vicinity of the project and was located in a municipality that has a planning board or municipal reviewing authority, a code enforcement officer and an appeals process for aggrieved parties.

The committee amendment (S-64) replaces the original bill and narrows the exemption from site location of development review to developments that consist only of a storage facility, rather than the broader exemption under the bill. Under the amendment, these developments must not exceed a threshold size and must meet specific standards. In order for a development to qualify for this exemption, the municipal reviewing authority must agree to review the project and find that the project meets the standards set forth in this exemption.

A House amendment (H-184) corrects an ambiguity in the bill's language.

SUMMARY

The bill proposed to exempt the replacement, maintenance and minor repair of road culverts from permits required under the natural resource protection laws, the site location of development laws and the mandatory shoreland zoning laws.

Committee Amendment "A" (H-43) replaced the bill. The amendment changes the title of bill and clarifies the intent of the original bill to exempt the repair, maintenance and replacement of existing road culverts from permitting by the Maine Land Use Regulation Commission and the Department of Environmental Protection under the natural resource protection laws and the shoreland zoning laws. Culvert construction standards not related to permitting are not affected by this amendment.

House Amendment "A" (H-50) reflected rule changes adopted by the Board of Environmental Protection pertaining to the regulation of culverting activities under the natural resources protection laws.
