LD 710 An Act to Expand Access and Reduce Barriers to Access to Naloxone Hydrochloride and Other Opioid Overdose-reversing Medications

ENACTED LAW SUMMARY

Public Law 2025, chapter 145 amends the laws governing the requirements for access to and distribution of naloxone hydrochloride or other opioid overdose-reversing medications. The law removes training requirements for community-based drug overdose prevention programs and recovery residences and expands access by allowing municipalities to provide vending machines for use by the public in response to an opioid-related drug overdose. The law further provides additional immunity protections for all persons who may administer naloxone hydrochloride or another opioid overdose-reversing medication to another individual in good faith when they believe the other individual is experiencing an opioid-related drug overdose. The law includes language that clarifies the authority of health care professionals to administer naloxone hydrochloride or another opioid overdose-reversing medication approved for over-the-counter dispensation by the federal Food and Drug Administration or its successor organization with or without a prescription. The law also incorporates other opioid overdose-reversing medications in the provisions governing naloxone hydrochloride.
