Sec. 11. Unallocated study. The Legislature finds that revenues to the dedicated Highway Fund have substantially declined because of reduced gasoline consumption caused by the spiraling cost of gasoline and the successful conservation efforts undertaken by Maine citizens. It finds that costs for the Department of Transportation have increased at an accelerated pace due to inflation. It finds that the gap between revenues and expenditures will be significant for the next biennium unless positive actions are taken.

It is essential that long-range plans be made for the department to identify those high priority programs and services which are essential for the preservation of public safety.

Therefore, the Commissioner of Finance and Administration is directed to employ objective professional consultants at the expense of the Highway Fund to evaluate the administration, planning and operation of the programs and services funded by the highway budget. The evaluation should include a study of the cost-effectiveness of programs, alternative methods of delivery and priority of services. The consultants shall coordinate their activities with the Joint Standing Committee on Audit and Program Review.

The study should make recommendations as to the source and size of future revenues which would be required to maintain the

basic priority and other essential services of the department. It will also provide information necessary to balance Highway Fund activities properly against projected needs for the next biennium.

This study shall be completed and a report, including all necessary legislation, made to the Governor in a timely manner prior to a special session of the Legislature to be held no later than September 15, 1980 to deal with its recommendations.

Emergency clause. In view of the emergency cited in the preamble, this Act shall take effect when approved, except sections 1 to 5 of the Act shall take effect on July 1, 1980.'

STATEMENT OF FACT

The purpose of this amendment is to compensate for the expected shortfall of \$16,700,000 in revenues to the Highway Fund. This amendment increases operator license fees and driver examination fees, reduces program allocations, and revises the percentage of funds set aside for the motorboat user and the snowmobiler.

Fee Increases

This amendment increases operator license fees by \$1.50 per year for increased revenues of \$1,050,000. In addition, driver examination fees are increased by \$5 for the initial fee and by \$3 for subsequent fees to produce increased revenues of \$306,000. Total fee increases produce added revenues of \$1,356,000.

Motorboat and Snowmobile excise tax revenues

For fiscal year 1980-81 only, this amendment reduces from 1.25% to 0.5% of the total excise tax on internal combustion engine fuel that is allocated for motor boat users and the Boat Facilities Fund. The Highway Fund will fund refunds to commercial motor boat users and allocations to the Commissioner of Marine Resources that are currently paid from the 1.25% allocation. It is expected that \$200,000 will be realized from this source.

For the fiscal year 1980-81 only, the allocation of .5% from the excise tax on internal combustion engine fuel for snowmobile purposes is reduced to .25%. Approximately \$125,000 will be realized from this source.

The total amount of revenues realized from these tax sources is \$325,000.

Program Reductions

A total of \$15,116,000 is reduced from programs funded  
by the Highway Budget.
