LD 1892**An Act to Establish Reasonably Available Control Technology Standards for Nitrous Oxides**

ONTP

SPONSOR(S)
GWADOSKY**COMMITTEE REPORT**
ONTP**AMENDMENTS ADOPTED****SUMMARY**

This bill would have established reasonably available control technology standards, or RACTs, for nitrous oxide emissions from major industrial sources located in moderate or more severe ozone nonattainment areas and that are required to meet RACTs pursuant to the Federal Clean Air Act, Section 182 and would have adopted a so-called "committal SIP" or state implementation plan for nitrous oxide RACT requirements in the rest of the State. Under the terms of the "committal SIP," the State would commit to do photochemical grid modeling to determine the extent to which nitrous oxide reductions in the attainment, nonattainment-unclassified and nonattainment-marginal areas, which are the "subject areas," would be necessary to achieve attainment in the moderate-nonattainment areas. If the modeling demonstrated that nitrous oxide reductions in the subject areas would not be necessary to achieve attainment in the moderate nonattainment areas, facilities in the subject areas would not be subject to nitrous oxide RACTs.
