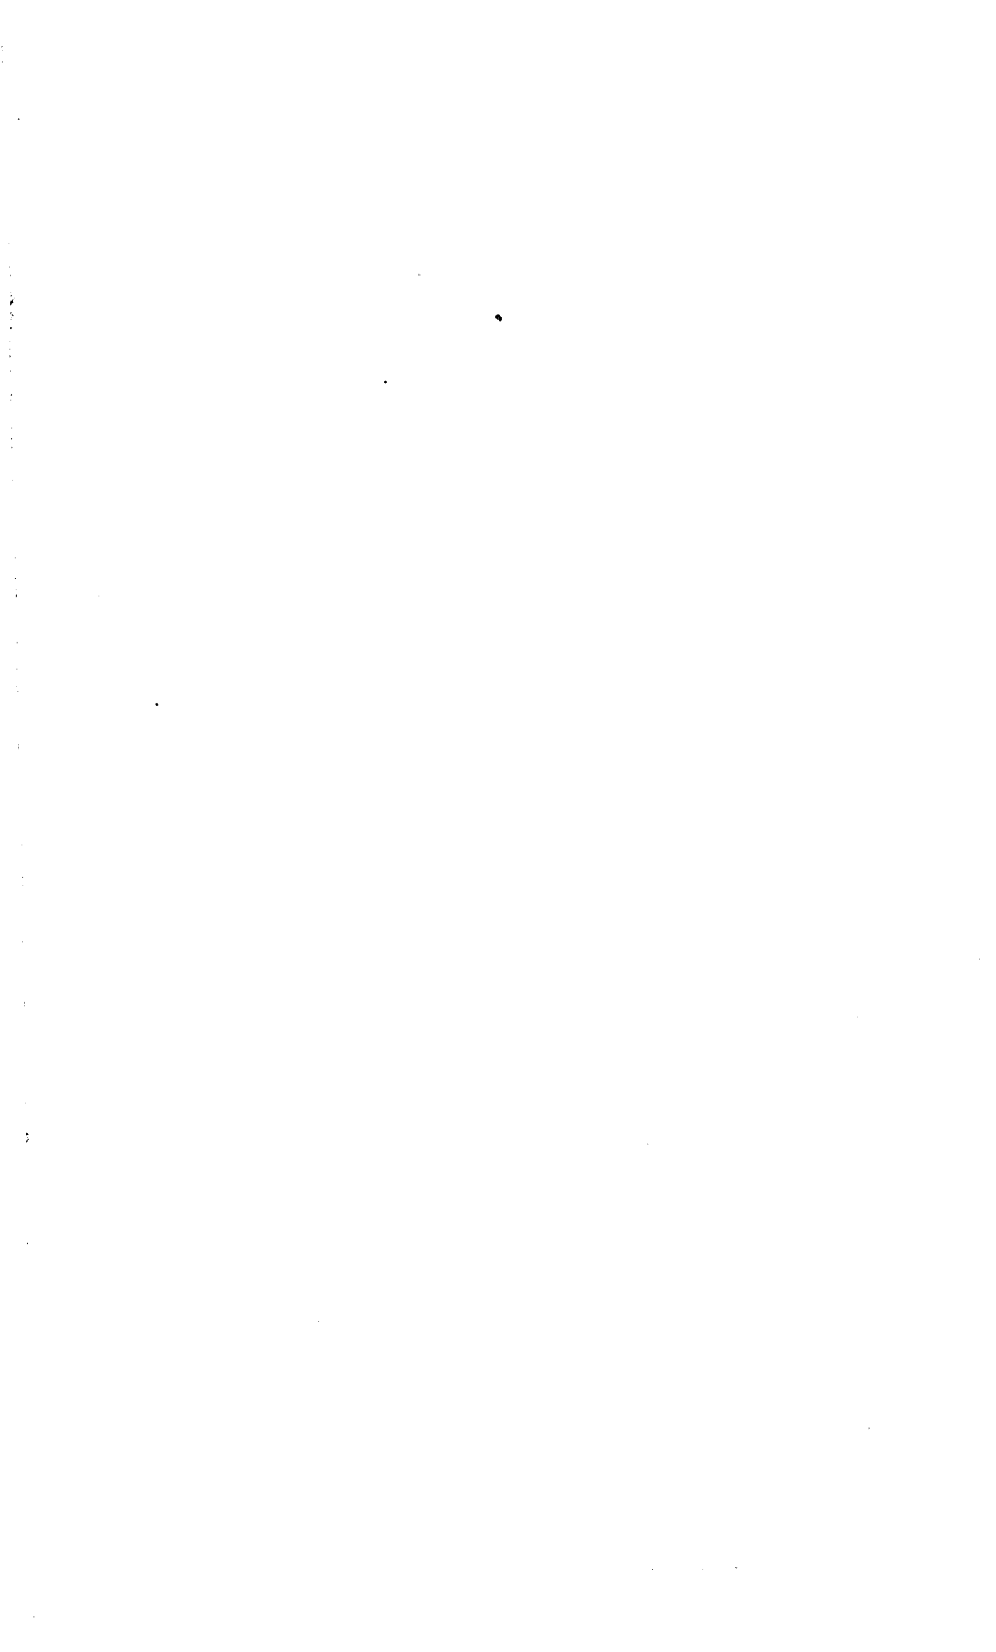

DECEMBER 31, 1853.

Augusta:

WILLIAM T. JOHNSON, PRINTER TO THE STATE.

1854.

REPORT.

TREASURY OFFICE, }
Augusta, January 2, 1854. }

*To the President of the Senate and
Speaker of the House of Representatives :*

IN conformity with the law, I have the honor herewith to exhibit in detail an account of the transactions of this department of the government for the year ending December 31, 1853.

The receipts have been as follows :

From taxes,	\$196,702 40
“ land agent on general account,	85,430 27
“ land agent on account of permanent school, fund,	872 72
“ land agent on account of sales of timber and grass on lands reserved for public uses in unincorporated townships,	19,587 47
“ bank tax,	41,065 59
“ proceeds of sale of timber on township belonging to Passamaquoddy Indians,	7,031 28
“ duties on commissions,	2,020 00
“ bank dividends,	800 00
“ miscellaneous sources,	7,907 84
Cash on hand January 1, 1853,	165,448 23
	\$526,865 80
Amounting in all to the sum of, (see sheet A,)	\$526,865 80

The disbursements for the same period amount to \$434,361.09—showing a balance on hand at this date of \$92,504.71. (See sheet A.)

From this should be deducted the following sums as liable to immediate call to meet past appropriations, or held in trust for specific purposes, viz:

Warrants drawn and unpaid,	\$18,635 21
Balance of school funds heretofore apportioned but not drawn,	17,971 95
Balance due on roll of accounts,	487 28
Installment of bank tax paid in October and con- stituting part of annual school fund for 1854,	21,703 36
County taxes on unincorporated lands, collected and held in trust for the several counties,	3,579 79

In all \$62,377.59—leaving \$30,127.12 to be applied to the future accruing wants of the government.

During the year past, in addition to the ordinary demands, the treasury has been called on to meet others of an unusual character.

For the completion of the Insane Hospital and Reform School, the expense of the extra session of the Legislature, and the cash payment to Massachusetts for her lands—each of which required the payment of a large amount of money.

The most important transactions of the department arose from the purchase by this State of the lands belonging to the Commonwealth of Massachusetts, lying within the limits of Maine.

The resolves passed at the called session of the Legislature in September last, providing for the consummation of the purchase of the Massachusetts lands, directed the payment of one hundred twelve thousand five hundred dollars in cash, and the issue of bonds binding the state to the payment of two hundred and fifty thousand dollars, being the balance of the purchase money, bearing interest at the rate of five per cent. per annum, payable at such times, not exceeding twenty years from the fifth day of October, A. D. 1853, and in such amounts, as the Treasurer of the State might deem most for the interest of the State.

Upon the approval of these resolves, the Treasurer made instant provision for the payment of the money required

thereby, and also prepared and executed bonds according to the terms of the law, with coupons attached for the interest at the rate of five per cent. per annum, payable, principal and interest, in the city of Boston, to the Treasurer of the Commonwealth of Massachusetts, for twenty-five thousand dollars each. These bonds will mature on the fifth day of October in each of the following years, viz.: 1863, 1864, 1865, 1866, 1867, 1868, 1869, 1870, 1871, and 1872, covering a period of nineteen years for their final redemption.

Among the reasons influencing the treasurer to fix upon so remote periods for the maturity of the land debt, was the necessity in the meantime of providing for the payment of the previous outstanding obligations of the state, the last of which falls due in the year 1860, and the whole of the intermediate time will probably be required to accomplish this.

When these liabilities shall have been discharged, the land debt can be met without inconvenience, inasmuch as the annual installments thereof, being but twenty-five thousand dollars, are much less than the amount of annual interest now paid on the previously existing debt. Coupled with the foregoing considerations, is the additional fact, that one of the inducements to the purchase of these lands was the belief that the timber lands might, after a delay of some years, be sold to produce sums sufficient to reimburse the cost of the whole, and by fixing a long period for the payment of the debt incurred on that account, there will be ample time to dispose of the lands in the most advantageous manner.

Immediately upon being notified that the deed of the land had been approved by the commissioners on the part of Maine, the Treasurer repaired to Boston, made the cash payment, delivered the bonds to the Treasurer of the Commonwealth of Massachusetts, and received the deed, also sundry notes of hand given by settlers and others, a schedule of which is attached to this report, (sheet B,) and a permit to John S. Jenness to cut timber on several townships of land conveyed

to this State, which is to be paid for as fast as taken off, all which papers are now in this office, subject to whatever disposition the Legislature may see fit to make.

Ten thousand dollars have been paid on account of the public debt in advance of its maturity, while no portion of that which was due at the commencement of the year has been presented for payment:

The costs of criminal prosecutions for the year have been large—for the sums paid to the several counties, see sheet C. In relation to this matter however, it is proper to add that certain amounts paid to a portion of the counties embrace charges for 1852, while in offset to this, there are bills against the State for 1853 which have not been presented for payment, so that the gross sum for the year is within the average of the costs of this branch of public expenditure.

The amount of the annual school fund apportioned to the several cities, towns and plantations in the State for the year 1853, was \$44,027.89 derived as follows:—Bank tax, \$37,063.44; Interest on permanent school fund, \$6,964.45, making that sum; and accompanying is a table showing the cities, towns and plantations, the number of scholars and sums apportioned to each. (See sheet D.)

There is also appended to this report, (see sheet E,) a schedule exhibiting the number of scholars in the State for each year from 1833 to 1853 inclusive, the sums apportioned and paid from the State treasury for the benefit of primary schools, which amount in the aggregate to \$660,317.56. This table possesses some interest as showing the annual increase in the number of scholars and the fluctuations in the amount of the funds.

The expenditures for the year ensuing are estimated at \$318,267.02, and the receipts, including cash balance on hand at this date, \$452,290.68. (See sheet F.)

The appropriations for expenditures being so entirely under the control of the Legislature, no estimates can be more than

proximately accurate; but in preparing these for the coming year, the Treasurer has endeavored to embrace all items ordinarily the subject of appropriation.

While the foregoing exhibit shows that the means in the treasury will be ample for all the demands upon it for 1854, prudence requires the husbandry of the resources of the State to meet the necessities of the government in succeeding years.

An analysis of the table of estimated expenditures shows that the ordinary and unavoidable expenses of the government will more than absorb the whole of the annual State tax of \$200,000, leaving whatever of the principal of the public debt is to be paid to be provided for by receipts from other sources.

The funded debt, other than that owing to Massachusetts, matures as follows:

Due since January 1, 1853, and not called for,	\$11,000
“ March 7, 1854,	10,000
“ February 1, 1855,	1,000
“ March 7, 1855,	259,000
“ March 7, 1856,	132,500
“ February 1, 1860,	48,000
	\$461,500

That which is overdue and has not been presented for redemption, as also the amount maturing March 7, 1854, making \$21,000, is covered by the estimates for the year ensuing, leaving the large sum of \$392,500 to be provided for early in 1855 and 1856.

Sales of the public lands having been stopped by the action of the last Legislature, the resources wherewith to meet the foregoing are reduced to the following items, viz:

<i>First</i> —The assets of the land office due and maturing before the 7th March 1855 and 1856 respectively, about	\$321,000
<i>Second</i> —So much of cash on hand this day which can be spared for other necessities of government, and estimated at	30,000

<i>Third</i> —100 shares Augusta Bank, par value and worth	\$8,000
<i>Fourth</i> —Notes due at this office prior to March 7, 1856,	2,000

In addition to these, is the claim of Maine upon the General Government for compensation for lands alienated by this State to quiet settlers upon the territory formerly in dispute between the United States and Great Britain, thereby enabling our government to fulfill the stipulations of the treaty of Washington. The justice of this claim is undeniable, and should not be the less readily admitted from the fact that Maine, instead of interposing embarrassing obstacles, came forward with alacrity to aid the United States in fulfilling her treaty obligations.

The attention of Congress has heretofore been called to this claim, and again at its present session, but such are the delays of congressional legislation, it is impossible to say when we may expect its allowance, and it would be unsafe to rely upon it as a resource wherewith to meet the exigencies of the treasury at any particular time.

In relation to the assets of the land office, while it may be assumed that the notes are well secured, and will be ultimately paid, it would be imprudent to rely implicitly upon the punctuality of the debtors to that department for the means to discharge the public debt at maturity; and it is also to be remembered in addition thereto that the resolve setting apart the proceeds of the sales of the public lands as a fund to discharge the public debt, reserves therefrom so much as may be required to defray the expense of the management of the lands, and for making roads through the same. No estimate has been submitted for either of these purposes, and a deduction from the assets of the land office will be required to whatever extent the Legislature now or hereafter may make appropriations therefor.

The bank stock can be sold any day for its present par value, and probably at a premium.

Inasmuch, however, as another Legislature will convene prior

to March 7, 1855, and in season to provide for any deficiency of means wherewith to meet the installment of the public debt then falling due, if any shall then exist, I have called the attention of the present Legislature to the subject, not so much for the purpose of invoking legislation upon the matter, as of suggesting the fact that any extraordinary appropriations the present year will be likely to increase the embarrassments for years to come.

I would express the opinion that the whole available means in the treasury which can be spared the present year, should be applied to the payment of the debt due in 1855 in advance of its maturity, as fast as the surrender of the stock can be obtained.

In addition to the funded debt of the State, now amounting to \$710,500, there are other liabilities on account of funds held in trust, viz :

Permanent school fund,	\$116,946 96
Penobscot Indians,	54,719 15
Proceeds of sales of timber and grass on unincorporated townships,	63,207 82
Passamaquoddy Indians,	22,500 00

The last is the proceeds of the sale of the timber and grass on the township belonging to that tribe, and has accrued within the last year. The sum stated is the whole amount of the sale, although but \$7,031.28 has actually been paid into the treasury; the balance, however, is understood to be well secured.

These require an appropriation for the annual interest thereof, except that belonging to the unincorporated townships, which will be much less—all which are embraced in the estimate of expenditures.

The assessment of the usual State tax, payable January 1, 1855, will be indispensable to the future operations of the government.
