MAINE

DEPARTMENT OF ECONOMIC DEVELOPMENT

STATE HOUSE

AUGUSTA, MAINE 04330

(207) 623-4511

JAMES K. KEEFE, Commissioner

Knowledge relating to the basic processes of economic development is one of the most important foundations of modern civilization.

Without an expanding network of such knowledge, nations have witnessed such phenomena as regional stagnation, growth retardation and critical pockets of economic disadvantage.

This first edition of the Maine Statistical Abstract will help to fill the gaps in whatever bank of economic data currently may exist in the Pine Tree State. It is inaugurated to enable economists, researchers and planners to develop strategies that will point our State toward a brighter future.

I look forward to major improvements in the Statistical Abstract in the years ahead. We are very hopeful that many interested persons will contribute suggestions for such improvement and the value of this compilation eventually will be enhanced considerably.

Among many others, three leading members of our Department deserve special congratulations on the achievement of this initial effort:

William E. Matthews, director of our Division of Planning, Research and Program Assistance; B. William Dorsey, chief compiler and project director; and Linwood V. Partridge, who supervised preparation of illustrations, charts and graphs.

James K. Keefe, Commissioner
Maine Department of Economic
Development

PREFACE

This first edition of the Maine Handbook represents an effort to bring together for the first time in standardized form a statistical abstract encompassing as much available information as possible basic to the Maine economy. It is intended to serve as a ready reference for the use of students, writers, governmental personnel, business interests and others who may find it convenient to have a wide range of basic social and economic information assembled under one index. It is hoped that this first edition of the Statistical Abstract will be revised annually to offer up-to-date information on a continuing basis.

Three important considerations were taken into account in formulating the abstract. Firstly, it was felt that a modest beginning would more likely be successful than an overly ambitious one. In this way a firmer base would be established upon which successive editions could be improved. Secondly, in the beginning only information that was well-organized or had already been published would be utilized. Hence the burdensome task of organizing new data and series could be avoided. In this regard, care must be exercised in comparing data presented in different tables, for sometimes variances in definitions of terminology are used by various sources. In most cases these differences are noted at the end of the respective tables. Thirdly, since the economics of the six New England states are so closely entwined, it was felt that certain comparative data should be presented in each section for the New England region as a whole and for each constituent state.

The Maine Statistical Abstract was prepared under the general direction of William E. Matthews, Director, Planning, Research and Programs Assistance Division of the Department of Economic Development. B. William Dorsey, Research Associate, was responsible for its planning and content, and Linwood V. Partridge, Illustrator, was responsible for the cover design, maps and other visual materials.

Publication of this first edition would not have been possible without the generous cooperation of many federal, state and private agencies which provided valuable information and assistance. Grateful acknowledgement of this cooperation and assistance is credited in the source notes below each table. Appreciation is also extended to Herbert W. Moore, Research Associate during the initial stages of its preparation.

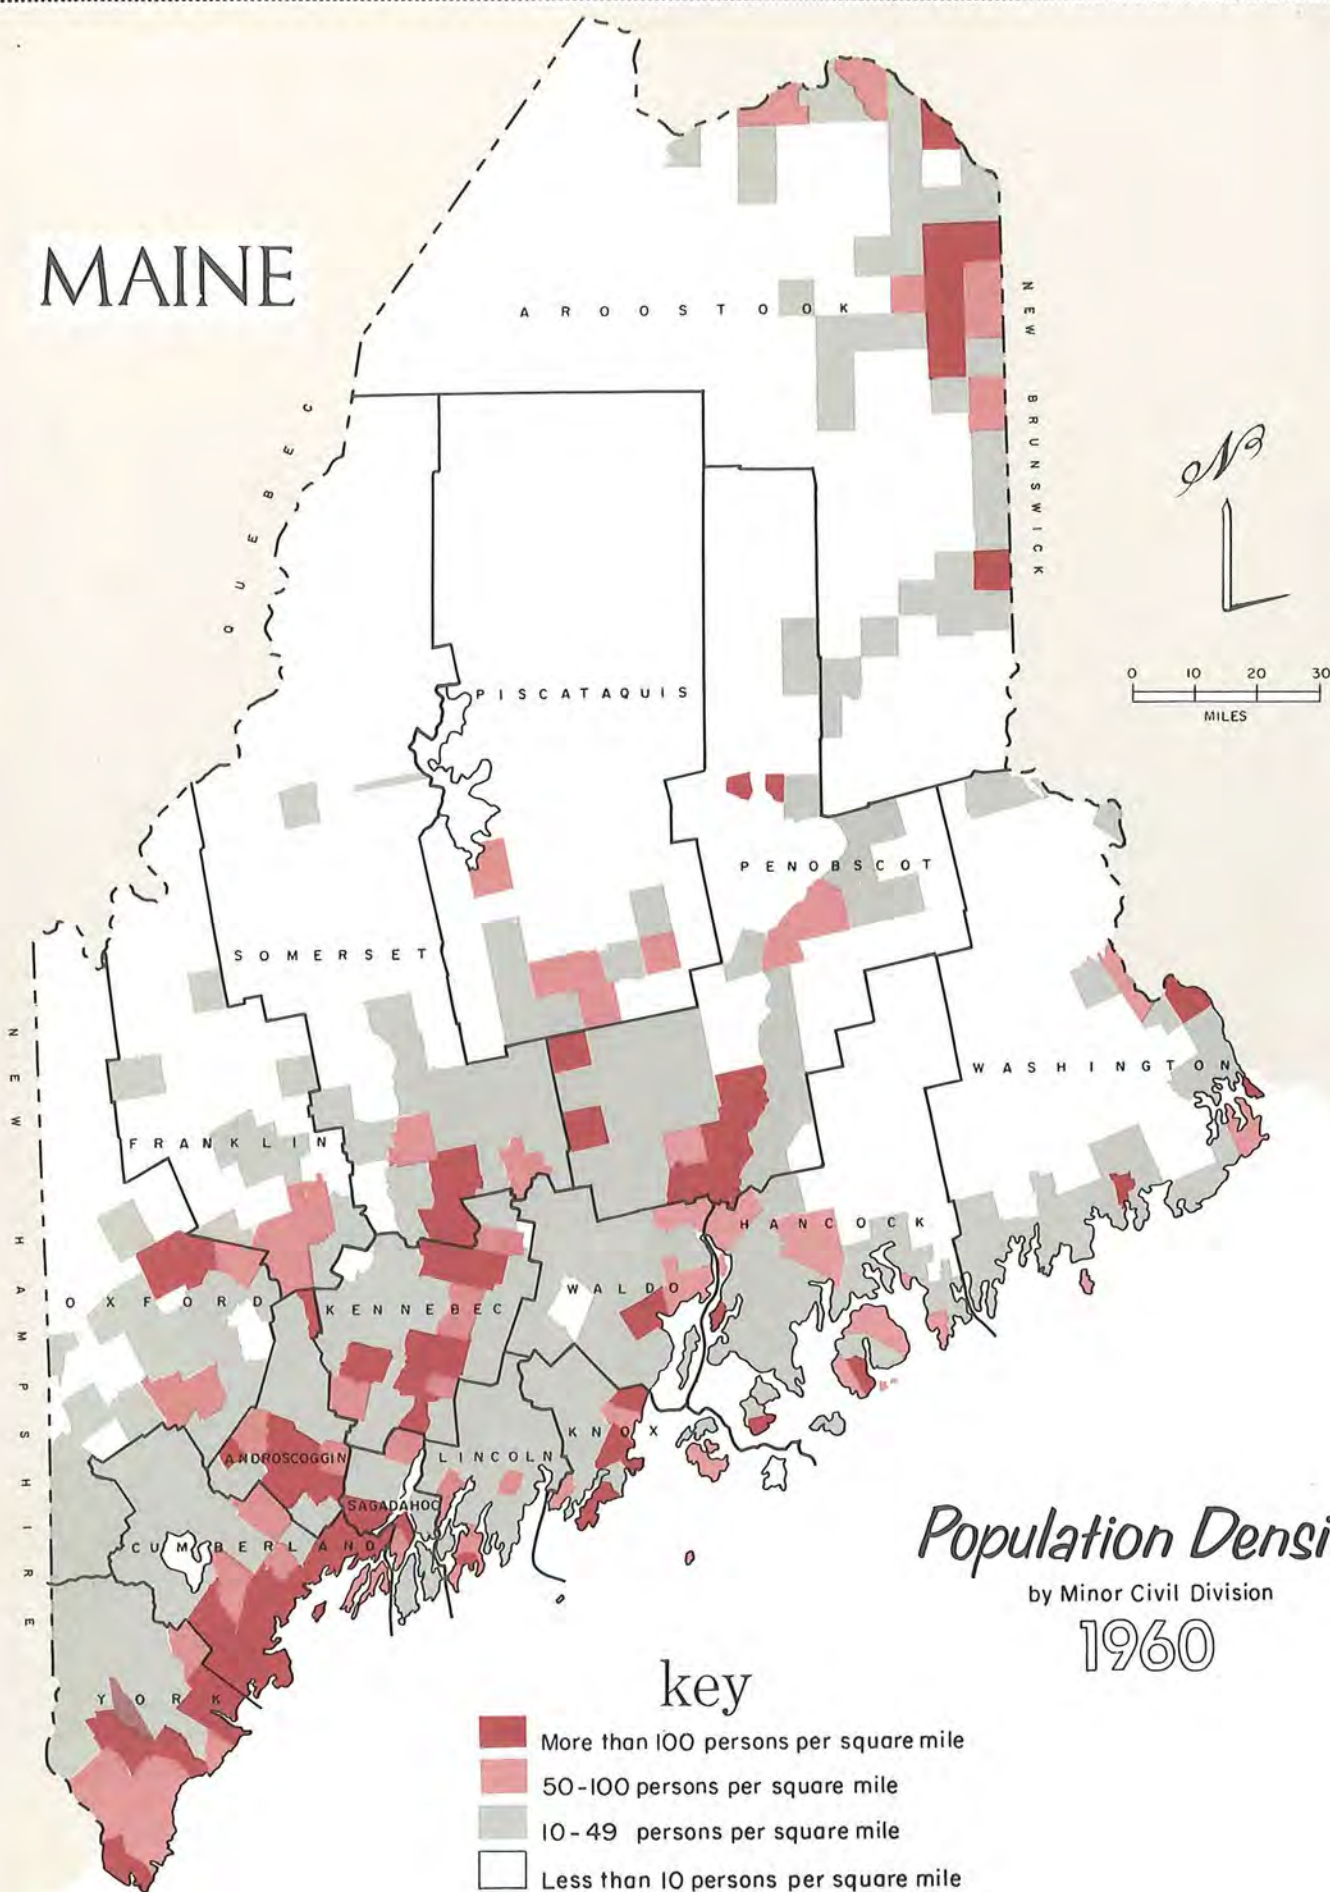

Comments and suggestions that might prove helpful in the preparation of ensuing editions of this publication are most welcome. Please address such comments to B. William Dorsey, Research Associate, Department of Economic Development, State Office Building, Augusta, Maine 04330.

POPULATION PROJECTIONS - UNITED STATES AND NEW ENGLAND STATES, 1975 AND 1985

[In thousands. As of July 1. Roman numerals I and II indicate interstate migration assumptions based on gross migration patterns of the 1955-60 period. Under Series I, those patterns continue throughout the projection period. Series II allows for convergence of the gross migration rates during the projection period. Letters B and D represent national population projections series.]

POPULATION SUMMARY OF MAINE MUNICIPALITIES, BY SIZE GROUPINGS
1950 AND 1960

Population Group	Total Number ¹ Of Municipalities		Municipal Total Population		Percentage of State Population	
	1950	1960	1950	1960	1950	1960
0-499	179	182	44,067	41,373	4.8	4.3
500-999	124	123	89,093	90,118	9.8	9.3
1,000-2,499	114	107	171,119	161,990	18.7	16.7
2,500-4,939	44	42	158,791	151,044	17.4	15.6
5,000-9,999	17	20	126,409	133,040	13.8	13.7
10,000-24,999	10	15	164,461	231,824	18.0	23.9
25,000-& over	3	3	150,166	152,282	16.4	15.7
TOTAL	491	492	904,106	961,671	98.9	99.2

Total municipal population	1950 904,106	1960 961,671
Population in unorganized townships	9,668	7,594
Total state population	913,774	969,265

¹ Total number of municipalities increased from 491 in 1950 to 492 in 1960 with separation of Town of West Paris from Paris in 1957.

MEASURES OF INJURY EXPERIENCE

Injury Frequency Rate = $\frac{\text{Number of disabling injuries} \times 1,000,000}{\text{Number of employee-hours of exposure}}$

Injury Severity Rate = $\frac{\text{Total days lost or charged} \times 1,000,000}{\text{Number of employee-hours of exposure}}$

FOUNDATIONS - NUMBER AND FINANCES, NEW ENGLAND STATES

[Money figures in thousands of dollars. Figures are for latest year reported by foundations, usually 1964 or 1965. A foundation may be defined as a nongovernmental, nonprofit organization having a principal fund of its own, managed by its own trustees or directors, and established to maintain or aid social, educational, charitable, religious, or other activities serving the common welfare. Excludes organizations which make general appeals to the public for funds, act as trade associations for industrial or other special groups, are restricted by charter solely to aiding one or several named institutions, or which are captive trusts, within colleges, churches, or other organizations, or are very small-defined as having neither assets of \$200,000 now making grants of at least \$10,000 in the latest year of record.]

(1) A Community District high school is operated jointly by several towns and is listed in this directory under the town in which it is located.
The high schools within a School Administrative District are listed together under the major town of the district.

(2) Teachers serving only part time in the secondary unit are included on a percentage basis.

(3) Junior high school not included.

- (1) Dry land and land temporarily covered by water, as marshland, swamps, etc.; canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.
- (2) Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Excludes areas of ocean, bays, sounds, etc., lying within U. S. jurisdiction but not defined as inland water.
- (3) Year of ratification of Constitution; one of the original 13 States.

COASTLINE, NEW ENGLAND STATES

State	(In Statute Miles)	
	General Coastline -1	Tidal Shoreline -2
MAINE	228	3,478
New Hampshire	13	131
Vermont	---	---
Massachusetts	192	1,519
Rhode Island	40	384
Connecticut	---	618

--Represents zero.

- (1) Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1: 1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.
- (2) Figures obtained in 1939-40 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

EXTREME POINTS OF THE UNITED STATES

(The geographic center of an area may be defined as the center of gravity of the surface, or that point on which the surface of the area would balance if it were a plane of uniform thickness. Because there is no generally accepted definition of geographic center, and no completely satisfactory method of determining it, there may be as many geographic centers of a state or country as there are definitions of the term. Because many factors such as curvature of the earth, large bodies of water, and irregular surfaces affect the determination of centers of gravity, the following positions should be considered as approximations only)

LOCATION	DIRECTION FROM GEOGRAPHIC CENTER	COORDINATES		DISTANCE FROM GEOGRAPHIC CENTER
		LATITUDE (N)	LONGITUDE (W)	
From geographic center of conterminous United States near Lebanon, Smith County, Kans., 39° 50', 98° 35' to Lake of the Woods, Projection, Minnesota				
	North----	49° 23'	95° 09'	Miles 680
Key West, Florida	South----	24° 33'	81° 48'	1,436
West Quoddy Head, Maine	East ----	44° 49'	66° 57'	1,640
Cape Alava, Washington	West ----	48° 10'	124° 44'	1,412
From geographic center of the United States (Excl. Hawaii) (1) near Castle Rock, Butte County, S.Dak., 44° 59', 103° 38' to-				
Point Barrow, Alaska	North----	71° 23'	156° 29'	2,504
Key West, Florida	South----	24° 33'	81° 48'	1,865
West Quoddy Head, Maine	East ----	44° 49'	66° 57'	1,779
Cape Wrangell, Attu Island, Alaska	West ----	52° 55'	172° 27' (E)	3,623
From geographic center of the United States (incl. Alaska and Hawaii) (2) west of Castle Rock, S.Dak., 44° 58', 103° 46' to-				
Point Barrow, Alaska	North----	71° 23'	156° 29'	2,502
Ka Lae (South Cape) Hawaii Island, Hawaii	South----	18° 56'	155° 41'	3,456
West Quoddy Head, Maine	East ----	44° 49'	66° 57'	1,785
Cape Wrangell, Attu Island, Alaska	West ----	52° 55'	172° 27' (E)	3,620

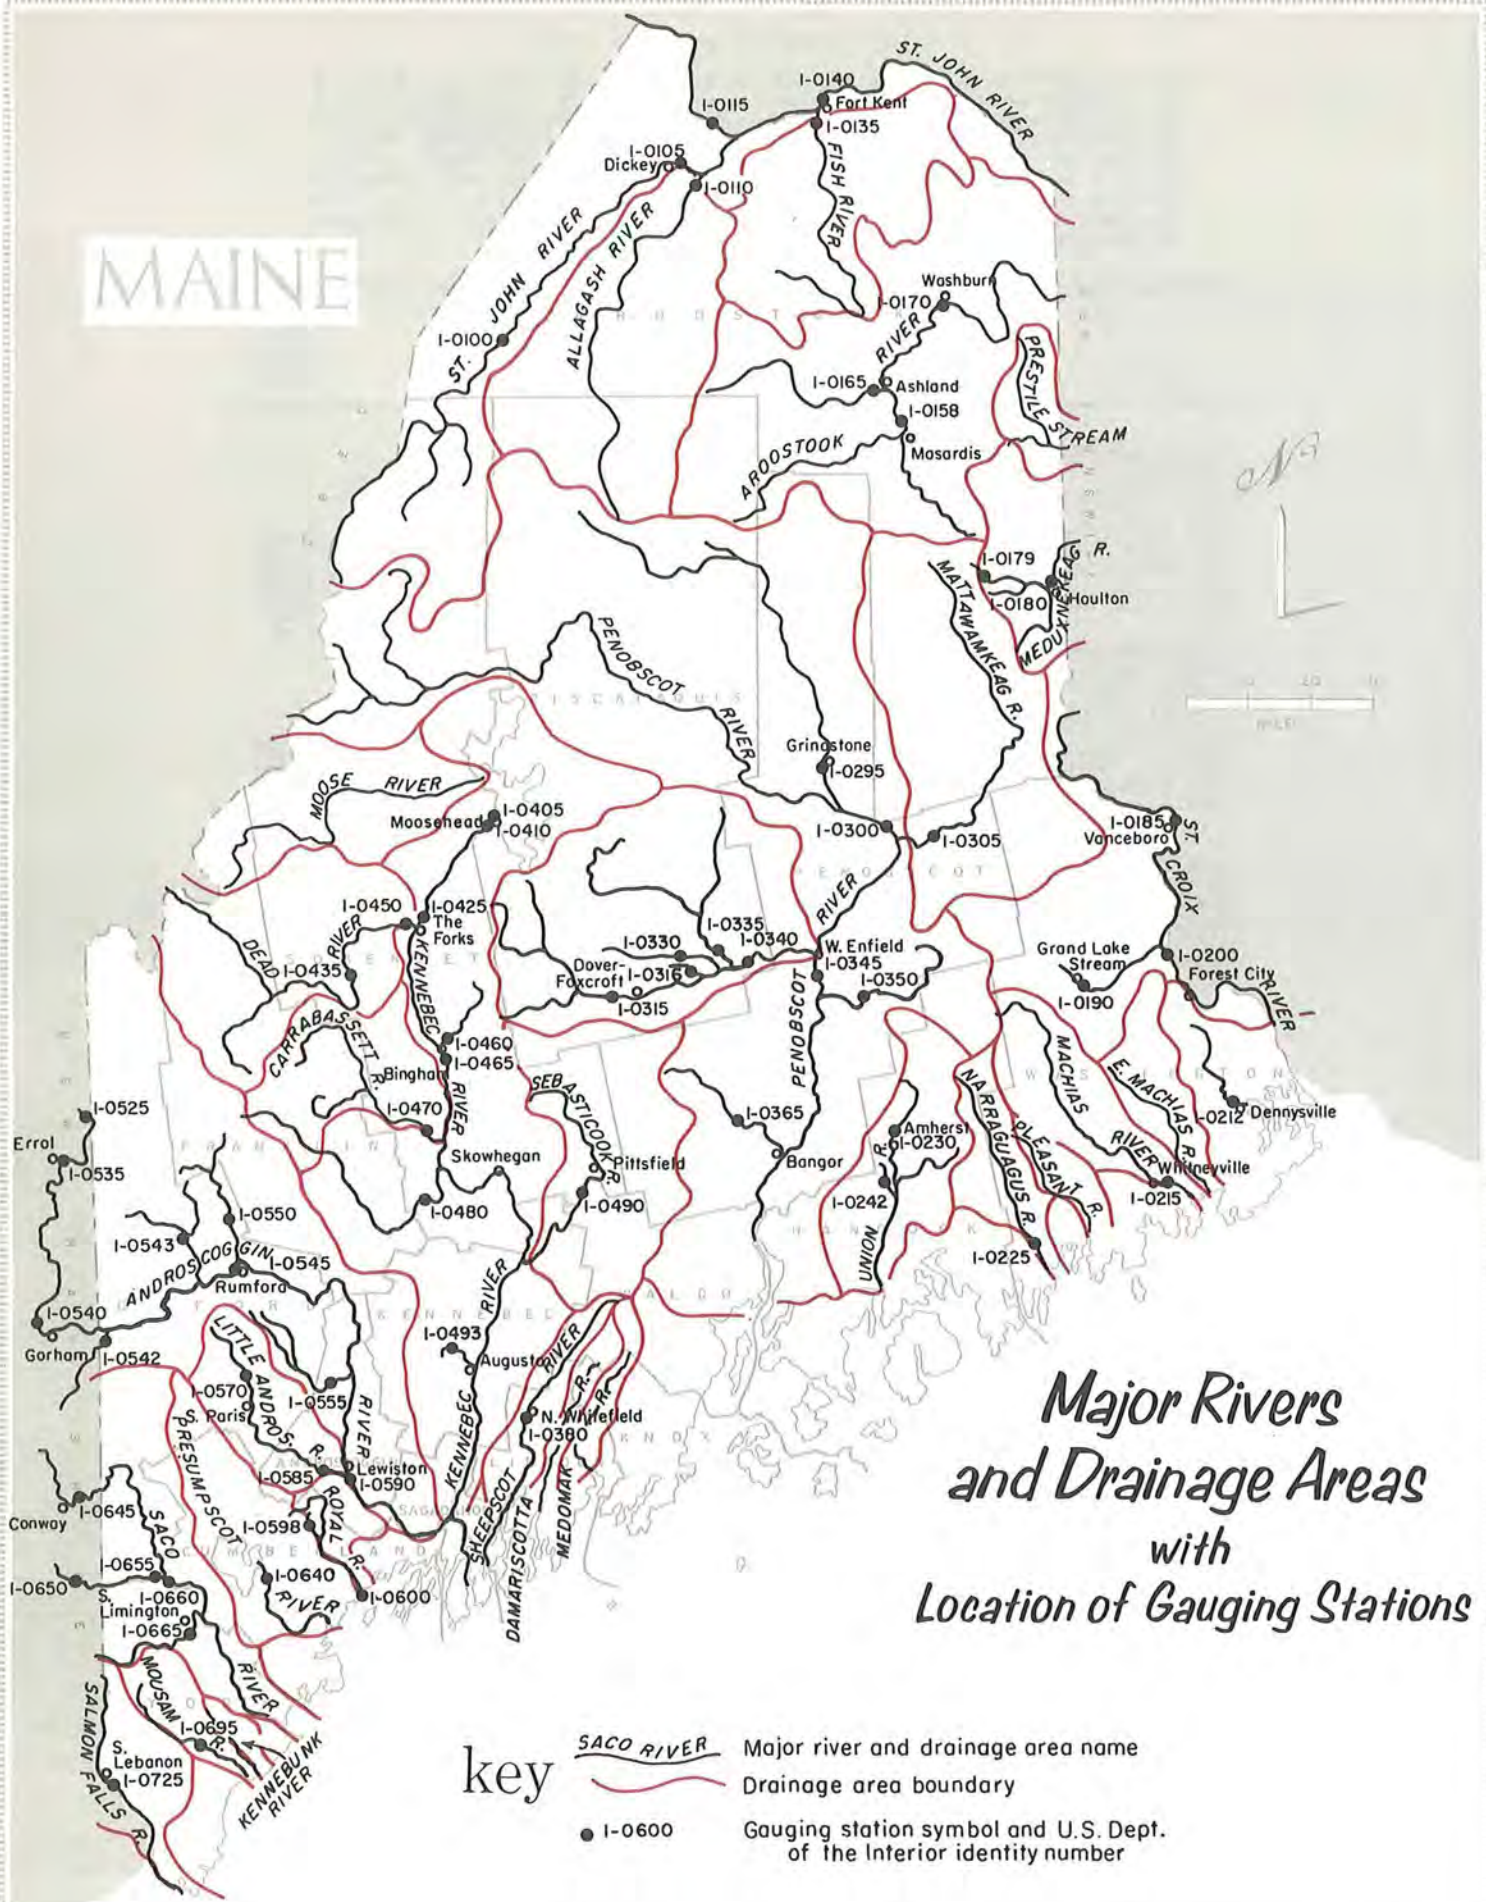

1. Excludes islands adjacent to the conterminous United States.
2. Excludes islands adjacent to the conterminous United States, but includes all islands of the Aleutian chain and Hawaii.

NOTE:

The following distances in statute miles are computed to mean sea level:
 (a) from West Quoddy Head, Maine, west along the parallel to the Pacific Ocean, 2,807 miles; (b) from the south point of Texas due north to the 49th parallel, 1,598 miles; (c) from West Quoddy Head, Maine, to Cape Wrangell, Alaska, 4,839 miles; (d) from West Quoddy Head, Maine to Kure Island, Hawaii, 5,788 miles; (e) from Mangrove Point, Florida, to Cape Wrangell, Alaska, 5,495 miles; (f) the two points farthest apart are Log Point, Elliot Key, Florida, and Kure Island, Hawaii, a distance of 5,852 miles; (g) length of the northern boundary, excluding Alaska, is 3,987 miles; (h) length of the Canadian-Alaskan boundary, 1,538 miles; (i) length of the Mexican boundary from Gulf of Mexico to the Pacific Ocean, approximately 1,933 miles, 1963 boundary agreement with Mexico; (j) the two points farthest apart in the conterminous United States are West Quoddy Head, Maine, and Point Arena, California, 2,897 miles; (k) the shortest distance between the Atlantic Ocean and the Pacific Ocean across the conterminous United States (approximately 10 miles south of Brunswick, Georgia, to approximately 12 miles south of San Diego, California), 2,088 miles; (l) Cape Mendocino, California projection extends to Latitude 40° 27', at longitude 124° 24'; Cape Sable, Florida (on Mainland) projection extends to latitude 25° 07', at longitude 81° 05'; Kure Island, Hawaii projection extends to latitude 28° 25', at longitude 178° 22'. The extreme south point of Texas is in latitude 25° 50', longitude 97° 24'.

AIR POLLUTION - NATIONAL AIR SAMPLING LEVELS, SELECTED NEW ENGLAND CITIES

1965

(Air pollution is defined as the presence in the air of substances put there by the activities of man, in concentrations sufficient to interfere with comfort, safety, or health or with use and enjoyment of property. Data represent values of samples taken nationally on a biweekly basis by the National Air Sampling Network.)

Workmen's Compensation Payments, United States and New England States: 1940 to 1965

[In thousands of dollars. Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the Spectator (Insurance by States . . . of Casualty Lines) and from published and unpublished reports of State insurance commissions); net disbursements of State funds (from the Spectator and from State reports, published and unpublished), estimated for some States; and self-insurance payments, estimated from available State data. Calendar-year data, except fiscal-year data for Federal employees and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Bases Compensation Act for States in which such payments are made.]

¹ Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown were in effect as of December 1966.

² For pay period ending nearest 15th of month.

³ Total wages in covered employment for all pay periods ending in year.

⁴ Wages subject to unemployment insurance tax. Includes State and local government coverage as well as private industry coverage.

⁵ Based on average covered employment in 12-month period.

⁶ Represents number of first payments during year.

⁷ Based on average total weekly wage in current year.

⁸ Number of weeks compensated divided by first payments.

⁹ Based on first payments for 12-month period ending June 30.

¹⁰ Includes contributions from employers.

¹¹ Includes payments under State (not Federal) temporary extended unemployment insurance provisions.

¹² Sum of balances in State clearing accounts, benefit-payment accounts, and State accounts in Federal unemployment trust fund.

¹³ 1965 data.

MAINE

Electric Utilities Service Areas March 1968

Note: Service areas shown are from the best information available from the Maine Public Utilities Commission and are not intended to represent the actual claimed or legal boundaries.

key

- 1 Bangor Hydro-Electric Company
- 2 Carrabassett Light and Power Company
- 3 Central Maine Power Company
- 4 Eastern Maine Electric Co-op, Inc.
- 5 Houlton Water Company
- 6 Kennebunk Light and Power District
- 7 Lubec Water and Electric District
- 8 Madison Electric Works Department
- 9 Maine Public Service Company

- 10 Matinicus Light and Power Company
- 11 Public Service Company of New Hampshire
- 12 Rangeley Power Company
- 13 Squirrel Island Village Corporation
- 14 Stonington and Deer Isle Power Company
- 15 Swans Island Electric Co-op, Inc.
- 16 Union River Electric Co-op, Inc.
- 17 Van Buren Light and Power Company
- 18 Vinalhaven Light and Power Company
- 19 Woodland Water and Electric Company

ELECTRIC UTILITIES - REVENUES FROM ULTIMATE CUSTOMERS: 1940-1966

SUGAR BEET PRODUCTION

Subject	1966	1967
State acreage allotment	33,000	(1)
Acreage utilized	3,200	9,534
Number of farmers participating	129	354
Average acreage per farm	24.80	26.93
Beets harvested (tons)	17,329.8	N.A.
Average yield per acre (tons)	5.93	N.A.
Sugar content	17.8%	N.A.

The average yield per acre in 1966 was 5.93 tons of beets per acre after all tare deductions and the sugar content of these beets averaged 17.8 percent. This means that Maine produced approximately 20 Cwt. of sugar per acre in 1966. It is expected that in 1967 yields in Maine will average over 12 tons per acre and will increase yearly as we gain experience. We have the capabilities in Maine of averaging between 15 and 20 tons of beets per acre and our sugar content is unusually high.

NOTE: The Tree Farm Program started in Maine in 1952 and over the years we have approved approximately one new Tree Farm each week. At the close of 1966, Maine had 783 Tree Farms with a total of 2,536,271 acres of woodlands in the program. As of December 31, 1959, there were 402 Tree Farms with a total of 279,466 acres. A discrepancy in these figures and the tabulation is due to Tree Farms being dropped from the program. This program is sponsored nationally by the American Forest Products Industries and here in Maine is sponsored by the Maine Committee of AFPI.

INLAND FISHERIES AND GAME

NICATOUS LAKE
T3 ND, T40 MD, and T41 MD, Hancock Co.
U.S.G.S. Nicatous Lake, Me.

Fishes

Salmon	Eel
Brook trout (squaretail)	White sucker
Brown trout	Minnows
Smallmouth bass	Fallfish
White perch	Golden shiner
Yellow perch	Creek chub
Chain pickerel	Blacknose dace
Hornpout (bullhead)	Banded killifish

Physical Characteristics

Area - 5165 acres

North Part

Maximum depth -	Temperatures
38 feet	Surface - 69° F.
	38 feet - 51° F.

Central Part

Maximum depth -	Temperatures
40 feet	Surface - 69° F.
	38 feet 56° F.

South Part

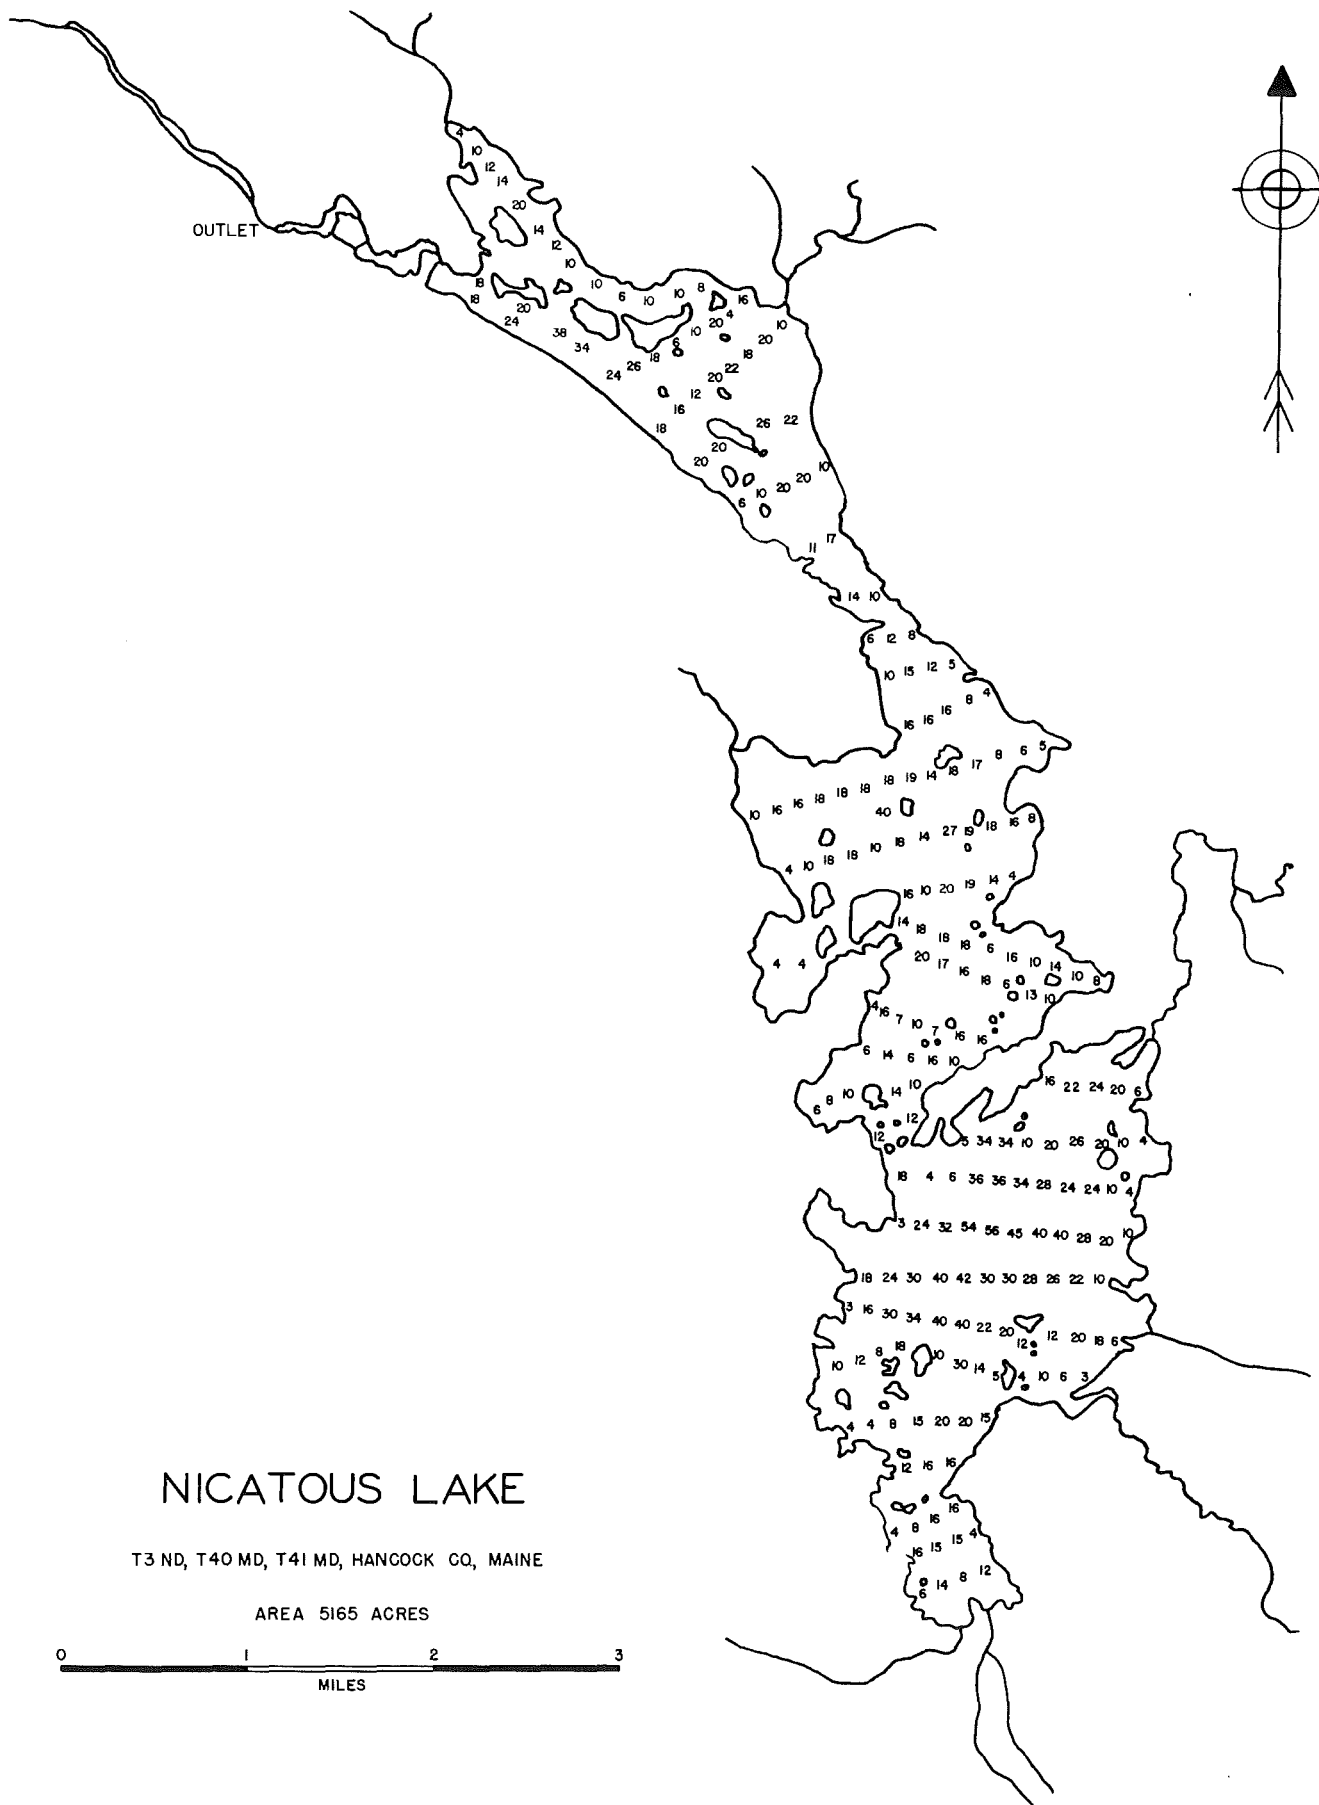

Maximum depth -	Temperatures
56 feet	Surface - 69° F.
	45 feet - 58° F.

Although Nicatous Lake is reported to have supported a good salmon fishery in past years, survey data indicate that a gradual influx and increase of warm-water game species has seriously decreased the lake's ability to support, at present, anything but a small fraction of the reported past salmon population.

The general shallowness of the lake together with a consideration of its water quality suggests that it has always been "marginal" salmon and trout water, that is, capable of supporting populations of these species only in the absence of excessive competition by the warm-water game species now present.

Management therefore, should be primarily for warm-water game species. However, maintenance of a small salmon fishery without diversion from the over-all policy of warm-water game fish management could probably be assured by intensively managing West Lake Outlet, Duck Lake Brook, and Nicatous Stream as spawning tributaries.

Surveyed - August, 1952

GEOLOGY AND OCEANOGRAPHY

CURRENT OCEANOGRAPHIC RESEARCH AND EDUCATION PROGRAMS

Agency or Institution	Program
Department of Sea & Shore Fisheries	Bacteriological pollution studies, particularly in clam flat areas.
Department of Sea & Shore Fisheries	Educational assistance to secondary schools on the ecology and economic aspects of 10 species. Sixty schools presently receiving this assistance.
Department of Sea & Shore Fisheries	Relationship of near shore water temperature and salinity to the abundance of several species (clams, northern shrimp, lobsters, bloodworms and others).
Department of Sea & Shore Fisheries	General ecological studies on soft shell clams and oysters.
Bureau of Commercial Fisheries	General study of herring and lobsters (off shore).
Bureau of Commercial Fisheries	Ocean, weather environment study.
Southern Maine V.T.I., So.Portland	Courses in marine biology and technical training in taking data on salinity, water temperature, currents and bottom sediments.
Southern Maine V.T.I., So.Portland	Contract with U.S. Hydrographic Office for supplying data on water temperature, salinity and sediments in Casco Bay.
Bowdoin College, Brunswick	Summer institute in marine biology for secondary school teachers.
Univ. of Maine (Walpole Laboratory)	Initiating a summer program in ecology of shore species for secondary school teachers and graduate students.
St. Francis College, Biddeford	Marine Biology courses at the undergraduate level.
Mount Desert Biological Station	Studies on seals and dogfish.
Traip Academy, Kittery	Regional Marine Biology Lab and Aquarium at Fort Foster.
Maine Maritime Academy, Castine	Marine engineering, navigation, etc.

INDUSTRIAL, INSTITUTIONAL AND PRIVATE RESEARCH FACILITIES

(with a definite or possible relationship to Oceanography)

Industrial.

1. Bath Iron Works, Bath - All fields of ocean engineering.
2. Hanna Associates, Rockport - Prototype design. Development plastic products.
3. Hussey Mfg. Co., North Berwick - Design of waterfront equipment.
4. Hyde Windlass Co., Bath - Design and development of miscellaneous marine cable equipment. Division of Bath Iron Works.
5. Marine Colloids, Inc., Rockland - Chemistry of marine plant life and the food and pharmaceutical aspects of marine life.
6. Portland Copper and Tank Works, Inc., South Portland - Fiberglass pressure vessels and metallurgy.
7. Allen Quimby Veneer Co., Bingham - Design, development and improvement of boat hulls.
8. Wardsworth and Woodman, Winthrop - Coated papers and fabrics.
9. Maine Metal Finishing Co., Inc., South Gorham - Metal finishing and decorating.
10. Monmouth Fibreglass Ind., Inc., Monmouth - Machinery and plastics.
11. Dielectric Products Engineering Co., Inc., Bridgton - Antenna systems, transmission lines and R. F. propagation.
12. Vocaline Co. of America, Waldoboro - Sonar LF to VHF communications, circuits, etc.

Industrial and Private.

1. Gorham Laboratories, Inc., Gorham - Chemical and electronic (also other potential fields.)
2. R. B. Jackson Memorial Laboratory, Bar Harbor - All phases of animal biology.
