B. Where payment is made for services in har-vesting wood, all weight measurements shall be expressed on a green wood or green weight basis. Except as otherwise provided by the state sealer, when the wood is not, or will not be, weighed within 10 days of felling, the person performing the services may, prior to hauling, require that the wood instead be measured by butt measure, or another authorized method of measurement agreed upon by the parties; and

- C. All sales of wood chips may be based on oven-dried weight, except where payment is made for harvesting wood.
- 3. Tree length wood. Butt measure shall be the standard state method for the measurement of tree length wood. Where expressly agreed upon, the parties may use any other method of measurement authorized by this subchapter.
 - A. Butt scale measurements may be used as follows.
 - (1) In the sale of wood involving payment for services, the use of butt scale measurements is prohibited as of April 1, 1985. Until that date, the use of butt scale measurements is permitted for tree length wood, under the following conditions.
 - (a) Prior to its usage, the parties or their authorized representatives, shall sign and date the volume table which shall designate the applicable harvesting area or areas.
 - (b) The parties, or their authorized representatives, shall receive a copy of the signed butt scale table.
 - (c) The volume table to which the measurements are applied shall reasonably represent the volume of trees being cut on the operation.

2 3 4	ment for services, butt scale measurements shall continue to be permitted for tree length wood, under the following conditions.
5 6 7	(a) The applicable butt scale table shall be provided in a written contract agreement.
8 9 10 11	(b) The volume table to which the measurements are applied shall reasonably represent the volume of trees being cut on the operation.
12 13 14 15 16	(3) In any case where butt scale is permitted, prior to its usage, the parties shall provide the state sealer with a signed copy of the volume table for the designated harvesting area.
17 18	4. Log scale measurements. Log scale measurements shall be made as follows.
19 20 21 22 23 24	A. When no other scale rule is agreed upon by the parties, the international 1/4 inch log rule shall be the standard state rule for the measurement of logs. Nothing in this section may prevent the use of any other log rule which is agreeable to the parties.
25 26 27	B. Where agreed upon by the parties, cubic foot measurement or weight scale may also be used to measure logs.
28	Sec. 2. 10 MRSA §2363-A is enacted to read:
29	§2363-A. Accurate and verifiable measurements
30 31 32 33 34 35 36 37 38	1. Standards. It is the intent of this subchapter that any method of wood scaling or measurement used in the sale of wood shall provide an accurate and verifiable count of the volume, quantity, dimension or weight measured, according to the standards established by the state sealer, provided that those standards may be efficiently and conveniently applied in transactions in this State involving the sale of wood as defined in this subchapter.

- 2. Measurements. No person who scales or measures wood and no person who makes payment to another in the sale of wood may represent a weight, volume quantity or dimension of wood which is less than the weight, volume, quantity or dimension of wood to be measured.
 - A. In the sale of wood involving payment for services, no deductions relating to merchantability or quality factors shall be taken from the total measure of properly prepared wood. Measurement deductions which are prohibited include those based on grading, soundness or other merchantability factors. Nothing in this section prevents making reasonable deductions based on quantity factors, such as for loose piling, short or undersized wood or for wood that was not designated to be harvested, hauled or chipped. Nothing in this section may be interpreted to cancel or repeal any written contract rights existing prior to enactment of this section.
 - B. In the sale of wood not involving payment for services, reasonable deductions relating to merchantability factors are permitted where specified in a written contract.
 - C. In the sale of wood involving payment for services, the calculation of payment shall be expressed in terms of the same unit of measure as was used in making the measurement.

29 STATEMENT OF FACT

The purpose of this after deadline bill is to provide a vehicle in skeleton form which can be carried over to the next session of the Legislature. For this carry over period, a special committee will be created by Joint Order pursuant to Joint Rule 16 to redraft this legislation to reflect the best interest of this State and to insure that any method of wood scaling or measurement used in the sale of wood shall provide an accurate and verifiable count

- of the volume, quantity, dimension or weight measured, according to the standards established by the State Sealer of Weights and Measures.
