## 118th MAINE LEGISLATURE

## **SECOND REGULAR SESSION-1998**

Legislative Document

No. 2286

H.P. 1657

House of Representatives, March 24, 1998

An Act to Implement the Recommendations of the Majority of the Joint Standing Committee on Agriculture, Conservation and Forestry Regarding Enhancing Forest Resource Assessment.

Reported by Report "A" from the Joint Standing Committee on Agriculture, Conservation and Forestry pursuant to Joint Order H.P. 1646.

JOSEPH W. MAYO, Clerk

4	repealed.
6	Sec. 2. 12 MRSA §8867-A is enacted to read:
8	\$8867-A. Rulemaking
10	No later than November 1, 1998, the Commissioner of Conservation shall provisionally adopt rules in accordance with
12	Title 5, chapter 375 to implement this subchapter. Rules adopted pursuant to this subchapter are major substantive rules as
14	defined in Title 5, chapter 375, subchapter II-A and must be submitted to the Legislature no later than January 1, 1999 for
16	review.
18	The Commissioner of Conservation shall consult with the Commissioner of Environmental Protection and the Commissioner of
20	Inland Fisheries and Wildlife to ensure that bureau rules are consistent with wildlife habitat and environmental protection.
22	Sec. 3. 12 MRSA §8868, sub-§1, as enacted by PL 1989, c. 555,
24	§10, is amended to read:
26	<ol> <li>Clear-cut. "Clear-cut" means any timber harvesting on a forested site greater than 5 acres in size which-over-a-10-year</li> </ol>
28	period that results in an-average $\underline{a}$ residual basal area of trees over 6 $\underline{4}$ 1/2 inches in diameter measured at 4 1/2 feet above the
30	ground of less than 30 square feet per acre, unless one-or-both of the following condition exists:
32	AIf,-after-harvesting,-the-average-residual-basal-area-ef
34	trees-over-1-inch-in-diameter-measured-at-4-1/2-feet-above the-ground-is-30-square-feet-per-acre-or-more,-a-elear-cut
36	does-not-occur-until-the-average-residual-basal-area-of trees-6-inches-or-larger-measured-at-4feet-above-the
38	ground-is-less-than-10-square-feet-per-acre,-or
40	B. After harvesting, the site has a well-distributed stand of trees acceptable growing stock as defined by rule of at
42	least 5 feet in height that meets the regeneration standards defined under section 8869, subsection 1.
44	Sec. 4. 12 MRSA §8868, sub-§2-A is enacted to read:
46	2-A. Parcel. "Parcel" means a contiguous tract or plot of
48	forest land owned by a landowner. Multiple contiguous tracts, plots or parcels of forest land owned by the same landowner are
50	considered a single parcel for the purposes of this subchapter.

Be it enacted by the People of the State of Maine as follows:

Sec. 1. 12 MRSA §8867, as amended by PL 1991, c. 722, §4, is

4	3-A. Separation zone. "Separation zone" means an area tha
	surrounds a clear-cut and separates it from other clear-cuts.
6	Coo & 12 MDCA \$9969 cmb \$4
8	Sec. 6. 12 MRSA §8868, sub-§4, as enacted by PL 1989, c. 555 §10, is amended to read:
Ü	gro, is differenced to read.
10	4. Timber harvesting. "Timber harvesting" means the
	cutting or removal of at-least-50-serds-ef timber for the primary
12	purpose of selling or processing forest products.
14	Sec. 7. 12 MRSA §8869, sub-§2-A is enacted to read:
16	2-A. Separation zones. For a parcel of land 100 acres of
	less, a clear-cut must be separated from any other clear-cut by
18	at least 250 feet.
20	
20	For a parcel of land over 100 acres, a clear-cut must be separated from any other clear-cut by a defined area equal to a
22	least the area contained within the perimeter of the clear-cut
	For a parcel of land over 100 acres, each defined separation zone
24	must be identified with a specific clear-cut and be a minimum of
26	250 feet in width and may not be designated to meet the
26	separation zone requirements for any other clear-cut.
28	The Commissioner of Conservation may establish, by rule, more
	stringent separation zone standards for clear-cuts greater than
30	35 acres.
3 2	Sec. 8. 12 MRSA §8869, sub-§3, as enacted by PL 1989, c. 555,
J &	\$10, is amended to read:
34	
	3. Forest management plans for clear-cuts over 35 acres
36	For eleax-eutsef50 a clear-cut of 35 acres or more, the
38	landowner, or agent of the landowner, shall develop, prior to harvest, a forest management plan for that clear-cut signed by a
50	professional forester that conforms to the standards set forth in
40	subsections 1 and 2. The plan must state the purpose of the
	clear-cut. This plan must be kept on file by the landowner or
42	agent of the landowner and be available for inspection by the
44	bureau until adequate regeneration in accordance with the standards set forth in subsection 1 is established.
17	scandards sec forch in subsection I is escapitished.
46	Sec. 9. 12 MRSA §8876, as enacted by PL 1989, c. 875, Pt. J.
	§10, is amended to read:
48	Soore To the second sec
50	§8876. Forest Resource Assessment Program
J U	

Sec. 5. 12 MRSA  $\S8868$ , sub- $\S3$ -A is enacted to read:

There is established in the Bureau of Forestry a Forest Resource Assessment Program. The purposes of the Forest Resource Assessment Program is to systematically and continually assess the ability of the State's forests to provide sustainable forest resources and socioeconomic benefits for the people of this State. The Director of the Bureau of Forestry, referred to in this subchapter as "the director," shall implement this program to:

- 1. Current status. Assess the current status of forest resources, including, but not limited to, timber, forest land base, fiber, recreation, water, wildlife and soil using standards of forest sustainability developed in accordance with section 8876-A;
- 2. Future demand. Project future demand for these forest resources based on a common economic forecast developed by the State Planning Office and on other appropriate economic projections;
  - 3. Trends. Identify trends in resource utilization and forecast supply available to meet the projected demands; and
- 4. Potential shortfalls. Identify potential shortfalls in forest resources and the management and policy actions necessary in the public and private sector to avoid shortfalls, -and.
  - 5.--Recommendations.--Recommend-to-the-Governor-and-the Legislature-the-administrative-and-legislative-policies-or actions-needed-te-refine-or-redirect-state-agency-programs-and stimulate-or-remove-obstacles-to-private-sector-action-in-a manner-that-contributes-to-an-adequate-supply-of-natural resources.

The Director of the Bureau of Forestry shall establish and consult with technical working groups composed of members of the existing staff of the consultation and staff of the consultation of the consultati

The director shall coordinate the efforts of this program fully with ongoing bureau and federal forestry program planning efforts and with the efforts of the Maine Economic Growth Council to develop a long-term plan for the State's economy pursuant to Title 10, section 929-B.

б

_	Sec. 10. 12 MMSA 300/0-A Is enacted to read:
2	\$8876-A. Forest sustainability
4	
6	The director shall establish a process to assess fores sustainability. In developing this process, the director shall build on the principles of sustainability developed by the
8	Northern Forest Lands Council established by Congress in 1990 and the criteria developed by the Maine Council on Sustainable Fores
10	Management pursuant to Executive Order #11 dated April 25, 1995.
12	1. Standards. Standards must be established to assess each of the criteria listed in this subsection by January 1st of the
14	year indicated. The following standards must be specific measurable and understandable by both forest managers and the
16	general public:
18	A. Soil productivity by 2001;
20	B. Water quality, wetlands and riparian zones by 1999;
22	C. Timber supply and quality by 1999:
24	D. Aesthetic impacts of timber harvesting by 2003;
26	E. Biological diversity by 2002;
28	F. Public accountability of forest owners and managers by 1999; and
30	G. Traditional recreation by 2003.
32	2. Process. The director shall identify individuals with
34	scientific background and practical experience in each of the criteria areas listed in subsection 1 and convene technical
36	working groups. In the development of standards pursuant to subsection 1, the director and working groups shall assess
38	current status and trends, the desired objectives and actions to reach the objectives. Each working group shall identify a range
40	of alternative standards and recommend a set of standards based on a comprehensive review of available information and ar
42	assessment of the economic impacts of implementing the standards. The director shall coordinate the efforts of each
44	working group and provide an opportunity for public comment or the recommended standards prior to final adoption.
46	3. Report. The director shall report to the joint standing
48	committee of the Legislature having jurisdiction over forestry matters with a recommendation for each set of standards and ar

4. Monitoring, As each set of standards is adopted, the director shall develop a system to monitor statewide progress in achieving those standards and begin monitoring. Standards and monitoring systems must be in place for all criteria by July 1, 2004.  Sec. 11. 12 MRSA §8877-A is enacted to read:  \$8877-A. Determination of supply and demand for timber resources  The director shall use a variety of methods, including those specified in this section, to assess the status of timber resources, project future demand for these resources and forecast the supply available to meet the projected demands.  1. Forest inventory. The director, in cooperation with the United States Forest Service, shall conduct a forest inventory and analysis program. The inventory must be based on plot data collected annually in a manner that provides for the entire State to be inventoried on a cycle of not more than 5 years. Plot data must be collected and compiled to provide for analysis by ownership class and geographic region. The director shall provide for collection of supplemental plot data when needed to assess the impact of catastrophic events on the State's forests or significant changes in harvesting levels or methods.  2. Remote sensing data. The director shall review data collected using remote sensing technology to determine the area of forest types and gross changes in forest types.  3. Timber supply modeling. The director shall coordinate efforts to project future timber supply using forest models based on growth, harvest and other dynamic factors affecting the forest. The models must allow for statewide projections and projections for geographic regions and landowner classes.  Sec. 12. 12 MRSA §8878, as enacted by PL 1989, c. 875, Pt. J., §10, is repealed.  Sec. 13. 12 MRSA §8878-A and 8879 are enacted to read:  \$8878-A. Annual report on clearcutting  The director shall prepare and publish an annual report that summarizes clearcutting statewide by geographic region and by ownership class. For the purposes of this section.	2	subsection 1. At the time of the report, the director shall indicate the recommended timetable for revisiting the particular criterion and standards.
director shall develop a system to monitor statewide progress in achieving those standards and begin monitoring. Standards and monitoring systems must be in place for all criteria by July 1. 2004.  Sec. 11. 12 MRSA §8877-A is enacted to read:  Sec. 11. 12 MRSA §8877-A is enacted to read:  The director shall use a variety of methods, including those specified in this section, to assess the status of timber resources, project future demand for these resources and forecast the supply available to meet the projected demands.  1. Forest inventory. The director, in cooperation with the United States Forest Service, shall conduct a forest inventory and analysis program. The inventory must be based on plot data collected annually in a manner that provides for the entire State to be inventoried on a cycle of not more than 5 years. Plot data must be collected and compiled to provide for analysis by ownership class and geographic region. The director shall provide for collection of supplemental plot data when needed to assess the impact of catastrophic events on the State's forests or significant changes in harvesting levels or methods.  2. Remote sensing data. The director shall review data collected using remote sensing technology to determine the area of forest types and gross changes in forest types.  3. Timber supply modeling. The director shall coordinate efforts to project future timber supply using forest models based on growth harvest and other dynamic factors affecting the forest. The models must allow for statewide projections and projections for geographic regions and landowner classes.  Sec. 12. 12 MRSA §8878-A and 8879 are enacted to read:  \$8878-A. Annual report on clearcutting  The director shall prepare and publish an annual report that summarizes clearcutting statewide by geographic region and by	4	CIICEIIOII AMA SCAMAIUS.
director shall develop a system to monitor statewide progress in achieving those standards and begin monitoring. Standards and monitoring systems must be in place for all criteria by July 1. 2004. Plot data must be collected and compiled to provide for analysis by ownership class and geographic region. The director shall provide for collection of supplemental plot data when needed to assess the impact of catastrophic events on the State's forests or significant changes in harvesting levels or methods.  2. Remote sensing data. The director shall review data collected using remote sensing technology to determine the area of forest types and gross changes in forest types.  3. Timber supply modeling. The director shall coordinate efforts to project future timber supply using forest models based on growth, harvest and other dynamic factors affecting the forest. The models must allow for statewide projections and projections for geographic regions and landowner classes.  Sec. 12. 12 MRSA §8878, as enacted by PL 1989, c. 875, Pt. J, \$10, is repealed.  Sec. 13. 12 MRSA §8878-A and 8879 are enacted to read:  The director shall prepare and publish an annual report that summarizes clearcutting statewide by geographic region and by	2.2

2	the definition of a clear-cut in section 8868, subsection 1.
4	1. Information. For landowners owning 100,000 acres or more of forest land statewide, the summary must include aggregate data
6	and frequency distributions and must present the following information:
8	A. Total area clear-cut:
10	
12	B. Area clear-cut as a percentage of a landowner's statewide land ownership;
14	C. Stated purposes for clearcutting;
16	D. The number of clear-cuts over 75 acres in size;
18	E. Total acres planted; and
20	F. Total acres precommercially thinned.
22	2. Sources of information. The summary must be based on landowner harvest reports required under section 8885. The
24	director may request additional information and provide field
26	verification as resources allow.
28	§8879. Biennial report on the state of the State's forests
30	The director shall publish a biennial report on the state of the State's forests. The director must submit a copy of the report to the joint standing committee of the Legislature having
32	jurisdiction over forestry matters by January 1st of odd-numbered years beginning January 1, 1999.
34	1. Content. The report must describe the condition of the
36	State's forests based on historical information and information collected and analyzed by the bureau for the biennium. The
38	report must provide an assessment at the state level of progress in achieving the standards developed pursuant to section
40	8876-A. The director shall also provide observations on differences in achieving standards by landowner class. The
42	report must summarize importing and exporting of forest products for foreign and interstate activities. The director shall obtain
44	public input during the preparation of the report through public hearings and other appropriate methods.
46	
4.0	2. Recommendations. The report must include
48	recommendations for state and private actions designed to address the needs identified in the assessment.
50	

A. State action recommendations must be defined in terms of 2 necessary policies, programs, staff and budgetary requirements to achieve specific goals. 4 B. Recommendations for actions on privately held forest lands may be developed separately for large, industrial 6 ownerships and small, nonindustrial ownerships. These recommendations must be defined in terms of actions needed 8 to achieve specific goals. 10 Sec. 15. 12 MRSA §8885, sub-§1, as enacted by PL 1989, c. 555, \$12 and affected by c. 600, Pt. B, \$11, is amended to read: 12 Harvest report. Any Except as provided in subsection 14 l. 1-A, an owner of forest land who sells forest products or 16 harvests forest products for that owner's commercial use shall submit a report to the director stating the species, volume and stumpage price per unit of measure for each transaction, 18 municipality or township where the stumpage was located, estimated acreage of the harvest, the harvest method employed and 20 the extent of whole-tree harvesting of both solid and chipped wood. For lump-sum sales, the purchaser shall be responsible for 22 submitting the report. 24 Sec. 16. 12 MRSA §8885, sub-§1-A is enacted to read: 26 1-A. Alternate harvest report. The director may develop alternate forms for or methods of collecting harvest information 28 from landowners who do not harvest timber on a regular basis. The director shall define landowners subject to the provisions of 30 this subsection and provide report forms pursuant to section 8883, subsection 2. 32 Sec. 17. 12 MRSA §8885, sub-§2-A is enacted to read: 34 36 2-A. Report on clear-cuts. When timber harvesting produces a clear-cut as defined in section 8868, the landowner shall 38 report to the director the acreage of the clear-cut and the purpose of the clear-cut. 40 Sec. 18. 12 MRSA §8885, sub-§3, as enacted by PL 1989, c. 555, 42 \$12 and affected by c. 600, Pt. B, \$11, is amended to read: 44 Reports. Reports required under subsections 1 shall-be and 2 are due January-lst-and-July-1st---Reports 46 required-under-subsection-2-shall-be-due during the month of January. If the period of cutting under subsections subsection 1 or 2 extends beyond December 31st of any calendar year, a report 48

shall be submitted during the month of January for the preceding

year. A person filing a harvest notification form pursuant to

	section 8883 must complete and return to the bureau a harvest
2	report whether or not the landowner has harvested that year.
4	Sec. 19. 12 MRSA §8886, sub-§2, as enacted by PL 1989, c. 555, §12 and affected by c. 600, Pt. B, §11, is amended to read:
6	2. Annual price reports. The bureau shall publish.
8	2. Annual price reports. The bureau shall publish, semiannually annually, a report on prices as specified below. These reports shall must be reported by zones as determined by
10	the director and shall must include a statewide average of all zones.
12	
14	A. The reports shall must include stumpage prices paid for forest tree species of the State as reported pursuant to section 8885. Prices for other forest products may be
16	collected using acceptable survey techniques.
18	B. The reports shall must include mill delivered prices paid by primary processors, wood wholesalers and wood
20	brokers of the State.
22	FISCAL NOTE
24	The Department of Conservation will incur some minor additional costs to adopt certain rules and to publish certain
26	rules. These costs can be absorbed within the department's existing budgeted resources.
28	The additional workload and administrative costs associated
30	with the minimal number of new cases filed in the court system can be absorbed within the budgeted resources of the Judicial
32	Department. The collection of additional fines may increase General Fund revenue by minor amounts.
34	
36	SUMMARY
38	This bill is the majority report of the Joint Standing Committee on Agriculture, Conservation and Forestry. It does the
40	following.
42	1. It reauthorizes rulemaking to implement the forest practices laws.
44	
46	2. It amends the definition of "clear-cut" to simplify implementation and enforcement of restrictions on clear-cuts.
48	3. It enacts definitions for "parcel" and "separation zone."

- 4. It removes the requirement that 50 cords be harvested to qualify as timber harvesting.
- 5. It creates minimum standards for separation zones and allows more stringent standards to be adopted by rule for clear-cuts greater than 35 acres.
- 8 6. It requires a management plan for clear-cuts over 35 acres and requires the plan to state the purpose of the clear-cut.
- 7. It makes revisions to the provisions of the Forest Resource Assessment Program.
- 8. It directs the Bureau of Forestry to establish a process to assess forest sustainability including the development of standards in 7 areas and a monitoring system.
- 9. It provides for annual collection of inventory data and for an inventory cycle of not more than 5 years. It provides for the use of remote sensing technology and modeling to assess timber supply.
- 10. It repeals the current provisions for reports and recommendations from the Forest Resources Assessment Program.

22

- 26 11. It requires the Director of the Bureau of Forestry to prepare and publish an annual report summarizing clearcutting activities.
- 30 12. It requires a biennial report on the State's forests.
- 32 13. It allows alternate forms for reporting harvesting information.
- 14. It requires a landowner to state the purpose of a clear-cut on the landowner harvest report.
- 15. It requires a person filing a notification of intent to harvest to complete and submit the harvest report whether or not timber was harvested during the year.
- 16. It changes from semiannually to annually the required report on stumpage prices published by the Bureau of Forestry.
