Sec. 3. 25 MRSA §2017 is enacted to read:

§2017. Legislative intent regarding restrictions on undetectable or untraceable firearms and downloadable gun code

The Legislature finds that undetectable and untraceable firearms are a danger to the residents of this State. The Legislature finds that the restrictions imposed on undetectable firearms pursuant to section 2015, on untraceable firearms pursuant to section 2016 and on the dissemination of downloadable gun code pursuant to section 2016 are necessary to ensure that undetectable and untraceable firearms, as defined in sections 2015 and 2016, respectively, are clearly prohibited in the State, except as specifically provided. The Legislature further finds that these restrictions are necessary to discourage and prevent the dissemination of firearms that are undetectable in metal detectors and other security screening devices, that are untraceable due to the lack of a serial number or other form of required firearm identification and that can readily be possessed by those who may not be legally able to do so under existing federal and state laws. The Legislature finds that the restrictions imposed pursuant to sections 2015 and 2016 are necessary to prevent the widespread possession of these dangerous weapons before they become a prevalent problem in this State and a threat to the health and well-being of the residents of this State.

36 SUMMARY

The bill provides definitions of "undetectable firearm" and "untraceable firearm" and prohibits the manufacture, import, sale, transfer and possession of such firearms with certain exceptions. The bill also prohibits, with certain exceptions, the dissemination of downloadable gun code from which untraceable firearms can be manufactured.
