Vienna	157.50
Westbrook	2,541.75
Scarboro	744.25
	<hr/>
	\$34,694.42

#### STATEMENT OF FACTS

At the Special Session of Legislature in November 1961 funds were appropriated for Dutch Elm Disease Control work. Thirty thousand dollars was appropriated for this first year of expanded control work but only 6 months were available to contact all cities and towns so that they could make preparations for starting proper control measures. Consequently, \$12,360 of the funds appropriated were lapsed as of June 30, 1962. Because of the spread of the disease and continued efforts of the various cities and towns to combat this problem through increased appropriations, the gap in lack of reimbursement funds is ever widening.

The Forestry Department was appropriated the sum of \$38,000 as reimbursement funds to municipalities in the State-Municipal Cooperative Dutch Elm Control Program. Cities and towns are responding to the state recommended program with larger regular and special appropriations with the result that at the present time the department has requests of nearly \$35,000 from cities and towns for which the department has no funds available for reimbursement.
