13 **SUMMARY**

14 This bill streamlines the procedure for authorizing career and technical education
15 satellite programs. Current law requires any affiliated unit that wishes to operate a career
16 and technical education satellite program to submit a written request to operate a satellite
17 program to the governing body of the center or region with which the unit is affiliated.
18 The governing body of the center or region considers the request and then forwards its
19 recommendation to the Commissioner of Education. Instead, the bill provides that the
20 written request be submitted directly to the Commissioner of Education for approval.
