SUMMARY

This amendment establishes a tariff rate applicable to distributed generation resources that do not qualify for the tariff rate under the Maine Revised Statutes, Title 35-A, section 3209-B, subsection 5, paragraph A. The amendment limits the applicability of the tariff rate under paragraph A to distributed generation resources with a nameplate capacity of one megawatt or less and distributed generation resources with a nameplate capacity over one megawatt that are collocated with net energy billing customers subscribed to at least 50% of the facility's output or that have certified that the resources have commenced physical work of a significant nature before September 1, 2022.

The amendment also provides that a distributed generation resource with a nameplate capacity of greater than 2 megawatts and not more than 5 megawatts may be used for net energy billing if certain requirements are met.

The amendment also replaces the term "competitive service provider" with "competitive electricity provider" in the laws governing the Public Utilities Commission.
