SUMMARY

This amendment amends Committee Amendment "C" by amending the provisions relating to net energy billing in the following ways.

1. It amends the provision in the committee amendment relating to affidavits that are required to be submitted for a distributed energy resource in order to be eligible for the new tariff rate established in the committee amendment by describing the type of activities relating to solar arrays and installations that constitute "continuous on-site construction efforts," authorizing the Public Utilities Commission to share information in an affidavit, as necessary, with a transmission and distribution utility and authorizing the Public Utilities Commission to adopt rules relating to the affidavit requirements.

2. It replaces the provision in the committee amendment that requires that tariff rates be adjusted for inflation and replaces it with a provision that requires that the tariff rates increase annually by 2.25% beginning January 1, 2023.

3. It removes the provision in the committee amendment that provides for a one-time election for a distributed energy resource to receive the new tariff rate.
