4 §6445-C. Local area plan

 A municipality may prepare and submit to the department for review a local area lobster fisheries management plan. The plan may propose a lobster harvesting season or a lobster trap limit for an area of coastal waters offshore of that municipality.
 Notwithstanding section 6440, subsection 3, and section 6445, a lobster harvesting season or a trap limit proposed in a local area lobster fisheries management plan is the season and trap limit applicable to those waters and must be enforced by the department if:

16 **1. Determination of reduced effort.** The commissioner determines that the local area plan will result in a reduction of lobster harvesting effort within the coastal waters included in the plan; and

2. Approval. The commissioner approves the plan.

Emergency clause. In view of the emergency cited in the preamble, this Act takes effect when approved.

STATEMENT OF FACT

This bill extends the Sunday lobster fishing prohibition, 30 limits each lobster harvester to 1,000 traps and prohibits lobstering in coastal waters during February and March.

The bill also caps the number of lobster licenses by limiting lobster licenses to individuals who either held a license in the previous year, have 2 years' experience as an unlicensed deck hand or who are students at a public or private university or technical school. One half of the licenses that become available through attrition may be sold to previously unlicensed persons who wish to enter the fishery.

The bill also allows towns to adopt local lobster fisheries 42 management plans to reduce lobster harvesting efforts in areas of coastal water offshore of the town. Those plans may include 44 seasons or trap limits different from those established in this Act. Locally established seasons and trap limits are enforceable 46 by the State if the Commissioner of Marine Resources approves the local plan.

48

Page 3-LR3132(1) L.D.1948 The bill also requires the commissioner to adopt rules requiring log books and establishing tagging requirements for the purposes of enforcing trap limits.
