## STATEMENT OF FACT

Four changes are proposed in the application process for a certificate of need. The purpose of these changes is to decrease the amount of time between when an applicant notifies the department of its intent to undertake a reviewable project and when the department reaches a decision. These changes are as follows.

1. No waiting period is required between submission of a letter of intent and submission of an application. Currently, there is a 30-day waiting period.

26 2. The applicant is required to respond to only 27 one set of questions. Currently, applicants are re-28 quired to respond to 2 sets of questions.

29 3. The department and the applicant, unless 30 agreeing jointly to waive this provision, are re-31 quired to have a technical assistance meeting prior 32 to the filing of an application so that both parties 33 may better understand the nature of the application 34 and the depth of required documentation.

35
4. The department is given the authority to re 36 tain funds generated by penalties from certificate of

need violations in a special revenue account to be used solely for supporting certificate of need activities, such as hiring expert short-term consultants.

The department has convened an advisory group composed of health care providers and together they have hired an independent consultant to examine the certificate of need process and make recommendations on the future scope of Maine's certificate of need The study is comprehensive in nature and adlaw. dresses whether certificate of need is still useful, what providers and services should be covered, what the application process should be and who should make final need determination. This study will be completed by March and will be the basis for later departmental legislation which significantly more amends the Certificate of Need Program.
