**SUMMARY**

This bill proposed to repeal the Maine Revised Statutes, Title 35-A, subsection 1, paragraph E, which requires the Public Utilities Commission to order electric utilities to develop proposals for cost-effective fuel conversions of electric space heating systems to systems using other sources of fuel.

Committee amendment "A" (H-348), the majority report of the Joint Standing Committee on Utilities, proposed to strike and replace the bill.

The amendment proposed to establish the Fuel Conversion Fund to be administered by the Maine State Housing Authority for the purposes of making grants and loans to low-income persons to undertake conversions of electric space heating systems to systems using other fuel sources. The amendment proposed to make an allocation from the Stripper Well Fund to the Fuel Conversion Fund.

The amendment also proposed to amend the Maine Revised Statutes, Title 35-A, section 3153-A, subsection 1, paragraph F to make it clear that utility-proposed programs ordered by the Public Utilities Commission for fuel conversions should be directed at low-income homeowners and tenants.

Senate amendment "A" (S-263) proposed to more specifically define eligibility criteria for loans and grants.

**SUMMARY**

This bill proposed to require any licensee of the United States Nuclear Regulatory Commission who proposes to invest in a major retrofit of a nuclear power plant to first obtain a certificate of public convenience and necessity from the Public Utilities Commission. The certificate would have established the need for the retrofit and the prudence of the investment, considering the potential impact on ratepayers in this State.
