CHAPTER 77

S.P. 447 - L.D. 1191

An Act to Facilitate the Adoption of a Maine Wellhead Protection Program for the Protection of Public Water System Wellheads

Emergency preamble. Whereas, Acts of the Legislature do not become effective until 90 days after adjournment unless enacted as emergencies; and

Whereas, the State lacks a coordinated approach to protecting public water system wellheads; and

Whereas, the Maine Wellhead Protection Program as developed under the requirements of the 1986 amendments to the federal Safe Drinking Water Act and approved by the United States Environmental Protection Agency may offer a coordinated protection approach and needs to be further developed; and

Whereas, in the judgment of the Legislature, these facts create an emergency within the meaning of the Constitution of Maine and require the following legislation as immediately necessary for the preservation of the public peace, health and safety; now, therefore,

Be it enacted by the People of the State of Maine as follows:

Sec. 1. Maine Wellhead Protection Program. By February 15, 1993, the Department of Human Services, Division of Health Engineering shall report to the joint standing committee of the Legislature having jurisdiction over natural resource matters on a proposed program and rules for implementing the Maine Wellhead Protection Program designed to protect public water system wellheads from contaminants that may have an adverse effect on public health, as required under the 1986 amendments to the federal Safe Drinking Water Act. The Department of Human Services, Division of Health Engineering also shall introduce legislation to implement this program.

In developing this program and the proposed rules, the division must work with and receive advice from representatives from water suppliers, municipalities, summer camps, businesses, the scientific community and other affected parties.

Emergency clause. In view of the emergency cited in the preamble, this Act takes effect when approved.

Effective March 13, 1992.
