The Department of Environmental Protection will incur some minor additional costs to submit a required report to the Legislature. These costs can be absorbed within the department's existing budgeted resources.'

28 SUMMARY

This amendment reduces from 4 to 3 the number of members of the Maine Public Drinking Water Commission who represent public water systems and increases the number of public members from 2 to 3. The size of this commission remains at 8 members. An unallocated section reassigns 2 current members as necessary to accommodate the new categories.

This amendment makes a technical correction, removes a section pertaining to dams that was addressed in a separate bill and changes a requirement for the review of certain land use standards from "periodically" to "annually." It also adds a fiscal note to the bill.
