GOVERNOR

STATE OF MAINE
DEPARTMENT OF TRANSPORTATION
16 STATE HOUSE STATION
AUGUSTA, MAINE 04333-0016

Dale F. Doughty
COMMISSIONER

February 10, 2026

Dear MaineDOT Customers and Partners,

Every year, MaineDOT produces a 3-year rolling Work Plan that lays out, openly and plainly, all the work we plan to do over that period. Our Work Plan is unique to public agencies as it contains our operations, planning, design, and construction efforts all in one place organized by calendar year. It is one of the most important documents we publish. It informs communities and policy makers, guides contractor resource investments, and gives the public a clear picture of how we invest their money. It also represents thousands of hours of work from teams across the Department and from our partners, reflecting the best thinking and disciplined preparation of hundreds of professionals statewide. It is produced in the same way we deliver our work; carefully, thoughtfully, objectively, and with the understanding that we serve the people of Maine first.

Our agency goals are clearly represented herein:

Goal 1. Manage the Existing System: The majority of the funding projected in this work plan is applied to operating and maintaining the existing system. Snow plowing, transit operations, safety improvements, paving, and bridge rehabilitation are just a few of the many activities necessary to maintain the expansive and varied system we all depend on for every aspect of modern life here in Maine.

Goal 2. Support Economic Opportunity: Economic opportunity goes hand in hand with quality of life. MaineDOT aggressively seeks out special state and federal funding for wise and thoughtful expansion and transformation. This work plan contains several projects that continue to guide Maine in the 21st century.

Goal 3. Build Trust: This plan is all about building trust by detailing all we plan to do and where your money is planned to be spent. We strive to say what we are going to do, do it, and then say what we have done. This is the shortest road to trust for a public agency.

This three-year plan, if fully executed, will deliver smart and steady progress across transportation modes. Accomplishing the goals set out in this Plan can be a physical and fiscal challenge. We are again operating in a period of uncertainty, particularly around federal funding. As I write this, Congress is debating the long-term direction of federal transportation programs through deliberation over a 5-year reauthorization bill; therefore, future appropriations remain uncertain. That uncertainty matters as transportation is a long-term endeavor. Shifting priorities affect our planning, schedules, our financial management and ultimately our efficiency in delivering products to Maine people. Part of our planning effort is to predict where these priorities are trending and aim ahead of them, so we stand ready.

Maine also has its transportation funding challenges, especially on the capital side. Governor Mills has made funding transportation a priority, filling much of the transportation's capital structural gap throughout both of her two terms. The Governor has supported bringing new long-term revenue streams to bear including portions of the Auto Related Sales Tax and Liquor Sale Revenue for MaineDOT capital needs. Unfortunately, there remains a structural gap of \$130 million in this plan in 2028. That gap will need to be filled or the plan adjusted. Mainers are resourceful and I am confident we will find a solution.

So, what will this plan do for you?

It will pave 3,046 miles of State and State Aid roads across rural and urban Maine. As this paving passes through villages and urban areas, it will include upgrades that will benefit people with mobility challenges as well as providing improvements to pedestrian and bicycle safety.

It will rehabilitate or replace 235 bridges. Bridges in Maine are safe as posted, but the overall condition of the network continues to decline. MaineDOT is refocusing efforts on how we slow or arrest the decline in these important investments. Projects like the \$35 million painting and preservation of Casco Bay Bridge and the \$25 million dollar bridge deck replacement on the Aroostook River Bridge in Caribou preserve your investment in these high value assets.

Continued investment in transit operations and enhancements statewide, like support for additional service from Portland to Scarborough and associated micro transit, are prominent examples. This clearly shows how partnerships play an important role: Greater Portland Metro, the Town of Scarborough, PACTS, Maine Turnpike Authority and MaineDOT all pool our efforts to get this underway.

Many of our projects include improvements to bicycle and pedestrian access and safety. Projects such as village improvements in Sanford, Windham, and Roux/Portland are grants that have bicycle pedestrian facilities at the core of their scope. Stand-alone projects such as the first segment of the Mountain Division "Trail Until Rail" are strong examples of standalone active transportation investment in this Plan.

Significant investment including planning, design, and construction supporting passenger and freight rail, ports, ferries, and aviation are all well represented and highlight partnerships.

There is something in this 2,798-item plan that will affect every Mainer. I urge you to flip through the introduction to better understand the work MaineDOT and its partners do and why we do it, then go to your community to see what stands out to you.

Respectfully,

Dale F. Doughty

Introduction

This 2026 Edition of the Maine Department of Transportation's (MaineDOT) Work Plan sets forth all work planned by MaineDOT and its transportation partners for calendar years 2026, 2027, and 2028. It contains 2,798 work items with a total value of \$4.5 billion, consisting primarily of work delivered by or coordinated through MaineDOT. It also includes funds to be expended by transportation partners that receive federal funds directly, including airports and transit agencies, and local and private matching funds not included in the state budget. Published early in each calendar year, MaineDOT's Work Plan includes all capital projects and programs, maintenance and operations activities, planning initiatives, and administrative functions for three calendar years.¹

Transportation will always be a big job in Maine. Our state is almost the size of all five other New England states combined, yet our small population (approximately 1.41 million people) is about the same as that of New Hampshire, making us the least densely populated state east of the Mississippi River. Maine's natural features and weather – while varied and beautiful – present additional challenges from an infrastructure perspective. To connect us all, Maine has an extensive, statewide, multimodal transportation system. That system includes 8,800 miles of state highways, 2,800 bridges and minor spans, six commercial airports, more than 1,300 miles of active railroad, 15 bus transit providers, passenger rail service, a state ferry service, three major seaports, and miles of active transportation corridors. Simply put, Maine has more transportation infrastructure per capita than most other states do.

MaineDOT has taken major strides to address pressing issues for transportation in the past year including ongoing efforts to address Maine's bridge conditions, an extensive evaluation of rutting that is occurring on the interstate system and multiple safety initiatives that have significantly changed the way MaineDOT programs work, develops projects, sets speed limits and evaluates safety data for all users.

2025 was MaineDOT's first full year, and first Work Plan, that saw implementation of crucial updates to the Department's Complete Streets Policy and speed limit setting processes. These important functions of MaineDOT are now implemented through a context-based decision-making framework guided by the Department's Roadway Context Classification System. This is a mapped system of classifying roadway segments based on the nearby built environment and how those roads are used by the public, which is mapped across the entire public road network in Maine. Transportation Engineers and Planners use these five context areas (Rural, Rural Town, Village, Suburban, and Urban) when planning future MaineDOT infrastructure projects to better

¹ MaineDOT's Work Plan is different from its Construction Advertisement Schedule, which is a subset of the Work Plan and is published early each January. The Construction Advertisement Schedule contains only capital projects that are advertised for construction bids from private contractors for the first calendar year of the Work Plan. The Work Plan includes all work activities – capital, operational, and administrative – over three calendar years.

align project design elements with the surrounding context of the community, in addition to direct engagement with municipal and regional officials. Visit the link below for more information about MaineDOT's Safety Approach, Complete Streets Policy and Context Mapping. <https://www.maine.gov/dot/programs-services/safety-and-mobility>.

MaineDOT understands that vehicle speed is a primary contributing factor contributing to crash outcomes on our roads. Over the last three years MaineDOT has been focusing on how vehicle speed management interventions can help the State achieve its transportation safety goals. In addition to the Department's speed limit setting process, and complete streets policy, MaineDOT has provided for increased use of traffic calming elements in project design and also for use of temporary materials to pilot traffic calming projects with our municipal partners. All of these roadway safety efforts are a critical part of how MaineDOT pursues its mission.

MaineDOT is also adjusting its planning efforts to anticipate and address changes in Maine; socially, culturally and economically. Issues like shifts in economic drivers, climate change, age demographics as well as workforce and housing shortages are all factors in MaineDOT's planning and ultimate programming for the future. MaineDOT takes the approach of working directly with communities and business leaders to develop their vision that addresses some or all these factors. We provide funding, technical guidance and connections with other professionals during the development of the vision.

Although most of our funding base is directed toward operating and maintaining our vast network of assets, funding projects resulting from these collaborative planning efforts is a priority. For these "transformative projects" we most often target special federal funding from Congressionally Directed Spending, and grants from various federal agencies including Federal Highway Administration, Federal Transit Administration, Federal Rail Administration, Federal Aviation Administration, and the Maritime Administration. Although this planning is ongoing the timing of special federal funding often relies on current and ever shifting Federal priorities. We do have several special state partnership programs to address discrete issues and promote reasoned growth.

A. Sources of Funds

Any Work Plan requires that future funding levels be estimated using reasonable assumptions. MaineDOT makes these assumptions with humility and respect. Decisions regarding funding are made by policymakers, not by MaineDOT.

Although uncomfortable, making reasonable assumptions is necessary. Everyone – policymakers, government officials at all levels, contractors, consultants, and citizens – expects timely information about the scope and timing of work and projects. Projecting funding levels is also necessary for seamless and efficient development of projects and for the contracting community to anticipate the appropriate level of resources. To meet these expectations, we assemble and publish Work Plans that extend beyond a single budget cycle. Formulating three-year plans requires that we estimate what policymakers will do in the future, which is inherently difficult. Accordingly, MaineDOT understands that funding policy decisions may require major adjustments to this Work Plan before work is fully executed.

This version of the Work Plan is being developed in a time of significant uncertainty. Congress is debating the long-term direction of federal transportation programs through deliberation over a 5-year reauthorization bill. This uncertainty directly following the longest federal government shutdown in history experienced in the fall of 2025. This major component of funding within the Work Plan is even more difficult than normal to predict both in amount and timing of availability and federal eligibility based on evolving federal priorities.

With that understanding, the estimated total sources of funds that support this three-year Work Plan are depicted in the Figure 2 pie chart.² As you can see, total resources over the three years are estimated at about \$4.5 billion, or an average of about \$1.5 billion per year.³

² The Figure 2 pie chart cannot be precisely the same as state budgeting information for several major reasons. The first and most obvious reason is timing. MaineDOT Work Plans cover *three calendar years*, because calendar years are most helpful for construction season planning, while the Maine state budget covers *two state fiscal years* (July 1st to June 30th). *Federal fiscal years* are also different (October 1st through September 30th) and include variable schedules depending on federal budget bill status, continuing resolutions, etc. Second, because capital-related work is the bulk of what MaineDOT does, Work Plan resources necessarily include capital (also known as Part 2) resources, which are not part of baseline budgets under state budgeting practice. Third, to avoid confusion on project level values that span budget cycles, Work Plan sources include the total value of projects and activities, even if some amounts have already been expended (e.g., design and permitting costs). Fourth, Work Plan funding also includes sources that are not part of the state budget, principally Federal Transit Administration and Federal Aviation Administration funds received directly by agencies other than MaineDOT and capital funds carried forward from previous years.

³ The Figure 2 pie chart includes all operational and capital funding based upon information available in the fall of 2024, before the ratification of collective bargaining labor agreements and the December 2024 revenue forecast.

Figure 2

At a high level, total sources of funding can be broken down as follows: about 80 percent are evenly split from state sources and federal sources; and the remainder are from municipal, private, and other sources. Each wedge of the pie chart in Figure 2 is described below.

1. State Fund Sources

As shown in Figure 2, total state sources of funding of all types are estimated at \$1.798 billion over the three years of this Work Plan. State funding represents approximately 40 percent of total Work Plan funding.

- a. Fuel Taxes and Vehicle Fees. Depicted as the first green wedge in Figure 2, this state source of funding represents long-standing traditional Highway Fund revenues – primarily motor fuel taxes and vehicle registration fees. A portion of vehicle fees previously directed to the

TransCap Bond program now is part of the Highway Fund Revenues. The amounts available to MaineDOT for three years from these sources are estimated at \$875 million or 19 percent of the total Work Plan funding.

These traditional HF revenues are a foundational funding source of MaineDOT Work Plans. As required by Article IX, Section 19 of the Maine Constitution, they must be used for specified highway- and bridge-related activities. These revenues are more flexible than federal or bond funds and support almost all our maintenance, operations, systems management, and administrative activities, including critical operations like snow fighting.

- b. TransCap Residual. Shown as the second light green wedge in Figure 2 TransCap Residual is a portion of dedicated fuel tax and a portion of the automotive sales and use tax revenue deposited to the Maine Municipal Bond Bank that provides the required coverage for the TransCap Bonds being issued in January of 2026. The issuance requires two times the revenue required for principal and interest payments be reserved however, the unused portion is available for eligible expenditures. This residual can be used for transportation infrastructure improvements in all modes with some limitations related to the allocation of the revenue sources to uses within the TransCap Bond program.
- c. Proceeds from Liquor Sales. Shown as the brown wedge, proceeds from liquor sales are highway fund revenue used to support multiple agencies – principally MaineDOT, the Maine Department of the Secretary of State, and the Maine Department of Public Safety.

MaineDOT estimates that the amount available to MaineDOT for this Work Plan will be \$142 million over three years or about three percent of the total sources of Work Plan funding, which is depicted as the brown wedge of Figure 2. All proceeds from liquor sales, in addition to traditional HF revenues, will be used to fund the baseline budgets of HF agencies; not for MaineDOT's transportation capital needs

- d. Automotive Sales and Use Tax Revenue. In June 2023, the 131st Legislature unanimously supported, and the Governor approved, statutory language directing 40 percent of sales tax collected at automotive dealers and sales and use tax collected by the Bureau of Motor Vehicles be transferred to the Highway Fund on a perennial basis.

As set forth in subsection (e) below, \$25 million of the auto-related sales tax earmarked for the HF will be transferred annually to the TransCap Trust Fund at the Maine Municipal Bond Bank to support a one-time, \$250 million TransCap revenue bond to be issued in January of 2026. Diversifying bond revenue streams beyond constitutionally protected fuel taxes and vehicle fees will allow these bond proceeds to be used for all capital projects. Subject to allocation within the TransCap Bond program and the limitations on the use of the revenue sources used to cover debt service – including highway and bridge and multimodal projects.

In the FY26-FY27 biennium, MaineDOT estimates the amount of auto-related sales tax available for allocation to MaineDOT will be about \$74 million per year for a total of \$223 million. This represents about four percent of total Work Plan funding and is depicted as the lime green wedge of Figure 2.

Continuing operational cost increases will quickly erode the capital impact of this funding in future budgets. It is estimated that all the auto-related sales tax revenue transferred to the HF will be used for operational baseline budgets – and not for MaineDOT capital lines – within a five-year time frame. TransCap Revenue Bonding. The TransCap Trust Fund and revenue bonding mechanism was created at the Maine Municipal Bond Bank in 2008 pursuant to 30-A MRS §6006-G to provide for the issuance of revenue bonds to be used for capital transportation purposes. A \$250 million TransCap revenue bond was included in the FY26-FY27 HF budget. This one-time infusion of bond proceeds is shown as the medium green wedge on the Figure 2 pie chart and represents about six percent of Work Plan funding. This represents the one-time solution for this biennium for the perennial capital funding shortfall at MaineDOT. MaineDOT is currently in process of the bond sale which is anticipated to be completed this winter in time for the upcoming construction season.

- e. State Multimodal Funds. State transit, active transportation, ports, passenger rail, aviation, and other non-highway projects are supported through the multimodal special revenue accounts in MaineDOT's Highway Fund Budget in addition to the Highway Fund support discussed in section a. This funding comes from a variety of sources, including revenues from car rental taxes, aviation fuel taxes, rail taxes, rail leases, and Penobscot Narrows Observatory fees. Shown as the purple wedge in Figure 2, these state multimodal special revenue funds total about \$58 million over the three-year period of this Work Plan and represent about one percent of the total Work Plan funding.
- f. General Fund Bonding/Cascades/Transfers and Special Programs. This Work Plan includes General Fund support (indicated by the bright yellow wedge in Figure 2) estimated at \$206 million, or five percent of the total of Work Plan funding. This funding is made up of several different components:

General Fund Bonding/Transfers: This Work Plan has a state funding need of approximately \$160M in capital funding in 2028. As discussed earlier in this document, assumptions need to be made to construct a viable Work Plan for the Department. This version of the work plan assumes \$130M in additional General Fund support through yet to be identified transfers/bonds. This conservative number is much less than the overall need. This conservative approach allows projects to progress through development for 2028 while the funding picture becomes clearer.

General Fund Cascades: At the end of state fiscal year 2025, General Fund revenues exceeded projections leading to a significant unallocated balance. In accordance with statute, a portion of this goes to MaineDOT for capital needs. Accordingly, \$34.8 million was transferred to MaineDOT, a much larger amount than previously anticipated. As indicated above, because of

recent General Fund transfers and additional unallocated revenue in the Highway Fund, MaineDOT was able to delay the issuance of the TransCap revenue bonding. In addition, this Work Plan assumes a \$5-million cascade in each of FY2027 and 2028.

Special Programs: These funds are one-time funding initiatives that have been made available to MaineDOT to deliver infrastructure improvements for Maine outside of traditional transportation infrastructure. Past programs have included adaptation and resiliency, working waterfronts, municipal culverts, and port design at Sears Island. These funds have historically been made available from non-HF sources. The yellow GF wedge also includes \$31 million in special program funding.

2. Federal Fund Sources

Federal funding of all types, shown in various shades of blue in Figure 2, is estimated to be \$1.797 billion, which represents about 40 percent of the total value of Work Plan items. This includes \$1.606 billion to be received by MaineDOT and \$191 million to be received directly by other transportation partners, including airports and transit agencies.

The current federal surface transportation authorization expires September 30, 2026. The authorization generally lasts for five years and gives local transportation officials a longer-term horizon that allows some level of planning of projects. Annual appropriations set the final dollar amounts available to states and other recipients, but the authorization bill provides the policy and general framework of future funding. Congress is currently drafting authorization language in each of the chamber's committee of jurisdiction. There is a large sense of uncertainty with the legislation being passed on time in the shadow of mid-term elections and consistent budget battles in Washington. MaineDOT has taken a conservative approach and is projecting flat core federal funding and is not projecting additional special federal funding outside of what has already been awarded to date.

Federal funds in this Work Plan consist of several types, including core formula programs from the Federal Highway Administration, federal multimodal funds received by MaineDOT, federal multimodal funds received by other transportation partners, and federal competitive grant funding. Each of these federal funding types generally includes extensive rules, restrictions, and guidance that designate and limit how the funding can be used. Specific types of federal funds are described below.

- a. Federal Highway Administration (FHWA) Formula Funds. Funding for core federal highway programs from FHWA in this Work Plan, sometimes known as "formula funds," is estimated at \$1.052 billion and is shown as the solid, darker blue wedge in Figure 2. This funding represents about 23 percent of the total Work Plan funding. These formula funds typically require a state or local match of at least 20 percent of the total cost of projects.

- b. Federal Multimodal Funds Received by MaineDOT. In addition to highway-related programs, MaineDOT receives about \$49 million of formula funding for non-highway modes over the three-year Work Plan period from the Federal Transit Administration (FTA), Federal Railroad Administration (FRA), Federal Motor Carrier Safety Administration, and U.S. Fish and Wildlife Service. Those modes include transit, rail, marine, and other programs that are administered by MaineDOT. This is shown as the solid, medium blue wedge in Figure 2 and represents about one percent of the total Work Plan funding.
- c. Federal Multimodal Funds Received by Transportation Partners. Some of our transportation partners – largely airports and transit agencies – receive direct funding from the FAA and FTA outside the state budget process. These amounts total about \$191 million over the three-year period of this Work Plan and are shown as the light blue wedge in Figure 2. These amounts are listed in the Work Plan to illustrate the broader sphere of transportation investment and because MaineDOT often provides match for these funds. Other federally mandated plans require the disclosure of these funds to provide a more comprehensive overview of our statewide transportation system investment.
- d. Federal Competitive Funding. This portion of federal funding has represented a game-changer for transportation funding in Maine following the passage of the federal IIJA/BIL. Special competitive U.S. DOT discretionary grant programs and Congressionally Directed Spending (CDS) are estimated at \$505 million and are shown as the polka-dotted blue wedge in Figure 3. Federal competitive funding represents about 11 percent of the total value of Work Plan items. This amount consists of awarded grants and CDS projects to be delivered over the next three years.

Scheduled for delivery in calendar year 2026 is nearly \$281M in projects containing competitive funding including:

- Sanford Downtown Reconstruction - \$32M
- Frenchville Route 1 Reconstruction - \$41M
- I-395 Bridge Improvements - \$79M
- Biddeford Elm Street Improvements - \$13M
- International Marine Terminal Improvements - \$18M
- Route 27 Rehabilitation - \$12M
- Portland East Deering Area - \$7M

The continuation of the levels of competitive funding under IIJA/BIL is uncertain as Reauthorization is considered in congress, however the political winds appear to be shifting to more traditional formula funding.

3. Other Funding Sources

- a. Municipal Matching Funds. This Work Plan is also based upon the anticipated receipt of about \$199 million from municipalities. Shown as the pink wedge in Figure 2, this represents about four percent of the total value of Work Plan items. This funding is largely derived through agreements with municipalities, reflecting the local benefit of projects and activities in the Work Plan, and includes local funding for transit operations, local bicycle and pedestrian projects, airports, and MaineDOT's various partnership initiatives such as the popular Municipal Partnership Initiative (MPI). The MPI program is a voluntary, low-process program in which municipalities take the lead on projects and MaineDOT acts more like a funder and partner, providing high-level engineering guidance.
- b. Private and Other Funding Sources. Less common, but important, funding from various sources, including private sources (often railroads) and governmental agencies other than municipalities, totals \$106 million over the three-year period of this plan and is shown as the maroon wedge in Figure 2. This funding represents about two percent of the total Work Plan funding.

Included within this funding is the 5% of annual operating revenues for the Maine Turnpike Authority (MTA) as denoted in 23 MRS §1961(7). This totals approximately \$9.5M/year. Many of the projects are listed in this work plan and are denoted in the project description, while others are more administrative in nature including payments over term of previous MTA contributions to critical projects. In total MTA contributions in this work plan total nearly \$14.1M with \$6M listed in actual projects. There are many other projects in the work plan that are in development meeting the criteria laid out in the statute and are currently being considered.

- c. Previously Programmed Funds. As noted above, unlike most state agencies, the focus of MaineDOT is capital in nature, which means relatively large amounts of funding routinely follow projects from previous Work Plans. These funds represent amounts carried forward that were previously programmed for projects and activities in multiple areas listed in the plan and include federal transit and aviation funding, state multimodal funding, bonding, and capital highway and bridge funding. Shown as the white hatched area in Figure 2, this represents 14 percent of the total Work Plan funding. Much of this funding is tied to federal projects that are often more significant and for which development times are longer. Previously programmed funds are comprised by more than two thirds of federal funding, about one quarter of state funding, and the remainder in local and private matching funds.

B. Uses of Funds

Although identifying funding often dominates policy discussions, it is the uses of these funds and the benefits to Maine people that are more important. This section sets forth how these projected funds are used.

1. Underlying Principles and Approach

MaineDOT responsibly uses the funds entrusted to it through long-term strategic planning, detailed asset condition assessments summarized in an annual State of the Transportation System Report, community outreach, and a resulting resource allocation process that brings together all these factors as well as funding availability and eligibility.

a. Long Range, Modal, and Other Strategic Plans

MaineDOT updates its long-range, modal, and various other strategic plans (Family of Plans) on a periodic basis. Due to delays caused by the pandemic and other factors, MaineDOT had the opportunity to update several of these plans at the same time starting a few years ago. This allowed these plans to be synergized to a new level. The result was an award-winning Family of Plans published in 2023.

As part of that 2023 effort, after several months of public and stakeholder outreach and plan development, MaineDOT published Working to Move Maine: MaineDOT's Long- Range Transportation Plan (LRTP). The LRTP conveys MaineDOT's vision for a multimodal transportation system that not only provides for safe and efficient travel throughout the state but also supports a high quality of life and economic opportunity in all of Maine's villages and communities. The LRTP serves as the overarching plan tying together MaineDOT's larger Family of Plans, which includes modal plans for active transportation, aviation, transit and rail. MaineDOT's Long-Range Plan set guiding principles for the remaining plans and MaineDOT's future decisions:

1. *Be responsible stewards by making reasoned, long-term decisions*
 - **Serve as responsible stewards of funds entrusted to MaineDOT** by seeking effective solutions to demonstrated transportation needs.
 - **Make Reasoned, fact-based decisions**, including those relating to system and asset management; resource allocation; and the selection, scoping, and development of projects.
 - **Consider long-term benefits and cost of transportation investment**, including the need for ongoing funding for operations and maintenance.
2. *Meet customers where they are*
 - **Commit to pursuing equitable solutions** that best address the diverse needs of all users of Maine's transportation system.
3. *Improve continuously and embrace the future*

- **Be open to new ideas, best practices, and technologies** that will result in continuous and sustainable improvement.
- **Anticipate and meet future transportation needs** – including the transition to cleaner transportation – through thoughtful study and pragmatic implementation, including pilots when feasible.

The diagram shown as Figure 3 below shows specifically how MaineDOT’s Family of Plans, Asset Management, and the Work Plan work together within the performance-based planning of MaineDOT.

Figure 3

b. State of the Transportation System

MaineDOT annually develops asset management evaluations and resource allocation decisions through the early stages of work plan development. This effort outlines the condition of transportation assets, performance of those assets, and the resulting allocation of resources to specific areas for project programming. The evaluation of asset condition and performance allows MaineDOT and its transportation partners to highlight the priorities for investment in the upcoming Work Plan.

A key feature of the evaluation is to identify funding levels in three broad categories for all asset classes: MacGyver Mode, Pragmatic Progress, and Aspirational.

MacGyver Mode (managing the slow decline) – This is a level of investment to operate and maintain the system in an acceptable way that will not – over a short period of time – create a significant future capital investment deficit. Performance levels are likely to decline on all asset priority levels over the longer term. Basic levels of investment include matching available federal formula funds and limited special federal funding that directly supports existing infrastructure condition and performance.

Pragmatic Progress (steady progress in targeted areas). This is a level of investment that supports responsible investments based on asset management strategies and key performance measures. Performance measures in all modes should be maintained or improved with reasoned levels of investment. This level supports strategic investments in villages, targeted multimodal improvements, highway improvement programs, and bridge investments for a sustainable transportation system, and limited capacity expansion. Pragmatic Progress levels of investment include basic levels (above) plus special federal funding that directly supports quality of life and economic opportunity initiatives in addition to attaining infrastructure condition and performance in line with MaineDOT’s mission. It should be noted that this level of funding applied over time will degrade the system and require higher levels of funding in the future to recover.

Aspirational (accelerated improvement with a “full needs” funding). This is a level of investment that addresses all identified needs and raises performance levels. Aspirational levels of investment will result in conditions improving to meet or exceed State of Good Repair levels. Aspirational levels of investment include maximizing all special federal funding opportunities available to MaineDOT and partners. Substantial capacity expansion is possible under this funding level. This is not an unlimited funding level but a level that is supported through quantifiable calculations with associated expected performance improvement.

Evaluating the need of each asset class at these three levels and comparing it to the projected resources available. This methodology attempts to allocate resources to the areas of greatest need while balancing programming levels for all modes at or near one of the three investment levels that has been chosen to match most closely with projected resources. In the end, the majority of investments made to the transportation system are used to manage the existing system based on proven asset management principles across all modes.

c. Community Outreach and Initiatives

MaineDOT and its partners at other state agencies, tribes, counties, metropolitan and regional planning organizations, municipalities, and other stakeholder groups work together to identify and address transportation needs across Maine. As each community is unique, sometimes these needs fall outside the usual asset management process. In these cases, MaineDOT has a set of

community-based initiatives that help communities not only improve safety and mobility for all road users – including pedestrians, bicyclists, drivers, and others – but also strengthens Maine’s iconic village centers and downtowns. By supporting human-scale infrastructure and placemaking efforts in the hearts of our communities, these initiatives help to make sure that you *can* get there from here and that *there* is a place that you want to be.

MaineDOT currently has four community-based initiatives: the Village Partnership Initiative (VPI), the Planning Partnership Initiative (PPI), the Municipal Partnership Initiative (MPI), and the Business Partnership Initiative (BPI). With the publication of this Work Plan, MaineDOT’s newest partnership initiative: the Active Transportation Partnership Initiative (ATPI) enters its second year. This new initiative is designed to give communities a program to access funding to enhance infrastructure and safety for vulnerable road users.

While each community-based initiative serves a unique purpose, these programs are all designed to identify specific transportation system improvements that can help communities better realize their own visions and priorities. In particular, the VPI – launched in 2022 – helps interested communities reinvest in traditional village centers and downtowns in ways that balance the use and safety of all users and support local economic revitalization. The PPI is often used to help fund feasibility studies that also support village-scale projects. Together, these efforts support the vision laid out in MaineDOT’s Long-Range Transportation Plan, especially the goal of supporting “a vibrant and world-class quality of life” by investing in transportation initiatives that support economic opportunity for Maine people, communities, and businesses.

d. Resulting Resource Allocation Process

MaineDOT – within the context of the Family of Plans vision, guiding principles, strategies, asset management findings and recommendations, and extensive community and stakeholder outreach outlined above – uses the Work Plan process to allocate resources to programs and work activities that are consistent with plans, comply with state and federal regulations, lead to a State of Good Repair, and have an emphasis on returning the greatest transportation benefit reflected in measurable outcomes.

- i. Funding Eligibility. Restrictions on the use of federal and state funding largely determine the funding available for each expenditure category in the Work Plan. For example, a specific amount is allocated by FHWA for the National Highway Performance Program and another amount for the Congestion Mitigation and Air Quality Program. Aviation funding provided by the FAA must be used for aviation. Funding provided by the FTA must be used for transit. There is limited flexibility in the use of different funding sources across programs, and these limitations largely determine how much funding there is for certain modes and for certain uses within modes.
- ii. State of the Transportation System Funding Levels. As discussed above, the three levels of funding requirements for individual resource allocation groups by mode,

projects funding levels as outlined in the sources section of this document, evaluates system performance and asset conditions, factors in the community and stakeholder input, and decides on resource allocations for each of the modal allocation groups. The process of finalizing resource allocation takes the projected resources and turns them into investments within modal allocation areas based on need and funding.

In this Work Plan, MaineDOT strived to move individual allocation groups as close to the Pragmatic Progress funding levels, averaged over the three years, as possible while balancing eligibility restrictions, risk, and project deliverability. In most cases the funding levels fell below Pragmatic Levels.

Due to the large system and limited resources, MaineDOT's basic resource allocation strategy is to fund transportation system needs as follows:

1. Operation of the multimodal transportation system.
 2. Maintenance of the existing transportation infrastructure.
 3. Preservation of the existing transportation infrastructure.
 4. Pragmatic improvements to existing transportation infrastructure.
 5. Any expansion of the system or services provided.
- iii. Committee Structure for Basic Asset Management. For assets that MaineDOT controls, like the state highway and bridge system, prioritization and selection of projects for the Work Plan are driven by MaineDOT staff committees: the Highway Committee, the Bridge Committee, the Multimodal Committee, the Safety and Mobility Committee, and the Management Team of the Bureau of Maintenance and Operations (M&O). These committees are comprised of staff from relevant disciplines and specializations. They include engineers and technicians with hundreds of years of cumulative experience.

These committees work throughout the year in conjunction with the Bureau of Planning to identify project candidates and prioritize them for potential inclusion in the Work Plan. Selection methodologies for these committees vary according to asset type and transportation mode, but the underlying asset management principles – managing the overall transportation system; using current, reliable data and rational scoring systems; and building in flexibility for unanticipated needs and developments – are common across all areas. In the fall of each calendar year, the committees review the last two years of the current Work Plan and make any needed adjustments in cost, schedule, and project scope. Once those adjustments are made, new projects are typically added for the third year of the Work Plan. Committees make allocations to individual resource allocation groups and turn those into specific projects with discrete scopes and budgets.

MaineDOT's Results and Information Office (RIO), with ongoing guidance from

senior management, coordinates the work of the asset committees, receives input from the Bureau of Planning's public outreach efforts, and assembles a Work Plan. This is a detailed, arduous task that is ongoing in earnest for the better part of seven months at the end of each calendar year.

2. Breakdown of Uses of Funds

The approach, principles, planning, and processes described above culminate in the listing and description of individual projects and work activities in the Work Plan. Individual projects can be found online by searching by municipality or by work type.

As shown in Figure 4, the Uses of Funds pie chart, activities in this Work Plan can be broken down into six high-level categories: Highway and Bridge Capital Work, Highway and Bridge Operations, Multimodal Capital Work, Multimodal Operations, System Management, and Administration. Each of these categories is described below.

Figure 4

Like all rural states, our highway and bridge system is the backbone of Maine’s transportation system. Accordingly, this Work Plan invests more than \$3.25 billion dollars in the highway and bridge system – including capital, maintenance, and operations – constituting about 72 percent of this Work Plan.

a. Highway and Bridge Capital Work. This Work Plan includes \$2.4 billion for highway and bridge capital-related work over the three-year period. These investments include safety and spot improvements, bridge replacements and rehabilitation, highway reconstruction and rehabilitation, pavement preservation projects, and light capital paving. Additionally, there are several improvements focused on adaptation to climate change and village improvements mobility improvements. The majority of these, non-asset management, projects are supported by special state or federal funding. This three-year Work Plan includes:

- 235 bridge construction and 121 bridge engineering projects (valued at \$975 million).
- 147 miles of highway construction and rehabilitation (valued at \$465 million).
- 1,030 miles of preservation paving (valued at \$558 million).
- 227 highway safety and spot improvements (valued at \$213 million).
- 2,100 miles of light capital paving (valued at \$120 million).

The production bar charts below (known as “widget charts” within MaineDOT) depict the total number and cost of most highway and bridge capital projects funded for construction in Work Plans over time, including the costs of construction, engineering, and property acquisition. As you can see, this 2026 Work Plan is continuing the *making smart and steady investment in highway and bridge infrastructure*.

b. Highway and Bridge Operations. The maintenance and operation of Maine’s extensive highway and bridge system accounts for a large portion of MaineDOT’s overall work activities. This work is essential to the movement of people and goods and to the health of the Maine economy. It is also an essential and cost-effective means of protecting the state highway and bridge system. From year to year, and within CY2026, actual expenditures for this work will depend on the constantly changing condition of the transportation system and, importantly, on weather. For those reasons, overall expenditures for routine maintenance and operation of the highway and bridge system are shown in the Work Plan as approximate, annual budget figures. Highway and bridge maintenance and operations work accounts for \$656 million in this Work Plan, while three-year annual averages for major maintenance and operations work include:

- \$53.7 million in winter maintenance.
- \$28.5 million in drainage maintenance.
- \$20.0 million in custodial maintenance.
- \$14.5 million in bridge and other infrastructure inspections.
- \$12.1 million in surface and base maintenance.
- \$12.2 million in bridge and structural maintenance.
- \$7.6 million in operational and safety maintenance.

c. Multimodal Capital Work. This Work Plan includes substantial capital investments in modes of transportation other than the privately owned automobile, including active transportation (walking, bicycling, etc.), aviation, transit, the state ferry service, passenger rail, freight rail, and ports and marine. Overall, as depicted as the purple wedge in Figure 4, the total value of multimodal capital work in this Work Plan is \$640 million, representing 14 percent of the total three-year Work Plan.

d. Multimodal Operations. This Work Plan also includes significant funding from federal and state sources to operate and maintain multimodal transportation, including substantial funding for passenger rail, the state ferry service, and transit operations. Overall, as depicted as the pink wedge in Figure 4, the total value of multimodal operational funding in this Work Plan is \$342 million, comprising about seven percent of the total three-year Work Plan.

When capital and operational work are combined, this Work Plan includes over \$982 million dollars in investment in multimodal systems, representing about 22 percent of this Work Plan.

e. Active Transportation. MaineDOT continues to implement Active Transportation (AT) capital investments in this Work Plan, with a total of \$93 million for stand-alone AT projects. This work does not include the tens of millions of dollars of AT investments that are routinely funded as part of highway, bridge, or other capital projects.

MaineDOT’s AT activities also support local and regional efforts to improve the walkability,

bikeability, livability, and social vibrance of communities. MaineDOT has created a new community partnership initiative, the Active Transportation Partnership Initiative, which dedicates \$1 million in state funds per year to be matched with local funds. Support is provided through educational programming, on-site technical assistance, and grant funding to design and construct active transportation infrastructure improvements.

- f. Aviation. Aviation is an integral part of a multimodal transportation system. This Work Plan provides \$177 million for aviation. Funding includes \$175M for capital that prioritizes pavement condition and snow removal equipment. An additional \$2M is programmed for operational expenses.

- g. Transit. This Work Plan provides \$292 million in transit investments across the state, including \$106 million in capital projects and \$186 million to support transit operations.

Transit capital investments are aimed at improving fleet reliability and expanding access. This Work Plan includes \$30M to update capital equipment in the Bar Harbor/Trenton area.

The Work Plan also includes \$24M in State subsidy for Transit operations and capital.

- h. Maine State Ferry Service. From mainland terminals in Rockland, Lincolnville, and Bass Harbor, the Maine State Ferry Service (MSFS) serves six islands in Penobscot and Blue Hill Bays: Vinalhaven, North Haven, Matinicus, Islesboro, Swans Island, and Frenchboro. These islands have approximately 2,800 year-round residents, yet the summer populations are much larger due to seasonal residents and visitors. The ferry is an economic and social lifeline for these communities.

This Work Plan provides \$144 million in support of this ferry service, including nearly \$86 million in capital projects and \$58 million for ongoing operations.

Ferry service capital work includes replacing aging vessels, made possible by federal funding in the BIL, and landside capital improvements. This work includes:

- \$33 million for the design and construction of landside improvements at Lincolnville and Islesboro to accommodate the larger, hybrid ferry.
- \$39M to replace the Margaret Chase Smith ferry.
- \$1 million to paint the Peaks Island transfer bridge.

As noted above, this Work Plan includes three years of the cost of ongoing operations of the MSFS. Farebox prices are adjusted periodically to cover half of the operating costs, while the other half, or about \$9 million per year, is an ongoing state subsidy, largely from the Highway Fund.

- i. Passenger Rail. The Northern New England Passenger Rail Authority (NNEPRA) manages the Amtrak Downeaster passenger rail service, which runs five trains per day from

Brunswick to Boston. The Maine State Rail Plan outlines both short- and long-term strategies specific to passenger rail in Maine, including the improvement of transit, bicycle, and pedestrian connections to the Downeaster rail service, operated by NNEPRA.

This Work Plan also provides nearly \$91 million in federal, state, and farebox resources to support operations of existing Downeaster service over three years.

- j. Freight Rail. This three-year Work Plan provides \$70 million for capital freight rail projects across the state. Projects include:
- \$13 million for the on-going Industrial Rail Access Program (IRAP) program – a 50/50 state/private program that fulfills “last mile” rail needs. The IRAP will support heavy rail cars and double-stack clearances.
- k. Ports and Marine. This Work Plan provides \$74 million for capital projects to support the development of Maine’s ports and marine infrastructure. Highlights of this capital work include:
- \$46M to build a breakwater in Lubec to provide a safe working environment for commercial fishing operations.
 - \$13M in Small Harbor Improvement Plan (SHIP) projects.
 - \$3M in a Boating Infrastructure Grant (BIG) from the U.S. Fish and Wildlife Service to expand transit marina docking at the Long Wharf in Portland.

In addition to the highway and bridge and multimodal uses of funds set forth above, there are two additional small but important parts of MaineDOT’s work.

- Systems Management Work. System management is necessary to coordinate asset management of the entire transportation network. Although most discussions about transportation usually involve individual projects; to be effective and efficient, you need to step back and look at the entire system as a whole – i.e., see the forest for the trees. System management work includes continuously monitoring the performance and condition of transportation assets and assuring that the projects and scopes selected achieve the most customer value. System management also involves ensuring that we are meeting customer expectations and system needs while meeting compliance requirements and doing so with available resources. This work includes asset management, planning, environmental work, compliance, and safety efforts. The value of such work in this Work Plan totals \$142 million, or three percent of the total Work Plan.

- Administration. Administration includes executive functions, finance and administration, human resources, most non-crew training, legal, information technology, federal compliance activities, and other traditional administrative activities needed to support any large and complex organization. The value of such work in this Work Plan totals \$151 million, representing three percent of the total value of the Work Plan.

Annually recurring work items for MaineDOT work units that perform system management and administration appear as three annual listings. These and other activities are provided in the Statewide Operations tab.

Embedded within these two sections and worthy of special note is the amount of work presented in this Work Plan from special programs. These are programs aimed at delivering civil works that are sometimes outside the scope of traditional transportation infrastructure but for which MaineDOT could use its procurement, design, and/or project development skills to deliver for local communities or related infrastructure. Three specific special programs are included in the uses:

Infrastructure Adaptation – \$41.8 million largely showing in the highway and bridge capital category but also with small amounts in the ports and marine category.

Working Waterfronts – \$17.1 million for recovery from storms of late 2023 and early 2024 along Maine’s working waterfronts. Many of the awards from this program are shown in the ports and marine capital category.

Municipal Large Culverts – \$9.5 million for replacement of significant structures on local roads through a competitive grant program showing in the highway and bridge capital category.

C. Future Funding Outlook

As outlined above, predicting future funding is the toughest part of constructing any Work Plan. As discussed previously projections are especially challenging right now given the lack of a federal appropriations bill which resulted in the longest federal government shutdown to date. Additionally, there is no authorization for surface transportation funding beyond federal fiscal year 2026. Additionally, there is a persistent state capital structural gap in beginning in 2028 and thereafter. This work plan was built with the best information available at the time and remains conservative in projections of future funding and its makeup.

This work plan reduces overall funding, generally due to decreased opportunities in federal discretionary funding. In most resource allocation groups, we have dipped below the “Pragmatic” funding level. With a new federal authorization and a temporary or permanent solution for the State capital structural gap. MaineDOT hopes there can be a return to pragmatic levels of funding that allows smart and steady improvement. Ideally that will come in the form of expanded formula funds.

To counter the uncertainty in future funding, MaineDOT has built into project selections a large number of preliminary engineering only projects. This maintains flexibility to deliver on schedule if overall resources exceed expectations, while at the same time limiting the commitment to deliver a project in the work plan timeframe. This positions the Department with flexibility to adjust when the financial landscape becomes clearer.

Despite the funding uncertainty at both the federal and state levels, it is rational to assume that the current base levels of funding are maintained and the more competitive or discretionary sources are reduced. While somewhat more conservative than past projections, MaineDOT feels this is the prudent course of action for programming future work given the current circumstances.

Reading the Work Plan

Reading the Work Plan

The *Work Plan* describes *all* projects and activities of the department. Listings in the *Work Plan* include projects and activities planned for Calendar Years (CYs) 2026, 2027 and 2028. CY 2026 projects that are not listed as PE-only will proceed as indicated in 2026, unless something unforeseen occurs. The timing of CY 2027 and 2028 projects are flexible to changing needs, and schedules may change in next year's *Work Plan*. *CY 2027 and 2028 capital projects are typically in some stage of pre-construction development and projected to begin sometime in 2027 or 2028, so long as the funding assumptions in the *Work Plan* unfold as anticipated.

Work Included in the Work Plan

The *Work Plan* includes all work for the department, including capital projects, maintenance and operations activities, and administrative efforts. Specifically, it includes such projects as Planning and Feasibility Studies, PE-Only projects, capital efforts that have not yet been advertised and should advertise within the timeframe of the *Work Plan*, administration activities and most maintenance and operations activities that will occur within the three-year timeframe of the *Work Plan*. Specific details about each of these types of projects or efforts may be found in the *Work Plan Terms and Definitions*.

What's Not Included in the Work Plan

The *Work Plan* does not include projects, activities or efforts that will advertise or have already been advertised prior to CY 2026 of the *Work Plan*. Thus, some projects that are currently ongoing are not listed in this *Work Plan* but may be listed in prior publications.

Work Plan Tabs

- The **County Tabs** contain location-specific lists - sorted alphabetically by County. Projects and activities are ordered alphabetically by locality. Those located across municipal boundaries are shown in an anchor community only, to avoid duplication.
- The **Statewide Capital Programs** tab includes capital work items that are not tied to a specific location.
- The **Statewide Operations** tab describes all other department operations and administrative activities, both internal to MaineDOT and in partnership with other agencies.

The Statewide Capital Programs and Statewide Operations lists are displayed similarly to the location-specific County lists. Work item listings appear as represented in the following graphic:

In some cases, you may see groups of projects, as shown below, with the same location detailed but with different scopes. These projects represent rehabilitation efforts that are still one complete effort, just broken out into specific work activities to be advertised on their own. There could be as few as two breakout projects to many breakout projects.

027676.00		Highway			
2025	Ellsworth, Hancock	Construction/Rehabilitation	Main Street/Washington	Beginning 0.02 of a mile northeast of McKenzie Avenue and extending northeast	
HCP 3		Rural Highways	Jct. Road	3.75 miles.	\$5,520,000
		HMA Surface			
027676.10		Highways			
2025	Ellsworth, Hancock	Highways - General	Main Street/Washington	Beginning 0.02 of a mile northeast of McKenzie Avenue and extending northeast	
HCP 3		Pre-Purchase Of Construction Materials	Jct. Road	3.75 miles.	\$175,000

Tips on Using This *Work Plan*

This *Work Plan* is published on the MaineDOT website in printable and searchable formats. This Work Plan is also published on a [companion webpage](#) in both printable and searchable formats. In addition to work scheduled for the next three years, the *Work Plan* web page also provides municipality-specific reports including a summary of the highway maintenance work completed in the preceding year, current Local Road Assistance Program (LRAP) payments, and recently completed capital projects. There is also a link to MaineDOT's interactive [Map Viewer](#) which includes Highway Corridor Priority (HCP) designations and other features on Maine's transportation system.

028820.13 2026	Hampden	Special Programs General Municipal Large Culverts	Marina Road	Municipal large culvert replacement. Located over Sucker Brook.	\$200,000
028816.64 2026	Harpswell	Special Programs General Working Waterfront	C. Hole	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$800,000
028820.15 2026	Harrison	Special Programs General Municipal Large Culverts	Edes Falls Road	Municipal large culvert replacement. Located over Carsley Brook.	\$200,000

ID/Year	Municipality	Scope	Name	Description	Total Project Cost
028820.16 2026	Harrison	Special Programs General Municipal Large Culverts	Carsley Road	Municipal large culvert replacement. Located over Carsley Brook.	\$200,000
028818.03 2026	Islesboro	Special Programs General Infrastructure Adaptation	Main Road	Scoping and design to move Phase 1 of the project to 60% design to meet the Maine Climate Council's guidance to managing sea level rise.	\$75,000
028002.10 2026	Kennebunkport	Special Programs General Infrastructure Adaptation	Pier Road	Preliminary engineering and design to adapt Pier Road and infrastructure to flooding hazard and SLR.	\$100,000
028820.17 2026	Lakeville	Special Programs General Municipal Large Culverts	Depot Road	Municipal large culvert replacement. Located over Dill Brook.	\$200,000
028820.18 2026	Lewiston	Special Programs General Municipal Large Culverts	River Road	Municipal large culvert replacement.	\$200,000
028000.08 2026	Lincolnville	Special Programs General Municipal Large Culverts	Youngtown Road	Municipal large culvert replacement. Located 0.51 of a mile east of Camden Road.	\$275,000
028820.25 2026	Litchfield	Special Programs General Municipal Large Culverts	Dennis Hill Road	Municipal large culvert replacement. Located 0.22 of a mile east of Route 9.	\$200,000
028816.46 2026	Lubec	Special Programs General Working Waterfront	Town of Lubec	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$238,000
028818.04 2026	Machiasport	Special Programs General Infrastructure Adaptation	Route 92	Construction to move 1,035 feet of Port Road inland along the exposed section.	\$475,000
028818.05 2026	Matinicus Isle Plt	Special Programs General Infrastructure Adaptation	Harbor Road	Scoping and design to generate viable adaptation options. Power Plant, Power Plant Fuel Tanks, Power Plant Fuel Pipeline.	\$75,000

ID/Year	Municipality	Scope	Name	Description	Total Project Cost
028818.06 2026	Medway	Special Programs General Infrastructure Adaptation	Libby Street	Design and the construction of a storm water ditch.	\$178,000
028820.19 2026	Medway	Special Programs General Municipal Large Culverts	Hathaway Road	Municipal large culvert replacement. Located over Hathaway Brook.	\$191,000
028818.12 2026	Mexico	Special Programs General Infrastructure Adaptation	Dix Avenue	Renovate the existing pump station at the Wastewater Pumping Station through floodproofing measures, and new exterior flood doors.	\$4,000,000
028816.65 2026	Milbridge	Special Programs General Working Waterfront	C. Rumery	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$100,000
028002.12 2026	Minot	Special Programs General Infrastructure Adaptation	Bucknam Bridge Road	Scope and design a solution to mitigate flooding.	\$53,000
028820.20 2026	Mount Vernon	Special Programs General Municipal Large Culverts	Bean Road	Municipal large culvert replacement. Located over Moose Pond Stream.	\$200,000
028816.54 2026	North Haven	Special Programs General Working Waterfront	JO Brown & Sons	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$1,500,000
028818.08 2026	Northport	Special Programs General Infrastructure Adaptation	Shore Road	Shoreline stabilize of the bank and Shore Road at Kelly Cove.	\$133,000
028002.13 2026	Penobscot	Special Programs General Infrastructure Adaptation	Salt Storage Facility	Design of a new salt sand storage facility.	\$105,000
028002.14 2026	Poland	Special Programs General Infrastructure Adaptation	Various locations	Construction of stormwater management improvements.	\$121,000

ID/Year	Municipality	Scope	Name	Description	Total Project Cost
028002.15 2026	Portland	Special Programs General Infrastructure Adaptation	Union Branch Pathway	Construction of stormwater improvements.	\$403,000
028816.22 2026	Portland	Special Programs General Working Waterfront	Maine Wharf	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$4,000,000
028816.49 2026	Portland	Special Programs General Working Waterfront	Widgery Wharf	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$4,000,000
028818.10 2026	Portland	Special Programs General Infrastructure Adaptation	Route 1A	Replace an existing 18-inch storm drain with a 42-inch storm drain between Maple Street and Center Street. A new 42" separated storm drain outfall with tidal backflow prevention valve will be installed at the south-western corner of Portland Fish Pier.	\$3,600,000
028000.13 2026	Presque Isle	Special Programs General Municipal Large Culverts	Egypt Road	Municipal large culvert replacement. Located 0.17 of a mile north of Butterfield Road.	\$320,000
028000.15 2026	Prospect	Special Programs General Municipal Large Culverts	Hawes Bridge Road	Municipal large culvert replacement. Located over Lane Brook.	\$350,000
028000.16 2026	Randolph	Special Programs General Municipal Large Culverts	Barber Road	Municipal large culvert replacement. Located over Togus Stream.	\$1,650,000
028002.16 2026	Rockland	Special Programs General Infrastructure Adaptation	Crescent Street	Construction of completed designs for storm water separation.	\$847,000
028816.68 2026	Rockport	Special Programs General Working Waterfront	Working Waterfront Grant Program	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$4,000,000
028818.11 2026	Roque Bluffs	Special Programs General Infrastructure Adaptation	Schoppee Point Road	Scoping and design to develop design requirements, prepare construction drawings and specifications, and identify permitting requirements.	\$71,000

ID/Year	Municipality	Scope	Name	Description	Total Project Cost
028818.13 2026	Saco	Special Programs General Infrastructure Adaptation	Route 9	Upsize, raise, and widen the footprint of the large culvert (#1022812) to accommodate future storm conditions. Located 0.06 of a mile west of Seaside Avenue.	\$1,260,000
028818.15 2026	Saint George	Special Programs General Infrastructure Adaptation	Cold Storage Road/Factory Road/Route 131	The proposed project will develop and evaluate approaches for addressing current and future damage to these roads due to coastal flooding and wave action.	\$71,000
028816.47 2026	Scarborough	Special Programs General Working Waterfront	Town of Scarborough	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$183,000
028818.14 2026	Sorrento	Special Programs General Infrastructure Adaptation	Waukeag Avenue/Main Street	Scoping and construction of sewer and storm drain improvements that consist of constructing a dedicated storm drain to convey precipitation away from the sanitary sewer system and alleviate backups.	\$517,000
028816.66 2026	South Bristol	Special Programs General Working Waterfront	Osier Seafood	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$500,000
028816.37 2026	South Thomaston	Special Programs General Working Waterfront	Spruce Head Fisherman's Coop	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$125,000
028816.36 2026	Southwest Harbor	Special Programs General Working Waterfront	S. Harper	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$800,000
028818.16 2026	Stow	Special Programs General Infrastructure Adaptation	Kezar Lake Road	Scoping, design, and construction by excavating drainage ditches and rebuilding 2,904 feet of the road by increasing the road height by 18 inches.	\$76,000
028818.17 2026	Surry	Special Programs General Infrastructure Adaptation	Newbury Neck Road	Scoping and design of a low-lying portion of a municipal road at the narrowest point.	\$75,000
028816.67 2026	Swans Island	Special Programs General Working Waterfront	L. May	Grant Program for Wharves and Piers that provide a significant and compelling benefit to Maine's commercial fishing and aquaculture industries.	\$300,000

ID/Year	Municipality	Scope	Name	Description	Total Project Cost
028820.23 2026	Vassalboro	Special Programs General Municipal Large Culverts	Mill Hill Road	Municipal large culvert replacement. Located over Seven Mile Brook.	\$200,000
028002.20 2026	Vinalhaven	Special Programs General Infrastructure Adaptation	Retaining wall	Construct retaining wall to protect parking lot from storm surge.	\$496,000
028002.02 2026	Westbrook	Special Programs General Infrastructure Adaptation	Geotechnical investigation	Geotechnical investigation.	\$1,390,000
028820.24 2026	Windham	Special Programs General Municipal Large Culverts	Falmouth Road	Municipal large culvert replacement. Located over McIntosh Brook.	\$200,000
028000.20 2026	Winslow	Special Programs General Municipal Large Culverts	North Pond Road	Municipal large culvert replacement. Located 0.01 of a mile north of Shorey Road.	\$471,000
028818.19 2026	Wiscasset	Special Programs General Infrastructure Adaptation	Route 1	Phase 1 of constructing a new treatment plant.	\$4,000,000
029494.00 2026	Yet to be determined	Special Programs General Infrastructure Adaptation	Maine Infrastructure Adaption Fund	Program for municipalities, tribes, and infrastructure districts ("Applicants") to adapt their critical infrastructure to reduce vulnerability to climate change. NOAA Grant recipient administered through Efficiency Maine.	\$22,100,000

WORK PLAN TERMS AND DEFINITIONS

ACIP: Airport Capital Improvement Plan.

ADA or Americans with Disabilities Act: The Americans with Disabilities Act prohibits discrimination and ensures equal opportunity for persons with disabilities in employment, government services, public accommodations, commercial facilities and transportation.

Administration: The ongoing functions that support MaineDOT programs and projects, including department-wide financial and administrative services, financial administration for federal programs, human resources, legal services, operation of the Executive Office, geographic information systems, performance measurement and accountability, the Freight and Business Services Office, the Business and Community Relations Office and engineering oversight.

Airport Master Plan: An Airport Master Plan is a comprehensive study of an airport that describes short-, medium- and long- term development plans to meet future aviation demand.

Apron: The area of an airport intended to accommodate the loading and unloading of passengers and cargo, and the refueling, servicing and parking of aircraft.

Asset Location Management: Managing transportation asset data, coordinating data between systems, analyzing data and work-reporting, and producing reports, maps and data files.

Asset Name: Names the publicly owned or publicly used facility or program on which work is to occur.

Aviation: Includes crack-sealing to preserve airport runway pavement.

Avigation Easement: Avigation easement is an easement or right in the airspace above or in the vicinity of a particular property. It includes the right to create such noise or other effects as may result from the lawful operation of aircraft in such airspace and the right to remove any obstructions to such overflight. This in effect prevents the landowners near airports from building above a set height or requires the trimming of trees.

AVL or Automatic Vehicle Location: Automatic Vehicle Location is a means of determining the location of a vehicle and transmitting that information to a receiver, allowing transit agencies to determine location of buses, wait times and other information.

ATCMTD or Advanced Transportation and Congestion Management Technologies

Deployment Grant: The FAST Act established the Advanced Transportation and Congestion

Items in Italics indicate Statewide Operations or Statewide Capital Programs

Management Technologies Deployment Program to make competitive grants for the development of model deployment sites for large scale installation and operation of advanced transportation technologies to improve safety, efficiency, system performance, and infrastructure return on investment.

ATSPM or Automated Traffic Signal Performance Measures: Automated Traffic Signal Performance Measures (ATSPMs), included in the [Every Day Counts 4](#) technology initiative, is defined as a suite of performance measures, data collection and data analysis tools to support objectives and performance based approaches to traffic signal operations, maintenance, management and design to improve the safety, mobility and efficiency of signalized intersections for all users.

Bicycle- Pedestrian: Improve transportation and safety, encourage healthful activities, and promote economic development, while improving the livability and vitality of local communities.

BIG or Boating Infrastructure Grants: Boating Infrastructure Grants is a program of the U.S. Fish and Wildlife Service to support boating infrastructure.

BPI or Business Partnership Initiative: Provides state funding to match private and municipal investment in highway improvements performed to facilitate economic development.

BR: Bureau Request for Maintenance and Operations.

Bridge: A span length of at least 20 feet, in accordance with federal law.

Bridge and Structural Maintenance: Investments to prevent or repair routine problems, and to extend the useful life of bridges until capital funding becomes available.

Bridge Deck: The portion of the bridge that provides direct support for vehicular and pedestrian traffic.

Bridge Preservation: Bridge-strengthening and other bridge improvements on state-owned bridges.**Bridge Scour Countermeasures:** Techniques employed to mitigate the effects of sediment scour and other hydraulic stress on bridge structures.

Bridge Substructure: The parts of a bridge that are below the bottom of the girders. Pilings, shafts, spread footings and columns may be part of the substructure.

Bridge Superstructure: The parts of a bridge that are above the bottom of the girders. Girders, bridge deck and bridge railing are parts of the superstructure.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

BUILD: Better Utilizing Investments to Leverage Development. FHWA Discretionary Grant program providing funding for investments in surface transportation infrastructure with a significant impact in their local or regional communities.

Building and Lot Maintenance: Supports maintenance of over 600 buildings and more than 100 building lots, as well as maintenance of ancillary lot structures.

CADD: Computer Aided Design and Drafting.

Catch Basin: A reservoir for collecting surface drainage or runoff.

CBITD: Casco Bay Island Transit District. The ferry system that serves Portland and nearby islands in Casco Bay.

CE or Construction Engineering: The supervision and inspection of construction activities.

CHBP: Competitive Highway Bridge Program. FHWA Discretionary Grant program providing funding for highway bridge replacement or rehabilitation projects on public roads that demonstrate cost savings by bundling at least two highway bridge projects into a single contract.

Chip Sealing: Consists of a layer of asphalt binder that is overlaid by a layer of embedded aggregate that furnishes, among other things, protection to the asphalt layer from tire damage and macrotexture that creates a skid-resistant surface.

CIPR or Cold in Place Recycling: The process of removing a portion of the pavement surface, processing it to a uniform particle size, and mixing with emulsion and Portland cement in a continuous portable operation to create a recycled pavement layer.

CMAQ or Congestion Mitigation for Air Quality: A source of Federal-aid funding for transportation improvements designed to improve air quality and mitigate congestion.

CMQ, CMQR: Central Maine and Quebec Railway.

Cold Storage Building: A building facility used to store salt and sand materials for use in maintaining a roadway facility in winter.

Communications and Outreach: This program includes the Local Transportation Assistance Program, work zone-safety and bicycle-pedestrian safety education, and audio-visual and other creative services.

CON: Construction phase of project work.

Contract Administration: Costs related to developing and administering contracts.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

CPR or Cyclical Pavement Resurfacing: The application of a 3/4" overlay used to preserve lower priority roads that are considered "built".

Crack Sealing: Roadway or runway surface crack sealing treatments, to prevent surface damage from freeze thaw cycles.

Crew Operations: Crew management and planning, and overall work preparation activities. Equipment transport and certain repairs also fall into this category.

CRISI: Consolidated Rail Infrastructure and Safety Improvements. FRA Discretionary Grant program providing funding for a wide range of projects that improve the safety, efficiency and reliability of intercity passenger and freight rail systems.

CSL or Customer Service Level: A measure of how a road compares to other roads of the same priority across the state, based on safety, condition and service.

Culvert: Any pipe or other structure under a roadway that has a diameter of less than 5 feet, or multiple pipes or other structures with a combined opening of less than 20 square feet in area.

Custodial Maintenance: Activities aimed at keeping the assets clean and functioning, such as patrolling and inspecting highways, sweeping, cleaning bridges, and vegetation management.

Debt Service: Debt service is the cash required over a given time period for the repayment of interest and principal on a debt instrument.

Description: Provides a detailed description as to the specific location of where work is to occur and/or details the type of work that is to occur over a specific area.

Dolphin: Man-made marine structure that extends above the water level and is not connected to shore.

Drainage Maintenance: Removing water from the highway structure, which increases roadway longevity—ditching, catch basin and culvert cleaning, and installation/replacement of drainage structure.

DSRC or Dedicated Short-Range Communications: One-way or two-way short-range to medium-range wireless communication channels specifically designed for automotive use and a corresponding set of protocols and standards.

DSRX: Downeast Scenic Railroad.

Easement: A certain right to use the real property of another without possessing it.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

EMAS or Engineered Materials Arresting System: EMAS uses crushable material at the end of a runway to stop an aircraft that overruns the runway.

Employee Education and Training: All costs associated with creating, presenting and attending various trainings, as well as costs associated with attending meetings and conferences.

EMR: Eastern Maine Railway.

Engineering and Professional Services: Legal work, right-of-way, design, geotechnical engineering, surveying, civil rights, planning, project management and utility coordination.

Enhanced Project Scoping: A planning process intended to manage future risk by detailing the basic need, possible impacts, roadway design matters, potential cost and stakeholder issues of proposed projects.

Environmental Stewardship: The collection, documenting, permitting and administration of environmental issues associated with maintenance activities or projects.

ESRI: Environmental Systems Research Institute is an international supplier of geographic information system (GIS) software, web GIS and geodatabase management applications.

FAA or Federal Aviation Administration: The national aviation authority of the United States with powers to regulate all aspects of civil aviation, including inspecting and rating civilian aircraft and pilots, enforcing the rules of air safety, and installing and maintaining air-navigation and traffic control facilities.

Feasibility Study: An analysis and evaluation of a proposed action which is based on extensive investigation and research to determine order-of-magnitude costs and benefits for the proposed action.

Federal Functional Classification: The process by which both rural and urban streets and highways are grouped into classes.

Federal Fund: A fund in which all resources are provided by the Federal Government.

FFY or Federal Fiscal Year: Federal Fiscal Year, which begins October 1st.

FHWA or Federal Highway Administration: The Federal Highway Administration (FHWA) is a division of the United States Department of Transportation that specializes in highway transportation.

Finger Floats: Floating parallel docks for use as a boat slip.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

Fog Seal: A method of adding asphalt to an existing pavement surface to improve sealing or waterproofing, prevent further stone loss by holding aggregate in place, or simply improve the surface appearance.

Freight: The movement of goods or cargo by ship, train or truck.

FTA or Federal Transit Administration: The FTA provides financial and technical assistance to local public transit systems, including buses, subways, light rail, commuter rail, trolleys and ferries. FTA also oversees safety measures and helps develop next-generation technology research.

FTA 5303: Funding provided by FTA for Metropolitan Transportation Planning.

FTA 5304: Funding provided by FTA for Statewide and Non-metropolitan Transportation Planning.

FTA 5307: Funding provided by FTA for transit investments, operating assistance and transportation planning in urbanized areas.

FTA 5310: Funding provided by FTA to improve transportation for seniors and individuals with disabilities.

FTA 5311: Funding provided by FTA to support public transportation in rural areas.

FTA 5337: Funding provided by FTA to finance capital projects to maintain public transportation systems in a state of good repair.

FTA 5339: Funding provided by FTA to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities.

Full Depth Reclamation with Foamed Asphalt: The foamed asphalt stabilization process involves full depth reclamation of all the existing hot mix asphalt and some of the underlying sub-base gravel, shaping this material to the desired grade and cross-slope and compacting the material to specifications.

Funding: Comprises the total funding being applied to a project, specific to the scope.

GARVEE: A Grant Anticipation Revenue Vehicle (GARVEE) is any bond or other form of debt repayable, either exclusively or primarily, with future Federal-aid highway funds under Section 122 of Title 23 of the United States Code.

General Fund: A fund used to account for all transactions of a governmental unit that are not accounted for in another fund.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

General Obligation Bonds: General obligation (G.O.) bonds are debt instruments issued to raise funds for public works. G.O. bonds are backed by the full faith and credit of the issuing entity.

Grader Work: Reshaping the shoulder of the highway to facilitate runoff to ditches.

Guardrail: Railing designed to keep vehicles from straying into dangerous or off-limits areas.

Guardrail Crash Cushion: Energy-absorbing cushioning device that offers protection from collisions with fixed guardrail installations.

Hangar: A large building for storing and maintaining aircraft.

HCD or Habitat Connectivity Design: Design incorporating key strategies to protect biodiversity, maintain viable ecosystems and wildlife populations and facilitate the movement and adaptation of wildlife populations.

HCP or Highway Corridor Priority: A classification system based on common-sense factors including the economic importance of the road. HCP model classifies all 23,500 miles of public highways as one of five levels:

- **HCP 1:** 1,760 miles - 8% of statewide mileage; 42% of Maine vehicle-miles traveled (VMT); the Maine Turnpike, all Interstate miles, and key principal arterials.
- **HCP 2:** 1,355 miles - 6% of statewide mileage; 17% of VMT; non-Interstate and high-value arterials.
- **HCP 3:** 2,211 miles - 9% of statewide mileage; 16% of VMT; the remaining arterials and the most significant major-collectors.
- **HCP 4:** 3,731 miles - 16% of statewide mileage; 12% of VMT; the remaining major-and urban-collector highways, as well as minor-collector highways and state-aid roads.
- **HCP 6:** 14,362 miles - 61% of statewide mileage; 13% of VMT; local roads and streets that are the year-round responsibility of municipalities.

Heavy Pavement Treatment: Applied to roadways in fair to good condition that have deteriorated too far for light treatments to be effective, but are still able to be preserved with a more substantial treatment.

Highway and Bridge Capital: Capital investments for highway and bridge improvements.

Highway and Bridge Maintenance: Maintenance investments for the highway and bridge program.

Highway Fund: The State Highway Fund is an account that receives its resources mainly through fuel taxes and is used to fund projects that are related to the State's highway system.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

Highway Light Capital Paving: (LCP) Program performs light paving treatments to improve safety and drivability, and to extend the life of lower-priority roadways.

Highway Preservation Paving: Preserves the investments in existing highways with treatments such as repaving, crack sealing, drainage repair, etc., in each region and the Interstate.

Highway Preservation Paving 1 1/4" overlay: Projects scoped for this treatment will receive a 1 1/4 inch HMA surface covering the travel way and any adjacent paved shoulders.

Highway Preservation Paving 3/4" overlay: Projects scoped for this treatment will receive a travel way leveling course followed by a 3/4 inch HMA surface course covering mainline travel way and shoulders.

Highway Reconstruction: The rebuilding of an existing highway to modern design standards to ensure adequate levels of service for travelers.

Highway Rehabilitation: Structural enhancements that extend the service life of an existing pavement and/or improve its load-carrying capacity.

Highway Safety and Spot Improvements: An activity grouping that includes striping, guardrail, rumble strips, crack-sealing, signage, measures to reduce vehicle/large animal collisions, improvements to visitor information centers, and installation of pedestrian crossing-signals.

Highway System Operations: Project-level expenses across multiple types of projects, and various operational activities including: fees for river gauges, landscaping, operating costs for the data collection vehicle, operation of intelligent transportation system field devices and advanced transportation management system operations.

HMA or Hot Mix Asphalt: Hot mix asphalt is a combination of approximately 95% stone, sand or gravel bound together by asphalt cement-a product of crude oil. Asphalt cement is heated aggregate, combined, and mixed with the aggregate at an HMA facility.

HTF or Highway Trust Fund: An account established by law to hold federal highway user taxes that are dedicated for highway and transit-related purposes. The HTF has two accounts: the Highway Account and the Mass Transit Account.

ID or Identification Number: The primary means of identifying and tracking projects within programs and information systems.

IMT: The International Marine Terminal, located on the Portland waterfront.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

Information Technology Support: Funds development, operation and maintenance of the department's technology systems through the state Office of Information Technology.

INFRA: Infrastructure for Rebuilding America. USDOT Discretionary Grant program providing funding for projects that address critical issues facing our nation's highways and bridges by creating opportunities for all levels of government and the private sector to fund infrastructure, using innovative approaches to improve the processes for building significant projects, and increasing accountability for the projects that are built.

Infrastructure Inspection and Inventory: Collection, monitoring and review of the department's assets, which include highways, rail, ferry, structures and appurtenances.

Intermodal Facility: A transportation facility designed to facilitate the change in mode for passenger or freight movement.

Interpretive Signs: Signs used to inform and make visitors aware of notable features of an area.

Inventory and Performance Management: A grouping of work that includes vehicle size/weight classification, traffic counts, highway classification, traffic studies, bridge inspections, the Safety Office, and operation of the Results and Information Office (RIO).

ITS or Intelligent Transportation System: Electronics, communications, or information processing used singly or in combination to improve the efficiency or safety of a surface transportation system.

Large Culvert: A large culvert is a pipe or other structure that has a clear span between 5 and 10 feet, or multiple pipes or structures with a combined opening between 19 and 80 square feet in area.

LCP or Light Capital Pavement: Light Capital Pavement is typically the application of a 5/8" nominal overlay, used as a holding action on unbuilt roads, to improve safety and durability and to extend the life of lower-priority roadways.

LED or Light-Emitting Diode: Semiconductor light sources that are highly efficient, used in highway lighting and signage installation.

Light Pavement Treatment: Intended to provide a new wearing surface for traffic and to protect the underlying pavement on the roadway.

Local Road Assistance or LRAP: The program working with municipal and tribal jurisdictions to provide training, technical assistance and information regarding the construction, maintenance and managing of local roads and bridges in Maine.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

LRFD or Load and Resistance Factor Design: LRFD incorporates state-of-the-art analysis and design methodologies with load and resistance factors based on the known variability of applied loads and material properties. These load and resistance factors are calibrated from actual bridge statistics to ensure a uniform level of safety.

Marine: Programs include the Boating Infrastructure Grant program funded by the U.S. Fish and Wildlife Service, funding for infrastructure improvements for the Maine State Ferry Service, and marine port improvements, statewide.

MCRR: Maine Central Railroad.

MePA or Maine Port Authority: The Maine Port Authority plans, develops, maintains and promotes port and intermodal facilities across the State to stimulate commerce and enhance the global competitiveness for the future wealth and prosperity of Maine.

Microsurfacing: A mixture of asphalt emulsion, graded aggregates (1/4" to 3/8"), mineral filler, water and other additives. The mixture is made and placed on a continuous basis using a travel paver (Slurry Surfacing Machine).

Mill and Fill: A pavement management treatment that extends the life of existing roadways by removing a portion of the roadway surface then replacing it with a suitable depth of new hot mix asphalt.

Mitigation: Actions that avoid, minimize, or compensate for potential adverse impacts.

MNR: Maine Northern Railway.

MPA or Metropolitan Planning Area: The boundaries of a metropolitan planning area (MPA) shall be determined by agreement between the MPO and the Governor. At a minimum, the MPA boundaries shall encompass the entire existing urbanized area (as defined by the Bureau of the Census) plus the contiguous area expected to become urbanized within a 20-year forecast period for the [metropolitan transportation plan](#). The MPA boundaries may be further expanded to encompass the entire metropolitan statistical area or combined statistical area, as defined by the Office of Management and Budget.

The cities and towns included in the **MPA** for each **MPO** are listed below:

ATRC includes Auburn, Lewiston, Lisbon and Sabattus

BACTS includes Bangor, Bradley, Brewer, Hampden, Hermon, Indian Island, Milford, Old Town, Orono, Orrington and Veazie

Items in Italics indicate Statewide Operations or Statewide Capital Programs

KACTS includes Berwick, Eliot, Kennebunk, Kennebunkport, Kittery, Ogunquit, South Berwick, Wells, and York

PACTS includes Biddeford, Cape Elizabeth, Cumberland, Falmouth, Freeport, Gorham, North Yarmouth, Old Orchard Beach, Portland, Raymond, Saco, Scarborough, South Portland, Standish, Westbrook, Windham, Yarmouth

MPI or Municipal Partnership Initiative: A method to develop, fund and build projects of municipal interest on the state infrastructure system with MaineDOT as a partner.

MPO or Metropolitan Planning Organization: A federally chartered planning entity responsible for transportation planning and approval of federal transportation funding in federally defined metropolitan areas. Maine has four: Androscoggin Transportation Resource Center (ATRC), Bangor Area Comprehensive Transportation System (BACTS), Kittery Area Comprehensive Transportation System (KACTS) and the Portland Area Comprehensive Transportation System (PACTS).

MTA or Maine Turnpike Authority: The Maine Turnpike Authority is a public entity that was established for the purpose of constructing, maintaining, reconstructing and operating a toll highway from Kittery to Augusta.

Multimodal: A term that describes the transportation of goods or passengers performed by multiple modes of transport. This can include rail, bus, ferry, bicycling, walking and aviation.

Multimodal Capital: Capital outlays for non-highway transportation investments.

Multimodal Operations: Operating outlays for non-highway transportation investments.

Multimodal System Operations: An activity grouping that includes operating support for aviation facilities, bicycle/pedestrian facilities, Visitor Information Centers, transit, and operation of the Maine State Ferry Service.

Multi-use Path: A path or sidewalk designed for use by cyclists and pedestrians, and sometimes motorized vehicles.

NHPP or National Highway Performance Program: A federal program that funds construction and maintenance projects located on the National Highway System.

NHS or National Highway System: A highway system, consisting primarily of existing Interstate routes and a portion of the federally designated principal arterial highways.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

NPDES II MS4: As authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States.

OBU or On-board Unit: A vehicle mounted device used to transmit and receive a variety of message traffic to and from other connected devices (other OBUs and RSUs). Among the message types and applications supported by this device are vehicle safety messages, a primary subject of this standard, used to exchange information on each vehicle's dynamic movements for coordination and safety.

Operational and Safety Maintenance: A work grouping that includes traffic control and roadway delineation and protection, including signage, traffic signal maintenance, lighting, striping, and guardrail installation and maintenance.

PACTS Municipal Partnership Initiative: A program that funds state/ local financial partnerships with municipalities to make highway improvements of local interest in the Portland metropolitan area.

Park and Ride Lots: Designated parking areas for drivers who ride in another vehicle for a portion of their trip.

PE or Preliminary Engineering: Engineering work done prior to advertising a project.

Pedestrian Refuge: A small section of pavement or sidewalk completely surrounded by asphalt or other road materials, where pedestrians can stop before finishing crossing the road.

Pilings: Linear members usually hexagon, square, round or "H" shaped constructed of timber, steel, concrete or a composite of these materials, driven into the earth to carry structural load.

PMRAP or Plant Mix Recycled Asphalt Pavement: A cold pavement mix consisting of reclaimed asphalt materials used as a base to add structure and correct deficient cross-slopes.

Policy, Planning and Research: An activity group that includes management of MaineDOT planning activities and studies, public outreach; project scoping and analysis; Work Plan development; Metropolitan and non-metropolitan planning; and research programs and projects.

Polyurea Reflective Striping: Highly reflective road paint for road lines and asphalt striping.

PPI or Planning Partnership Initiative: This competitive program supports regional planning efforts through grants awarded on a best-value basis.

PPP or Public-Private Partnership: A Public-Private Partnership is a mutually beneficial collaboration between a public agency and a private-sector entity.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

Precision Approach Path Indicator: A visual aid consisting of lights in a single row of either two or four light units set perpendicular to the airport runway centerline. The row of light units is normally installed on the left side of the runway.

Preservation Paving: Paving done to a highway facility that facilitates the preservation of the investment.

Public Transportation Capital: Capital funding for buses and bus facilities under Federal Transit Administration (FTA) intercity, urban, small urban, and rural programs that serve the general public, and elderly and disabled persons. Some FTA funding may be used for either capital or operating expense. This category also includes improvements to park and ride lots.

Public Transportation Operations: Supports statewide operations, planning and administration for buses and passenger rail, including operating support and administration of federal programs, state-funded transit assistance, and operating support for the Downeaster passenger rail service.

Rail: Operational improvements to state-owned rail lines, rail-crossing improvements and the Industrial Rail Access Program (IRAP), which partners with private-sector entities to fund rail improvements that support economic development.

RAISE: Rebuilding American Infrastructure with Sustainability and Equity (RAISE) discretionary grants program to support roads, bridges, transit, rail, ports or intermodal transportation.

Recreational Trails Program: A Federal Highway Administration funding set-aside that MaineDOT transfers to the Maine Department of Agriculture, Conservation and Forestry for improvements to multi-use trails.

Region: A MaineDOT maintenance region. MaineDOT's field operations and facilities are grouped into five large geographic areas of the state (Northern, Southern, Eastern, Western and Mid-Coast).

Roundabout: A type of circular intersection or junction in which road traffic is slowed and flows almost continuously in one direction around a central island to several exits onto the various intersecting roads.

Route: Established path along the public road network. A route's length is typically measured in miles. Locations along the route are typically referenced by their mile point.

ROW, RW or Right of Way: A right of way is a type of ownership or easement granted over the land for transportation purposes. This can be for a highway, public footpath, rail transport, canal, etc. Also, the property acquisition phase of a project.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

RRFB or Rectangular Rapid Flashing Beacon: RRFBs are pedestrian-actuated conspicuity enhancements used in combination with a pedestrian, school, or trail crossing warning sign to improve safety at uncontrolled, marked crosswalks. The device includes two rectangular-shaped yellow indications, each with an LED-array-based light source, that flash with high frequency when activated.

RTAP or Rural Transit Assistance Program: A Federal Transit Administration program that provides a source of funding to assist in the design and implementation of training and technical assistance projects and other support services tailored to meet the needs of transit operators in non-urbanized areas.

RWIS or Road Weather Information System: RWIS is comprised of Environmental Sensor Stations (ESS) in the field, a communication system for data transfer, and central systems to collect field data from numerous ESS. These stations measure atmospheric, pavement and/or water level conditions.

Safety and Spot Improvements: Roadway treatments that address single issues or a series of issues along a roadway.

Scope: The type and extent of the planned treatment, activity, or operation that will take place.

SHIP or Small Harbors Improvement Program: A state program that promotes economic development, public access and improved commercial fishing opportunities, and works to preserve and create infrastructure at facilities in tidewater and coastal municipalities.

SLA, SLR: Saint Lawrence and Atlantic Railroad.

SRTS or Safe Routes to School: An approach that promotes walking and bicycling to school through infrastructure improvements, enforcement, tools, safety education, and incentives to encourage walking and bicycling to school.

STP or Surface Transportation Program: A Federal-aid Highway program that provides flexible funding that may be used by states and localities for projects on any Federal-aid highway including the National Highway System, bridge projects on any public road

Surface and Base Maintenance: Localized pavement repairs, shimming, and paving of certain corridors. This activity also includes the preparation of base gravels or shoulder work.

Taxiway: A defined path established for the taxiing of aircraft from one part of an airport to another.

Items in Italics indicate Statewide Operations or Statewide Capital Programs

Traffic Calming: Changes in street alignment, installation of barriers and other physical measures to reduce traffic speed and/or cut-through volumes, in the interest of street safety, livability and other public purpose.

Transfer Bridge: A structure that facilitates car movement from a dock to a ferry.

UA or Urbanized Area: A continuous urban area as designated by the U.S. Bureau of the Census having a population of 50,000 or more.

Ultra-Thin Bonded Wearing Course: The placement of a thin (3/4") HMA surface course over a polymer modified tack coat membrane placed by a spray paver.

Variable Message Board: Adjustable, digital sign to inform the traveling public.

Vessel Electronic Devices: Electronic devices classed for use in the marine environment, designed for navigation and other marine functions.

VPI or Village Partnership Initiative: Funding for planning, scoping and design for a new state-municipal partnership initiative to improve the economic vitality of village and downtown areas across Maine. Cost shares to be based upon scope, nature of project, and other factors.

W-beam: The **wide flange I beam** (W shape) is a structural steel shape with I (or H) form. Top and bottom plates of a **I beam** are named as flanges and the vertical plate which connects the flanges is named as web. In **wide flange I beams**, flanges are nearly parallel to each other.

Wearing Surface: The surface portion of a roadway or bridge deck which is in the direct contact with the vehicles.

Wetland Mitigation: Actions that avoid, minimize, or compensate for potential adverse impacts to wetlands.

Wingwalls: The retaining wall extension of an abutment extended to the side-slope material of an approach, causeway or embankment.

Winter Maintenance: Activities associated with snow and ice control, and monitoring the highways for hazardous winter conditions.

Work Program Management: A grouping of work activities that support the development of projects, including overall project management, software, property acquisition and compliance oversight.

WR or Work Request: A Work Request for the Bureau of Maintenance and Operations.
