Summary Of Legislation Before The Joint Standing Committees

Enclosed please find a summary of all bills, resolves, joint study orders, joint resolutions and Constitutional resolutions that were considered by the joint standing and joint select committees of the Maine Legislature this past session. The document is a compilation of bill summaries which describe each bill and relevant amendments, as well as the final action taken. Also included are statistical summaries of bill activity this session for the Legislature and each of its joint standing committees.

The document is organized for convenient reference to information on bills considered by the committees. It is arranged alphabetically by committee name and within committees by bill (LD) number. The committee report(s), prime sponsor for each bill and the lead co-sponsor(s), if designated, are listed below each bill title. All adopted amendments are listed by paper number. Two indices, a subject index and a numerical index by LD number are provided for easy reference to bills. They are located at the back of the document. A separate publication, History and Final Disposition of Legislative Documents, may also be helpful in providing information on the disposition of bills. These bill summaries also are available at the Law and Legislative Reference Library and on the Internet (www.state.me.us/legis/opla/billsumm.htm).

Final action on each bill is noted to the right of the bill title. The abbreviations used for various categories of final action are as follows:

- CON RES XXX..... Chapter # of Constitutional Resolution passed by both Houses

Joint Standing Committee on Utilities and Energy

LD 671

An Act To Facilitate the Development of Cost-effective Distributed Electricity Generation in the State

PUBLIC 555

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
HALL	OTP-AM MAJ ONTP MIN	S-399

LD 671, which was carried forward from the First Regular Session, proposed to do the following:

1. Establish a regulatory structure for distributed generation designed to remove barriers to the development of distributed generation in this State;
2. Require the Public Utilities Commission to establish rules governing the retail sale of excess electricity from a distributed generator;
3. Authorize the commission to require a transmission and distribution utility to purchase excess electricity from a distributed generator and resell it at wholesale;
4. Direct the commission to allow certain distributed generators to elect a net energy billing arrangement; and
5. Direct the commission to examine and address issues related to distributed generation and report back to the Joint Standing Committee on Utilities and Energy by January 1, 2004.

Committee Amendment "A" (S-399), which was the majority report of the Joint Standing Committee on Utilities and Energy, proposed to replace the bill. This amendment proposed to require standard-offer service providers that serve areas of this State within the New England independent system operator control area to purchase the output of generators with a capacity of 5 megawatts or less at a price that is financially neutral to the standard-offer service providers. It proposed to direct the commission to require standard-offer service providers that serve the northern region of the State to purchase the output of such generators if it finds that the market design in that region will accommodate such purchases.

Enacted Law Summary

Public Law 2003, chapter 555 requires standard-offer service providers that serve areas of this State within the New England independent system operator control area to purchase the output of generators with a capacity of 5 megawatts or less at a price that is financially neutral to the standard-offer service providers. The commission is directed to require standard-offer service providers that serve the northern region of the State to purchase the output of such generators if it finds that the market design in that region will accommodate such purchases.
