LD 2016 An Act Concerning Continuous Emission Monitoring Devices LV/WD

SPONSOR(S)	COMMITTEE REPORT	AMENDMENTS ADOPTED
VOSE ANDERSON	LV/WD	

SUMMARY

This bill would have provided that continuous emission monitoring devices are considered in use during periods of nonoperation provided that calibration audit and preventive maintenance services are being conducted in accordance with a quality assurance plan submitted to the department.

This bill also proposed that nonoperation of a continuous emission monitoring device due to equipment malfunction would not subject a person to penalties if the period of nonoperation does not exceed 10% of source operating time. Under the bill, periods of noncompliance due to unavoidable malfunctions in excess of 10% of source operating time would be exempt from penalty at the discretion of the department.

This bill also would have required the Department of Environmental Protection to respond to licensees who have submitted requests for exemptions from penalty due to equipment malfunctions.

LD 2021 An Act to Clarify the Water Quality Definitions for Impoundments ONTP

SPONSOR(S)	COMMITTEE REPORT	AMENDMENTS ADOPTED
CLARK H GOULD R A ANDERSON LUDWIG	ONTP	

SUMMARY

State water quality law defines the level of permissible impact on water quality, in part, through the use of narrative descriptions of habitat and aquatic life typical of each class of water. By amending certain key definitions, this bill would have precluded the application of these narrative standards to "impoundments", including hydropower impoundments, with water quality classifications of GPA, A or B. See also LD 2159.

LD 2039 An Act to Clarify the Status of Wood Yard Debris PUBLIC 643

SPONSOR(S)	COMMITTEE REPORT	AMENDMENTS ADOPTED
JACQUES	OTP-AM	H-891

SUMMARY

This bill would have excluded unprocessed bark and dirt from wood processing mill yards from the definition of solid waste.

Committee amendment "A" (H-891) replaced the entire bill. The amendment exempts soil that contains incidental bark or woody material generated during the transport, handling or storage of logs prior to
