pay; or transferred to another position within the utility at a site more than 50 miles away from the employee's current site of employment.

**7. Compliance with safety, security and reliability standards.** In implementing the policies specified in this section, the commission and other agencies and instrumentalities of the State shall ensure that applicable regional, national and international grid safety, security and reliability standards are met. The commission and other agencies and instrumentalities of the State shall seek to cause standards that promote cost-effective technologies and practices supporting smart grid functions to be integrated into national and international grid safety, security and reliability standards.

**8. Cost recovery.** The commission shall, upon petition, permit a transmission and distribution utility to adjust its rates to recover the utility's prudently incurred incremental costs associated with implementing smart grid functions and associated infrastructure, technology and applications or otherwise taking reasonable actions consistent with the policies of this section, to the extent that the costs are not already reflected in the utility's rates and the adjustment does not result in rates that are unjust or unreasonable. A grant by a utility in an amount approved by the commission to the University of Maine System for smart grid research and development is deemed to be a prudently incurred incremental cost associated with implementing smart grid functions.

**9. Report.** The commission, as part of its annual report pursuant to section 120, shall include a report on the progress of the State in achieving the purposes of this section. The commission may include in its report any recommendations for changes to law to promote the purposes of this section.

**10. Consumer education.** A transmission and distribution utility that implements smart grid functions shall, to the extent the commission determines appropriate, provide information to customers about the purpose and goals of smart grid functions, the ways in which smart grid functions, including but not limited to time-of-use pricing, may involve customer interaction and how the implementation of smart grid functions can benefit customers.

**11. Savings clause.** Nothing in this section limits any other authority of the commission with respect to smart grid implementation.

**Sec. 3. Report.** As part of the report regarding smart grid policy implementation that is due February 1, 2011, pursuant to the Maine Revised Statutes, Title 35-A, section 3143, subsection 9, the Public Utilities Commission shall report on the results or progress of any proceeding conducted pursuant to Title 35-A, section 3143, subsection 5 and any recommendations regarding smart grid policy to the joint standing com-

mittee of the Legislature having jurisdiction over utilities and energy matters. Following review of the commission's recommendations, the joint standing committee may submit a bill regarding smart grid policy to the First Regular Session of the 125th Legislature.

**Emergency clause.** In view of the emergency cited in the preamble, this legislation takes effect when approved.

Effective March 23, 2010.
