**SUMMARY**

This bill provides that municipal general assistance payments must generally be made by vouchers to providers of goods and services rather than by a cash payment to a recipient. The bill further provides that the Department of Human Services may not withhold reimbursement if a municipality is in substantial compliance or unless a municipality has received a written notice of violation of a section of the law and has subsequently violated the same section of the law. The bill also provides that municipalities post a brief notice that gives notice to applicants of their right to file an application, the right to receive a written decision within 24 hours, the right to a fair hearing, as well as the currently required notice of the times applications will be taken, the name and number to contact in emergencies and the department's toll-free number.

Committee Amendment "A" (H-220) removes the bill's requirement that a specific notice be posted in general assistance offices and adds the requirement that the notices presently required include the fact that municipalities must issue general assistance decisions within 24 hours. It also requires that copies of the general assistance laws be provided to municipalities by the Department of Human Services, and it removes a provision in the bill that would have prohibited municipalities from unreasonably restricting the vendors from whom recipients receive goods. It also eliminates provisions in the bill related to municipal compliance and penalties and adds a fiscal note to the bill.

**SUMMARY**

This bill makes clarifying amendments to the statutory authority permitting the Department of Human Services to carry out investigations of chronic diseases and evaluations of completeness of data that health care providers are required to file with the department. The bill clarifies that public health studies must be those which the department is otherwise authorized to carry out and that prior written consent of patients is required except in cases where the department seeks to verify information already on file. In those cases, the law is clarified to limit the department's contacts solely to the patient's health care providers for the purposes of verifying such information. The bill also requires that inquiries seeking consent be channeled through the patient's attending physician.
