LD 1504 An Act to Provide for Citizen Input to the Bureau of Public Lands

ONTP

SPONSOR(S)	COMMITTEE REPORT	AMENDMENTS ADOPTED
LUTHER MILLS POWERS PRAY	ONTP	

SUMMARY

This bill would have established a mechanism for the creation of unit management boards for units of land administered by the Bureau of Public Lands. These management boards would have been created when at least 9 municipalities, or county commissioners for the unorganized territories appoint a member to a particular unit management board, and on appointment, would manage the affairs of riparian and general recreation areas of that unit in cooperation with the Director of the Bureau of Public Lands. Unit management boards would not have come into operation until 9 designating authorities appointed members, but membership of a particular board could have been as large as the number of towns and counties that appointed members. Members would have served without compensation and would have been prohibited from having a conflict of interest for the parcel of land with which they were concerned.

LD 1513 An Act Relating to Best Practicable Treatment Determinations in Air Emission Licensing

CARRIED OVER

SPONSOR(S)	COMMITTEE REPORT	AMENDMENTS ADOPTED
GOULD R A LUDWIG THERIAULT ANDERSON		

SUMMARY

This bill would define best practical treatment for air emission licensing of existing emission sources as the commonly found control technology on boilers of a similar age and design in the same industry. This bill also would provide that the use of low sulfur fuel required by statute is considered best practicable treatment for fuel sulfur content limits. Lower sulfur fuel would only be required when necessary to meet air emission standards or ambient air quality standards. The low sulfur fuel provision was included in LD 112.
