THIRD ANNUAL REPORT

OF

Auditor State Printing

For the Year Ending December 31

1908

WATERVILLE
SENTINEL PUBLISHING COMPANY
1909

STATE OF MAINE.

AUGUSTA, February 20, 1909.

To the Honorable Governor and Council:

I have the honor to herewith submit the third annual report of the Auditor of State Printing, for the year ending December 31, 1908.

Respectfully,

E. N. CARVER,

Auditor of State Printing.

COST OF GENERAL PRINTING IN 1908.

COMPARISON WITH FORMER YEARS.

On subsequent pages of this report will be found in detail a tabulated statement of the printing done during 1908 for the various State departments and institutions, followed by a summary of totals. By this statement it will be seen that the cost of general printing for 1908, with certain items estimated, because the work is unfinished and cost not ascertained, was less than in any recent year.

COMPARATIVE STATEMENT.

1906		\$26,953 66
1907, (completed)		30,822 24
1908, total ascertained items.....	\$22,196 69	
1908, 8 items estimated.....	2,662 00	24,858 69

BALLOT PRINTING FOR 1908.

The expense of ballot printing for 1908 was unusually large. The amendment ballots and accessories nearly doubled the ordinary cost for the September election printing. In connection with the November election there was a special congressional election to fill vacancies in two congressional districts, adding largely to the printing required. Altogether the printing of ballots and accessories for all elections of 1908 cost \$7,863.37. Further detail of the same will be found following the department tabulations.

STATE BINDING CONTRACTS.

By chapter 176, Public Laws of 1907, the office of Public Binder was abolished and the competitive system extended to the contracts for State binding, taking effect January 1, 1909. Toward the close of 1908, specifications and forms were issued, proposals invited and received after due public notice, and awards made. The bindery work includes folding, stitching, binding, ruling, numbering, perforating, etc. This was divided into five natural classes. Classes A, C, and E were awarded to Harry W. Reid, Augusta. Classes B and D were awarded to Merrill & Webber Co., Auburn. Contracts for one year, with suitable bonds, have been executed at prices that appear advantageous.

RESULTS OF THE COMPETITIVE SYSTEM.

On account of the lack of available data as to the volume and cost of the State Printing prior to 1906, it has not been possible heretofore, to make a fair and reliable comparison of the cost under the two systems—contracting on the basis of competitive bids and fixing prices by statute.

The first contracts under the competitive system, covering the years 1906 and 1907, have now been completed and sufficient data obtained to make such a comparison possible. The two-year period constitutes a complete cycle, as there is a considerable difference between a legislative year and the alternate year, aside from the distinctively legislative printing.

For the two-year period named there were 4,227 items of printing, varying in cost from fifty cents to \$4,067.41. All of these items have been figured in detail for the purpose of comparing the actual cost with the would-have-been cost under the system of a State Printer and Statute prices as fixed prior to 1906. The results are tabulated as follows:

	Actual cost under compet- itive system.	Would have cost under former system.	Actual saving to the State.
Book printing, 1906.....	\$22,036 87	\$27,335 91	\$5,299 04
Job printing, 1906.....	4,916 79	8,382 14	3,465 35
Book printing, 1907.....	21,744 32	27,511 67	5,767 35
Job printing, 1907.....	8,372 17	12,462 27	4,090 10
Legislative printing, 1907	23,388 81	28,886 64	5,497 83
	\$80,458 96	\$104,578 63	\$24,119 67

It will be seen that the total saving to the State under the competitive system has been in two years \$24,119.67.

Deducting salary and expenses of the office for two years, \$3,616.40, and we have a net saving of \$20,503.27.

It is a significant fact that in November, 1905, when the awards of the printing contracts under consideration were announced by the Governor and Council, the statement was given out, based upon estimates made in this office, that there would be a probable saving on State printing of \$20,000.

COMPARISON OF UNIT PRICES ON PRINTING.

SUPERVISION IN BEHALF OF THE STATE.

This seems an opportune time to note some of the results accruing to the advantage of the State by having a State official in charge of the printing who is a practical printer, and who is in a position to represent and protect the interests of the State as no one could do who is also concerned in the profit accruing to the printer.

Since January 1, 1906, the Auditor of State Printing has, by virtue of the order of the Governor and Council, and under their direction, exercised the function of supervision, as the conditions imposed by the laws of 1905 seemed to require, in addition to the duties of auditing the printing bills. This includes the preparation of all the specifications and forms for proposals and contracts, the estimates of the value of bids upon which awards are made, the handling of orders to the printers, the inspection and delivery of completed jobs, the selection of stock and the laying out of the work in the most advantageous manner. In addition to this may be mentioned the system of filing vouchers and samples, the records and accounts that make possible a complete annual report. Whether this supervision is of sufficient value to be profitably maintained as a permanent feature may be judged by the statement of a few instances showing results.

EXAMPLE ONE.

The mailing list of the Agricultural Department Bulletin contains rising 9,000 names. The list is kept in standing type and the printer is required to correct and print three or four sheets of each form when needed. In 1905 this job cost rising \$250.00. It is classed as irregular work, for which, according to the Statutes, the printer, "shall receive such compensation as shall be judged reasonable by the auditor." In 1906 and 1907 this mailing list cost \$65.62, practically one-eighth as much as before. This was accomplished through arrangements made by the Auditor of State Printing whereby the printer, on terms mutually acceptable, would receive about one-fourth the former price, and the department, with but a slight amount of added clerical work, would need to have the list printed but twice a year instead of four times.

EXAMPLE TWO.

The annual report of the Agricultural Experiment Station for 1907, made up of the reprints of Bulletins issued during the year, cost for stock and printing \$195.29. It would have cost, if printed under the old system, \$668.79. The chief element making this difference lies in the supervision now established by which the State is enabled to anticipate future requirements, and save the cost of re-setting the type, when it may be used twice, which has heretofore accrued to the printer.

EXAMPLE THREE.

In the State Assessors' report for 1906 there are 307 pages in the valuation lists, costing for typesetting alone, \$951.70. The same feature in the 1908 report makes 192 pages at a cost of \$318.22. Here is a saving of \$633.48. The saving on stock and press work is \$102.58. Total on this report, \$736.06. This saving is effected by a change in the style of arrangement on the page, making it more compact and neater in appearance. This has been brought about through the co-operation of this office and that of the State Assessors. Nor does the effect of this arrangement of type end here. The same change is carried to the Tax Act Documents for 1909 and 1910 on which the saving will be approximately \$945.46.

EXAMPLE FOUR.

In the printing of the laws of 1909, the Tax Acts are included in substantially the same form as in the Documents. The State Assessors' valuation lists, upon which the State tax is based, set new in the old form would cost \$1,264.84. If set new in the revised form referred to in Example Three, it would cost \$474.24. Saving on composition alone \$790.60. A further saving on stock and press work of \$106.52 would result. This makes \$897.12. But there is still further saving resulting from supervision in behalf of the State. Under the present contract the opportunity is reserved to the State to save nearly all the cost of composition when type is kept standing for future use. In this valuation list the type is used for three distinct jobs, and by slight changes adapted to two runs in each job. The Auditor of State Printing has secured this saving to the State; whereas under the former statute provisions the printer

would unquestionably be entitled to charge composition six times. Following the style used two years ago, under prices of present contract, we would pay for composition six times \$1,264.84, or \$7,589.04. We will pay for this, under present arrangements, \$474.24, with additional allowances for changing forms, etc., of perhaps \$75 to \$100. Saving on this line of work over \$7,000.

EXAMPLE FIVE.

The Insurance Department requires a set of large blanks annually for returns of insurance companies to the department. In 1906 the five blanks, containing a total of 92 pages, cost \$460.00. Under the old system they would have cost \$1,052.34. In 1907 the corresponding blanks contained a total of 118 pages and cost \$301.74. They would have cost under the old prices, \$1,286.93. In 1908 these blanks had increased in total bulk to 124 pages. The cost, however, was further reduced to \$268.00.

EXAMPLE SIX.

These are labels for coat room in Executive Department. In 1907 we had 8 labels, a different name on each label. The printer claimed, under a technical point in the contract, that he was entitled to charge each as a separate job, amounting to \$9.25. The same job recently done under present contract, there being seven names instead of eight, cost 94 cents.

EXAMPLE SEVEN.

The House and Senate Documents have a few lines of endorsement on the last page, with few exceptions the only printing on the page. The printer is entitled to the measurement of a full page of composition by the generally accepted rules of the trade. Until recently these half dozen lines have been set in 8-point type. Now, by direction of the Auditor of State Printing, they are set in 10-point type, like the other pages. No reason could be offered for the use of 8-point, except that it made the page cost more without any additional work. In 8-point it would cost \$1.39. In 10-point it would cost 89 cents. The gain to the State in changing to 10-point is 50 cents per page. This enters once into every document, and in 1907 there were 989 House and Senate Documents printed. A fair estimate of this item of saving is \$500.00.
