FIRE INSURANCE.

The risks written by fire insurance companies of other states and countries on Maine property, and reported to this department, for the year ending December 31, 1900, amounted to \$133,189,006.49 which is the largest amount ever written in this State in a single year and again emphasizes the fact that the business of fire insurance—showing as it does a steady growth in Maine during the past seven years—is more than keeping pace with the growth and development of our State and is a commercial necessity of sufficient magnitude to affect the interests of every citizen of our Commonwealth.

LOWER RATES.

The premiums collected by these companies on the risks written in Maine during the year 1900 aggregate \$1,772,701.62, a decrease of \$17,099.27 from the collections of the year previous.

* Includes assessments on premium notes.

† No reports.

The average premiums collected during the year amounted to \$1.33 for each \$100 insured which is the smallest amount charged during the past fourteen years. Since 1895, when the legislation of 1893 was repealed and the standard policy law and the statute relating to the investigation of fires enacted there has been a constant decrease in the average rates of insurance, as shown by the accompanying tables.

LOSSES.

The losses paid during the year 1900 amounted to \$983,763.64, a decrease of \$89,208.40 from those of the previous year.

The losses incurred aggregated \$1,050,326.49, showing a decrease of \$283,475.63 from the losses incurred during 1899. The losses paid during the year 1900 were 55.49% of the premiums received against 59.95% for the previous year and the losses incurred 59.25% against 63.34% for the year preceding.

The Maine Mutual Fire Insurance Companies during the year 1900 wrote insurance amounting to \$5,333,077 and collected in cash premiums and assessments \$49,298.11 and paid for losses during the same period \$45,341.47.

These companies are mostly organized and conducted by the farmers of our State for mutual protection—many of whom are unable to procure insurance in foreign companies,—and are examined biennially by this department as required by law and have generally been found to be doing a safe business and furnishing their patrons adequate protection at small cost, and their interests should be zealously guarded and protected.

"MILL MUTUALS."

I desire again at this time to call attention to the so called "Mill Mutual" insurance companies which insure many of the manufacturing establishments in this State—the insurance being effected by the owners or agents of the property with the companies direct and without the intervention of any third party. These corporations have no agents or representatives in Maine; pay no fees or taxes to the State and make no report to this department. There is, therefore, no means of ascertaining the extent of their transactions, which are extensive and, if reported, would materially swell the volume of business shown by the foregoing figures, and I earnestly recommend that some action be taken to require these corporations to transact their business in the usual manner and contribute their share of the fees and taxes imposed by law upon foreign insurance companies.

INVESTIGATION OF FIRES.

The percentage of fires of "unknown" and "incendiary" origin for the several years since the enactment of the law providing for the investigation of fires has been as follows:

	Incendiary.	Unknown.
1895 (May 26 to Dec. 31).....	8.64%	32.54%
1896	8.46%	31.59%
1897	4.81%	27.04%
1898	3.54%	20.58%
1899	2.76%	20.47%
1900	1.85%	19.37%

There were only thirty-five incendiary fires in Maine during 1900 against fifty-three for the year 1899 showing a decrease of 33.96% in the fires of incendiary origin during the past year.

CAUSES OF FIRES.

The record of fires in this State during the year 1900 shows a slight improvement over that of the previous year. During the past year there were 1884 fires reported to this Department exposing \$7,095,943.01 of property and damaging the same to the amount of \$1,886,600.38, and as there were fires in unorganized townships from which no returns could be obtained it is probable that the property destroyed by fire exceeded \$2,000,000.00—only about one-half of which was insured.

This enormous waste is altogether too large and some further action should be taken to reduce the same and save to the cities and towns of this State thousands of dollars of taxable property which is annually being swept from their valuations, never to be replaced.

DEFECTIVE CHIMNEYS.

During the year there were 293 fires which were attributed to "defective chimneys and flues" exposing property to the value of \$680,651.90 and damaging the same to the amount of \$261,272.23.

In my opinion a very large proportion of this loss might have been averted by more diligence on the part of the owners and occupants of the property.

There were other fires in which the loss was undoubtedly materially increased through defective construction and I earnestly recommend that the law relating to the inspection of buildings and the accumulation of combustible materials be amended to apply to all towns of one thousand inhabitants and that a penalty be provided which will compel the Inspectors of Buildings in the various cities and towns to perform the duties imposed by the statute.

MANHATTAN FIRE INSURANCE COMPANY.

The cash capital of the Manhattan Fire Insurance Company of New York is \$500,000, and the annual statement of the company, for the year ending December 31, 1900,—an abstract of which is published in this report,—showed a “surplus over all liabilities” on that date amounting to \$38,013.55, making the “surplus to policy holders” \$538,013.55.

The company has since been examined by the New York Insurance Department, the examination being brought down to date of March 1, 1901, and the examiner's report shows that on December 31, last the company's capital stock of \$500,000 was impaired to the extent of 49%, or \$245,649.88, a difference of \$283,663.43 between its alleged condition as represented in the statement and that found on examination. The examiner found the capital impaired March 1, 1901, 98%, or \$489,703.31.

The statutes of this State make no provision for the revocation of a company's license, except for “neglecting or refusing” to comply with our laws, or for violation of certain provisions thereof.

The Manhattan had not neglected or refused to comply with or violated the statutes of this State, and therefore, I had no authority to revoke its license. Section 75 of chapter 49 of the Revised Statutes provides that “when the commissioner thinks that any licensed foreign insurance company is in failing condition, or unsafe, he may, on reasonable notice, suspend its right to do business in this State until such disability is removed.”

Upon receipt of information relating to the condition of the company I notified its officers that at the expiration of ten days' notice the licenses of the company and its agents would be suspended, which was done on the tenth day of May.

Otto Kelsey of Geneseo, N. Y., has been appointed receiver of the company and I understand that criminal proceedings have been commenced against the officers of the corporation.

In this connection I desire to call attention to the present statutes, and to say that in my judgment more discretionary power should be given the commissioner relating to revocation of licenses to companies and agents.

Annexed to and forming a part of this report will be found a list of licensed agents and brokers, revised to May 15th, also the usual statistical tables and abstracts of the annual statements made to this department, as required by law, for the year ending December 31, 1900, and the tabulations required by chapter 267 of the Public Laws of 1897, relating to the investigation of fires.

Respectfully submitted,

S. W. CARR,

Insurance Commissioner.

AUGUSTA ME., May 15, 1901.
