FIRST REGULAR AND FIRST SPECIAL SESSIONS

Summary Of Legislation Before The Joint Standing Committees
August 1997

We are pleased to provide this summary of bills that were considered by the 15 Joint Standing Committees of the Maine Legislature staffed by this office. The document is a compilation of bill summaries which describe each bill, committee amendments and other relevant amendments, as well as the final action taken on the bill. Also included are statistical summaries of bill activity this Session for the Legislature and each of its joint standing committees.

The document is organized for convenient reference to information on bills handled by the joint standing committees. It is organized alphabetically by committees and within committees by bill (LD) number. The committee report(s), prime sponsor for each bill and the lead co-sponsor(s), if designated, are listed below each bill title. All adopted amendments are listed by paper number. Two indices, a subject index and a numerical index by LD number are provided for easy reference to bills. They are located at the back of the document. A separate publication, History and Final Disposition of Legislative Documents, may also be helpful in providing information on the disposition of bills. These bill summaries also are available at the Law and Legislative Reference Library and on the Internet (www.state.me.us/legis/opla).

LD 1577

An Act to Eliminate Paper Mill Dioxin and Restore Maine's Rivers

INDEF PP

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>

LD 1577 proposed to establish a zero dioxin effluent limitation as a condition of all waste discharge licenses for kraft pulp and paper mills issued by the Department of Environmental Protection. The bill also proposed to require that all kraft pulp and paper mills in the State eliminate the use of chlorine-based bleaching chemicals in the bleaching process by December 31, 2002.

The bill proposed to require the State to include the zero dioxin effluent limitation and schedule of compliance as a condition of water quality certification under the federal Clean Water Act. It also proposed to require the Commissioner of Environmental Protection to object to the issuance of a license or permit by the United States Environmental Protection Agency to any kraft pulp and paper mill not located in the State that uses chlorine-based bleaching chemicals in its bleaching process and that discharges wastewater into waters that enter the State.

Committee Amendment "A" (H-614), the minority report of the Joint Standing Committee on Natural Resources, proposed to require all kraft pulp and paper mills in the State to have a bleach plant wastewater flow of 5m³/kkg or less of air-dried bleached pulp by December 31, 2002. The amendment proposed to authorize the Commissioner of Environmental Protection to extend the schedule of compliance with the zero dioxin effluent limitation or the low effluent standard for a specific length of time for a mill, but not beyond December 31, 2007, if the commissioner determined, based on information presented by the mill, that compliance would not be achievable by the deadline due to engineering constraints, availability of equipment or other justifiable technical reasons.

The amendment also proposed to require the Commissioner of Environmental Protection and the Commissioner of Economic and Community Development to report to the joint standing committee of the Legislature having jurisdiction over natural resources matters by January 15, 1999 on recommendations relating to assistance in the financing of capital investments to assist mills in achieving the requirement for reduced bleach plant wastewater flow.

This amendment was not adopted.
