**SUMMARY**

This amendment requires the chief executive officer of the Maine Public Employees Retirement System to waive the reduction in the amount that a person's disability retirement benefits must be reduced when the person receives compensation in any year from engaging in any gainful activity or from employment if the person demonstrates that the excess compensation has ceased and that continuing the reduction would cause a hardship.

The amendment also provides that any person required to reimburse the Maine Public Employees Retirement System for any excess payments due to the receipt of excess compensation from employment under current law as of the effective date of this legislation does not have to pay that reimbursement.

## Fiscal Note

No change to anticipated payments

### Fiscal Detail and Notes

This bill increases the limit on income that a person receiving disability retirement benefits may earn from employment or gainful activity before their benefit is reduced. This bill also eliminates any reimbursements owed to the Maine Public Employees Retirement System (MPERS) as a result of exceeding the income limitation as of the effective date of the bill. As a result of this bill, MPERS may potentially pay a larger benefit to a greater number of recipients than it pays currently. Additionally, MPERS will not be collecting any reimbursements owed to it as a result of income limitation exceedances as of the effective date of this bill. However, because MPERS does not assume any reduction in benefits due to income limitation exceedances in its projections, this bill does not change the anticipated disability retirement benefit payments that MPERS will need to make. Additionally, because MPERS does not budget for reimbursements owed to it due to income exceedances, there is no anticipated decrease in revenue.
