**9. Experimental vehicle permits.** The Commissioner of Transportation, with the advice of the Commissioner of Public Safety and the Director of Motor Vehicles, may establish a program providing for the issuance of temporary experimental vehicle permits on a discretionary basis, each for a period not exceeding 2 years, upon proper application in writing from a trucker representing a significant sector of the trucking industry. The permits are to provide for the operation and the evaluation of the operation of experimental vehicles that have a length, width, height, weight and other conditions beyond that specified in Title 29-A, over any nonlimited way or bridge. These permits carry no fee. Registration must be assessed for the applicable road limit exclusive of general or special commodity permits, despite expected operation beyond these limits, in an experimental mode. Multistate experiments are to be encouraged. Registration in another state in the context of a regional multistate experiment will be honored without the necessity of acquiring a Maine registration. These permits may be granted only within the context of a structured joint industry-government evaluation program, including preparatory off-road performance tests, strictly controlled operational testing on the highway system and both in-process and final evaluation reports covering productivity, operating characteristics and safety. Additional reports may be required by the commissioner if considered necessary during the experimental phase. The Commissioner of Transportation shall issue these permits on a limited basis and only if the commissioner judges that a significant potential exists for increased productivity without undue compromise in safety by the eventual legal general operation of the experimental vehicle, without permit, on the highway system. No commitment to that eventual operation is implied by the issuance of the temporary experimental vehicle permit. The Commissioner of Transportation shall ratify, at the commissioner's discretion, all conditions of the experimental programs proposed, including, but not limited to, preparatory off-road vehicle tests, time limits, vehicle dimensions, axle and gross weight limits, routing, insurance and reporting provisions. The commissioner may terminate any evaluation at any time if in the commissioner's judgment the operation of the vehicle poses an undue threat to public safety or the integrity of the highway system or if the conditions of the permit are violated.

The commissioner shall submit a report biennially to the joint standing committee of the Legislature having jurisdiction over transportation before the first regular session of each Legislature. This report must discuss

the progress of any experimental vehicle evaluations and contain recommendations, if any, for legislation leading to their eventual general use on the highway system. If during the previous biennium there has been no activity relating to the evaluation and permitting of experimental vehicles, the reporting requirement is waived.
