ANNUAL REPORT

OF THE

LAND AGENT

OF THE

STATE OF MAINE,

FOR THE YEAR 1854.

Angusta: william t. johnson, printer to the state.

REPORT.

LAND OFFICE, December 30, 1854.

Gentlemen:—Agreeably to the provisions of law, I have the honor herewith, to render to you a report of the transactions of this office, for the year ending December 30, 1854.

The amount received at this department from all sources (excepting the reserved lands) during the past year, is seventy-six thousand five hundred and fifty-one dollars and sixty-nine cents. (See schedule C.)

In addition to the above, I have received from the sale of timber and grass upon the lands reserved for public uses, and from securities in the office, heretofore taken for timber and grass upon such lots, the sum of eleven thousand seven hundred and thirty-four dollars and eighteen cents.

I have since the first day of March last, sold the timber and grass upon eleven thousand seven hundred and forty acres of the reserved lands, for the sum of five thousand one hundred and sixty-eight dollars and twenty-five cents. These lands were situated in townships which were conveyed long ago, and most of the timber had been taken off by trespassers or proprietors, who have paid little regard to the rights of others. It is believed, however, that the prices I have received do not, at least, fall below the prices received by my predecessors.

Numerous other applications have been made for similar lots, but the sums offered were so low that I have not deemed it my duty to sell.

The quantity and description of the lands conveyed by me under grants, and by virtue of resolves of the Legislature, will be seen by reference to schedule B.

By a resolve approved April 7, 1854, I was authorized to convey to John K. Russell, township numbered one in the eighth range in the county of Franklin. I have received from Mr. Russell the sum of ten thousand dollars, in part payment of the purchase money, but the balance has not been fully adjusted and no deed has been given. It will undoubtedly be satisfactorily arranged and the conveyance made at an early day.

I have expended in repairing roads and bridges the past year, the sum of seventeen thousand one hundred and thirty-six dollars and sixteen cents. (See schedule 1.)

From a personal examination in many instances, and from reliable information in others, I have the pleasure of informing you, that the money has been judiciously expended, and that the roads have been improved, as much as the means in the hands of the agents employed, and the great length of roads specified in the resolves authorizing the expenditures, would allow me to anticipate.

I would here respectfully suggest that the policy now pursued for opening and repairing roads in the newly settled parts of the State, although promotive of great good heretofore, may not now be the best course to be followed.

In my opinion the money to be expended, should be applied exclusively to the great thoroughfares; and if it should be deemed unadvisable, at once, to appropriate money sufficient to complete all, the money that may be appropriated, should be definitely applied to the more important ones, that they at least may be permanently made; and this course should be pursued from time to time, until all shall be so made. The settlers would speedily and cheerfully construct the necessary intersecting roads. By the mode at present pursued, little more can be expected than to make the roads passable for the time being; the ensuing spring showing that little if any permanent improvement has been made.

To aid and encourage the rapid settlement of the public lands, has long been regarded as a measure of the first importance by the people of the State; laws have been enacted almost annually to this end. But nothing perhaps demonstrates so emphatically, the deep solicitude felt in this matter, as the recent extensive purchase of settling lands from the Commonwealth of Massachusetts, for gratuitous distribution among those who choose to occupy them.

It is believed that nothing can contribute more to this object, than the speedy and permanent construction of the necessary leading roads. The present seems to be a propitious time for the State to move energetically in this matter. The lumbermen afford the settlers a ready and valuable home market for their produce, whereby the usual hardships and privations of early settlements are avoided. The lumbermen in turn are materially benefited by the settlers; and the State will also receive a share of the benefit in the price of the timber lands, increased by the facilities thus offered to the operators.

Our geological and agricultural surveys, the concurrent testimony of all my predecessors, and the uniform success of the settlers there, prove so conclusively the great superiority of the "Aroostook territory" over other parts of the State for agricultural purposes, that any testimony from me would be unimportant and perhaps regarded as supererogatory.

Along the southern bank of the Saint John river in this State, resides a people, using a different language and accustomed to different habits, from the people of other parts of our State. Transferred (involuntarily on their part, but rightfully) by the treaty of Washington, from their country to ours, and made strangers in a land of their own, it is eminently fitting and proper that they should receive the fostering care of the State. Already is some improvement in their condition perceptible; the thatched hut and hovel of the last century are slowly giving place to the more comfortable and substantial buildings of the present day.

Justice, philanthropy and humanity demand that this people should be aided, encouraged and protected. Let them but feel and know, that they are regarded by the State as of us, and entitled to all the privileges of native born citizens, and they will soon cease to be a burden, and become a valuable portion of our population.

I found the valuable and expensive bridge across the Fish river, at its mouth, had been materially injured by the great freshet of last spring. One of the abutments was so far undermined that it was apparent to all who saw it, that unless it should be repaired before another even ordinary rise of water, the whole bridge would be lost.

I therefore, though there was no appropriation for the purpose, deemed it my duty to cause the same to be repaired; and accordingly I employed Col. David Page, of Fort Kent, to repair it, for which I have paid him from the funds in the office, the sum of three hundred and fifty dollars. The money has been judiciously expended, and the bridge is regarded as in good condition.

I also found a bridge in township B, range one, on the only road leading from Houlton to Presque Isle and No. 11, R. 5, in a condition unsafe for travelers. This road is the stage road, and is much needed and used, and the bridge is indispensable. In this instance also, without a specific appropriation, I directed the bridge to be rebuilt, and the same was very satisfactorily done by S. B. Pattee, Esq., for which I have paid him the sum of three hundred dollars. As there appeared to be no other course to be adopted, for these purposes, before another session of the Legislature, and as the property of the State was in a hazardous situation, I hope the course I have taken may not be unsatisfactory.

By a resolve of the Legislature approved March 22d, 1853, the Land Agent was authorized to expend the sum of seven hundred and fifty dollars, to aid in the construction of a bridge across Mattawamkeag river, in Bancroft plantation, provided, the inhabitants and proprietors should cause a good bridge to be built.

A bridge has been built the past season at that place by John Pomroy, at an expense of about two thousand dollars, of which I have paid the sum of seven hundred and fifty dollars; a like sum has been paid by the proprietors, and the balance by the builder and other settlers in the vicinity of the bridge.

Agreeably to the provisions of a resolve of March last, I issued advertisements soliciting proposals for rebuilding the Mattawamkeag bridge. There were but few competitors. I made a contract with Mr. Carlostin Jewett of Bangor, and it affords me pleasure to say, that Mr. Jewett has most faithfully performed the conditions of his contract. On examination, I found the superstructure (which was built by the United States of the very best materials and in the most substantial manner) in a perfect state, with the exception of the covering. I therefore determined to rebuild the piers and abutments, without taking down the bridge, as had been contemplated; by this course a great saving has been made, and the travel has not been at all obstructed, for any part of the season.

The bridge now rests firmly, upon two granite piers and two abutments, which in point of material and workmanship are not surpassed in the State. The small bridge has been made much shorter—much of the space formerly planked is now permanently filled with gravel, by which considerable expense will be annually avoided. The abutments of the small bridge are also of granite and well and substantially made. I have caused the whole to be newly planked; for all of which, including forty-one dollars paid Mr. Asa Smith under a former resolve, I have paid the sum of six thousand one hundred thirty-six dollars and sixteen cents.

The roof of the bridge should be shingled, and the walls slightly repaired, and the whole bridge will then be regarded "as good as new."

The amount of timber cut the past year by trespassers is less undoubtedly than the amount heretofore annually cut. But trespassing to some considerable extent, will be carried on while the State holds the lands; it cannot be entirely stopped.

In most cases settlements have been made with the trespassers; very little however has been actually paid, but in many cases satisfactory notes have been received. Some remain unsettled, but no disposition has been manifested to avoid a settlement; but as the timber did not go to market payments could not be made. The timber will be held till payment is made or secured.

I regret that the amount received at this office during the past year, is not as large as was in the early part of the season, anticipated.

The principal cause of the deficiency however must be apparent.

The lumbermen, on the Penobscot and St. John rivers, where those most largely indebted to the office reside, have been particularly unfortunate the past year; they have had vast quantities of valuable lumber, at their mills and in their booms, but the unprecedented drought has rendered it unavailable.

Most of the notes in the office for land are undoubtedly good, and will be eventually paid.

A strong desire to pay has been generally manifested; but payments could not be made without sacrifices, which I have not felt willing to exact.

In all cases where payments on notes have been made to me, I have collected the *annual* interest, agreeably to the terms of the notes. The payments have been very reluctantly made, and the course alleged to have been heretofore adopted, in casting the interest, offered as an excuse for resisting; but I have not considered that a sufficient justification for varying the terms of the contracts.

Without venturing an opinion as to the policy that should be adopted, in relation to the lands belonging to the State, denominated timber lands, I may perhaps be pardoned for recommending that certain portions of these lands (under proper regulations) should be sold as soon as adequate prices can be obtained therefor.

Some of these lands are now owned in common by the State

and individuals. The State's interest should be sold, or immediate measures adopted for partition.

There are other small tracts isolated and detached from the lands of the State, and surrounded by lands owned by individuals. These lands cannot be protected, except at an expense, which in a few years will exceed their value.

Whenever the Legislature may deem it advisable to offer the timber lands for sale, I advise that provision be made to prevent sales to persons who have notes over-due in the office at the time of sale. Fair and honorable competition seems to require this, and no just cause of complaint is perceived in the State's refusal to add to the indebtedness of those who have dishonored paper lying in the office.

GEORGE C. GETCHELL, Land Agent.

To the Hon. Governor and Council of the State of Maine.

Dr. STATE OF MAINE, in account current with GEO. C. GETCH-ELL, Land Agent, for the year ending Dec. 30, 1854.
