**FIRST REGULAR SESSION**

**Summary Of Legislation Before The Joint Standing and Select Committees**  
**August 1999**

We are pleased to provide this summary of all bills that were considered by the Joint Standing and Select Committees of the Maine Legislature this past session. The document is a compilation of bill summaries which describe each bill and relevant amendments, as well as the final action taken. Also included are statistical summaries of bill activity this session for the Legislature and each of its joint standing and select committees.

The document is organized for convenient reference to information on bills considered by the committees. It is organized by committees and within committees by bill (LD) number. The committee report(s), prime sponsor for each bill and the lead co-sponsor(s), if designated, are listed below each bill title. All adopted amendments are listed by paper number. Two indices, a subject index and a numerical index by LD number are provided for easy reference to bills. They are located at the back of the document. A separate publication, History and Final Disposition of Legislative Documents, may also be helpful in providing information on the disposition of bills. These bill summaries also are available at the Law and Legislative Reference Library and on the Internet ([www.state.me.us/legis/opla](http://www.state.me.us/legis/opla)).

**LD 871**                      **An Act to Amend the Process for Granting Aquaculture Leases**                      **CARRIED OVER**

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
SMALL		

LD 871 proposes to require the Department of Marine Resources, in considering the issuance of aquaculture leases in areas in which pollution has created conditions that adversely affect traditional fisheries, to make an assessment of any pollution abatement activities that may be occurring and when the area may be suitable again for traditional fisheries. If the department finds that a polluted area will be sufficiently cleansed to support fishing uses within a year of the application, it would be required to make this finding clear in all notices of the hearing on the lease. The department could not issue a lease for a polluted area if the area would be suitable for fishing uses within one year of the application and the department finds that the aquaculture project would unreasonably interfere with future fishing uses of the area.
