mission may determine what work fairly and properly is a part of such elimination or alteration and what work fairly and properly should be regarded as highway construction. The commission may make such order relative to the maintenance of crossings at grade, and of crossings where the highway is carried over the railroad, as it may deem necessary, and may determine whether such expense shall be borne by such railroad corporation, by the city or town in which any such crossing is located, or by the state acting by or through the state highway commission, or said commission may apportion such expense equitably between such railroad corporation, such city or town, and the state acting by or through the state highway commission. While the use of any way is obstructed in carrying out the foregoing provisions of this section, such temporary way shall be provided as the commission may order; provided, however, that the commission shall not make any order upon any petition filed under the provisions of this section until they are satisfied, by investigation or otherwise, that the financial condition of the corporation operating the railroad in question will enable said corporation to comply with such order, and that the probable benefit to the public will warrant said order and the probable expense resulting therefrom, and that said order can be complied with without exceeding the state appropriation available therefor. The county commissioners shall have the same right of petition under this section, with respect to roads in unorganized places laid out by them under the provisions of section 55 of chapter 27, as have municipal officers of a city or town under the foregoing provisions of this section; and in case a petition is filed by them, all parties interested in the subject matter of the petition shall be notified by the public utilities commission of the filing of such petition and given opportunity to appear and be heard thereon.'

Approved March 14, 1933.
