NON-DISCRIMINATION NOTICE

In accordance with Title VI of the Civil Rights Act of 1964 (42 U.S.C. Section 2000d et seq.), Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. Section 794), the Age Discrimination Act of 1975, as amended (42 U.S.C. Section 6101 et seq.), and Title IX of the Education Amendments of 1972, the Maine Department of Human Services does not discriminate on the basis of sex, race, color, national origin, handicap or age in admission or access to or treatment or employment in its programs or activities. Ann Twombly, Affirmative Action Officer, has been designated to coordinate our efforts to comply with the U.S. Department of Health and Human Services regulations (45 C.F.R. Parts 80, 84 and 91) and the U.S. Department of Education (34 C.F.R. Part 106) implementing these Federal laws. Inquiries concerning the application of these regulations and our grievance procedures for resolution of complaints alleging discrimination may be referred to Ann Twombly at 221 State Street, Augusta, Maine 04333, Telephone Number: 207/287-3488 (Voice) or 1-800-332-1003 (TTY), or to the Assistant Secretary of the Office of Civil Rights, Washington, D.C.

This Report was produced under Appropriation No. 010-10A-1110-012.

August, 1995

GUIDELINES FOR DATA USE

The Maine Office of Data, Research and Vital Statistics requests that the following guidelines be followed in any further publication or release of data from this report:

- a. Any published material derived from the data should acknowledge the Office of Data, Research and Vital Statistics, Bureau of Health, Maine Department of Human Services, as the original source. It should also include a disclaimer which credits any further analyses, interpretations, or conclusions reached to the author, and not to the Office.
- b. Recipients who wish to publish a technical description of the data should make a reasonable effort to ensure that the description is not inconsistent with that published by the Office.

ACKNOWLEDGEMENTS

The author wishes to thank those individuals, organizations and agencies contributing to the development and production of Maine postcensal population estimates. Religious school enrollment data were provided by the individual schools. Marty Burns, Planning and Research Associate II with the ODRVS, conducted the survey. Non-religious school enrollment data came from the Maine Department of Educational and Cultural Services and were processed by William Turner, ODRVS Programmer Analyst. Housing unit data were provided by the Institute for Real Estate Research and Education (University of Southern Maine).

Special acknowledgement is due to the members of the ODRVS technical advisory panel for their critique of the estimates contained herein. Catherine St. Pierre, Planning and Research Associate II with the ODRVS, coordinated the review. The county controls used in the development of these estimates were prepared by the United States Census Bureau. This report was produced under the general guidance of Ellen Naor, Director of the Office of Data, Research and Vital Statistics.

INTRODUCTION

This report contains postcensal estimates of Maine's population on July 1, 1993, for the State, counties and minor civil divisions (MCDs). Organized MCDs are arranged in alphabetical order within each county, and summaries of each county are displayed as well. Contiguous unorganized MCDs within the same county are clustered as a single unit of population. Within each table, the unorganized MCDs follow the organized minor civil divisions.

A component method was used to produce these estimates. The estimated population of each minor civil division is equal to the sum of the 1990 census count, the natural increase and the estimated net migration from April 1, 1990 through June 30, 1993.

The first two components of these estimates were known data. The third component, net migration, was estimated using a regression line based on the experience of the previous censal decade (1980-1990). For each area, the dependent variable in the equation was the net migration rate. The independent variables were the ratios of the difference between the actual and expected values of given symptomatic indicators of net migration to the expected values. The expected values of these indicators were based on United States trends. After the estimated net migration rate of a given MCD was calculated, it was multiplied by the population base to obtain the estimated net migration. The estimated net migration was added to the sum of the 1990 census count and the natural increase to obtain an unadjusted estimate. The unadjusted estimates were then adjusted to sum to independently generated county-level estimates. For this report, county-level estimates prepared by the United States Census Bureau were used as controls.

Prior to publication, the estimates were reviewed by a panel of technical advisors. Adjustments were then made, as needed.

The ten-year prediction equation used to estimate net migration rates was:

$$Y = 0.08552X_1 + 0.46512X_2 + 0.31857X_3 + 0.06219, \text{ where}$$

Y = the net migration rate, X_1 = the independent variable for births, X_2 = the independent variable for K-12 school enrollment, and X_3 = the independent variable for total housing units.

Using the new regression line to estimate net migration rates, two sets of test population estimates for April 1, 1990 were prepared. One set was adjusted to sum to the enumerated county totals from the 1990 census; while the other set was not. These data provide a measure of the expected accuracy of ODRVS postcensal estimates for the decade of the 1990s (Text Table I).

Text Table I
