MAINE STATE PRISON.

INSPECTOR'S OFFICE, THOMASTON, ME., December 1, 1900.

To the Honorable Governor and Council:

In compliance with the provisions of the Revised Statutes we have the honor to submit herewith the annual report of the condition of the Maine State Prison and the several county jails for the year ending November 30, 1900.

We are pleased to say that the same cleanly condition of the Prison and grounds has been maintained, and the same good discipline enforced. There have been no complaints of the quantity or quality of food. No contagious disease has prevailed in the institution, and a comparatively small number of inmates have been treated in the hospital. Three inmates have died from natural causes. No attempts at escape have been made.

The Prison physician, Dr. A. R. Smith, will give the necessary information concerning the physical condition of the inmates. The moral and educational status will be fully set forth by Chaplain Plumer, whose indefatigable labor we believe is productive of great good.

Not quite as many goods have been manufactured in the different departments as last year owing to the fact that the daily average number of convicts has been thirty-seven less; last year the average number was 221, while this year it is but 184. While the gains from these departments have been fair, far better results would have been attained had there been sufficient funds to enable the management to conduct affairs on business principles. The legislature will be asked by the warden for an appropriation sufficient to liquidate all outstanding obligations; also running expenses for the next two years; the amount should be readily granted; it is not sound business policy for the State of Maine to pursue the manufacturing of goods without capital enough to enable the managers to purchase merchandise used in manufacturing at the minimum prices, thereby saving all discounts, which amount to a large sum during the year; and to pay the rate of interest demanded at the national banks for money used in legitimate running expenses.

In a former report, we suggested the advisability of providing for a matron in the female department of the Prison; time and experience have demonstrated the fact beyond question, that this measure would be for the best interest of the State and in keeping with prison discipline and reform throughout the country. We therefore earnestly recommend that the sum of six hundred dollars be added to the appropriation for officers' salaries for this purpose. We further advise that the appointment of the matron be made by the warden, subject to the approval of the Board of inspectors, as prescribed in section 6, chapter 140 of the Revised Statutes relative to the appointment of subordinate officers.

The overseers have been attentive to duty and faithful in discipline and instruction.

In visiting the Prison we have been frequently accompanied by the visiting member from the executive council, Hon. A. P. Gordon, whose suggestions and advice have been of material value.

Our thanks are hereby extended to the warden and all subordinate officers for courteous treatment during the year.

WHITMAN SAWYER,

A. W. GILMAN, W. L. SCRIBNER, Inspectors of Prison and Jails.

---	----------------------------------

WARDEN'S REPORT.

To the Honorable Governor and Council:

GENTLEMEN: Herewith I have the honor to submit my annual report for the fiscal year ending November 30, 1900.

Thomaston at her last spring election voted to extend her sewer on Main street as far as the Prison, giving me an opportunity to connect the warden's house, the repository building with four tenements, the chaplain's residence and the house occupied by B. P. Bacheller, overseer of the trimming shop, with the sewer, thereby removing what has been a filthy nuisance, especially to the tenants over the repository, the cost of the same being \$561.36.

The east end of the old Prison must be rebuilt, as it is unsafe in its present condition. The roofs of the blacksmith and trimming shop are much out of repair and leaking badly. In the blacksmith shop the men are unable to work only a part of the time in extremely cold weather as the shop is heat with stoves, which I consider unsafe, and not warming the building properly. I would recommend that the building be heat by steam which can be done at a small cost.

The fire engine purchased some twenty-five years ago, is much out of repair and unsafe. I would recommend that it be thoroughly overhauled and put in condition to do efficient work when required, as the State property connected with the Prison at a cost of more than \$100,000 should have the protection of modern fire apparatus.

Money should be appropriated by the State to enable the warden to make all purchases for the different departments for cash, thereby saving discounts and interest money which amount each year to several hundred dollars.

WARDEN'S REPORT.

I am not surprised that the question is frequently asked, why the State Prison is not self supporting. For the information of such inquiry permit me to give a few of the most important reasons.

The principal reason is that a large majority of the men sentenced to our State Prison are for short terms, not long enough to be of any service to the State either in making carriages or harness. For the year 1899 sixty men were sentenced to State Prison, five of that number were sentenced for three years, one for two and one-half years, one for two and one-quarter years, fifteen for two years, seven for one and one-half years, four for one and one-quarter years, and thirteen for one year.

With the time off allowed by the State, a three-years'-man would serve two years, five months and eight days, a two-yearsman would serve one year, seven months and fifteen days, while a one-year-man would only serve nine months and twenty-three days. From the above you will see that out of the sixty men sentenced for the year 1899 forty-six of them were for short sentences, averaging less than two years per man. The expense per man for a year is about sixty-five dollars, multiplied by forty-six and you have the cost of the men sentenced to the State Prison for three years or less which is \$2,990, add to that amount the cost of providing for at least fifteen per cent of the whole number in the Prison, men who are unable to work on account of bodily infirmities, and you will readily see that about \$5,000 has been expended with nothing to show for it. In the above estimate I have not reckoned the cost of overseers, guards or fuel, which would increase the expense at least \$2,000. For the present year 1900, fifty-eight men have been sentenced to the State Prison; out of that number forty-three were sentenced for three years or less. Five of the fourteen men left out of the sixty sentenced in 1899, two are for life, one of them nearly worthless, poor health is the trouble; one for thirty-eight years, old and unable to work but little; one for ten years, more than sixty years of age; one for eight years, seventy years old when sentenced; one for six years, works most of the time; two for five years, one of them unable to work on account of poor eyesight, one in hospital for nearly two years, operated on for appendicitis; four for four years, one of the men has poor eyesight, the other three are all right, work every day.

From the above statement it will be seen that more than fifty men out of the sixty sentenced to this Prison for the year 1899 have been of no benefit to the State.

In concluding this report I desire to extend to the Prison inspectors, to A. P. Gordon of the council committee and the Prison officials with whom I have been associated, my sincere thanks for their earnest co-operation in the management of the Prison.

Very respectfully,

HILLMAN SMITH, Warden.

CHAPLAIN'S REPORT.

To the Honorable Governor and Council:

Gentlemen : I herein submit a report of the work of the year ending November 30, 1900 :

During the year fifty-eight persons, for various crimes, have been committed to the Maine State Prison, and one to the insane department of the prison. Four of them did not know the alphabet. Four could read a very little but could not write at all. Twenty-five had attended the public schools of this or other countries, either a few weeks or a longer period. Eight had completed the grammar school course of study. Seven had completed the high school course. The remaining eleven had been favored with academical and collegiate training. The comparison of these figures with those given in my report for 1899 will show that those committed to the prison this year had been favored with school advantages superior to those committed last year.

Fifty-two were users of tobacco, some only chewing, others smoking only, yet others using it in both ways. Only seven were free from its use. Thirty-three of the fifty-nine, including those who only drank occasionally but were never drunk, and all others, classed as moderate or hard drinkers, had been accustomed to the use of intoxicating drinks. Twenty-six of the fifty nine replied to the question respecting the drink habit that they were total abstainers.

LIBRARY.

Some more than one hundred volumes which were worn beyond repair have been destroyed. These numbers have been replaced by second-hand books donated by the convicts and others interested in the prison work. Sixty volumes have been added by purchase. We continue to take several of the leading magazines. These, with old magazines given by the friends of education and reform, are weekly distributed to the men and are very generally read.

CORRESPONDENCE.

A large number of the convicts improve the privilege of writing one letter each week to friends and acquaintances. I continue to write weekly or as often as they wish to write for those who cannot write.

PERIODICALS.

Many of the men use the privilege given them to subscribe for some of the leading papers of the State and country. Others receive the papers through the kindness of their friends. The men are allowed to exchange their papers by the hands of the guards. I have also furnished each man with some religious paper, or a copy of the Youth's Companion weekly, such papers being given for this purpose by the friends of reform in various sections of the State. The men are therefore well informed respecting the current events of the day.

INSTRUCTION.

The work of instruction has been continued with commendable progress by most of the students. The primer, the first reader, and the spelling book are not neglected. The students are advanced as rapidly as their attainments and existing circumstances will admit. All are advised and urged to persue some course of study to be continued after their liberation, or if completed while here, to be followed with a more advanced course in future years. We hope in this way to fortify some against the temptations common to all discharged men.

RELIGIOUS INSTRUCTION.

We have given thoughtful and prayerful attention to this important part of our work. The regular services of past years are continued; preaching in the A. M.; service of prayer and Bible study with the women prisoners in the P. M.; and a service in the hospital such as the condition of the inmates may justify. These services are supplemented with such personal conversation and instruction as may be helpful in leading the men to a better and Christian life. We are encouraged to think these labors are not in vain.

With sincere thanks to each member of your honorable body, the officers of the prison, and to all who have in any way assisted me in my work, I submit this report.

C. A. PLUMER,

Chaplain.

November 30, 1900.

PRISON PHYSICIAN.

To the Honorable Board of Prison Inspectors :

Gentlemen : I herewith submit to you my fourth annual report for the fiscal year ending November 30th, 1900. As a rule there has been very little sickness except a run of influenza we experienced last December but the men were sent to the hospital as soon as their cases demanded it and the result was very satisfactory as not a complication arose and all made a good recovery. There has not been a case of pneumonia resulting from the common causes as might be expected when so many were afflicted with colds and influenza, and the reason. I believe, is due to the fact that the hospital has been kept open during the entire year and all cases showing the slightest disposition for complications arising, or not yielding at once to treatment, have been sent there where they get much better care than could be administered to them in their cells. I have been in the habit of selecting one of the prisoners, whom I could fully trust to carry out my instructions, to act as steward and nurse, and in so doing I believe I obtain far greater results toward averting a serious illness if not a death. In cases demanding the same, the food that is prepared for the sick and convalescing is of the same standard that any hospital furnishes, the milk diet, beef, mutton and chicken broths. Mellin's food and others of a similar nature. gruels, eggs, toast, and stimulents when required.

Three deaths have occurred during the year. Alfred H. Stewart, sentenced from Cumberland county, June 13th, for six years, was placed, immediately upon arrival, in the hospital, in the last stage of consumption and died July 8th.

James Keegan, serving an eight years' sentence for burglary from Cumberland county, sentenced September 20th, 1898, died very suddenly in the hospital July 23rd of valvular disease of the heart. Fred Witham serving a five years' sentence for assault with intent to kill, came from York county, October 5th, 1897, had been confined in the hospital nearly a year and died of consumption.

The large majority of deaths here are due to consumption and most of these cases are in a more or less advanced stage when they are committed. I believe that the health of the men confined here will compare favorably with the same number of men outside and that the confinement to which these men are subjected, with their daily work, their regular habits of eating, sleeping and all combined with the present sanitary conditions, tend to prolong their lives rather than shorten them. The sanitary conditions are not as yet what might be called perfect and I am in hopes to see more improvements in the coming year, in regard to sewerage connections with all the workshops.

I wish to thank you, gentlemen, and the officers of the prison for the many courtesies received.

ADDISON R. SMITH, M. D.,

Prison Physician.

3

REPORT OF THE COUNCIL COMMITTEE ON STATE PRISON.

To the Governor and Council:

I have visited the State Prison several times the present year and have endeavored to acquaint myself with the workings of the institution. Most of my visits have been with the inspectors as I thought it advisable to consult together. The warden and all subordinate officers have ever extended to me all assistance in their power. I am under special obligations to the Prison Inspectors for their uniform courtesies.

The financial standing of the Prison is shown by the report of the Inspectors, The sanitary condition is good, and not a single complaint as to food or treatment has been made by any of the convicts.

Many people of the State think that the Prison should be self supporting, but that is impossible under the restriction that only a certain amount of the convicts should be employed on one kind of work. It must have a skilled workman in each department. Most of the convicts have short sentences, from one and a half to five years, and when they begin to understand much of the work, their time is out.

The Legislature ought to appropriate money enough to pay the debt of the Prison, and to give a working capital, to stop interest and to have money to pay down for stock and to get the discounts.

I think the warden and the subordinate officers are doing all in their power for the interests of the Prison and the welfare of the convicts.

Respectfully Submitted,

A. P. GORDON.

REPORT OF THE COMMISSION RELATING TO THE CRIMINAL INSANE.

To His Excellency, the Governor, and the Executive Council of the State of Maine:

It again becomes the duty of your commission, who has under its charge the care of the criminal insane, to present its annual report.

The statutory enactment requiring the commission to meet and examine into the condition of the inmates of the insane department of the Prison has been fully complied with. Monthly visitations have been made by the entire commission and it has personally examined into the mental and physical condition of the occupants of this department, and supplemental to such action the services of the physician to the Prison have been rendered at frequent intervals and whenever informed of the necessity of his presence.

These investigations have also extended to its hygenic, dietetic and sanitary conditions. We have at all times observed sufficient light, heat and ventilation and this feature in connection with its sewage, with its attachment of a bathroom and water closet and the insistence of cleanliness in the patients receiving weekly baths, renders the sanitation of the department very acceptable if indeed it cannot be regarded as perfect. While the variety of food is somewhat limited as is to be expected, yet it is well cooked and sufficient in quantity and quality to meet the physical requirements of the individual.

Our observations can be but commendatory of the interest that has been manifested by Mr. Moody, the supervisor, who has the immediate care of this department. His adaptability to the position and his long experience renders him not only a valuable acquisition but the inmates are receiving the benefit of trained service.

One cannot fail to observe the exhibition of increased comfort and contentment manifested by the inmates since the management of the Prison very wisely made it available for this unfortunate class to receive the benefit of manual exercise in gardening and farming. It will doubtless be interesting for the public to learn what has been accomplished in the above direction by the occupants of this department and it affords us pleasure to state that under the immediate charge of the supervisor during the past year fifty cords of wood have been manufactured; and three hundred and twenty-six bushels of potatoes, one hundred and seventy-five bushels of turnips, fifty bushels of vellow corn, seven thousand, seven hundred ears of sweet corn, sixty-seven bushels of string beans, and seven tons of cabbages have been raised and harvested. During the winter months or at such seasons as labor cannot be utilized, the inmates have extended to them the opportunity of sunlight and air every suitable day. As a result of such advantages most excellent physical health has been enjoyed throughout the past year. Indeed there has been almost entire exemption from pain and bodily ailments. No deaths have occurred.

While exhibitions of violence have occasionally occurred, as would be expected from persons suffering from insanity and particularly in that class who are so unfortunate as to be afflicted with criminal instincts and tendencies, yet no serious injuries have been inflicted upon those in charge or the inmates. We are pleased to state that individual conduct has been such as to make available the opportunities of extending the advantages of the institution's library and such reading material as conduce to improvement and contentment. They also receive the helpful advice of the chaplain and the comfort and consolation of religious services.

In conclusion it may be pertinent to add that while your commission is still of the opinion that for reasons which might be urged, and many of which have been set forth in a former report and emphasized in a subsequent one, that this dangerous and defective class should be cared for in connection with a hospital for the insane, yet we are able to assure the relatives and the

CRIMINAL INSANE.

public as well, that much is being done for their comfort here and such supervision is rendered and such agencies applied as affords to each inmate a large share of restfulness and as great a degree of contentment as is consistent with the necessary monotony which, in consequence of peculiarly diseased conditions, must exist.

We append the numerical status of the department during the past year. Number remaining, November 30, 1899..... 23 Admitted since 2 Discharged since 2 Died since 0 Remaining November 30, 1900..... 23 Respectfully submitted, BIGELOW T. SANBORN, M. D., ADDISON R. SMITH, M. D., HILLMAN SMITH, Warden,

Commission Relating to Criminal Insane.

Maine State Prison, Thomaston, Me., November 30, 1900.

JAIL REPORT.

The several county jails have been inspected quarterly as prescribed by law by one, and in some cases by two, members of the board. It would be wise to have the appropriation large enough to have two members at least to inspect jails in the large counties. We are pleased to state that the condition of the jails on the whole has attained rather a higher standard than was stated in our last report; greater attention has been given to sanitary arrangements, particularly in the jail at Portland, where large sums have been expended in this direction; more attention has been given to the cleanliness of cells, bedding. etc.

No complaint has been made to the inspectors of the food, and so far as we have been able to observe, it has been ample in quantity, of plain, wholesome quality, and well cooked. It is our duty to report escapes from jails in Auburn, Aroostook, Ellsworth, South Paris, Bangor and Alfred; these escapes we attribute to carelessness on the part of the officers in charge; too much confidence is often reposed in prisoners who are considered trusty and we recommend more vigilance in that particular. A new jail is nearly, if not quite, completed in Piscataquis county which will be ready for occupancy January 1st, 1901. It has been the custom in former years to report each jail separately; this custom we omit at this time, and for the number of commitments and the offences, we refer you to the reports of the sheriff of each county hereto annexed.

Respectfully sbmitted,

WHITMAN SAWYER,

A. W. GILMAN,

W. L. SCRIBNER,

Inspectors of Prisons and Jails.
