#### MAINE STATE PRISON.

THOMASTON, ME., December 1, 1903.

To the Honorable Governor and Council:

We have the honor to transmit herewith our annual report for the year ending November 30, 1903.

At the commencement of the prison year, December 1, 1902, there were confined in the prison, one hundred eighty-one (181). Sixty-seven (67) have since been received; seventy-one (71) have been discharged by expiration of sentence; one (1) has died; and four (4) have been pardoned. Largest number of prisoners at any one time, one hundred eighty-two (182). Smallest number, one hundred fifty-five (155). Average daily number for the year, one hundred sixty-eight (168).

All our monthly inspections have found the prison in a neat and cleanly condition. The usual good discipline has been maintained with but few punishments. There have been no contagious diseases during the year and but little sickness. For the physical and spiritual condition of the inmates we refer you to the reports of the prison physician, Dr. A. R. Smith, and the chaplain and teacher, Rev. C. A. Plummer.

As a matter of economy and cleanliness, mattresses have been purchased for the cells to replace the old ticks of straw.

The sewer, begun late in 1901, was completed in the early part of this year and connections made with the different shops. The quarry pond has been nearly drained and filled, so that instead of an unsightly, stagnant pond, breeding disease, there is now a smooth, level space of earth which will be further improved from year to year. Six bath-rooms have been put into the old chapel for the use of the men, and one bath-room fitted up in the women's department. The prison has now an independent sewer to the Georges river with sanitary arrangements nearly perfect,—a condition of things hitherto unknown and of which the State may justly feel proud.

The gain from the manufacturing departments has been very gratifying, and is due largely to the efficiency of the overseers and the willingness of the convicts to work. A slight falling off in the sales and gain in the harness department arises from the fact that more experienced workmen have been discharged from this shop than from any other.

The seventy-first legislature passed a resolve (Senate Document 230) for the establishment of an electric light plant at the prison and empowered the inspectors to install it. A contract was made with the Maine Electric Company of Portland for a four hundred light dynamo of sixteen candle power each, with such wiring, switchboard, arc-lights, &c., necessary for a firstclass job to be set up ready to run, for ten hundred seventy-five dollars (\$1,075). The plant was completed and lights started the last of October, since which time they have been running with fairly good results. We are of the opinion, however, that a more modern high speed engine would be for the best interests of the institution, and we, therefore, recommend that one be purchased at an expense of from nine hundred dollars (\$900) to one thousand dollars (\$1,000), completed ready to run, and that it be paid for from the amount appropriated by the legislature for lighting the prison.

In visiting the prison, we have often been accompanied by the visiting member from the executive council, Hon. William T. Haines, whose suggestions and advice have been of great value. Our thanks are extended to the warden and all subordinate officers for their courteous treatment during the year.

WHITMAN SAWYER, W. L. SCRIBNER, A. P. GORDON, Inspectors of Prison and Jails.

#### WARDEN'S REPORT.

To the Honorable Governor and Council:

Gentlemen—I herewith submit my seventh annual report for the fiscal year ending November 30, 1903. The past year has been a very gratifying one to the officials of the prison as several lasting and permanent improvements have been completed, making the sanitary conditions of the several shops and their surroundings greatly improved. The inforcement of cleanly habits by every convict whether in the shops or in their cells, must receive the approval of every one who considers the comfort of the officers on duty and the welfare of the prisoners themselves

The prison has been without any conveniences for bathing until the present year, when we took a part of the old chapel, built six bath-rooms, furnished each with a modern bath tub, hot and cold water, good soap and clean towels. Every Saturday morning under the direction of an officer every convict, unless sickness prevents, is thoroughly washed and clean underclothes furnished.

I have also removed the old unsightly bed ticks filled with meadow hay or straw, many of them unavoidably soiled from time to time and in their place I have a neat wool top mattress, each mattress has a snug fitting covering, when the covering becomes soiled it is removed, washed and replaced.

The women's department has also been furnished with a modern bath-room. With every shop and building heated by steam and all connected with the main sewer emptying into the Georges river, and the old quarry with its filthy cesspool, an unsightly nuisance for so many years, is today a clean, attractive lawn. Next year I hope to be able to make the place more attractive by the use of grape vines, running roses, flowers and shrubbery.

This very gratifying showing has been perfected after several years of constant effort on the part of the prison officials.

The blacksmith shop, one hundred eighty feet in length, has had a new roof during the past year, the trimming shop has been thoroughly repaired, and all the other buildings needing repairs, looked after.

I desire to thank the overseers of the several shops for the great interest they have taken in their work. The statistical part of this report will show the result of their efforts. I also extend my sincere thanks to the prison inspectors for their kind and courteous treatment, and the officers who are associated with me in the management of the prison, I extend thanks for faithfulness to duty.

Respectfully submitted,
HILLMAN SMITH, Warden.

#### PRISON PHYSICIAN'S REPORT.

To the Honorable Board of Prison Inspectors:

Gentlemen: In making my seventh annual report, it is with pleasure to say that the greatest needs of the institution have been accomplished in the past year in the way of sanitary arrangements. The filling of the old quarry, the sewer connections with all the shops and the addition of six bath tubs makes our present system as near perfect as can be expected. There has not been a contagious or infectious disease in the prison during the past year. One death occurred on September 13th, of cancer of the liver, in a man 66 years of age, Howard A. Cleveland sent from Penobscot County in 1869, for murder in the first degree and serving a life sentence. The diet has been up to the standard and the hygienic conditions very much improved. No serious accidents have occurred and very little sickness of any character during the year, only one patient in the hospital at the present time suffering from Brights disease with a heart compli-Thanking you, gentlemen, for the many courtesies extended to me in the past year, I have the honor to remain,

Your Ob't Servant,
ADDISON R. SMITH, M. D.,
Prison Physician.

#### CHAPLAIN'S REPORT.

To the Honorable Governor and Council:

GENTLEMEN: I now submit my annual report of the work and interests committed by you to my charge as Chaplain of the Maine State prison.

The courts have sentenced sixty-seven persons to the prison during the year with sentences ranging from one year to life. Five of these could neither read nor write; five could read a little but could not write; one could not read or write the English language but could write and read the Italian language; thirty-three had attended the common schools one or more terms; nine were graduates of grammar schools; ten were graduates from High schools; two had attended some seminary, and two had completed a college course.

Sixteen had been hard drinkers of intoxicating liquors; twenty-six were moderate users of such drinks, and the remaining twenty-five professed to be total abstainers.

The weekly papers are admitted to the prison as heretofore. No change has been made during the year respecting the admission of papers and magazines. These are gladly received and carefully read by all who can read. The privilege of exchanging papers is granted the men, and therefore many of them are asfully informed upon the topics of public interest as the outside world.

The library contains more than two thousand books and bound magazines. Many of the books are old and worn with constant use. Some have been condemned to the waste heap. These numbers have been replaced by more recent publications either by purchase or donation.

The work of instruction has been conducted as heretofore. Each illiterate is encouraged to improve the opportunity afforded

to gain somewhat of book knowledge. The advancement of all has been commendable.

The weekly letters received and sent out are a source of contentment, happiness and culture. The privilege of writing and receiving letters weekly is fully appreciated by the men.

The work of religious instruction has not been neglected. It has been our constant endeavor to cultivate in the minds of all a sense of man's personal responsibility to his Creator and the need of such a Saviour from sin as the Lord Jesus. I think a larger number of the men than in previous years are daily reading and studying the Holy Bible. It has been my privilege to have many interesting conversations with the men respecting Bible truths, as well as to hold the Chapel services. We are endeavoring to plant the seed of Gospel Truth, waiting the harvest.

With sincere thanks to your Honorable Body and each of the prison officials for the assistance and encouragement given, this report is respectfully submitted.

C. A. PLUMER,

Chaplain.

Nov. 30, 1903.

# REPORT OF COUNCIL COMMITTEE ON STATE PRISON.

Waterville, Me., Dec. 30, 1903.

To the Governor and Council:

I am pleased to report the condition of affairs at the State Prison very much improved during the past year. I have visited the prison in company with the inspectors upon their several monthly visits, and have watched with much satisfaction the continuation of improvements made under their direction. The drainage of the prison yard, or what is commonly known as the "old lime quarry," begun by them two years ago, has been completed, and all the buildings have been connected with it by proper sewerage connections. What was formerly a very unsightly spot, and what might at any time have become a nuisance and a menace to health, has been entirely removed. A pool of dirty, stagnant water has been filled with earth and may be made into a grass-plot or flower garden, or used for any purpose required by the prison management. It has been made both healthful and attractive in appearance. I feel that no work done upon any of the property of the State will give the citizen and tax-payer, who understands the situation, greater satisfaction than this. It is true that it has cost quite a sum to accomplish this, but it is worth all it has cost. The health of the prisoners, during the past year, has been good, as has also the discipline and general management. The prison shows a better financial • result for the business done there during the past year in the several departments than has been accomplished for a number of years previous. The carriage, harness, broom, and furniture departments show a net gain of \$14,708.79; the carriage, broom, and furniture departments each showing a substantial gain over the business done in 1902; while the harness department shows

a small loss as compared with the business done in 1902. For the details, reference is made to the report of the inspectors. A new roof has been put upon the blacksmith shop, and the repair of the other buildings has been well kept up. New bath tubs have been introduced and the general sanitary condition of the prison much improved. All of which was made possible by the new sewer which drains the "old lime quarry." A new electric lighting plant has been installed, according to the provisions of the act passed by the last legislature, which will result in considerable saving to the State, but before this can be fully realized, a new engine, in my judgment, will be required.

I feel that a word of praise is due to the inspectors, who have spent a great deal of time and care in assisting the warden to work out these several improvements, also in the management of the details of the business of the prison.

All of which is respectfully submitted,

WILLIAM T. HAINES, Visiting Committee from Council.

# REPORT OF THE COMMISSION RELATING TO THE CRIMINAL INSANE.

To His Excellency, the Governor, and the Executive Council of the State of Maine:

The closing of the fiscal year of the prison management brings with it the imposed duty of your commission, appointed to administer the affairs of its department for the insane, to report what has transpired in its operations during the past twelve months.

Inspections have been made regularly by a majority of the commission each month, and the prison physician, one of its members, has been subject to call at all times to administer to the physical necessities and personally see and listen patiently to the imaginary demands and to promptly attend to the real medical wants of the inmates of the department.

It is the province of the commission at its monthly investigations to inquire into all of the details incident to properly managing this dependent class, to scrupulously note its sanitary, dietetic and hygienic conditions, to observe the decorum of its inmates and its discipline, to listen to the requests of its occupants, to note the existing state of cleanliness of the bedding, clothing and personal condition of the inmates, to correct errors if any exist, and to give such instructions to its immediate supervision as the commission may deem prudent and such as shall afford the maximum comfort to its inmates and add to their physical requirements.

It is gratifying to be able to report that while ample opportunities have been extended to the inmates to report any personal grievances or complaints of any kind or character, none have been made throughout the entire year. This unusual experience, which have been noted, points emphatically to the discretion

and ability of Mr. Moody who has the immediate supervision of the department. It demonstrates not only skillful qualities, but close watchfulness and alertness in looking after the little details and daily wants incident to the oversight of this peculiar department.

Since the introduction of steam sufficient warmth has been supplied, and added ingress of air during the past few years has offered sufficient ventilation at all times. Its system of sewerage, which affords a bathroom and water-closet with the introduction of hot water contributes to excellent sanitation. By careful inquiry into the dietary, it is observed that, while there is not a large variety of food, yet it is well cooked, wholesome, and sufficient in quantity and quality.

The southern aspect of the department affords ample sunlight, and with the constant daily exercise of its inmates in the open air, contributes largely in maintaining most excellent physical health. It has been the aim of the commission, supplemented by the prerogatives of the warden, to offer manual employment in the open air every suitable day, to such whose mental conditions make it prudent to allow them the privileges of enjoying its beneficial and healthful influence. The past year has been a very successful one in this direction, as a maximum number have voluntarily manifested a disposition in the selection of active manual exercise in the garden and about the grounds of the Institution. The records of this department show that nine out of the 23 inmates have been employed constantly, and under the direction of Mr. Moody, the supervisor, 125 cords of hard wood have been fitted for consumption, and in addition this force with frequent accessions of others from the department, has aided very materially, throughout the entire year in refilling the old excavation of the prison vard. As a result of this open-air exercise the physical health of the inmates has been at its maximum and very few cases of acute illness of any kind or character have prevailed. But one death has occurred during the year and that in a person who has passed the limit of human life, being four score years of age and death being largely due to extreme longevity. Such constant discipline has been maintained that no accidents have occurred to mar the physical well being of any of its people. By consulting the tabulation appended to this report it will be found that two persons have been discharged. One

had apparently recovered. He had increased in physical strength and had become very industrious and well disposed. His relatives who evidently were responsible people volunteered to take him home and provide suitable employment. No report has been made since his discharge and it is assumed that he is maintaining still, proper self-control, is not disturbing the peace and safety of the community and engaged in some industry. The other person discharged was by the request of relatives and with the promise that he should be kindly cared for. He manifested no violence at the department, was at all times passive and manageable, but had become very feeble in consequence of mental and physical infirmities.

In closing this report we should not be doing justice to the faithful services of the chaplain of the prison, did we not mention the kindly interest he has constantly manifested in the spiritual welfare of the inmates of this department, not only in his didactic instructions, but in affording them the opportunity of the usual religious exercises in the chapel and in extending to them the privileges of the institution's library. Long experience in dealing with abnormal states demonstrates the beneficial moral effects, and which cannot be overrated, of proper religious instruction as an auxiliary in the judicious administration of hospitals and prisons. It is ameliorating in its tendencies, elevates morals, and is soothing and helpful in the treatment of diseased mental processes.

We append the following tabulation which is the numerical status of this department:

Number remaining November 30, 1902														
Admitted since														
Whole number under treatment														
Discharged recovered														
Discharged unimproved														
Died since	I													
Remaining Nov. 30, 1903														

Respectfully submitted,

BIGELOW T. SANBORN, M. D., ADDISON R. SMITH, M. D., HILLMAN SMITH, Warden, Commission Relating to Criminal Insane.

Maine State Prison, Thomaston, Me., Nov. 30, 1903.

#### To the Honorable Governor and Council:

The jails of the different counties have been inspected quarterly as prescribed by law, by one and when possible, by two members of the board of inspectors. We are pleased to state that the condition of the jails has been kept up to the high standard reported in former years, especial attention having been paid to sanitary arrangement, with the exception of the jail at Wiscasset, which is a disgrace to the county. Food in the different jails is very much alike. It consists of bread and tea or coffee for breakfast; soups, chowders and baked beans for dinner; and bread and tea for supper. This food is ample in quantity and of good quality. The jail at Augusta was partially burned in the early part of the season but no prisoners escaped. It has since been repaired and maintains its usual good discipline.

It has been the former custom to report the condition of each jail separately. This custom has been omitted for this year, and for the number of commitments and offenses and other jail statistics we refer you to the annexed reports of the sheriffs of each county.

Respectfully submitted,

WHITMAN SAWYER,
W. L. SCRIBNER,
A. P. GORDON,
Inspectors of Prison and Jails.

### ANDROSCOGGIN COUNTY JAIL—AUBURN.

County Officers—George Parcher, A. M. Penley, A. B. Nealey, County Commissioners; Chas. S. Cummings, Sheriff and Jailer; B. F. Beals, Turnkey; No regular physician; Austin B. Howard, Overseer of Workshop.

Number of prisoners in jail November 30, 1902. 76
