# REPORT.

---

*To the Governor and Council of Maine :*

In compliance with the provisions of law, the Land Agent has the honor to submit this his Annual Report for the year ending November 30, 1874.

## SALES AND CONVEYANCES OF LAND.

In obedience to the Resolve approved March 4, 1874, "authorizing the sale of State lands and timber," under the direction of the Governor and Council, the several classes of lands and timber, designated in the Resolve, except the lands set apart for settlement, were advertised for sale at public auction, to be sold at Bangor, on the twenty-third day of September last, and ample notice was given of the sale. At the time appointed, the lands claimed by the European and North American Railway Company were withdrawn from the sale to await the decision of the question of title, and a few lots reserved by the Commonwealth of Massachusetts, the title of which was also held in doubt. All the other lands were sold and have been since conveyed, except in a few instances, where the terms of sale have failed to be complied with. So far as conveyances have been made, the result is as follows :

1. Lands held in fee by the State, containing 26,272 acres, for \$9,514.97.

2. Lands held in trust by the State for the Permanent School Fund, 91,762 acres, for \$46,366.29.

3. The right to cut timber until 1884, on nine of the townships reserved in the grant to said Railway Company for the Permanent School Fund, for the sum of \$48,549.07. The other township was sold, but the purchaser has failed to make the payments.

4. The right to cut timber on public lots reserved in grants from the State, containing 31,764 acres, for the sum of \$20,283.84.

Some three or four other tracts have, as yet, not been conveyed, as the preliminary payments have not been fully made.

There have also been conveyed during the past year, for cash and cash securities, under a Resolve entitled "resolve in favor of David Dudley," 6,825 $\frac{25}{100}$  acres of land, "not suitable for settlement," for \$1,831.91; under Resolve entitled "resolve in aid of road in Island Falls," for cash, 828 acres of land, "not suitable for settlement," for \$882; under a Resolve entitled "resolve in favor of inhabitants of Silver Ridge plantation," for cash, 1,153 $\frac{31}{100}$  acres of "swamp lots," for \$700; under various Resolves, mostly to actual settlers, as shown by Schedule B, annexed to this Report, 8,057 $\frac{23}{100}$  acres; and to actual settlers, upon the surrender of outstanding Land Certificates, 19,238 $\frac{4}{100}$  acres. There have also been contracted to actual settlers for road labor notes, 23,489 $\frac{72}{100}$  acres, amounting to \$11,744.64.

#### SURVEYS OF LAND.

The tract of land lying north of Township No. 1, Range 8, west of Bingham's Kennebec Purchase, in the county of Franklin, has been surveyed and explored, and additional surveys of lands for settlement, have been made in Township L, R. 2, and Townships Nos. 14 and 15, R. 3, and roads located for the accommodation of settlers.

#### EXPENDITURES ON ROADS AND BRIDGES.

The following expenditures on roads and bridges have been made under resolves of the Legislature:

By a resolve approved February 10, 1873, the sum of four hundred dollars was appropriated to be expended upon that part of the Baring and Houlton road which leads across the Indian Township in the county of Washington, which sum has been expended under the supervision of Benjamin Bradford, Esq., of Topsfield.

The sum of three hundred dollars appropriated by resolve approved February 10, 1874, for the repair of "a road in the Indian Township extending from the Houlton and Baring road to Grand Lake stream," has been expended under the direction of John H. Sprague, Esq., of Princeton.

Under resolve entitled "Resolve in favor of Cyrus T. Daniels of Presque Isle," lots numbered one hundred forty-two, one hundred forty-three and one hundred forty-four, in Township No. 11, R. 3, containing 968 $\frac{25}{100}$  acres, have been conveyed to John Allen, assignee of said Daniels, for \$968.52, which sum had been expended by said Daniels previous to the conveyance to said Allen,

in building a road in said plantation leading northeasterly from said Daniels' mill toward Presque Isle, agreeably to the provisions of said resolve.

By a resolve approved February 24, 1874, the Land Agent was directed to sell at public or private sale, such swamp lots in Silver Ridge plantation as were owned by the State, not to exceed seven in number, and to devote a sufficient sum arising from such sale to the construction of a good and substantial bridge across the Molunkus stream in said plantation; and said lots having been sold for the sum of seven hundred dollars, a good substantial bridge has been constructed by Joseph Libbey, Esq., of Molunkus, at a cost of five hundred and thirty-four dollars and twenty-five cents.

By a resolve approved February 24, 1874, the sum of two hundred and fifty dollars was appropriated "for the repair of the Shin Pond road leading from Patten to the lumbering regions." Under this resolve, the sum of two hundred twenty-seven dollars and fifty-nine cents have been expended under the superintendence of Ivory B. Gerry, Esq., of Sherman, leaving in his hands twenty-two dollars and forty-one cents unexpended.

Of the sum of one thousand dollars appropriated by resolve approved February 28, 1874, to be expended to aid in building a bridge over Little Madawaska river in Township K, Range Two, the sum of nine hundred and twenty-two dollars and seventy-five cents has been expended under the direction of Warren S. Dwinel, Esq., of Lyndon.

The sum of three hundred dollars appropriated by resolve approved February 28, 1874, in aid of opening a road in Township F, Range One, in the county of Aroostook, has been expended by Daniel Libbey, Esq., of Limestone.

The appropriation of one hundred and fifty dollars made by resolve approved February 28, 1874, in aid of building a bridge over Wheelock brook in Saint John plantation, has been expended by Edward Wiggin, Esq., of Fort Kent.

By resolve approved March 3, 1874, the sum of one thousand dollars was appropriated to complete the bridge across the Molunkus stream, on the Military road, in Macwahoc plantation, and to pay the balance due for building the granite abutments. Under this resolve, having advertised for proposals, a contract was made with David Smith of Bangor, and J. S. Richardson of Kingman, to complete said bridge, which they have done in a faithful man-

ner, at a cost, including incidental expenses, and \$273.88, the balance due for building the abutments, \$910.18,—leaving a balance of \$89.82 unexpended. This is a covered bridge, one hundred and twenty-eight feet in length, is constructed of excellent materials, and is thoroughly and substantially built.

The sum of five hundred dollars appropriated by resolve approved March 3, 1874, to be expended upon the New England road, so called, in the town of Kingsbury, has been expended under the supervision of Joseph B. Packard, Esq., of Blanchard.

The appropriation of two hundred dollars made by resolve approved March 3, 1874, to be expended in repairing the bridge over the Mattawamkeag river in Bancroft plantation, has been faithfully expended by John Smart, Esq., of Bancroft plantation.

By resolve approved March 3, 1874, the sum of one thousand dollars was appropriated to keep in repair the Canada road leading from "The Forks" to Canada line, which sum has been expended by Jonas H. Colby of Moose River plantation.

By resolve approved March 3, 1874, the sum of three hundred dollars was appropriated to be expended in aid of building bridges in Chapman plantation, to be in full payment of all claims under resolves of eighteen hundred seventy-two and eighteen hundred seventy-three. This sum has been expended by Hon. David Dudley of Presque Isle, in building two substantial bridges in said plantation.

An appropriation of one thousand dollars was made by resolve approved March 3, 1874, to be expended under the direction of the Land Agent, in building a bridge across the Mattawamkeag river at Kingman, provided that the bridge be constructed within one year from the date of the approval of said resolve. The work on this bridge has been commenced and will probably be completed before the first day of March next.

Hon. Cyrus A. Packard of Blanchard, was appointed in 1873 to superintend the expenditure of five hundred dollars appropriated by resolve entitled "Resolve in favor of the town of Kingsbury," approved February 24, 1873, but on account of the lateness of the season before the work could be commenced, the contractors did not complete their jobs, and Mr. Packard's account was not adjusted. During the past season the repairs of the road have been completed and Mr. Packard's account has been settled.

By a resolve entitled "Resolve in aid of road in Island Falls,"

approved February 19, 1873, the Land Agent was authorized and directed to sell for cash five lots of land "not suitable for settlement" in the town of Island Falls, and to apply the proceeds of said land in repairing roads and bridges in said town. Under this resolve the five lots containing 828 acres were sold for the sum of eight hundred and eighty-two dollars, which sum has been expended in repairing roads and bridges in said town under the direction of Daniel Randall, Esq., of Island Falls.

LOCAL AGENTS FOR SETTLING LANDS.

The following persons, residing in the vicinity of lands set apart and designated for settlement, were appointed agreeably to section twenty-eight, chapter five of the revised statutes, "to superintend the location of settlers, the payment of their road labor, and the performance of their several duties:—"

## NEW HAMPSHIRE STATE LINE.

In the last Annual Report of this Department, a brief allusion was made to the resolve approved February 17, 1873, providing "for surveying and marking the line between this State and New Hampshire." Since the date of that report, the Surveyors appointed by the two States—Albion P. Gordon, Esq., of Fryeburg, Me., on the part of Maine, and J. H. Huntington, Esq., of Hanover, N. H., on the part of New Hampshire—have surveyed and marked said line in its entire length, and established suitable and durable monuments at all points wherever found to be necessary, and have made a very full and elaborate report; and it is believed that the work has been done in a thorough and satisfactory manner. Their report is herewith submitted for the inspection and action of the Governor and Council.

## PROCEEDINGS IN COURT.

In the last Annual Report of this Department, a succinct statement was made of the several suits then pending, in which the State was interested, growing out of the business of the State lands. Since that report further proceedings have been had as follows:

1. Two suits were then pending in Aroostook county in favor of E. G. Dunn and Robert Scott respectively against the Land Agent and his assistant for trespass for seizing logs cut and teams engaged in a lumbering operation upon Township No. 11, R. 3, west from the east line of the State, under permit from the European and North American Railway Company. The State claimed the township as one of the settling townships excepted from the grant to the company. The company, on the contrary, claimed it as a part of the grant, and its permittee refusing after warning to desist, the seizure was made under the provisions of the Revised Statutes, chapter 5, section 7, by direction of the Governor and Council. The teams were subsequently sold according to the provisions of Statute of 1872, chapter 9, and these suits were brought to vindicate the company's title. The cases were tried and argued on law as stated in last annual report. A decision has since been rendered by the Court sustaining the State's title, but declaring the proceedings in the sale of the property as illegal, the statute authorizing the sale being unconstitutional. The first named suit for trespass for seizing the logs and breaking

up the operation was therefore non-suit, and the last named remanded for further hearing.

Another suit against the same defendants, in favor of Jonathan Kennedy, for damages arising from the sale of his teams and supplies in the same operation, was brought in the C. C. U. S., and several replevin suits were also brought for the property sold, against the purchaser, in Aroostook county.

After the favorable decision of the Court in the above suits, an action of trespass was commenced in the name of the State against said Dunn, for cutting the logs and taking the same away.

Under the circumstances now detailed, a full adjustment has been made with the company of all the matters thus in litigation, by virtue of which all suits have been dismissed and causes of action discharged, so that all suits growing out of the company's claim to the settling lands are terminated and litigation respecting the same at an end.

The decision of the Court now referred to is regarded as very important as setting at rest the mooted question of title to some forty or more townships and parts of townships heretofore set apart for settlement, the title to which is now fully settled to be in the State, as reserved from the grant to the Railway Company.

2. During the past year the replevin suits brought against the Land Agent for timber cut on the public lots in Silver Ridge and Oakfield plantations respectively, and seized by him as trespass timber, as stated in the last annual report, have been finally disposed of in a favorable manner. The decision of the Court having been rendered in favor of the State in one of the suits and the case remanded for further proceedings, both suits have been withdrawn and payment made to the State of reasonable stumpage and costs.

3. The only other suit now pending in connection with the State lands, is that involving the legality of proceedings in the organization of the plantation of Vanceboro', so as to limit the right of the party to cut under his deed of the right from the State. The case has been argued on law and is now held by the Court under advisement.

In connection with the trespass suits growing out of the seizure of teams, &c., on Township No. 11, R. 3, a valid claim exists against the State, in favor of the person who bought and paid for the property at auction, the same having been replevined and held by the original owners. The law under which the sale was made

being held unconstitutional and the sale of course illegal, no title therefore passed. The net results of the sale, after deducting charges and expenses, were paid into the State Treasury, thus giving the purchaser a legal claim against the State to be refunded the money so paid by him so far as his title failed.

#### TREATY LOTS.

In the last annual report attention was called to certain claims of settlers under the Treaty of Washington, upon the "Disputed Territory," and a particular statement of the facts relating to the same was there given. A resolve carefully framed to meet the circumstances of the case was presented, but failed to be enacted, and the settlers whose claims are thus affected, still remain unprovided for. The claim is a small one and very evidently just, it being simply a call for the State to pay to the few settlers remaining to be quieted, the sum which the United States government has paid into our State Treasury for their benefit under condition that the State would thus quiet them in their possessions. Attention is again called to the subject.

#### SWEDISH IMMIGRATION.

The Swedish colony introduced originally into this State in 1870, continues to thrive and give satisfactory evidence of the success of its mission. The first years of such an enterprise, to establish a new home for a race in the dense wilderness of a new country, must very naturally be attended with more or less of discouragement and with some degree at least of suffering and want. With the colony in question much less of this has been experienced than could have been reasonably anticipated. These discouragements, however, are gradually wearing away, and the colonists becoming so completely acclimated to their new home as not only to render their continued residence here assured, but also to raise the most hopeful expectation of far greater success in the future by new additions. The population of the colony has not been very largely increased during the past year, though a few families have been added to its number, but an increased activity and earnestness of effort pervade them all to an extent to give the most flattering encouragement. During the past year they have been very fortunate in gathering their crops, which have been extremely abundant, and they are in consequence feel-

ing greatly stimulated and happy. Some who had at an earlier stage of their history left for other places, have returned, satisfied that they can do better here than at the West. During the past season about 500 additional acres of land have been felled and cleared for next year's crop, and many improvements made upon their buildings, and lands previously subdued. About 150 farms in all have been thus far taken up by as many different families and single men, and some 2,000 acres in all brought under cultivation, the whole population now actually on the territory being about 600. Besides these a very great number of other Swedes have followed the colony into the State, some of whom regard themselves connected with it, but very generally seeking homes and employment independent of it. During the latter part of the year the immigrants have repaid by labor on the highways the sum of \$860 towards the sum advanced to them by the State, and ultimately and probably very shortly will reimburse the State for the balance. They are a very industrious, temperate and intelligent as well as honest population, and seem firmly attached to our form of government and have mainly taken the initiatory steps to become naturalized citizens, thus as it were adopting our government as their own for themselves and their posterity.

Although individual instances of want have existed among them, yet this has probably been little more so than has been the case with other communities in our State similarly situated. Slandorous reports were set afloat during the summer respecting their condition, and becoming quite widely spread, the Land Agent regarded it his duty to investigate the truth and accordingly appointed two commissioners to visit the colony and by personal observation ascertain the facts. This they did and made an early report of what they found, the result of which is as now stated. At the same time the religious pastors of the colony, both of them immigrants, made a like investigation, reporting to the local press a particular statement of each family, whose statement strongly confirmed that of the State commissioners. They all denounce the rumors thus set afloat as false and groundless and indulge in most encouraging anticipations for the future. The colony now embraces the entire township of New Sweden, every available lot in which has been taken up and also parts of the adjoining townships of Woodland, Lyndon and Perham.

The enterprise of introducing foreign immigration and especially that from Sweden and Noway, into our State, is now demonstrated

to be of such practical importance as to justify the expression of the hope that the Legislature will continue to give to the subject its thoughtful attention and guardian care.

#### RESOLVE ABOLISHING LAND OFFICE.

The Legislature having by resolve of March 4, 1874, decided to abolish the office of Land Agent without making any specific provision for closing its business or transferring it to any other department, an important work seems to be devolved upon the present Legislature to make provision to meet this new order of things. The office being one recognized and established by the Constitution, it would seem that the resolve might be objectionable on this account, as it now reads, though the power to regulate its duties and salary may without question be within its control. Should, however, the substance of the resolve be re-enacted, it will then become a matter of very great question and importance to determine how the want now supplied by that department shall be served in future. In anticipation of this state of things the following suggestions are volunteered :

##### I.—*Records and Archives.*

The Land Office has now been in operation for more than half a century, during which time more than half the territory of the State has been conveyed by deeds emanating from it or the Land Office of Massachusetts, to the extent of many millions of acres. The original field-notes of surveys and plans of these lands are largely now on deposit in this office, the Legislature of Massachusetts having liberally donated to this State the valuable records in its possession from the earliest period of its history, pertaining to our territory. And not only are the original muniments of title to these lands thus conveyed to be found here, but very largely those of other lands in all parts of the State. In very numerous cases all over the State, it is in the Land Office alone that the correct information can be obtained relative to boundaries and monuments, both of townships, tracts and single farms and lots of land. Hence it is that constant application is made for information in relation to these facts both in person and by mail to the number of hundreds every year. This information the Land Agents have ever held themselves ready to give as a part of their official duty and free from payment of fees. This State of facts

suggests several important duties to be performed, if the Land Office is to be dispensed with or abolished.

1. Immediate steps should be taken to preserve and arrange these records, plans and field-notes so as to make them available and secure their future safety. Their value is too great to be estimated or compared with gold or silver, for these can never replace them if once lost or destroyed. This is particularly the case with those invaluable papers bestowed upon us before mentioned, by the Legislature of Massachusetts. Of these very many are worn and dilapidated to almost the last degree by age and rough usage, and require repairs and careful binding and filing. At the last session a resolve was enacted directing "the Land Agent under the direction of the Governor and Council, to take such measures as may be necessary for the preservation and convenient use and reference of these documents," but in consequence of the pressure of other business of more immediate and pressing importance, nothing has been done towards effecting the object. It is suggested that the resolve be now enacted requiring this work to be performed, embracing all such documents as may be regarded by them as essential, now in the Land Office.

2. A suitable depository of these records, plans and documents should be established and provision made for their keeping and oversight. For many years the calls for information will be very frequent and pressing, and office copies for use in court will be demanded. Some competent keeper then should be supplied, clothed with authority to certify the contents in order to their legal admissibility as evidence.

## II.—*Public Lots.*

The present law devolves upon the Land Agent the care of the lots reserved for public uses in all the townships of this State not already incorporated into towns. The right to cut the timber and grass upon such lots until such incorporation or organization into plantations, has mostly been sold, and such lots will need no care from the State until such organization takes place. Upon the organization his care it is to protect them from trespasses. This duty has for a few years past devolved a great labor upon the office, and this labor still continues. In case the Land Office is dispensed with, this duty must be provided for. In very many cases the public lots in such townships have never been located. At present it is the duty of the Land Agent to attend to this when

necessary. In the contingency spoken of, provision will be required to meet this new state of things.

### III.—*Unsold Lands and Conditional Sales.*

As stated in another part of this report, many State lands were withdrawn from the late public sale and still remain unsold. These will require provision to meet the necessity thus existing in the absence of the Land Agent.

Of the sales made during the past year under resolve authorizing the sale of State lands and timber, all, except the public lots, were sold on a credit for two-thirds of the consideration, and conditional deeds given forbidding the cutting of timber without permit from "Land Agent or other legally constituted agent of the State," specifying the stumpage to be paid. The remainder of the settling lands now unsold are also open for the sale of timber upon them. Some more than 400,000 acres of timber lands are thus remaining to be guarded and overseen until such payments are made or lands sold and money received therefor. In the contingency foreseen this duty is to be provided for.

### IV.—*Settlers and Settling Lands.*

Early in the history of our State, the Legislature recognized the importance of settling our extensive public domain, then covered by a dense wilderness and occupying a very large portion of our entire territory. The reputed rigor of our climate and the distance of the lands from a market, presented almost insuperable obstacles to the enterprise, but notwithstanding, the legislators at once grappled with it and with energy and wisdom went to work to perform it. Acts of the Legislature were passed to effect their object and these have been supplemented by others extending down to the present time. A slow but constant success has attended these efforts of the State and its appropriate officers, until the wilderness may now with great truth be said "to blossom as the rose." Under general or special acts of the Legislature, more than fifty townships and parts of townships have from time to time been set apart for settlement, and surveys made to fit them for that purpose. So great has been the success of these efforts that about forty of these townships have been so far settled that incorporations into towns or organization into plantations have already taken place, and others will soon follow, 541,644 acres having been thus far actually taken up by about 4,000 families. And

the work is still going on with a success hardly equalled in any former years of our history. The number of acres thus settled or taken up during the past year for which new certificates have been granted has been 23,326, and during the same time 19,238 acres have been conveyed to those whose previous contracts had been satisfied by a performance of their settling duties. A tabular statement annexed, gives a list of the towns and plantations thus grown up under the fostering care of the State through its Land Office, showing a present population of about 20,450 souls.

The present number of acres remaining unsold and unsettled in the townships thus set apart, is about 146,000, a considerable portion of which is of great value for settlement, though a large part is unavailable for that purpose, except as connected with other lots. Besides these there are 136,797 acres now occupied by settlers who are working out their settling duties and thus earning their titles. The work thus prosecuted during the whole life of our State thus far, is in its midst at the present day requiring more attention from the appropriate officer than at almost any previous time. The many calls for information which necessarily are made in the prosecution of the enterprise demands a suitable person to answer them at the place of inquiry, and to this end the records of the office must not only be at his command, but he must himself have the knowledge ready to impart. An important question is then forced upon the Legislature; if the Land Office is to be abolished, what is to be done with this most vital interest? That it should be abandoned after so long a season of effort, at a time, too, when yielding its richest harvest, would seem to be a folly too great to be for a moment entertained. Our duty to ourselves and to the settler demands that we persevere in the work and not suffer neglect, much less decay to overwhelm it. The best interests of the State demand that the present generation should follow the example of the last and of all other new States, by all legitimate means to encourage immigration from abroad and to keep at home our own sons and daughters as they come to maturity and seek homes of their own. No false system of economy should blind us against these interests. In the effort to save expense we should take especial care not to waste the substance already acquired, for such economy is only the wildest extravagance of our real wealth.

The settling lands of Maine are among the richest in New England, and if properly husbanded and cared for, the enterprise of

peopling them with a rich population must most naturally as in the past prove successful, but if abandoned we may justly anticipate the fate of all neglected works, decay and death. In any contingency, if the office is abolished, proper provision must be made to protect the thousand families already contracted with, and who are now working out their titles and whose legal rights the State is bound to protect. The duty of the State is therefore clear. The corresponding right of the State is also as clear, that these thousand accounts now open upon the books of the Land Office, should be faithfully settled and turned into the wealth of the State.

In connection with this subject that of the Swedish Colony is also to be mentioned, the care of which in a measure is devolved on this office. The condition and importance of this subject are dwelt upon more at large in another part of this report.

#### V.—*Miscellaneous.*

Very many other duties devolving on the Land Agent to perform under the existing state of things, will in case the office is abolished, necessarily require provision to be made by new laws to meet them. Among these are the preparation of schedules and descriptions of lands sold, so arranged as to make the records in future available for use of generations yet to follow us; of islands in our rivers and in the sea along our maritime border, of which there are numerous ones belonging to the State; the appointment of local agents to look after the interests of the State in lands and timber in which for a time at least the State will be interested; the working out of appropriations for roads and bridges which the State may make in the future, as it has annually in the past made more or less provision, and in general, to attend to the multifarious duties which a half century of legislation has gradually imposed upon the office to perform.
