MESSAGE OF THE GOVERNOR.

To the Senate and House of Representatives :—

The Commissioners appointed on the parts of Massachusetts and Maine, pursuant to the provisions of the Act of Separation, having made a representation of their proceedings up to the 17th of November last, I communicate the same to the two branches of the Legislature for their information.

From this report, there is reason to expect that, in the course of the ensuing season, much progress will be made in effecting a just division of the personal property belonging to the two States, and that such a portion of the public land will be divided, as will enable the Commissioners to "set off by metes and bounds," so much from the share of Massachusetts as in their estimation shall be of the value of thirty thousand dollars ; whereby the parent State may be enabled to make the election of assigning the land, so set out, to this State, as an indemnification for having assumed the performance of all the duties and obligations of the Commonwealth towards the Indians.

As this will probably be effected and such election made on the part of Massachusetts previous to October next, and as by the treaty with the Penobscot tribe, to which treaty this State has become a party, under the 5th Article of the 1st Section of the Act of Separation, sundry articles of provision and clothing are to be furnished for their use, in the month of October annually, the attention of the Legislature is invited to the expediency of making such an appropriation as a full performance of the treaty on the part of this State would require.—There having been no appropriations by the Legislatures of either State for meeting the expenses incident to such surveys as may be directed by the Commissioners, and as surveys to a certain extent are to be made the ensuing season, the Commissioners of both States have suggested the necessity of making such provision, as in the opinion of the respective Legislatures the circumstances may require.

I find by a Resolve of the 26th of June, 1820, the Governor, by and with the advice of Council, was authorized to

appoint jointly with the Executive of the Commonwealth of Massachusetts, one or more Agents, should the Governor of that Commonwealth think proper to act on this subject; or separately on the part of this State, should the Executive of that Commonwealth decline acting in such appointment.—And the Agent or Agents thus appointed, were from time to time to perform such acts and duties relating to the public roads, and the care and preservation of the timber on the public lands as should be prescribed by the Governor of this State.—Under this Resolve, Agents were appointed in different parts of the State, in the vicinity of the public lands, with instructions so to conduct their business, that there should be an entire stop put to every species of depredation on the Government property generally, and especially on the Penobscot and Schoodiac rivers, and all their tributary streams, as well as on the waters which empty into the St. Johns.

A correspondence was opened with the Executive of Massachusetts requesting information as to what measures it would be agreeable to that State to pursue, in conjunction with this, to preserve the joint property of both from depredation.

From the answer, a copy of which will be laid before you, it appears that the State of Massachusetts relies upon the authority of Maine to preserve the common property; and that whatever expense may be thereby incurred, will be a subject of cognizance by the Commissioners in making a division. By information received from various sources, there is good reason to believe that extensive depredations are committing upon the timber in different parts of the State. It is stated that companies are forming to take timber from the public lands on one of the principal rivers emptying into the St. Johns, and that the erection of a mill on the land of the State for the cutting of lumber is contemplated the ensuing season. The depredations committed on this river are represented to be made principally by persons who are not citizens of this State. On the Penobscot and Schoodiac rivers it has been found impossible wholly to prevent the cutting of the timber. It had

been the practice of the Commissioners of the Land-Office in Massachusetts, previous to the Separation, to sell grass and timber on these rivers by permits, to the amount of about ten thousand dollars in three years, under the belief that nearly as much timber would have been cut without permit, and without any consideration to the Government. Since the Separation, the public lands being the joint property of the two States, no permits have been granted, and some of those persons who had heretofore cut under permission, and who would still purchase permits, if to be obtained, continue the business of "lumbering" from the public lands. I have thought it proper to refer this subject to the particular consideration of the Legislature, inasmuch, as it will involve the expediency of making an additional appropriation to be applied for the purposes of protecting the public property, and as many of the members residing in the vicinity of the public lands can judge more correctly than the Executive, what measures, most for the interest of the State, can be pursued in relation to this subject.

There being a portion of the public land within the town of Ellsworth, an Agent was appointed by the former Executive to prevent the destruction of the timber, and to enforce payment, for such as had been or might from time to time be cut without permission from the proper authority. The said town of Ellsworth, by their Selectmen, have represented to me that the Court of Sessions, for the County of Hancock, having adjudged a public road through said land to be of common convenience and necessity, are about to cause such a road to be laid out and opened. As the effect of opening this road would be to increase the value of the public land, the inhabitants of said town have requested permission from the Executive to appropriate such sums of money, as have been received, or may, for a given period, be received by the said Agent in the execution of his trust, for the opening and making said road.

There being no power vested in the Executive to give the permission requested, I have concluded to refer the memorial to the consideration of the Legislature.

I have this day received from the Executive of Massachusetts a copy of An Act recently passed by the General Court of that Commonwealth, "to provide for carrying into effect certain stipulations in the Act for erecting the District of Maine into a separate State," which, as it seems to contemplate a corresponding Act on our part, will be laid before you by the Secretary.

CHAPTER XXXVIII.

Resolve respecting the Penobscot Indians.

Resolved, That, for the purpose of carrying into effect the Treaty made with the Penobscot tribe of Indians, on the seventeenth day of August, in the year of our Lord one thousand eight hundred and twenty, to which treaty this State has become a party under the fifth Article of the first Section of the act of Separation, there be, and hereby is granted the sum of twelve hundred dollars to be paid out of the Treasury of this State, to purchase sundry articles of provision and clothing, which are to be furnished for the use of said tribe of Indians, in the month of October annually. And the Governor, with the advice of Council, is hereby requested to carry into full and complete effect all the terms and conditions of said Treaty on the part of this State to be performed; and for that purpose to draw his warrants on the Treasury for all or any part of said sum of twelve hundred dollars.

[*This Resolve passed February 8, 1822.*]

CHAPTER XXXIX.

Resolve directing the Secretary of State to cause certain accounts to be printed.

Resolved, That the Secretary of State cause to be printed, at the time when the Resolves passed at the present

Session shall be printed, the Pauper and Miscellaneous or other accounts as allowed at the last Session of the Legislature, with the Resolve or Resolves authorizing the payment of the same.

[*This Resolve passed February 8, 1822.*]

MESSAGE OF THE GOVERNOR.

To the Senate and House of Representatives :—

On examining the Treasurer's account as published by order of the Legislature, I find it does not shew the expenditures of the Convention that framed the Constitution.

The accounts were laid before the last Legislature, with a request that they might be examined and settled, and a direction given, as to the disposition of the balance stated to be remaining in the Treasurer's hands.

I have never been able to find that that Legislature took any order thereon. I shall therefore direct that a copy of the accounts exhibited to the last Legislature, together with the letter which accompanied it, be laid before you, and also a particular account of the sums borrowed by order of the Convention, and of every item of expenditure authorized by that body from its commencement until its dissolution.

I have to call the attention of the Legislature to the construction of Article 5th, Part fourth, Section 4th of the Constitution of this State, by which it is provided that "no money shall be drawn from the Treasury but by warrant from the Governor and Council and in consequence of appropriations made by law." On a comparison, it will be found that this clause, so far as it respects appropriations is a transcript of the Constitution of the United States, under which, it is known, that the officers of the Treasury do not feel authorized to make any payment unless in consequence of a specific appropriation. This is one of the instances in which our Constitution is varied from that of the parent State. This alteration having, undoubtedly, been intended as an additional security of the Treasury, it be-

comes proper to inquire in what manner it was contemplated to have that effect, and what has been the practice under Constitutions containing a similar provision. From the phraseology of the section referred to, it would seem to have been the intention of the framers of our Constitution that the *probable* expenditures of the ensuing year should be distinctly brought before each Legislature in the form of an appropriation law; and the *actual* expenditures of the past year, in the form of a regular statement and account. The laws of the United States fixing the salaries of its officers, or the pay of the army or navy, or the pay of Congress, have never been deemed by the officers of the Treasury as any authority for them to make the payment. The law establishing the salary, pledges the Government for the payment of such salary, but does not make the appropriation; and without the appropriation, the Comptroller and the Secretary of the Treasury do not permit the payment. As our Constitution is in this respect like that of the United States, and as the Governor and Council have no greater authority in relation to the State Treasury, than have the Comptroller and Secretary in relation to the National Treasury, and as the practice in the latter has uniformly been, under every administration of the Government, to make payments only in consequence of appropriations, I have felt it to be my duty, previous to drawing warrants on the Treasury, to submit this question to the consideration of the Legislature. From the present situation of our finances it may not be of much practical consequence; but when its decision is considered as establishing the practice for succeeding years, more especially when viewed as a question upon the construction of our Constitution in relation to the Treasury, I trust it will not be deemed unimportant.

Council Chamber,

January 16, 1822.

ALBION K. PARRIS.
