**CARRIED OVER**

This bill directs the Public Utilities Commission to develop clear standards and protections to be imposed on investor-owned transmission and distribution utilities to prevent them from providing preferential treatment to their generation affiliates in Maine.

This bill requires the commission to adopt major substantive rules to protect ratepayers and establish standards of conduct that govern the relationship between an investor-owned transmission and distribution utility and a generation affiliate. It requires that standards of conduct adopted by commission rule ensure at a minimum that a generation affiliate is not given preference over nonaffiliated competitive generators; costs of the generation affiliate are not recovered from ratepayers; employees of an investor-owned transmission and distribution utility are physically separate from and not shared with those of a generation affiliate; and the accounts and records of an investor-owned transmission and distribution utility and a generation affiliate are separate.

This bill defines "generation affiliate" as an affiliated interest that owns, has a financial interest in or controls generation or generation-related assets.

This bill defines "financial interest" as any voting or nonvoting equity interest, partnership interest, whether limited or general, trust interest or joint venture in an entity and specifies that a financial interest is not created between an investor-owned transmission and distribution utility and a generation affiliate solely by virtue of their relationship with a common parent company.

This bill establishes penalties for violations of rules adopted pursuant to this bill, and provides that the commission may require an investor-owned transmission and distribution utility to divest from its generation affiliate as a result of any violations of the rules.

This bill was carried over to any special or regular session of the 128th Legislature by joint order, H.P. 1138.
