STATE OF MAINE.

EDUCATIONAL DEPARTMENT,

AUGUSTA, December 30, 1914.

To the Governor, William T. Haines, and the

Honorable Executive Council:

GENTLEMEN:—In accordance with the requirements of chapter 7 of the Resolves of 1895, I respectfully submit the following report of the condition, progress and needs of the public schools of Maine.

Very respectfully,

Your obedient servant,

PAYSON SMITH,

State Superintendent of Public Schools.

CONTENTS.

I. OF THE REPORT.

CHAPTER I.

The Support of Schools.

Summary of all public appropriations and expenditures for current expenses of schools for fiscal years terminating within the twelve months ending July 1, 1914.

	PAGE
Resources	1-3
Expenditures	3-5
Amounts Available for Other Than Current Expenses.....	5-6
Proportionate Support Given by Towns and State.....	6
Common School Funds of Towns.....	6-7
State Funds for Common Schools.....	7-8
History of State School Funds.....	8-9
The First Mill Tax	9
The Common School Fund.....	9-10
The Equalization Fund	10-11
Apportionment of State School Funds	11-12
School Superintendence	12
Repairs, Apparatus, etc.....	12
Aid for Industrial Courses.....	12
Secondary Schools	12-13
Expenditures Wholly From Local Funds.....	13-14
Aid Paid by the State for Special Activities.....	14
Methods of Expenditure	14-15
Administration	15

CHAPTER I.

THE SUPPORT OF SCHOOLS.

SUMMARY OF ALL PUBLIC APPROPRIATIONS AND EXPENDITURES FOR CURRENT EXPENSES OF SCHOOLS FOR FISCAL YEARS TERMINATING WITHIN THE TWELVE MONTHS ENDING JULY 1, 1914.

RESOURCES

I. Amounts available from towns (for fiscal year 1913-1914)

Raised for common schools..	\$660,998	00
Unexpended balances for		
common schools	149,487	00
From local funds for common		
schools	60,356	00
	\$870,841	00
For school superintendence	82,435	00
For school committee expenses.....	13,952	00
For free text books.....	126,805	00
For repairs, apparatus and appliances...	253,419	12
For manual training and domestic science	23,962	50
For evening schools	9,020	60
For secondary education (direct support, contracts, tuition and conveyance)....	508,355	05
For miscellaneous expenses (compulsory education, medical inspection, rent, etc.)	19,269	00
	\$1,908,059	27

II. Amounts available from State for distribution to towns and school superintendents.

For common schools (fiscal year 1913-14)		
School and Mill Fund.....	\$786,777	82
Common School Fund.....	717,234	06
Equalization Fund	28,569	12
	\$1,532,581	00
For school superintendence (annual appropriation, 1914)	60,000	00
For repairs, apparatus and appliances (from Equalization Fund) (fiscal year 1913-14)	4,352	88

PUBLIC SCHOOLS.

For free high schools and tuition reimbursement (fiscal year 1913-14).....	127,940 11	
	<hr/>	\$1,724,873 99

III. Amounts available from State for special educational activities, higher education and educational institutions (annual appropriation 1914).

For industrial education.....	\$40,000 00	
For schools in unorganized townships	\$20,800 00	
For schools in unorganized townships from taxes and interest paid on funds.....	2,530 92	
	<hr/>	23,330 92
For summer schools for teachers.....	2,500 00	
For teachers' meetings.....	1,000 00	
For teachers' pensions.....	25,000 00	
For interest on funds.....	590 00	
For support of state normal schools and training school	85,000 00	
For insurance, normal school buildings..	2,000 00	
For expenses of trustees of state normal schools	1,200 00	
For aid to academies.....	25,000 00	
For support of the University of Maine:		
For general support.....	\$110,000 00	
For printing and binding report	1,500 00	
For bulletins of experiment station	4,500 00	
For animal husbandry.....	5,000 00	
For instruction in forestry	3,750 00	
	<hr/>	124,750 00
For expenses of trustees of University of Maine	400 00	
For support of Maine Industrial School for Girls	25,000 00	
For support of Maine Industrial School for Girls from interest on funds on deposit in State Treasury.....	540 96	
For support of State School for Boys...	36,500 00	
For expenses of trustees of Juvenile Institutions	1,000 00	
For support of Maine School for Deaf..	22,000 00	
For education of the blind.....	8,000 00	
	<hr/>	\$423,811 88

IV. Amounts available from State for State administration purposes (annual appropriation, 1914).

For salaries and expenses of state superintendent of schools and office assistants	\$7,900 00
For high school inspection.....	2,000 00
For supervision of schools of unorganized townships	2,200 00
For distribution of Equalization Fund...	2,000 00
For printing, postage and office expenses	4,800 00
For state certification of teachers.....	1,000 00
For Rhodes scholarships.....	100 00
For plans for school buildings.....	200 00
	<hr/>
	\$20,200 00

Total amount available from public funds and appropriations for current expenses of schools..... \$4,076,945 14

EXPENDITURES

I. For activities supported wholly by amounts appropriated by towns (fiscal year 1913-14).

For school committee expenses.....	\$12,016 00
For free text books.....	125,463 00
For miscellaneous expenses (compulsory education, medical inspection, rent, etc.)	18,672 00
	<hr/>
	\$156,151 00

II. For activities supported jointly by amounts appropriated by towns and State.

For common schools (fiscal year 1913-14)	\$2,264,288 00
For repairs, apparatus and appliances (fiscal year 1913-14)	279,067 00
For school superintendence:	
By towns (fiscal year 1913-14)	\$84,963 00
By State (year ending July 1, 1914)	77,774 94
	<hr/>
	\$162,737 94
For secondary education:	
Direct support (fiscal year 1913-14)	495,633 00
Contracts (fiscal year 1913-14)	52,898 00
Tuition (year ending July 1, 1914)	40,786 28

PUBLIC SCHOOLS.

Conveyance (fiscal year 1913-14)	6,182 00	
	<hr/>	\$595,499 28
For manual training and domestic science (industrial education) (fiscal year 1913-14)	48,708 00	
For evening schools (industrial education) (fiscal year 1913-14).....	16,446 00	
	<hr/>	\$3,366,746 22

III. For activities wholly supported or aided by amounts appropriated by State (year ending July 1, 1914).

For industrial courses in state normal schools.....	\$5,602 77	
For industrial courses in academies	3,794 76	
	<hr/>	\$9,397 53
For schools in unorganized townships...	22,112 50	
For summer schools for teachers.....	2,734 43	
For teachers' meetings.....	1,245 97	
For teachers' pensions.....	8,574 72	
For payment of interest on funds.....	590 00	
For support of state normal schools and training school	87,113 54	
For insurance on normal school buildings	1,314 60	
For expenses of normal school trustees	1,330 85	
For aid to academies.....	23,000 00	
For support of the University of Maine:		
For general support.....	\$149,000 00	
For printing and binding report	1,692 22	
For bulletins of experiment station	4,791 41	
For animal husbandry.....	5,000 00	
For instruction in forestry	4,743 02	
	<hr/>	\$165,226 65
For expenses of trustees of University of Maine	297 35	
For support of Maine Industrial School for Girls	26,183 79	
For support of State School for Boys..	42,456 74	
For expenses of trustees of Juvenile Institutions	868 65	
For support of Maine School for Deaf..	24,160 73	
For education of the blind.....	8,605 49	
	<hr/>	\$425,213 54

IV. *For State administration purposes from amounts appropriated by State (year ending July 1, 1914).*

For salaries and expenses of state superintendent of schools and office assistants	\$8,144 47
For high school inspection.....	1,961 88
For supervision of schools of unorganized townships	2,043 27
For distribution of Equalization Fund...	973 57
For printing, postage and office expenses.....	6,597 13
For state certification of teachers.....	1,172 07
For Rhodes scholarships	85 57
For plans for school buildings.....	200 00
	\$21,177 96

Total expenditures from public funds and appropriations for current school expenses \$3,969,288 72

The summary of all public appropriations and expenditures for current expenses of schools shown by the foregoing schedule cannot be presented as a balanced account. In listing the items of funds made available by towns those sums appropriated for the fiscal years terminating prior to July 1, 1914, are considered. Like consideration is given in the case of funds available by state appropriation wherever this is possible. In those cases, however, where payments are made directly by the State for such educational activities as are not within the control of towns it is more practicable to use as items of the resources the state appropriation for the calendar year 1914 and as items of expenditure the amounts paid from state funds within the twelve months preceding July 1, 1914.

This summary, therefore, while covering in its several items periods beginning and ending at different dates, is an accurate statement of the financial support given from public funds for the current expenses of schools for the period of one year terminating within the twelve months ending July 1, 1914.

Amounts Available for other than Current Expenses. The totals shown in this schedule give the items of the *current expenses* of education from public funds. No account is made of expenditures by towns for new school buildings or appropriation by the State for permanent improvements and new construction at educational institutions supported wholly or aided

by the State. Should it be desired, therefore, to determine the amount available during the past year from public funds for all educational purposes, there must be added to the total resources for current expenses, (\$4,076,945.14), as shown above, the following items:

By towns for new school buildings (fiscal year 1913-14)	\$491,732 00
By State for new construction and permanent improvements at educational institutions supported by or receiving aid from the State (annual appropriation, 1914)	150,500 00
	<hr/>
	\$642,232 00

Such discussion of figures of resources and expenditures as appears in this chapter will deal only with those that relate to the current support and expenses of schools from public funds. No reference will be made to the support given for new construction or permanent improvements.

Proportionate Support given by Towns and State. The primary analysis of the resources given in the summary indicates that of the total amount available from public funds (\$4,076,945.14) there was available from towns the amount of \$1,908,059.27 or somewhat over 46 per cent and from the State the amount of \$2,168,885.87, or nearly 54 per cent. These figures, it will be seen, indicate the relative amounts of public support for all current school purposes. If only those activities are considered which have to do with the public school systems of towns it will be seen by the totals shown under heads I and II of the resources that the amounts furnished from local funds are in excess of those furnished by the State.

There is a marked tendency on the part of the State to increase assistance given to local communities in the support of schools. Under present conditions the only expenses that are met wholly from funds received from local sources are for free text books, school committee expenses, compulsory education, medical inspection, rent and lighting. All other items in connection with the support of schools by towns show that financial support is to some extent given by the State.

Common School Funds of Towns. Of the amounts available from towns, the sum out of which common school expenses

are met is the greatest and constitutes 45 per cent of the whole financial support to schools given by towns. To this amount are added the amounts paid by the State out of the funds provided for the support of common schools. The whole amount available for common school purposes for the fiscal year 1913-14 was \$2,403,422. Of this amount \$1,532,581, or a little less than 64 per cent, was paid from the State Treasury.

All amounts whether from local sources or state funds, when received by towns for common school purposes constitute the "common school fund" of the town. It is required that this fund be carefully accounted for annually by town officers. Provision is made by law that it may be expended only for the payment of teachers' wages and board, fuel, janitors' services, conveyance, tuition and board of pupils. Provision is further made that except in cities any balance unexpended shall be carried forward as a part of the fund for the year succeeding. The reports filed by the municipal officers of towns are carefully checked on these details and a strict accounting is made.

The clause of the law relating to the carrying forward of unexpended balances does not apply in the case of cities. Probably at the time when this provision was made and state school funds were relatively small there was some good reason for its enactment. Under present conditions, however, at least two cities receive amounts out of state funds for common schools that are greater than are required to carry on the common schools. In the case of one city at least the balance of the state funds is expended for other purposes than the support of common schools. It would appear therefore that repeal should be made of that clause of the law which relieves cities of the responsibility of keeping the common school fund intact or that provision should be made for a return to the state school fund of any amount not required by the city or town for the support of schools.

State Funds for Common Schools. The amounts paid by the State in support of common schools are from three funds which for the fiscal year 1913-14 were as follows:

School and mill fund	\$786,777 82
Common school fund	717,234 06
Equalization fund	28,569 12

The school and mill fund is made up from a tax of one and one-half mills on the valuation of the entire State to which is added six per cent interest on the permanent school fund of the State and one-half of the taxes imposed on savings banks and trust companies. From this amount are deducted such appropriations as are deemed by the legislature to be closely related to common school support. The school and mill fund is distributed on the basis of the number of persons between the ages of five and twenty-one years residing in the cities, towns and plantations of the State on the preceding April first.

The common school fund is made up from a tax of one and one-half mills on the total valuation of the State and is distributed on the basis of one-third of the fund according to the school population (as in the case of the school and mill fund) and two-thirds according to the valuation of the municipalities of the State.

The equalization fund is a sum deducted from the school and mill fund and is apportioned to those towns wherein a rate of taxation for common schools considerably in excess of the average rate for the State fails to bring about a reasonable degree of school efficiency.

History of State School Funds. The first enactment of any Maine legislature looking to the establishment of a state school fund was that passed by the legislature of 1828 directing the Land Agent to set apart twenty townships of public lands to be sold and the proceeds to be deposited in the State Treasury to form a permanent state school fund, the interest to be distributed annually among the several towns and plantations in the State according to the number of scholars therein. By a provision of the same law, all moneys received from Massachusetts on account of claims against the United States for services in the war of 1812 were to be set aside for the support of schools. This section relating to war claims was repealed in 1835.

In 1833, there was enacted the first bank tax under the conditions of which all sums to be thereafter received by the State for the tax on savings banks, with certain minor exceptions, were to be expended for the support of elementary schools. The basis of apportionment of state funds continued

to be the number of scholars resident in each of the towns or school districts.

In 1855, the legislature passed a resolve which authorized the Land Agent under the advice and direction of the Governor and Council to set apart a quantity of the public lands equal to twenty-four half townships to be reserved and applied for the benefit of common schools and to be held in trust for that purpose only. The resolve provided for the sale of not more than one township each year, the proceeds to be appropriated as a permanent fund for the benefit of common schools, the interest of which fund was to be annually distributed among the towns according to the number of scholars. In 1857, another resolve directed that twenty per cent of all moneys accruing from the sale of the public lands should be added to the permanent school fund for the benefit of common schools.

Chapter 217 of the Public Laws of 1863 remitted to the banks of the State an amount of their state tax equal to the amount required to be paid to the United States by the law establishing national banks. This remission very considerably reduced the school fund. In 1864 and 1866, the State applied a greater interest in the public lands to the permanent school fund.

The First Mill Tax. In 1872, by the provisions of Chapter 43 of the Public Laws, the first school mill fund for the support of common schools was created. Under the conditions of this act a general tax of one mill per dollar was to be annually assessed upon all property of the State and the proceeds paid into the State Treasury and designated as the school and mill fund. This act was the first recognition by Maine of the principle that to some extent the property of all the State should be made to yield a revenue to be applied to the education of common school children in whatever part of the State they might reside.

The state school funds yielded in 1874 on account of the mill tax \$224,529, on the tax on banks \$131,293 and from the interest on school funds \$19,156. In the year 1907, the mill tax was increased to a mill and one-half.

The Common School Fund. The legislature of 1909 gave considerable attention to various measures the purpose of

which was to find some equitable means of levying a state tax on certain wild lands. Out of the discussion of these measures it was finally decided to levy an additional tax of one and one-half mills on all property of the State for the support of common schools. With the mill and one-half tax already existing, this made available for common schools a fund derived from the three mill assessment in addition to the income from the bank tax and the permanent school funds previously mentioned.

As described above this fund is distributed on both population and valuation bases. The principle of raising a sum on the basis of valuation and distributing on a like basis may at first glance appear to indicate that one mill of the tax paid by towns to the State comes back to the towns in the exact amount to which assessed. It should be emphasized, therefore, that while the assessment is based on the valuation of all of the property of the State including the wild lands as well as the municipalities, the distribution is based solely on the valuation of the municipalities. As the wild lands constitute approximately ten per cent of the entire valuation of the State the return of one-third of the common school fund on the basis of valuation provides for an increase of approximately ten per cent on the single mill assessed and returned on the valuation basis.

The Equalization Fund. The equalization fund, as the name suggests, is designed for the purpose of removing some of the more marked inequalities of distribution of the two funds previously described. The act for the equalization of school privileges gives authority to the State Superintendent of Public Schools to investigate the educational facilities in those towns having excessive tax rates for common school purposes and to recommend to the Governor and Council the payment of special aid for such purposes as will increase the efficiency of the schools in those towns. The original act under which this fund is distributed was passed in 1909 and set aside the sum of \$20,000 for this purpose. The legislatures of 1911 and 1913 made further increases to \$27,500 and \$40,000, the amount now available. The recommendations of the State Superintendent in regard to the apportionment are based on reports which indicate all conditions on

which the efficiency of the school system of the town may be judged. Apportionments have been made for the purpose of increasing the wages of teachers, employing trained teachers, increasing the length of the school year, providing for permanent repairs to school buildings, purchasing maps, globes, charts and other school equipment. There was paid to towns out of this fund for the fiscal year 1913-14 a total of \$32,922.00 of which the amount of \$28,569.12 was for the purpose of increasing the length of the school year or improving teaching service and the amount of \$4,352.88 for permanent improvements and the purchase of apparatus and appliances.

Apportionment of State School Funds. The school and mill fund and common school fund are apportioned immediately after July first, annually. The number of persons between the ages of five and twenty-one years is determined from certified lists filed by superintendents of schools. These lists give the names and ages of all persons within the age limits named above residing within the town on April first preceding. In case the school officers or municipal officers fail to make a return of the school census or fiscal reports on or before July first, the number of persons of school age from which the apportionment is determined is secured by using the school population of the preceding year less a number equal to ten per cent. In making the apportionment of July 1, 1914, four towns thus suffered a deduction of school funds because of dilatory methods of their officers. Amounts apportioned from the school and mill fund and common school fund are paid by the State in January and immediately become available for the use of the towns during the fiscal year within which they are paid.

Apportionment of the equalization fund is made as soon as practicable after July first of each year. In determining the rate of taxation for common school purposes, it is necessary to consider the amounts raised by towns for the last completed fiscal years. The average rate for the State is determined by securing the mean of the individual rates. The average rate on the basis of amounts raised for the fiscal year 1913-14 was .0026 or two and six-tenths mills for each dollar of valuation.

As soon as apportionments are made and agreements to expend such an apportionment as recommended are received

from the superintending school committees a recommendation for apportionment is forwarded to the Governor and Council and provision for immediate payment is made.

School Superintendence. Of the whole amount available from towns for school superintendence part is supplemented by aid from the State. Two hundred and twenty-one towns forming supervisory unions and seven cities having more than fifty schools receive the services of superintendents of schools whose salaries are paid in part out of state funds. The appropriation of the State for this purpose is deducted from the gross amount of the school and mill fund and does not represent additional direct taxation.

Repairs, Apparatus, Etc. Of the amount available for repairs, apparatus and appliances a proportionately small amount is secured from state funds. The only aid given by the State for these purposes is from the equalization fund. This aid, while constituting less than two per cent of the whole amount available for these purposes, was expended for fundamental improvements necessary to the efficient conduct of the schools.

Aid for Industrial Courses. Of the total amounts available for manual training, domestic science and evening schools, the State provides a liberal share out of the appropriation for industrial education. For carrying on these courses for the fiscal year 1913-14, there was available the sum of \$65,154. Of this sum the State furnished \$33,202. The aid paid by the State for industrial courses in elementary and secondary schools and for evening schools is on the basis of two-thirds of the amounts paid for instruction to maximum amounts in each case.

Secondary Schools. For education in secondary schools including the direct support of free high schools, contract relations between towns and academies, tuition paid by towns not supporting standard schools and conveyance of pupils to secondary schools there was available a total of \$636,295.16. Of this amount, there was available from local sources the sum of \$508,355.05 and from the State for reimbursement within the fiscal year the sum of \$127,940.11. The expenditures for the fiscal year totaled \$595,499.28.

In analyzing the figures showing the expenditures for secondary schools from public funds it appears that eighty-three

per cent is devoted to the support of free high schools, a little less than nine per cent for instruction in academies under contracts, nearly seven per cent for tuition reimbursements to towns not supporting standard schools and somewhat over one per cent for conveyance of high school pupils.

The original act establishing free high schools was passed in 1873 and provided for reimbursement to an amount not to exceed \$500 annually. Subsequent amendments reduced the amount of state aid to a maximum of \$250 annually. With the passage of the law now in effect the amount of aid was again raised to \$500.

Additional to the aid paid to towns for instruction in secondary schools is the direct aid paid academies for current expenses. An appropriation of \$25,000 for this purpose was made for the year 1914. The act under which annual payments are made to academies was passed in 1901. Under its provisions academies may receive amounts ranging from \$500 to \$1,000 annually. Such payments are additional to any that may be made for industrial courses or the indirect payment to academies by towns of funds received from the State for tuition reimbursement.

Expenditures Wholly from Local Funds. Of that class of expenditures met wholly from local funds that for free text-books is by far the largest. As shown in the summary, towns had available for the purchase of text-books the sum of \$126,805 and expended \$125,463. On the basis of total enrollment in common and free high schools this represents an expenditure of eighty-four cents per pupil.

A relatively small outlay is necessary to meet the expenses of the superintending school committee, the summary showing an expenditure of a little over twelve thousand dollars. Two hundred and fifteen towns report expenditures under this head. In some instances members of the superintending school committees receive pay but the larger items of the expense are for clerk hire, census and office expenses in the larger centers.

The appropriations made for miscellaneous school expenditures including the enforcement of the compulsory education law, medical inspection, rental of rooms or buildings for school purposes, lighting and power represent about one per cent of the total amount available for school purposes from

town funds. The statistical tables show that 173 towns made expenditures under the head of compulsory education while a very small group of towns reports expenditures for the other purposes.

Aid paid by the State for Special Activities. The amounts available from and expended by the State for the support of special educational activities, higher education and educational institutions, as listed in the third section of the summary includes some appropriations which are deducted from the school and mill fund as described in a preceding paragraph. The appropriations so deducted are as follows: industrial education, schools in unorganized townships, summer schools for teachers, teachers' meetings, teachers' pensions and support of the state normal schools and training school.

State aid for courses in manual training and domestic science in elementary schools, mechanic arts, household arts and agriculture in high schools and academies and in evening schools offering industrial work is paid from the appropriation made for industrial education. From this appropriation also the industrial courses in the state normal schools are supported. Six thousand dollars of the appropriation is available for this purpose.

The total appropriation in support of schools in unorganized townships amounts to \$23,000; of this amount, \$2,200 is available for supervision through agents and is included in the fourth section of the summary which gives amounts available and expended for administrative purposes. Residents of unorganized townships in which schools are maintained by the State are required by law to pay a tax of forty cents per capita. The amounts received from this tax and those available as interest on the reserved land fund of those townships are added to the appropriation.

Methods of Expenditure. The appropriations for summer schools, teachers' meetings and teachers' pensions are expended under the direction of the State Superintendent of public Schools and are paid directly from the State Treasury. The appropriations for the support and incidental expenses of the state normal schools are expended under the direction of the normal school trustees and are paid through the State Department of Education directly from the State Treasury. The

expenses for the support of the Maine Industrial School for Girls, State School for Boys and Maine School for the Deaf are paid directly from the State Treasury after vouchers have been presented to the State Auditor. Payments out of the appropriation in favor of the University of Maine are made in lump sums upon requisition of the treasurer.

Administration. The appropriations and expenditures given in the fourth section of the summary include all for those purposes which can be classified as state administrative and represent the cost of maintenance of the State Department of Education.

Summary. From what has been given in the itemized summary and described in this chapter it appears that of the whole amount available from public funds for current school expenses \$1,908,059.27 is from local sources and \$2,168,885.87 from state funds and appropriations. Of the amounts available from the State the school and mill fund, common school fund, equalization fund and appropriations for superintendence, industrial education, schools in unorganized townships, summer schools, teachers' meetings, teachers' pensions, normal schools and state certification of teachers, in all amounting to \$1,774,433.88, are secured from the three mill tax for school purposes and the additions thereto. The balance of the amount made available by the State, \$394,451.99, is provided from the general income of the State.

All payments made by the State for current expenses of education, except those on account of the Maine Industrial School for Girls, State School for Boys, Maine School for the Deaf, education of the blind and the University of Maine, are certificated and accounted for by the State Superintendent of Schools. These accounts bring a total of \$3,858,754.18 for the current year for the supervision of whose expenditure the State Superintendent of Schools is directly or indirectly responsible.

CHAPTER II.

COMMON SCHOOLS.

Detailed statistics relating to common schools will be found in Tables I to VIII inclusive.

School Census. The annual school census taken by the superintendents of schools of the several plantations, towns and cities on April 1, 1914, showed that there were then 221,271 persons between the ages of five and twenty-one. This was an increase of 3,679 over the number reported on April 1, 1913. With the exception of six counties all shared in this increase, the largest absolute gains occurring in Cumberland, Androscoggin, Oxford, Kennebec and Somerset Counties, which showed respectively gains in school population of 1,292, 845, 715, 412 and 259. Hancock, Knox, Piscataquis, Waldo, Washington and York Counties showed decreases in the number of scholars to the number respectively of 19, 161, 44, 25, 27 and 216.

Enrollment. Of the whole number of scholars, i. e., persons between five and twenty-one years of age, 130,916 were enrolled in common schools. This number was an increase of 3,871 over the preceding year. While the census showed, therefore, an increase of nearly 2 per cent, the school registration gained at the rate of 3 per cent. In addition to the foregoing there were 10,830 pupils reported as enrolled in private or parochial schools, this number being seventy-three less than for the year preceding.

Distribution of pupils. According to the distribution of pupils into city, village and country schools it is of interest that of the entire gain in common school enrollment, the first class of schools with a gain of 2,392 showed the largest absolute and relative increase; the schools classified as village gaining 467 over the preceding year. In rural school enrollment the increase of 1,012 would appear to indicate a most promising reaction from a former decline in rural school registration. Re-

ferring to the tables for 1904 there is evident for the decennial period a decrease of rural school registration amounting to 6,679. In connection with that comparison this marked increase in such enrollment for the past year is most promising.

Attendance. The report of school attendance for the year ending April 1, 1913, showed that 2,614 pupils of compulsory school age were not attending school, while only 1,292 of that number had been formally excused by committees as provided by law. These figures showed that in some towns there was apparently a serious neglect in the enforcement of the compulsory education law, while in others the provisions of the law permitting excuses to be granted was perhaps too generously exercised. Consequently the following letter was addressed to superintendents of schools:

To the Superintendent of Schools:—

According to the returns made by the superintendents of schools this year there were reported 2,614 persons of compulsory school age who were out of school last year without the consent of school authorities. These figures are practically the same as those reported for the preceding year.

I beg to call your especial attention to this figure particularly in connection with a study of the condition of illiteracy in the State. The United States Census Bureau reported in 1890 that there were 25,587 illiterates in Maine, 5.5 per cent of the total population. In 1900 the same Bureau reported that there were 29,060 illiterates representing 5.1 per cent of the total population. In the United States Census report just published for 1910 there are shown to be in Maine 24,554 illiterates representing 3.2 per cent of the population.

It is gratifying to note the reduction in illiteracy for the decade ending in 1910. Of course the public schools cannot be held responsible for the entire percentage of illiteracy since a portion of it is due to immigration into the State of adults who are beyond the influence of the public school system. On the other hand there is a serious responsibility resting upon the school to prevent illiteracy in the future by extending its present influence in every possible way. The compulsory school age represents the period when the school authorities have control of the child's education. To permit children to remain out of school without excuse during the period is to increase the danger of a future uneducated citizenship.

Will you kindly go over the figures in your own reports and urge the superintending school committee of your town to cooperate with you in reducing materially this number of persons who are failing to receive the benefits of the public school within the period established for compulsory attendance?

Very truly yours,

The comparison of the same figures for the year covered by this report shows that a comparatively small gain has been made with respect to these figures. Fewer pupils of compulsory school age, to the number of 104, were out of school while 67 less were excused by authority of the committee; a further analysis would indicate that 37 less persons of compulsory school age were absent from school without having been excused by the school authorities. While these figures show a movement in the right direction they indicate that much attention needs yet to be paid to the required attendance of pupils.

The School Year. Among the means of measuring the efficiency of a school system the length of the school year, or the number of days schools are in session, must be regarded as having great value. In 1907 the average school year for Maine was approximately 130 days. This had increased to 164 days in 1913 and to 166 days for the year covered by this report. The legislature in 1909 raised the minimum school year from twenty to twenty-six weeks. It is to be noted that last year only 32 towns kept to the minimum permitted by the law, 6 others failing to meet the legal requirements. One hundred and thirty-nine towns and cities maintained their schools not less than 180 days. This represents an ideal to which all the schools should be brought as rapidly as possible. Three hundred and twenty towns maintained a school year that was shorter than the average for the State. A difference of fifty days, or ten school weeks, between various municipalities of the State is so great that no one can fairly support the contention that a desirable equality of educational opportunity is afforded all children. It would appear that further legislative action should be taken to remove this so great discrepancy. A school year of thirty school weeks, or 150 school days, is not an unreasonable guarantee of minimum educational opportunity to be given the children of all towns. One hundred and sixteen towns are now below this suggested minimum. Seventy-four towns last year offered a school year of the suggested legal minimum. The enactment of 1909 fixing the legal minimum at twenty-six weeks, or 130 days, caused a wholesome reaction on all towns including those which had already reached or passed the then new requirement. A further raising of the minimum school year would no doubt further accelerate the movement towards a uniform school year of 180 days.

Grade Distribution. The table showing the distribution of pupils by grades is one that should invite the careful consideration of school officers and citizens. Maine has been found in comparison with other states to have a most favorable record with respect to the extent to which pupils remain in school. Yet a careful scrutiny of Table II shows that there are losses through the schools that should thoughtfully be considered. Disregarding for the moment the enrollment in ungraded schools, since the figures given for these schools afford no basis of computing school losses, let a study be made of the enrollment in the several grades. The distribution for the nine grades was as follows :

Grade I	17683
Grade II	11532
Grade III	10938
Grade IV	11076
Grade V	10112
Grade VI	9646
Grade VII	8532
Grade VIII	7044
Grade IX	5144

The returns for Grade I reflect the varying conditions that apply generally with reference to the admission of pupils to the first year of school. Since many enter late in the year a large proportion will be found spending parts of two years in the first grade. The marked difference between the enrollment of Grades I and II does not therefore, indicate school losses. Beginning with the second grade the following variations should be observed :

Grade III	enrolled	594	less than	Grade II
Grade IV	enrolled	138	more than	Grade III
Grade V	enrolled	964	less than	Grade IV
Grade VI	enrolled	466	less than	Grade V
Grade VII	enrolled	1114	less than	Grade VI
Grade VIII	enrolled	1488	less than	Grade VII
Grade IX	enrolled	1900	less than	Grade VIII

The foregoing figures should not be interpreted as showing in conclusive terms accessions to or losses from classes. Variations normally occur in the size of different grades and classes.

Especially should it be noted that the adoption of the eight grade system in a few of the larger towns will account for a part of the apparent loss between Grades VIII and IX. However, it is impossible to escape the conclusion that pupils begin to leave school as early as the fifth year and that the school losses increase rapidly in the grammar school grades. It is certainly possible to defend the position that nine years are not too many to be spent by practically all children in preparation for the demands of life and citizenship. Only in exceptional cases can just cause be shown for permitting a youth to leave school with a less equipment than that afforded by a common school education. That several thousand are annually leaving school without such equipment is a cause for a careful inquiry on the part of school officers and the public as to proper remedies. The educational test should appear more prominently as a factor in the compulsory education law. Educational attainment appears to constitute a more logical requirement than an arbitrary age limit. An educational test requiring the completion of a stated minimum of school work would, if accompanied with suitable provision for release of pupils in exceptional cases, present distinct advantages over a law based on age standards.

Of even greater importance than compulsory education law in the checking of these losses is the further modification of the courses in the upper elementary grades. These courses at present reveal a basis that is well nigh exclusively of the book. Larger attention to the manual arts, especially in their vocational connection, is imperatively demanded.

Repeating Pupils. The returns of superintendents showing that 3,560 pupils were repeating the work of a grade reflect a kind of educational waste that should be very considerably reduced, if not entirely eliminated. These pupils generally represent the most serious problems of the schools. They are not only themselves the discouraged and disheartened element that is being trained towards failure, but they are likely to impede the progress of the classes to which they belong. In larger school systems special rooms under the charge of the most skillful teachers should be established for these pupils. In all school systems individual instruction will help to eliminate the problem. It is not wise from either a financial or an educational stand-

Fort Fairfield
Primary School. Erected 1914

point to continue the practice of educational repeating to the extent indicated by these figures. The reduction of the number of these repeating students by 731 over the preceding year is at once an evidence of the attention already given by superintendents to the problem and a promise of its ultimate solution.

More Careful System. The number of pupils in ungraded schools is shown to be 29,089, a decrease of 1986 from the figures shown for the previous year. It is clear that the work of the schools is becoming more carefully systematized. This fact is further attested by the reduction in the number of schools not using a course of study. In 1904 there were 2,323 schools that were reported as following no definite outline of studies. In 1913 this number had dropped to 827 and, as indicated by this report, has now been further reduced to 670. This change, already increasing to no small extent the efficiency of the schools, suggests a promise of the greater advantages that would follow the adoption of a course that would in essentials be uniform for the State. While an absolute uniformity that would prevent individual initiative and wise experimentation would retard progress and is not to be desired, there is much to be said in favor of an agreement on established and essential points for all parts of the state school system.

The Teaching Force. Employed in the common schools of Maine for the period covered by this report were 6,360 different teachers of whom 5,876 were women. The reduction of 578 in the number of different teachers employed in comparison with the report of 1913 is, so far as it indicates a continuity of teaching service, a distinct educational gain. Frequent changes in the teaching force of any town or of an individual school make for unrest and demoralization of school work. The tendency to employ teachers for the entire school year rather than from term to term is happily increasing.

With respect to the proportion of trained teachers there is reason for congratulation. In 1904 teachers were reported as graduates of normal or training schools to the number of 1,476. This was a little more than twenty-two per cent of the whole number. In 1913 the number of trained teachers had increased to 2,074 or over twenty-nine per cent while for the year covered herein there were shown to be 2,128 trained teachers representing over thirty-three per cent.

The distribution of these trained teachers is especially significant. The statement sometimes made that teachers of normal training do not get into the smaller towns is found to be incorrect. There were 146 towns and plantations that reported no trained teachers employed. These 146 towns employed a total of 538 teachers. There is of course a close connection between the quality of the teaching force and the wages paid. The largest average salary paid women teachers in any of the 146 towns was \$461.39. The average for these towns was \$264.49. The smallest average salary in any was \$156.00. Sixty-three, or forty-three per cent, of these towns assessed themselves for common schools at a rate less than the average for the State and could without an excessive rate of taxation correct the implied deficiency. Of the others, claims were considered in connection with equalization fund apportionments and awards in some cases made for the specific purpose of increasing teachers' wages.

Teachers' Salaries. There continues to be improvement in the salaries paid teachers. The position held by the State on this point has been a most unenviable one and there must be no relaxation of effort for improvement until the schools can hold well qualified teachers in competition with neighboring states. The annual salary of women teachers was increased over the preceding year from \$345.93 to \$356.52. There are still two counties where the average annual salary of women teachers falls under three hundred dollars.

Again, it should be understood that the real test of the result of teachers' wages is not to be made by an application of an average figure. The weakness is apparent when in any school the wage of the teacher is so low as to make it impossible or extremely difficult to insure a well sustained quality of teaching service through a period of years.

A reference to Table XXX will, therefore, reveal the essential weakness of the teacher's salary as offering a guarantee of a reasonable teaching efficiency sustained from year to year. The figures there given, showing that last year 1,119 teachers were paid annual salaries of \$250 or less, show conclusively the number of schools for which there could be no reasonable expectation of a high grade of teaching service sustained year after year. Added to these were 1,150 teachers whose annual

salaries did not pass beyond three hundred dollars. The question raised by these figures is not so much one of justice to teachers, as it is one of assuring to children a reasonable efficiency of instruction and to the State a proper safeguarding of the education of its future citizens. The whole situation, while showing improvement, is still in such form as to suggest that the State might well, through a minimum salary act, take practical steps to eliminate more speedily this number of grossly underpaid teaching positions.

Professional Activities. The returns of superintendents showed that for the year ending July 1, 1914, the last to which the system of local certification applied, there were employed in elementary schools 3,985 teachers who held state certificates. Many of these certificates were, however, granted under the provisions of the new act, a description of which with an explanation of the plan of its operation will be found elsewhere in this report. More than four thousand teachers of elementary schools were reported as having attended teachers' meetings during the year while 443 attended sessions of summer schools. In a teaching force that has so large a proportion of untrained teachers, and that enlists the services of its members for so short a period it is imperative that every reasonable means be taken to protect pupils from the unfavorable results of inexperience and lack of preparation. The teachers who attend voluntarily the various institutes and summer schools are, it is to be assumed, those who are particularly zealous in self improvement.

No doubt the assumption can be safely made that the schools most needing help and inspiration were those that were in charge of the two thousand or more teachers who at no time during the year came in contact with these means of improvement that have been established for perfecting educational methods. If these schools are to be touched by these influences it is necessary in some way to enforce or to further encourage attendance of this class of teachers at these institutes and schools of instruction. It should, of course, be admitted that many of these teachers represent our lowest salaried class and are remote from centers. Amendments should be made to the teachers' institute law so that a larger number of small local meetings can be held. Such amendments should also contemplate the means of securing the attendance of the class of teachers who

especially require the means of improvement offered by the institutes.

School Buildings. The improvement in the condition of school property is marked. The figures showing the cost of new construction during the past ten years are as follows:

1905	\$211,148.00
1906	172,169.00
1907	214,606.00
1908	232,748.00
1909	326,997.00
1910	278,162.00
1911	144,763.00
1912	221,483.00
1913	348,322.00
1914	850,728.00
Total	\$3,001,126.00

In light of the fact that the school population is not increasing so rapidly as to require a large number of new buildings to provide for expansion, it is evident that a very large proportion of the foregoing expenditure was to replace old and unfit buildings with new structures.

For the year included herein the superintendents reported that 902 school buildings were not in "good condition." While that description is sufficiently elastic to cover a wide range of personal opinion, it may be taken as a fair reflection of average opinion and fair judgment. The law providing for the approval of plans of school buildings and for the provision of plans without cost in the cases of small school buildings has resulted in the establishment of good standards of construction among the towns. Further legislation should, at the opportune moment, have reference to older buildings that are no longer fit for the occupancy of children. There is small advantage in an educational program that considers solely intellectual or mental training and leaves out of the account the right of the child to sound physical health. School houses that are so faulty in lighting, ventilation or sanitation as to endanger the physical welfare of the children who attend them should be speedily improved or replaced.

Support of Common Schools. Elsewhere in this report will be found a detailed discussion of school revenues and expenditures in all departments. Table VI of the appendix shows in considerable detail the receipts and expenditures for that most important part of the school system, the common schools. The annual and decennial comparisons of these figures to be found in Tables VII and VIII are of encouraging interest. Of the entire expenditure for support of common schools amounting to \$2,264,288 teachers' wages required \$1,751,713 or 77 per cent.

School officers and citizens would do well to make careful comparisons of the several appropriations and rates of taxation considering other towns similarly situated with reference to school population and valuation as well as with the counties and the State as a whole. The figures afford ample basis for local financial surveys which should be valuable in leading to a better understanding of school conditions and needs of the towns.

Take for example the amount available for each scholar (i. e., persons between five and twenty-one) and it will be found that there is the extremely wide range from \$5.20 in Wallagrass Plantation to \$127.30 in Rangeley Plantation. Among the incorporated towns the range is from \$5.42 in Frenchville to \$41.31 in Grafton. The range among the cities is from \$6.50 in Biddeford to \$14.38 in Gardiner. These figures should not be taken alone in considering the probable educational result. A high valuation with few scholars or a large school population having a considerable portion outside of the public schools will materially alter the circumstances affecting both local taxation and the amount available for each child in school.

There were four plantations, three towns, and two cities that did not find it necessary to raise for common schools any amounts to supplement the rebates from the State on account of the common school and school and mill funds. At the other extreme were a plantation raising by supplemental local taxation at the rate of \$25.00 per scholar, a town raising \$12.50 per scholar and a city raising \$6.35 per scholar. Within any group of towns local school officials can, from the sixth table, supplemented by statistics of other common school tables,

formulate a survey or report that will serve to a better understanding on the part of citizens of receipts and expenditures for the most fundamental part of the school system.

Schools in Unorganized Townships. That part of the state school system which deals with the education of children in unorganized townships is the logical outgrowth of the policy of the State with reference to education as a whole. Like other states, Maine has long had an established policy of education based on generally accepted principles of the obligation of the State to provide educational privileges to the people and by means of these privileges secure its own perpetuity.

The State, like others, definitely committed itself to the proposition that education must first of all be free and open on equal terms to all children of the community. At first this educational opportunity was made free only so far as it might be offered in common schools. Later, the obligation was accepted to provide similar privileges throughout the secondary schools. To safeguard and make effective this principle of general and free education, laws have been enacted with reference to compulsory education, free text-books, tuition in high schools and academies, child labor and other matters concerned with the complete and successful operation of the adopted policy. Like most other states Maine has left the regulation of the various details of school support and management to the various local units of town or city, interposing such statutory regulations and creating such financial measures as have seemed most likely to produce a reasonable equality of educational privileges to all of the youth. Unlike most other states, however, Maine has had and still has a very considerable territory not yet brought under local organization.

In fact, there are approximately 450 townships, comprising nearly one-half the total area of the State, of which the foregoing statement is true. In a large number of these unorganized townships there are no inhabitants, while none of them have local officers and no local taxes are assessed. These townships are frequently confused in the popular mind with the plantations, which are, however, an entirely distinct and semi-organized group of townships in which is found the essential machinery of local government that incorporated towns possess.

Rockwood—Kineo Station
Unorganized Township School. Erected 1914

With few exceptions the unorganized townships have no roads and their entire area is forested, a small settlement marking the only advance of civilization upon the wilderness. Yet in many of these little settlements, however remote they may be from town or city, there are found families having children who need the benefits of school training and who, in many instances would not receive it except at public expense.

To provide for the schooling of the children of the pioneering families settling in this large unorganized area the present "Act for the Schooling of Children in Unorganized Townships" was adopted in 1899.

Briefly, the act provided that school privileges should be furnished under the direct supervision of the State Superintendent of Public Schools, either through the establishment of a local school or through arrangement with an adjoining town, for the children of any unorganized township in which there were two or more persons of legal school age (then, four to twenty-one years.) The inhabitants of the township were required to pay a per capita tax of twenty-five cents (now forty cents) and authority was given to the State Superintendent of Public Schools to appoint agents who, under his direction, should make returns showing the number of children in each township, assess and collect the per capita tax, employ teachers and attend to other necessary details which required local supervision.

The expense incurred in carrying out the provisions of the law were to be met first, from the money collected in taxes as stated above; second, from the annual interest on the reserved land fund belonging to the township; and third, from the special appropriation made by the legislature for the purpose.

The object of this act was to extend the privileges of free education to the most remote sections of the commonwealth. By its terms the State Superintendent of Public Schools was charged with the duty of providing directly for the children of unorganized townships at least the minimum of school privileges required to be given by towns to the pupils resident within them. This act with its various amendments, each adding extensions of opportunity, has completed those steps by which it is proposed to insure to the children of all the people

some degree of educational privilege. It is by means of this act and the others relative to the establishment of free public schools that the State expects to fulfill its plan of protecting itself from the dangers of ignorance in even the smallest part of its body of citizens.

During the year 1899-1900, the first in which school privileges were provided under the act of 1899, we find thirty-three townships taking advantage of the opportunity afforded by the law. There were 414 children who attended school and the average attendance was 353, schools being maintained for twenty weeks which was the minimum school year at that time. Of the thirty-three townships for which schooling was provided in that year it is of interest to note that the children in twenty-three are now receiving their education through the same channels. For one reason or another, ten of the original townships are no longer found in the list but forty others have been added in their place. Three of the ten have since been organized as plantations, while in the other seven there are now no children to be schooled.

Among those townships which have been added to the list in the fifteen years since this part of the school system was established are to be found six which were formerly organized as plantations. Through loss of population and the consequent difficulty in maintaining an effective organization, as well as because of the burdens of local taxation these plantations were disorganized and their schools came under state control. Thus it will be seen that there has been a tendency to increase rather than to decrease the number of these schools because of changes which have been made in the form of local government. On the other hand the number of children affected is far greater in the case of those townships which decide to assume control of their own schools than in those which relinquish their local authority. This is evident from the fact that the three which were lost from the list on account of organization thereby took from the enrollment of the township schools a total of 295 pupils while the six which were added because of loss of organization increased the enrollment by a total of less than fifty.

Two years after the establishment of the first schools it was considered that practically all the townships eligible to the

Hillman
Unorganized Township School

benefits of the law had been brought under its provisions and that no marked increase either in the number of townships or in total enrollment would be recorded in the future. Since that time, however, we find that twenty-six have been added to the number of townships and that the enrollment, while not increasing in like proportion, because of the facts previously stated, nevertheless has shown a gain of approximately one hundred. At the present time there are five townships out of the seventy-three for which schooling is provided that furnish nearly one-third of the whole enrollment. Should these five become organized plantations the statistics showing the number of townships would be only slightly affected while those showing attendance would suffer a marked decrease.

The above figures, taken in connection with the statement that organization is undertaken only by those townships having a comparatively large population lead to the conclusion that in any period of years the number of townships may be expected to show a considerable increase while the enrollment may show either an increase or a decrease, depending upon the changes which may have been made in the form of local government during that period.

In extending educational privileges to the unorganized townships two separate plans have been followed. First, children are schooled at public expense in the established schools of nearby towns when this arrangement does not involve undue hardship in transportation or board away from the home. Second, schools are established within the unorganized townships themselves when conveyance or board near an established school is impracticable or when the number of children within the township is large enough to make expedient the conduct of a school for their benefit. Some of these schools are in townships that are, through recent industrial development, approaching the time when incorporation will become possible and desirable. Others are on the shores of remote inland lakes, near the forest frontier, or on lone island outposts. Teachers who go to them are frequently required to travel considerable distances by primitive conveyance. Wherever the schools are established, however, they represent the broad and liberal purpose of a state definitely committed to a scheme of universal education.

The character of the communities in which schools have been maintained is representative of a great variety of conditions. Scattered as these schools are through nine of the sixteen counties of the State from the islands of the coast to the fertile farming settlements of Northern Aroostook and from the rugged mountain sections of western Oxford and Franklin to the easternmost portions of Washington it is to be expected that little uniformity in local requirements can be discovered. Here is a community whose people are interested in lobster fishing, here another in which the children know little of industry outside of the lumber mill about which their houses are grouped in the midst of the forest. Three or four children making up another school live in the atmosphere surrounding a summer hotel or a sporting camp of which their parents are proprietors or employees. Railroad section men with their families at a junction or remote siding form a little settlement in which their own work is the predominant topic while a considerable number of other children are located in communities where agriculture is the only factor in its industrial life. Many are found in places which combine several of these characteristics and in such cases the situation is not materially different from that which exists in a great number of instances in the larger towns.

While for the most part it is true that these schools are small, a few having only two or three pupils, and while the townships are usually only sparsely populated, yet a considerable number of plantations and towns in the State show fewer persons of school age and a smaller population than do a good percentage of the unorganized places. Therefore, except for the difference in method of administration and financial support, there is no reason to believe that any marked distinction should be made in considering the conditions which surround these schools in comparison with those of a fairly large number of other communities of longer establishment.

An examination of the professional qualifications of the teachers making up the corps of instructors in these townships shows that they compare favorably with those found in the average rural district. Of the eighty-eight different teachers employed during the past year, fourteen were graduates of nor-

mal schools and twenty-eight others had received some training in such schools.

For the first few years after the State assumed responsibility for the schooling of all children in the unorganized townships, there were very few buildings used for the purpose that could properly be called schoolhouses or that were originally intended for use as such. It was necessary to requisition almost any unoccupied building and the result was that all too often such temporary quarters became the more or less permanent location of the school. The State was not at that time and never since has been in a position to furnish funds for the construction of schoolhouses. The people of the several townships were then and still are required to provide the building in which the school is held. Gradually buildings for the purpose were erected in most of the townships where it seemed that settlements were to be at all permanent. However it must be said that many of these schoolhouses were far from meeting even the minimum requirements of comfort or attractiveness. Many were built of logs, the material most easily available, while others were roughly finished frames, some of which were even less desirable than those of the more primitive construction.

From year to year a few much better adapted and more attractive buildings were erected until at the present time there are to be found a considerable number which may fairly be classed as very satisfactory except for minor deficiencies. Recently more pressure has been brought to bear to bring about improvement with respect to housing conditions and a notable gain is in progress. One of the more populous townships boasts the completion during the past year of a combined schoolhouse and public hall, the total cost of which was only slightly less than five thousand dollars. In several others, movements are on foot which should result in very marked improvements before the end of another year. The log building is still somewhat in use and in some cases is not so ill adapted to comfort and convenience as might be supposed. Such a case is, however, an exception to the general rule. There are also still some instances where no regular schoolhouse is provided, the school being held in one room of a private dwelling. The fact that many of the schools of these townships are more or less temporary institutions on account of a transient population makes it

certain that physical conditions except in permanently established settlements will never reach a high standard. But it is equally certain that all the latter communities will in reasonable time be served by satisfactory buildings.

In the beginning the equipment was for the most part extremely meagre. This deficiency has from year to year been remedied to the extent that there are now to be found only a very few schools which do not possess a supply of such accessories sufficient to cause them to compare favorably with the schools located in the larger towns. Text-books in up-to-date editions have recently been generally supplied so that teachers find themselves provided with nearly everything which can be regarded as at all necessary for their work. Constant additions are being made as occasion demands.

During the year covered by this report there were seventy-three townships for which school privileges were established. Eight hundred and thirty-two persons of school age were residents of these townships on April 1, 1914. The townships were located as follows—twelve in Aroostook County, twelve in Franklin, three in Hancock, one in Lincoln, six in Oxford, eleven in Penobscot, ten in Piscataquis, fourteen in Somerset and four in Washington. The number of pupils in each township ranged from the minimum of two each in nine townships to 121 in the case of the largest, Township No. 17, R. 4, W. E. L. S., Aroostook County. Sixty schools were maintained within the townships while children of all others were schooled in neighboring towns.

The record of attendance shows that 708 different pupils enrolled in unorganized township schools with an average daily attendance of 478. While the comparison of these figures with similar figures in many organized towns appears to reflect less favorably upon the former it should be borne in mind that the population of a pioneer settlement contains usually a high percentage of the transient element.

In the sixty teaching positions there were employed eighty-eight different teachers. The percentage of permanence was reasonably high and reveals a commendable professional devotion to the instruction of these schools. Of the entire number employed, seventy-four are shown to have had previous experience.

A Group of Unorganized Township Schools

The total expense of maintaining the unorganized township schools for the year was \$24,155.77, an average for each child enrolled of \$31.49 and on the basis of average attendance an average cost of \$50.53. The distribution for various purposes shows that \$15,394.45 or 63 per cent of the whole was expended for wages of teachers while \$4,278.32 or 17 per cent was expended for conveyance, board and tuition of pupils.

The plan of supervision of these schools includes general oversight by a special agent who visits all of the schools annually and at such times as special need requires. Under this general direction there is such uniformity of procedure as is found desirable in communities widely divergent in locality and educational conditions. Local agents under the direction of the state agent have certain oversight of business and other details.

One of the recent amendments to the act under which these schools are conducted provides for the payment of tuition in secondary schools of those pupils whose advancement warrants their attendance in institutions of that class. Seventeen pupils were found to be eligible to this provision and took advantage of it last year.

CHAPTER III.

SECONDARY SCHOOLS.

Statistics for high schools and academies are to be found in Tables X to XIX included in the appendix of the report.

Attendance. In enrollment in secondary schools, both high schools and academies, there has been a gain during the past year of 723 students, or 4 per cent. The increase is not large but when considered in connection with the five year period since the schools were classified under the act for the improvement of high schools a steady growth is indicated. During this period the gain has been 2,225 pupils, equivalent to 12.4 per cent. The increase of pupils attending high school has been at the rate of 17.3 per cent while the enrollment in academies has been at the rate of 5.2 per cent. This difference is accounted for in large measure by the number of new high schools which have been established during the past five years. The figures for this year show an actual loss of 82 students in enrollment in academies.

With the increase in enrollment there is an accompanying improvement in school attendance. The service which any school renders is considerably measured first by the enrollment of qualified students and second by the regularity of their attendance.

During the five year period the increase of students taking advantage of the free tuition privilege has been about nine per cent. The opening of the several high schools has slightly reduced the number of non-resident pupils.

Another significant condition is brought out by enrollment statistics. There is a prevalent impression that secondary schools have in attendance a much larger number of girls than boys. Five years ago the boys formed 42.2 per cent of the total while last year 45.5 per cent were boys. During this period the gain in boys enrolled has been 21 per cent. The number of girls has increased 11 per cent during the same period.

The secondary school, like the elementary school, serves a large constituency of distinctly small towns or rural communi-

ties. This is shown by the large number of small high schools and academies. Measured by the teaching force in the schools of Class A, the predominance of small schools is shown by 66 schools with two teachers and 51 schools with three teachers. With these must be grouped twelve schools of Classes B and C having two teachers on full or part time and 39 one teacher schools of these classes. As may be inferred, these schools have small enrollment. The average for the schools with two teachers is 34; for those with three teachers 51 and for the B and C Class schools 19. The average for all other schools of the State is 170; while for schools of all classes, 75 is the approximate average number of students.

Classification and Distribution of Schools. There were 241 high schools and academies approved for the past year. This represents a gain of nine high schools and four academies during the last five year period.

The schools were classified this year as follows: Class A, 188; Class B, 21; Class C, 30; unclassified, 2. The latter normally belong in Class C. These figures compared with those of 1910, when the first classification was made, show a gain of 19 schools of Class A, a decrease of 4 schools in Class B and of 2 in Class C. The gain in schools of standard grade reflects a serious effort on the part of the communities to provide the children the best possible opportunities for secondary school work.

In spite of the increase of immediately available school opportunity, the number of non-resident pupils has steadily gained except for the current year. It would seem that the opening of new schools and the advance of standards tends in every instance to arouse interest in the schools as a whole.

There are few cases where more than one secondary school is found within the limits of the same town. There are five towns and cities that maintain two high schools while in four others a high school and an academy are found. Besides these instances, there are in the city of Portland two high schools and two approved academies. Allowing for these duplications, it appears that 229 out of the 521 municipalities have secondary schools within their limits. Distributed by counties, in proportion to the school population, Lincoln County is best supplied with secondary schools and Aroostook County has the fewest.

Slightly aside from this point but related to the service rendered by the distribution of the schools is the enrollment in proportion to the school population. Using the school census, as a basis, Oxford County has the largest proportion of secondary school pupils enrolled, namely, one pupil in high school or academy for each nine and four-tenths persons of school age. Six other counties show somewhat less but approximately the same relation between secondary school enrollment and school population. In six counties, the proportion is not as satisfactory, being one in eleven or one in thirteen. In three counties, York, Androscoggin and Aroostook, the enrollment is much smaller in proportion to the number of school age; the ratios are one to fifteen, one to eighteen and one to twenty-one, respectively. Local industrial conditions are to be considered in relation to this proportion to some extent. In Androscoggin County, large industrial centers tend to furnish fewer students for the high schools. In Aroostook County, the large school population of the northern part of the county is served by special schools which in a measure take the place of the secondary schools.

Length of the School Year. An essential factor in determining the value of the school is the time actually spent by the pupils in school. The average attendance for high schools has already been noted, the time element is shown in the length of the school year. On the basis of the actual number of days schools were in session, the high school year was 175 days. A combination of these two figures, average attendance and length of year, show the actual working year or the aggregate attendance. These figures are useful for comparison. While statistics available give only an approximation, a careful estimate indicates that there has been an increase in aggregate attendance, i. e., the actual number attending while school was in session, amounting to fully 33 1-3 per cent. This must be regarded as indicative of the increase of service rendered by the schools to the State as a whole.

The school year for the academies is slightly longer than that of the high schools, namely, 177 days. This is accounted for in part by the fact that the minimum year for academies is 36 weeks while high schools in Class C may be maintained 30 weeks. It happens also that a larger proportion of academies than of high schools has a school year above the minimum.

High School Building. Erected 1914

Enrollment by Courses. The question is not infrequently raised as to whether the Maine high schools are giving expression to the changing conception in the education of boys and girls of secondary school age. The changes in enrollment in the various courses offer some evidence upon this point. Comparing the English, or general, course enrollment with that of five years ago, there is a gain of 536 pupils while the number of pupils enrolled in college preparatory courses has fallen from 6,409 in 1910 to 6,267, a loss of 182. In courses which may be said to have some trace of vocational tendency, including commercial, mechanic arts, domestic science, training for teaching and agriculture, the increase in enrollment was 1991, or 108 per cent. This gain may be compared with the gain of 7.3 per cent in the English course and loss of 1.11 per cent in the college preparatory course. This significant showing for vocational courses would doubtless be further augmented if the data on commercial courses in academies were available. In other words, while five years ago the courses with a more or less direct bearing upon vocational interests enrolled 9 per cent of the students, similar courses for last year enrolled 21 per cent.

Some further analysis of the special courses in industrial education may be of interest. Five years ago no high schools reported pupils in household arts or agriculture while 289 were in manual training courses. In the academies at that time, 8 pupils were enrolled in household arts, 105 in manual training and 24 in agriculture. For the year ending July 1, 1914, there were 429 students in mechanic arts courses, 189 in domestic science and 361 were studying agriculture. These courses are subsidized by the State, are under specially trained teachers and are required to have full equipment to meet their special demands. There has been an equally marked extension of the commercial courses as indicated by a gain of 1,392 in the high schools alone.

The trend of student enrollment is somewhat further indicated by the statistics relating to the distribution of boys and girls in various courses for the last five year period. The English course gained 211 boys and 325 girls. The college preparatory gained 6 boys but lost 88 girls. The commercial courses in high schools gained 486 boys and 906 girls.

Enrollment by Classes. The student losses from secondary schools may be regarded as a matter of concern. Any examination of general statistics can only approximate actual conditions. Comparing the registration by classes, the figures show that the second year class is 23 per cent smaller than the first year class; the third year class is smaller by 22.2 per cent than the second; the fourth 20 per cent smaller than the third, while during the fourth year 4 per cent of the class left school or failed to graduate.

The percentages show the approximate losses from year to year. Comparing these conditions with the best obtainable figures for the country at large, even this showing is favorable to the Maine high schools. For the United States as a whole, the first year high school class is 40.9 per cent of the total enrollment. For Maine, it represents 41 per cent. But the fourth year class for the country at large is only 13.5 per cent while the fourth year class for Maine comprises 15.6 per cent of the total enrollment in the high schools. In studying the losses for our schools, it is noted that between the first and second year a considerably larger number of boys than girls left school last year. Between the second and third year, the condition was reversed though the difference is less marked. In the last two years of the course, the losses of boys and girls are approximately the same. Secondary school attendance is often a hardship. Boys and girls of secondary school age begin to realize that they have attained wage earning capacity and the opportunity for individual gain is difficult to put aside in favor of the more remote and, to them, less easily demonstrable value of an educational investment.

Then again, by reason of remoteness from the homes, attendance at high school or academy presents the physical difficulty of the hardship or expense of going to and from school. It is safe to say that hundreds of boys and girls in our secondary schools travel an average of five miles a day. Hardly a school but has some student or students living at a distance of five or six miles from the school house and driving or walking throughout the year. It may be said, too, that these children are not seldom the most regular in attendance, the least often tardy and the most thoroughly interested of the student body. The fact that Maine holds so creditable a position among the

States on point of secondary school attendance must in the face of the relatively sparse population be construed favorably to the enterprise of the youth and to the zeal felt among the people for the promotion of education.

Financial. The towns maintaining high schools expended for all purposes more than half a million dollars. Nine-tenths of this sum was for instruction, the remainder for janitor service, fuel and conveyance.

The available funds for the year were approximately thirty thousand dollars in excess of the outlay and were derived from three principal sources: (1) local appropriations, (2) tuition and (3) state aid. The towns themselves raised more than seven-tenths of the whole income. The income from tuition was not quite one-twentieth while state aid amounted to two-tenths of the total fund. The increase in annual cost of instruction during the past five years has been about seventy thousand dollars.

The towns which maintained last year high school privileges through contract relations with academies expended \$52,000 for instruction, a marked increase over the amount similarly expended five years ago. Those towns that had only the tuition relation expended for this purpose somewhat more than \$40,000. The increasing cost of schools is accounted for in part by the increase in salaries paid. This point is discussed in some detail under another topic. The general tendency is shown in a comparison of the average cost per school for instruction. In 1910, the high schools, large and small, cost on the average \$2,285. In 1914, the cost was \$2,358.

The average cost of schooling a pupil in the high school during the past year was a little less than thirty-seven dollars based upon the enrollment and total expenditures.

So large a proportion of the secondary schools is to be classed as small schools that there is special force to an analysis of the expense of conducting the schools of this group. One of the legal requirements for approval in Class A is the expenditure of \$850 for instruction. An examination of the returns shows that none of the Class A schools expended less than \$900 for instruction and only five expended less than \$1,000. Twelve schools expended between \$1,000 and \$1,100, eight between \$1,100 and \$1,200. Nineteen schools are included in

the group from \$1,200 to \$1,400. The remaining ten high schools of Class A having but two teachers are expending \$1,400 or more for instruction. Of this group, eight schools cost \$1,500 or over for instruction. The average cost for instruction in the two teacher high schools is approximately \$1,250.

A similar condition exists in the cases of schools of Classes B and C. But six schools of these groups are maintained in the minimum named in the statutes. The average cost of instruction for these schools is approximately \$650. It cannot be justly said that expenditure for instruction is a final measure of efficiency yet almost invariably the larger expenditure indicates permanency, higher qualifications and better work. Using as a basis the average salary for men and women in Maine secondary schools, a two teacher school should cost at least \$1,500 for instruction. From the figures above given, the majority of these schools is below this average.

Teachers—Qualification. A very exhaustive study of the teaching force of the State was recently made by Mr. I. O. Scott, a graduate student in education at the University of Maine. Some of his findings are of special interest. Under the qualifications of secondary school teachers, it is noted that 70 per cent of all principals have full college preparation and that 75 per cent of male assistants and 70 per cent of female assistants have similar preparation. At the other extreme were eight principals, 3.3 per cent of the whole, and 50 assistants, 9.3 per cent of the whole, who had no preparation beyond that offered by the secondary school. Between these extremes, 21.1 per cent have had partial college courses, normal school training or special training in commercial or other departments. It should be said in the cases of those without training beyond the secondary school that many have had long experience and have done work to supplement earlier educational opportunities. Some are to be rated as superior teachers. The certification regulations make the minimum qualification two years of college or normal school and examination or experience. This requirement should be raised as rapidly as conditions will permit. It should call for special training for secondary school work as well as for higher educational qualifications.

Experience. This study also showed that 16 per cent of the principals and 25 per cent of the assistant teachers were without previous secondary school experience. Thus nearly a fourth of the entire secondary school force was entirely new to this grade of work. The mobility of teachers in secondary schools is shown by the fact that 50 per cent of all secondary teachers were new to their positions at the opening of the school year. Such a condition cannot fail to reduce in a great measure the efficiency of the schools as a whole. This lack of permanency in the teaching force is perhaps the most serious problem confronting secondary school administration. A similar situation would be regarded as disastrous in almost any other profession or industry where the individual responsibility for results is as great. Careful consideration of this condition in past years shows that the investigation does not reveal an exceptional condition for the year covered by the report of Mr. Scott.

Teachers' Salaries. The tendency towards an increase in salaries of teachers is marked throughout the school system. In the past five years the average salary of male teachers in high schools has increased 18.3 per cent while that of women teachers has increased 28.3 per cent. The latter gain is due in part to an increasing number of women who are employed as principals of high schools. Salaries of teachers in academies, both men and women, are slightly larger than those for high school teachers and the increase has been made at approximately the same rates.

Academics. The academies of the State may be roughly grouped under three general types. A small group includes those that are in a large degree private institutions. They are conducted without special connection with the public school systems of the communities within which they are located. Nearly all of these larger academies maintain boarding departments and offer special courses of instruction in addition to regular academic work. Their courses are subject to approval for tuition purposes. They may, or may not, receive state aid according to the amounts of their endowments. They are, for the most part, strong flourishing institutions.

The second group includes a few institutions so situated that they are in effect serving as central high schools for a

number of towns adjacent to those in which the schools are located. In some of these schools, as many as fifteen or more towns have students enrolled from year to year. While not under direct public control, schools of this class generally endeavor, so far as practicable, to meet the immediate needs of the constituencies which they serve.

The third group consists of those academies which are serving distinctly as the high schools of the towns in which they are located. The majority of the students come from the home communities and often there exist contract relations and consequent association between the school and academy officials. Last year thirty-five towns had contract relations with as many academies.

Secondary School and College Relations. An important function of the secondary school has, from its foundation, been that of providing what the college would regard as a proper and adequate background or preparation for the courses of the higher institution. Indeed for many years this was regarded as the chief if not the sole function of the secondary school. The name "preparatory school" was one generally applied to the secondary institution and even yet the term is not obsolete.

As the popular conception of society's educational obligations has widened there has come a very general acceptance of the idea that the program of popular education is only partially accomplished by the common school. In the increased support of a generous public, in the recognition of rights of all pupils through free high school and free tuition enactments, as well as, more vividly, in the rapid increase of secondary school enrollment there is ample evidence that the program for public education now includes all that is below the college. Such an extension precludes at once the possibility of considering the secondary school as an institution set apart for the special service of any one class of students.

Moreover, within recent years there has been a growing though frequently somewhat vague demand that the secondary school, dealing as it does with youth who are close to the vocation choosing age, should concern itself considerably with so-called practical courses. It is perhaps not too much to say that no other part of the school system has ever been

subjected to so many separate forces working for readjustment as the secondary school is now being required to meet.

The situation at present is this; on the one hand are the colleges with a set of fairly well established requirements based on many years, if not generations, of experience and custom, while on the other is a large body of students and their parents voicing a clearly felt, if not distinctly expressed, desire that the schools shall depart from the traditional courses and adopt those of a more definitely "practical" aim.

Both classes of students, those who will go to college and those who will not go, have equal rights to receive severally from their schools the kind of service they require. However, it should be borne in mind that comparatively few students on entering high school have any clear notions as to what the aim of their high school course will be for them. The youth at this age are still "going to school" under the impression that doing this will later serve to some good purpose. There is no early separation of those having different aims; there is, rather, a considerable confusion of aims in each individual case.

The high school has as a part of its multifarious duties the scrutiny of its students with a view to giving them such advice and help as the wisdom and experience of its instructors may suggest, that each may be led into that one course of action that will be for him most advantageous.

There has been, in this era of readjustment, no little criticism made by public school teachers and administrators that the college has kept an undue influence over the secondary school and that this influence has prevented the high school from enjoying that degree of freedom which in any educational institution is essential to growth.

It is pointed out that the concrete demands of the college, applying to an almost complete program of secondary studies, has kept the high school from formulating any program for the benefit of those not intending to go to higher institutions. Both these complaints have a very substantial basis in the facts. On the other hand the college with equal force has shown that the secondary schools have been invaded by not a few vaguely planned experiments, that many of the so-called "practical courses" have been lacking in substantial values;

have been aimless and, not infrequently, characterized by an appeal to easeful accomplishment rather than to serious and consecutive study. Those who have taken up the question intimately with college authorities have found them not unsympathetic to the secondary school point of view and to be reasonably ready to adapt themselves to a reconstructed curriculum as soon as its definite values can be established.

With a view to providing opportunity for the harmonious adjustment of various parts of the educational system of the State there was recently called by the State Superintendent a conference of the representatives of the colleges. Out of this conference came an unofficial committee of the colleges which, meeting semi-annually with the State Superintendent, has rendered invaluable service in the promotion of the interests of general secondary education.

The influence of the work of this committee has been reflected in the actions taken by the colleges in the direction of more liberal recognition for credit in secondary courses not previously recognized for college preparation while a serious and fruitful effort has been made to secure just estimates of the work of secondary schools.

Among the specific means which have illuminated the secondary school and college relationship through the medium of this committee is the series of reports made to the State office by the several colleges. These reports have covered the standing of the first year college students who have gone from approved secondary schools. They show the number entering from each school, the failures in particular subjects and, for the past year, the honor grades earned by the students. The reports are very complete and, so far as actual work in college is concerned, give much valuable information. It is not practicable to reproduce the reports in any detail but some of the more conspicuous items may be pointed out.

It has been noted elsewhere that the increase in students in college preparatory courses was less than in other courses. It happens despite this relatively small increase in the total enrollment that the number entering the Maine colleges in 1913 was 451 against 393 in 1912, a sufficiently marked gain. This number entering college is very significant when taken into consideration with the number graduating from all sec-

Waterville
Primary School. Erected 1914

ondary schools. That number for 1913, the class from which the entering class of last year was drawn, was 2,580. Thus the number entering college was more than one-sixth of the number who graduated from all courses of the secondary schools. In 1912, 113 different high schools and academies sent students to Maine colleges and the year following 121 schools were represented. The first report showed 37 schools of two or three teachers sending students, the second report shows that 43 of these smaller schools were represented. In 1912, 73 different high schools were reported and 40 different academies while last year 84 high schools and 37 academies sent students.

The purpose of the college reports is to assist in determining the quality of the work done by students in their preparation for college as shown by their success after entering. They, however, do not make in any sense an absolute or final criterion for judging the efficiency of the secondary school. The factors which enter the college work both favorable and otherwise have been carefully considered in the discussion of the reports. The inspectory reports and other available information regarding the work of the schools is introduced for the purpose of properly estimating the significance of the college work. It is to be noted, too, that the subjects under consideration are those called for in college preparatory courses only.

The contents of these reports constitute, therefore, only a partial measure of evaluating the schools. They do serve to supplement the more direct sources of information and they offer a means of comparing the work of students from the same schools in different colleges. Unsatisfactory work of students in one or more colleges is frequently offset by excellent work in other institutions. On the other hand, failures appearing in two or more colleges is suggestive of some weakness in the school.

The reports do not constitute basis for approval or withdrawal of approval of schools.

The failures in English according to the 1913 report were nine per cent of the total number taking the subject in college, in mathematics 23 per cent, ancient languages 5.5 per cent, modern languages seven per cent, science twelve per cent. Similar

figures for the preceding year correspond very closely to those given above. In fact when slight differences in the plan of reporting are taken into consideration the results would be practically identical.

The percentage of failures may appear excessive but it must be remembered that the figures deal with several hundred students each graded in from five to seven subjects. Taken in a broad way as reflecting the approximate work of students from the two types of high schools the figures show that there is little relative difference between the large and small school so far as the college work of their graduates is concerned. Another column of the report shows the number of honor grades earned by students from the various schools. This information was secured for the last report only. It showed that the students from large high schools earned two honor grades per student on the average, while the small school students earned 1.9 honors.

Methods of admitting students to college. That function of educational administration which deals with the means of determining the eligibility of students to receive the instruction of the next higher grade or institution has been always one of the most perplexing to discharge. The difficulty of determining whether a pupil is ready for promotion is least in the small school where the teacher has an opportunity to associate intimately with the educational progress of all the pupils and may even know of individual characteristics and of development in personal power as these are the results of educational influences outside the school. The problem has, moreover, by means of modern school supervision been reduced in degree as school systems have come under the watchful and careful scrutiny of competent principals and superintendents.

Save for the persistence here and there of the traditions that have grown up around examination systems and artificial plans of rating educational progress the schools are becoming measurably free from meaningless restraints. The notion is happily growing among the people that it is not primarily the function of any school to prepare for another school and it is being increasingly recognized that it is the function of each school to provide those educational stimuli that are needed by its pupils at the special stage of progress during which it deals with

them. There is, too, a wholesome revolt from the notion that educational results can be subject to exact mathematical measurement.

There continues considerable friction, however, in adjusting the transition of pupils from the secondary school to the college. The special difficulty that obtains at this point of school progress is considerably due to the fact that the two institutions are so removed from each other that suitable media of communication cannot be readily established and maintained. Hence, at this point the practice of passing the pupil forward on the basis of a clearly established personal claim to educational achievement gives way to some system whereby the candidate for further institutional training can be officially examined, certified and declared eligible to the opportunities he would seek.

The earlier method of determining this eligibility to enter college was by means of written examination in those subjects which were held to supply an adequate foundation for the courses to be later taken in the higher institution. But the examination system came under serious question as to whether it was the most just and feasible plan of determining such eligibility. Various colleges in an effort to meet the wishes and demands of the lower schools and the public for a more flexible arrangement of college admission set up schemes of certification which were to take the place of entrance by examination.

This step, while it was taken in the interests of greater freedom in education and while it no doubt worked to that end, was found to be faulty in that the conditions prescribed by various institutions were frequently so varied in detail as to impose considerable hardship on those secondary schools whose students were going to a number of different colleges.

To overcome this difficulty the colleges again moved, this time in the direction of forming associations for the purpose of formulating some uniform plans or systems that would relieve the somewhat chaotic situation.

In New England a number of colleges organized the New England College Entrance Certificate Board with a view to agreeing on a list of secondary schools whose students might be admitted without examination to any of the colleges rep-

resented by the Board. This Board has not undertaken to concern itself with the entrance requirements of individual colleges but rather has endeavored to give recognition to a body of schools whose standards in a general way are of a kind that would justify to the colleges of the Board the acceptance of their students without examination.

These several steps of college authorities present in themselves evidence of the recognition by the colleges of the difficulties under which the secondary schools have worked and of their own obligation to cooperate in removing these difficulties. That the problem has not been solved would appear to be sufficiently evident from the dissatisfaction frequently expressed by the secondary schools and public school administrators relative to the methods and results of the various plans at present in use. Hardly less pronounced are the complaints of those representing the colleges that there are still lacking adequate means of measuring the eligibility of students.

In Maine at present there are three general methods that are employed for admitting students to the colleges of the State: (1) examination by the individual college, (2) certification, and (3) graduation. Under each of these methods the student must of course have completed the subjects required by the college for admission.

Under the plan of entrance by examination, each college supplies its own sets of questions, conducts the examinations and passes on the results. A few students take the examinations of the College Entrance Examination Board. Most of these students go to institutions outside the State.

Bates, Bowdoin, and Colby Colleges accept on certificate those students who come from schools which are approved by the New England College Entrance Certificate Board. These colleges are members of this Board. By the rules of the Board these colleges may not accept certificates from schools not on the Board list. A combination of these two methods sometimes occurs in the cases of schools on the list where a student does not qualify for a certificate in all subjects. The Board does not prescribe the method of issuing the certificate as, according to its statement, "it believes in placing all responsibility upon the principal who must determine for himself, by his own methods, whether his pupils have done good enough work to be certified."

The University of Maine admits graduates of Class A schools provided they have completed the subjects which are required by the curriculum they wish to pursue in the University.

Admission by examination calls for no special comment. Its serious defect is that it tests only a kind of mental qualification. It is used by all the colleges for students who do not qualify on other plans of admission.

Between the methods of admission by Board certificate and graduation there is one marked distinction. This exists in the source of the approval of the schools. The privilege of certification is granted by a Board made up of fifteen New England colleges acting through their representatives. The purpose of this Board is stated in its by-laws as follows: "The Board is established for the purpose of receiving, examining and acting upon all applications of schools in New England that ask for the privilege of certification." It will thus be seen that the Board assumes to deal only with the schools which may seek the privilege.

The approval of schools for admission upon graduation is incidental to the general approval of standard secondary schools as provided by the act for the improvement of free high schools and by the earlier act for the State approval of courses in academies. Under these acts the State Superintendent of Public Schools is authorized to approve courses and is required to cause all schools to be annually visited and reported. The law requires that schools of standard grade shall maintain one four years course. This may be either English or college preparatory. This act does not preclude the maintenance of both or of additional courses. If, however, a preparatory course is offered it is expected that it will provide the subjects called for in admission to at least one curriculum of any college of the State.

It should be made clear that the approval of a college preparatory course does not of itself determine the grade of school. A school offering either course, English or college preparatory, is recognized as of standard grade provided the courses and conditions of maintenance fulfill the requirements of the law.

The New England Board bases its approval on detailed statements as to curriculum, teaching force and equipment supplemented by the records of two or more students attending some of the colleges of the Board. It withdraws approval upon an unfavorable record of students during the first term of the college year. Schools are "warned" if one-fourth of the students fail in two or more subjects or equivalent records. If no improvement is shown a second warning may be given or the approval withdrawn.

The plan adopted by the University of Maine accepts the classification of schools made by the State Educational Department. It provides that those students who have completed in such manner as to be graduated the work prescribed for admission by the college may continue their work in college.

The New England Board according to its report for 1913-14 approved seventy-two schools in Maine. This was 39.4 per cent of the Class A schools for the corresponding year. In the same year 121 schools or 66 per cent sent students to the Maine colleges. Of the schools having the certificate privilege, the large schools, i. e., having four or more teachers, constituted 76.4 per cent of the whole. Only 15 per cent of the small high schools of the State have the certificate privilege yet 47.3 per cent of the small schools sent students to Maine colleges. On the other hand 81 per cent of the large high schools are approved by the Board.

It may be inferred from these comparisons that the privilege of certification has become a privilege of the large schools. The service rendered to the small schools is almost negligible. Of the 107 students who went from this group of schools only 30 were from schools having the privilege of certification.

In any attempt to state the situation with reference to the results on the schools of the activities of the New England College Entrance Certificate Board there ought at the outset to be clearly set forth the fact that the Board came into existence considerably, if not entirely, as a result of the suggestions, if not of the positive invitation, of the principals of secondary schools. Relief was sought by them from the somewhat chaotic condition created by the various requirements of different colleges. This relief, it appeared, must come through some one standardizing agency.

Besides, there ought to be given very full recognition to the valuable service rendered by the Board at a time, perhaps not altogether past, when the States were negligent of their responsibility for the standards of the institutions they had created. In this respect educational history but repeats itself. Nearly every important function of education now controlled and directed by the public was first proposed, and in many instances actually started, in an experimental way by a private agency.

The question may well be raised with the colleges of the Board, with the secondary schools and with the public as to whether the method of college entrance admission may not in some way be administered without the direct or indirect implication that private institutions exercise a too great influence and control over another class of institutions for whose conduct and accountability to the public they have no responsibility. No one would seriously raise the question that any college would desire any but the highest welfare of education as a whole, or that any would consciously impose a hardship on any part of the public school system. However, no situation can permanently exist that gives over to one class of educational institutions an inordinate power or control over another class; especially when the first would properly resent any public interference with their methods of administration while the other must always hold themselves readily and strictly accountable to that public which established and supports them.

Such dissatisfaction as has now arisen in relation to the New England College Entrance Certificate Board is due in part to the following reasons:

(1) It attaches to the school possessing the certificate a fictitious value. The annual announcement by the Board of its list of approved schools is followed immediately by press items and school catalog statements that clearly imply that an award of merit is held to have been given. Advertisements appear offering the statement of Board approval as a clear implication that the institution is of high grade. The Board, through its members, has frequently stated that the plan is merely one to deal with the details of college admission and that any assumption that schools are graded in value, or that the Board attempts to make any award of merit is absolutely unwarranted. While the Board therefore disclaims its responsi-

bility for the advertising purposes to which its approval is applied yet it would be useless to deny that a distinct impression is made upon the public mind that an important agency has given to some schools a certain coveted scholastic standard.

(2) The undue stress laid by smaller schools on college preparation in order that Board approval may be secured or retained.

The establishment among the people of the impression that a school is superior or inferior according as it has or has not the approval of the Board tempts the school with a small teaching force to place chief stress on its college preparatory group regardless of its proportionate numbers. Realizing that the selection of the school on the Board list will affect not only the standing of the school with the colleges, but as well with its local constituency it is not remarkable that this special attention is paid. It is not a wholesome condition, however, that exists in any public or other school, when the fortunes of a group of students are made, more than those of another group, the special and distinct care of the institution. A public high school should not be in a position where its standing rises or falls by any other criterion than that of the service it renders its whole student body.

(3) The indirect effect on many small schools that cannot consistently apply for, or might be ineligible for, the privileges accorded by the Board.

The following table represents the density of population of the New England States.

State.	Population.	Land Area.	Inhabitants Per Sq. Mi.
Maine	742,371	29,895	24.8
Massachusetts	3,366,416	8,039	418.7
New Hampshire	430,572	9,031	47.6
Vermont	355,956	9,124	39.0
Rhode Island	542,610	1,067	508.5
Connecticut	1,114,756	4,820	231.2

From the foregoing table as well as from the statistics herein reported it is evident that the secondary school youth of Maine in comparison with those of other New England States now and for many years to come must look in larger measure to

Sebago Lake
High and Graded School. Erected 1914

the small schools for their high school opportunities. The preservation of the highest welfare of each of these small schools is of the utmost concern to the State.

The figures elsewhere quoted show that schools of this class compare favorably with any others both in the quality of the later college work of their graduates and with respect to the proportionate numbers sent to higher institutions. Many of these schools may send only occasionally a student direct to college but they are in the meantime accomplishing worthy and creditable results. With their scattering college representation, however, it would be difficult for some of them to remain permanently on the Board's lists. When they are not included, students will adopt the practice of securing the first two or three years of their training in the home school going on for the final year to the Board school in order that they may avoid the necessity of the entrance examination. It is difficult for the patrons of a large school to appreciate the unfavorable reaction of this practice upon the small school. It receives no credit from the college for the good work it did for the student in the important first two or three years. Its students who remain are infected with a distrust of the quality of their school. The classes, small at best, are depleted and thus enthusiasm and interest are reduced. Finally, there is the inevitable comment of many people of the community that their school is probably an inferior one since students go away to fit for college. Of course this is not the fact since they are already considerably fitted and they go away not for that purpose but to secure the privilege of entering college without an examination.

(4) The judgment of the school solely on the basis of the result in college.

The New England College Entrance Certificate Board bases its judgment rather exclusively on the results in college as shown by the work of the certificated students. It claims with some justice that in so large a group of colleges the average of such judgments when extended with some leniency over a series of years reflects fairly enough the actual efficiency of the schools. Doubtless this is true of the larger schools. Whether the small school with only an occasional representative in college meets this test on equal terms may be open to question.

In any event the inevitable result of this method of awarding the certificate privilege must put the secondary principal in a most cautious attitude in selecting the students who will represent his school. Hence has sprung into existence the so-called double standard in graduation. By this is meant the practice of giving the diploma of the school to all who complete a course but in the case of those in the college preparatory course, the awarding of an entrance certificate only to those who have attained an exceptional standing. There is sharp disagreement among secondary principals as to the expediency of this practice. Many hold that, regardless of the standing of a school with a certificate board, the practice is necessary to the holding of students to a high quality of accomplishment. However, when a student has completed the specified subjects laid down and required for any course, and is regarded as qualified for the diploma of the school it would appear that he may justly contend his right to offer himself for trial for the next higher educational opportunities without further restraints by way of special ratings. The college receiving students may well and properly determine the conditions on which it will take them and it has no doubt a right to ask and receive from public and other school authorities any information that will aid in the selection of the kind of students it desires. But it is less clear that public school authorities, having given the seal of their approval to the satisfactory completion by a group of students of a required course, are justified in determining that some of the group are to be denied their approval in their attempts for further education. Moreover it is significant that the double standard idea is applied in no other save the college preparatory course.

(5) The colleges of this Board while indirectly responsible for the effects of its activities on lower schools are without accountability to the public for those results.

Of the fifteen colleges in this New England Board, twelve are outside the State. Even if there were a disposition to fetter higher institutions with legal restraints, it is clearly beyond the power of a state government to interfere with institutions that do not owe their creation or support to the legislative action of that state. Neither is it conceivable that colleges within any state should be made by law accountable for the quality of

the lower schools. Without denying the general professional obligation that each part of the educational system shall discharge its function with due regard to the duties and rights of all other parts and for the ultimate welfare of the whole, there must yet be reasonable caution that nowhere shall there exist an undue preponderance of influence or power. The responsibility for the right conduct of public education must rest finally with the people who establish and support it.

In this somewhat extended discussion of one phase of college admission it is apparent that some of the practical disadvantages of the activities of the Board and its plan of college admission grow out of a misconception of the intentions of the Board. Something has already been attempted to make clearer the desire of the Board to prevent any discrimination against small schools as well as to discredit the tendency to exploit acceptance on the Board's list as a certificate of standing or special award of merit. Doubtless these disadvantageous results might be considerably reduced with the more emphatic and public statements of the Board regarding its intentions and methods.

Ultimately, however, it would appear that in justice to all secondary school students regardless of the courses they elect; in compliance with the reasonable demand of the public for the supervision of its own schools; as well as in the interests of the colleges themselves, there must come with a gradual readjustment of college entrance requirements a permanent and generally recognized medium of communication between the several branches of the school system. This medium must be properly accountable to all who are interested in the schools' products.

For Maine particularly, it is necessary that every precaution be taken to conserve the interests of the small schools upon which the secondary education of so many must depend. The highest welfare of any part of the educational system of the State, whether conducted under private or public auspices, is entirely consistent with a policy of the preservation to each of its own integrity. On the proper adjustment of all the parts one to another depends finally the right development of what may well be regarded as the most serious undertaking of the people.

CHAPTER IV.

- A. Certification of Teachers.
 - B. State Normal Schools.
 - C. Summer Schools for Teachers.
 - D. Teachers' Institutes and Conventions.
 - E. Conference of School Superintendents.
-

THE STATE CERTIFICATION OF TEACHERS.

Among the most important educational measures adopted in recent years is the "Act to Provide for the State Certification of all Teachers of Public Schools" (Chapter 58, P. L., 1913). This Act in full is as follows:

Sect. 1. It shall be the duty of the state superintendent of public schools to cause to be held at least once each year at such times and at such places as he may designate, public examination of candidates for the position of teacher in the public schools.

Sect. 2. The examination herein provided for shall test the professional as well as the scholastic abilities of the candidates and shall be conducted by such persons or agents and in such manner as the state superintendent may determine. Due public notices of the times, places and other conditions of the examination shall be given.

Sect. 3. Certificates of qualification signed by the state superintendent of public schools shall be granted to all candidates who pass satisfactory examinations in such branches as are required or permitted by law to be taught in the public schools and who in other respects fulfill the proper requirements, provided, however, that no person unless he is seventeen years of age and has completed a standard high school or academy course shall be eligible for a certificate. Such certificate shall be either probationary or permanent and shall indicate the grade of schools which the person named therein is qualified to teach. Provided, however, that the certificate may be granted without the examination herein prescribed to graduates of colleges and Maine state normal schools, or of other normal training schools having a two years' course for graduates of high schools or academies, and to teachers of two years' service and satisfactory fitness on the presentation of such evidence of fitness and under such special conditions as the state superintendent of public schools may prescribe. Provided, further, that certificates may, under the rules prescribed by the state superintendent, be granted to persons holding state certificates granted by authority of other states. Provided, further, that any certificate granted under this or any preceding act may for sufficient cause be revoked and annulled.

Sect. 4. A list of persons so certificated shall be kept in the office of the state superintendent of public schools and copies of the same with such information as may be desired shall be sent to school committees and superintendents upon their request.

Sect. 5. No person shall be employed to teach in any school under the supervision and control of any local school board of any city, town or plantation of this state, after September one, nineteen hundred and fourteen, who does not hold a state certificate as herein provided. Provided, however, that any person not holding a state certificate may be granted not more than one temporary non-renewable teaching permit for a period not to exceed one year, such permit to be issued upon examination by the superintendent of schools of the town in which such person is employed and the form of such permit shall be prepared by the state superintendent of public schools and shall be furnished by him upon application of the superintendent of schools of any town. No person shall be eligible to a teaching permit unless he shall meet the requirements of section three in relation to age and educational preparation. Provided, further, that all state certificates heretofore granted shall continue in force in accordance with the terms stated therein.

Sect. 6. Whoever teaches a public school without first obtaining a state teachers' certificate or a temporary teaching permit as herein provided, forfeits not exceeding the sum contracted for his daily wages, for each day he so teaches and is barred from receiving pay therefor.

Sect. 7. For the necessary expenses of carrying out the provisions of this act there may be annually expended the sum of one thousand dollars, which sum the treasurer of state shall deduct for said purpose from any school money raised for the support of common schools.

Sect. 8. All laws and parts of laws inconsistent with the provisions of this act are hereby repealed

While the requirement that all public school teachers must hold state certificates or temporary teaching permits does not come into force until September 1, 1914, authority to grant certificates according to the several prescribed methods existed through that year.

Accordingly there was issued a manual of instruction outlining the rules and regulations applying under the new act. This manual was given general circulation among teachers. The instructions therein contained follow:

BASES AND CLASSES OF STATE CERTIFICATES

State certificates will be issued in accordance with the provisions of the foregoing act. Such certificates will be granted in any of the following ways:

- A. On written examination.
- B. On the basis of two years' successful teaching experience.

C. On the basis of scholastic record in normal or training school whose course is not less than two years subsequent to a standard secondary course, or record in college.

D. On the basis of a state certificate granted by the authority of another state.

The certificates issued will be of the following classes:

A. **ELEMENTARY**: (probationary or permanent) entitling the holder to teach for the period specified in any public elementary school.

B. **PROFESSIONAL ELEMENTARY**: (probationary or permanent) entitling the holder to teach for the time specified in any public elementary school.

C. **SECONDARY**: (probationary or permanent) entitling the holder to teach for the time specified in any public secondary school of the state.

D. **PROFESSIONAL SECONDARY**: (probationary or permanent) entitling the holder to teach for the time specified in any public secondary school of the state.

E. **SPECIAL**: (probationary or permanent) entitling the holder to teach a special subject: Kindergarten, Drawing, Music, Manual Training, Household Arts, Commercial Branches and Agriculture.

APPLICATION FOR CERTIFICATE.

Blank forms for applying for state certificates will be furnished candidates on application.

Candidates for state certificates will be required to furnish references as to moral character and professional integrity.

CONDITIONS OF ELIGIBILITY.

ELEMENTARY CERTIFICATES: Any person is eligible for an elementary certificate who is at least seventeen years of age, has accomplished the equivalent of a standard secondary school course *and*

(1) can furnish evidence of a successful teaching experience of not less than two years, part of which, at least, shall have been in elementary schools, *or*

(2) has completed satisfactorily a normal or training school course subsequent to a standard secondary course, *or*

(3) can present a certificate, valid at date of application, issued by authority of another state and covering the requirements of the Maine elementary certificate, *or*

(4) can pass a satisfactory examination in the following subjects: reading, orthography, penmanship, English grammar and composition, arithmetic, geography, United States history, civil government, physiology and hygiene, nature studies and Maine school law.

The written examinations will cover both the subject matter and, to a limited extent, the methods to be employed in teaching them.

PERMANENT ELEMENTARY CERTIFICATE: A teacher meeting the general requirements for elementary certification will, after five years of successful teaching in elementary schools, be eligible to a permanent or life certificate.

PROFESSIONAL ELEMENTARY CERTIFICATE: Any person who has satisfactorily completed a course in a Maine state normal school or in a

teachers' training school offering not less than two years' work subsequent to a standard secondary school course is eligible to an elementary professional certificate. To any person meeting the foregoing requirements a probationary certificate good for not more than five years will be granted, the term of the certificate to be based on previous experience.

Credit towards professional certificates will be given for the completion of approved courses in summer schools. Teachers holding elementary school certificates may qualify for professional elementary certificates by written examination in the following subjects:

1. History of Education.
2. Psychology.
3. School Management.
4. Method as applied to elementary school branches.
5. School Law of Maine.

The examinations in these subjects will be rigid and will be based upon the presumption of extended study. Candidates for professional elementary certificates on the basis of written examination must file notice thereof at least two weeks prior to the date of examination.

PERMANENT PROFESSIONAL CERTIFICATE. After five years' successful experience in elementary schools a professional certificate will be made permanent.

SECONDARY CERTIFICATES. Any person is eligible to a secondary certificate who meets the minimum requirements of the foregoing act and who complies with any of the following conditions:

1. The completion of the four years' course of a Maine college or of any other of equal standing; *or*
2. The presentation of evidence of not less than two years of successful teaching in approved secondary schools after the completion of not less than two years of a college course or a normal course; *or*
3. The presentation of a valid state certificate issued by authority of another state, the holder of such certificate to give evidence that he has met the minimum requirements for a Maine secondary certificate; *or*
4. The satisfactory accomplishment of a written examination in any five of the following groups:
 1. English—required.
 2. Mathematics.
 3. Science.
 4. Modern Languages.
 5. Ancient Languages.
 6. Civics, History (American, English, Ancient).

The candidate for a secondary certificate by examination must have completed not less than two years of a college course or a normal course.

The written examination will cover the scope of work required in secondary schools and will treat of subject matter and methods of teaching. The examination in prescribed subjects will presuppose thorough and extended study by the candidate.

Candidates for secondary certificates on the basis of written examination must file notice thereof at least two weeks prior to the date of examination.

Probationary secondary certificates will be issued for periods of two, or five years as indicated by experience of the candidate. After five years of successful experience in standard secondary schools the teacher is eligible to a permanent or life certificate.

PROFESSIONAL SECONDARY CERTIFICATE. Any person who has graduated from any Maine college or from any other of equal standing shall be eligible to a professional secondary certificate provided he has completed a course in pedagogy approved by the state superintendent of schools or provided, subsequent to graduation, he has completed a course in pedagogy in a professional school, or provided, he can pass a satisfactory written examination in the following subjects:

1. History of Education.
2. School Management.
3. Psychology.
4. Methods (as applied to secondary school branches).
5. School Law of Maine.

Candidates for professional secondary certificates on the basis of written examination must file notice thereof at least two weeks prior to the date of examination.

Any candidate completing an approved course in a summer school will be given credit therefor towards a professional secondary certificate.

PERMANENT PROFESSIONAL CERTIFICATE. After five years of successful experience any person meeting the general requirements for a secondary professional certificate may be eligible to a permanent or life certificate.

SPECIAL CERTIFICATES. Special certificates are issued to those persons who desire to qualify only for a special subject and they are not valid for general school work. They imply fitness to teach in subjects for which technical preparation is required. Special certificates will apply to the following branches:

Kindergarten, Music, Drawing, Manual Training and Household Arts, Commercial Branches and Agriculture.

Probationary special certificates will be granted to any person who has satisfactorily completed an approved course in any of the foregoing subjects. Such probationary certificates will be made permanent after five years of successful experience. Candidates giving evidence of successful experience in teaching the foregoing branches may be granted certificates on the basis of such experience.

DATES AND PLACES OF EXAMINATION.

Public examination of candidates will be held regularly on the last Saturdays of February and June and will be held at convenient points in all sections of the state. Public notices will be duly made of the places selected. Examinations will also be held at such other points as may appear from time to time convenient to groups of ten or more candidates who have filed preliminary papers.

GENERAL REGULATIONS.

REVOKING CERTIFICATES. Any state certificate will be revoked if after investigation it is shown that the holder of the certificate is incompetent or is guilty of immoral or unprofessional conduct.

RENEWALS. A holder of a probationary certificate who desires a re-issue of certificate should file application for renewal at least thirty days prior to the expiration of the original certificate. Forms for filing additional information as a basis of renewal will be sent on request to the state superintendent of public schools.

DATE OF CERTIFICATE. All certificates will be issued under date of August first and will be valid for periods covering full school years.

TRANSFER OF FORMER CERTIFICATES. Maine state certificates granted under the provisions of former acts continue valid. Persons holding such certificates are eligible for re-certification under the provisions of the act now in force.

TEMPORARY TEACHING PERMITS.

After September 1, 1914, persons employed as teachers in the public schools, not holding teachers' state certificates, must hold *temporary teaching permits*.

No person is eligible to receive a teaching permit unless he is at least seventeen years of age and has completed a standard high school or academy course.

Teaching permits may be issued for a period not to exceed one year, and are non-renewable. Not more than one such permit may be issued to any person.

A teaching permit may be issued by the superintendent of schools of the town in which the applicant is to be employed upon the basis of an examination given by the superintendent. This examination should include such subjects as the applicant will be required to teach and should in all cases include an examination in physiology and hygiene.

After the applicant has satisfied the local superintendent of schools that he has met the requirements in relation to age and educational preparation the superintendent of schools may secure from the state superintendent of public schools a form to be used in issuing the permit to teach. Blanks to be used in applying for forms for teaching permits are supplied on request.

While the conditions of the new act were not to be fully operative until September, 1914, applications for certification under its various provisions were received as soon as it was in effect in July, 1913. During the year then opening, there were granted in accordance with the new regulations 2,863 certificates of elementary grade, 568 of secondary grade and 206 for special subjects.

STATE NORMAL SCHOOLS.

The work of the state normal schools is very vitally connected with every part of the school system.

With the establishment of the Farmington Normal School in 1864, Maine placed herself early on record as holding it essential to supply to the public schools a body of trained teachers. Following with the establishment of the Eastern State Normal School at Castine in 1867, the Western State Normal School at Gorham in 1879, the Madawaska Training School at Fort Kent in 1878, the Aroostook State Normal School at Presque Isle in 1903, and the Washington State Normal School at Machias in 1910, the State has definitely committed itself to the serious undertaking of training teachers for the public schools of all sections of the State.

These schools, however, are not only charged with the responsibility of creating a public school teaching force of the highest possible training and efficiency; they must as well represent in their practice the most approved methods and policies that are practicable for adoption in the schools of the State for whose educational betterment they were created.

In the early history of the schools, secondary school opportunities were exceedingly limited in many sections. High schools were few in number and the educational privileges offered by academies were restricted to comparatively few of the youth. Under these conditions it was necessary and wise that the normal schools should include in their courses subjects that were necessary for the better general education of the students, but not closely related to the art of teaching. Beginning with the passage of the first free high school act in 1873 and following more rapidly with the act of 1909 for the improvement of free high schools, the public high schools became first more numerous and then better classified and standardized. These acts, together with the free tuition act of 1903, made secondary school privileges available generally to the youth and increased very greatly the enrollment in all classes of secondary schools.

With this more general availability of high school opportunity, the necessity that the normal schools serve in any way

State Normal School, Farmington
Purington Hall. Erected 1914

as state secondary schools decreased. There came with this changed condition the opportunity for the normal schools to devote themselves more directly to the primary object of teacher training.

In 1912, the schools began to receive only those students who had completed the work of secondary schools or those who could show that they had completed the equivalent of the secondary course. This step will, it is believed, increase considerably the opportunities of the schools for more and better professional teaching.

The tendency of school officers to employ teachers for the entire school year rather than from term to term is one that is manifestly in the interests of the pupils of the schools. To encourage this tendency and to set the institutions of the State in harmony with the best interests of the schools, an action has recently been taken by the trustees which provides for the formation of new classes only in the fall term. Formerly, new classes were begun at the beginning of each of the three normal school terms. This arrangement will likewise tend to the more economical conduct of the normal schools.

Following are the reports of the principals of the several schools:

FARMINGTON NORMAL SCHOOL.

FARMINGTON, MAINE, June 30, 1914.

To the Trustees of the State Normal Schools:

Gentlemen:—I have the honor to submit the following annual report of the Farmington Normal School for the year ending June 18, 1914. The attendance for the year has been as follows:

Number entering	114
Number registered in the fall term	186
Number registered in the winter term	217
Number registered in the spring term	199
Number of different pupils registered	257
Number in the graduating class, regular course	85
Number in the graduating class, advanced course, Household Arts	6

The teachers for the year have been: Principal, Wilbert G. Mallett, A. B.; assistant principal, Arthur M. Thomas, A. M.; assistants, Hortense M. Merrill, Katherine E. Abbott, Virginia A. Porter, Florence L. Walker, Franca Camp, Marion C. Ricker, Cora J. Chase. Supervisor of training school and critic teacher, Lillian I. Lincoln, assistants, Louise W. Richards, Marguerite Fox, Helen M. Leland, Mabelle A. Hutchins, Inez M. Rolfe. Secretary, Mildred S. Gay.

The class which was recommended for graduation and which received diplomas was as follows:

Vera L. Adams, Canton Point; Lois F. Allen, Sanford; Carolyn E. Barker, Athens; Sybil G. Barker, Fryeburg; Edna M. Bartlett, Locke Mills; Anna E. Beal, Phillips; Ethel M. Beal, Boston, Mass.; Marion E. Beedy, Livermore; Blanche M. Belches, Winterport; Ruth D. Blake, Farmington; Opal Boston, Athens; Myrtle A. Bradeen, Mexico; Lora J. Bridges, Sangerville; Alice M. Briggs, Turner; Gladys Buswell, Exeter; M. Ruth W. Clifford, North Edgecomb; Frances R. Coffin, Harrington; Harriette E. Crockett, Guilford; Helen T. Dalzell, Rockland; Rena P. Davis, Auburn; Gertrude K. Day, Livermore Falls; Mildred F. Dyer, Hanover; Lottie L. Dunn, West Pembroke; C. Marie Farrar, Rumford Center; Pansy M. Felch, Cornish; Maude R. Gale, Jackson, N. H.; Julia A. Gile, Buckfield; Vira A. Gilmore, Turner; Edith G. Ginn, Auburn; Enna Gleason, Mexico; F. Esther Goodell, Monson; Marion Gould, Gardiner; Myrtle L. Green, Skowhegan; Helen M. Grover, Gardiner; Mildred M. Hatte, Charleston; Edna M. Havey, North Sullivan; Nellie D. Hinds, Livermore Falls; Susie B. Holt, Canaan; Bessie M. Huckins, Eastport; Flora M. Hunt, Cundy's Harbor; Stella S. Hutchins, Phillips; Marietta Ingerson, Vinalhaven; Frances C. Johnson, Auburn; Ruth B. Lander, Bingham; Edith A. Luce, Farmington; Tina M. Miller, North Jay; Gretchen A. Mulholland, Lubec; Hazel D. Norris, Monmouth; Mary E. Packard, Hartland; Helen S. Page, Milo Junction; Elsie M. Palmer, East Sumner; Mabel I. Pennington, Patten; Frances L. Porter, Farmington; Lucie W. Preble, Bangor; Mary B. Prince, Madison; Helen M. Purinton, Lewiston; Mary I. Putnam, Winthrop; Doris Rayner, Skowhegan; Nellie W. Reed, Boothbay; Villa L. Russell, New Sharon; Eva L. Sawtelle, Augusta; Clara M. Shaw, Farming-

ton; Alice M. Smalley, Tenant's Harbor; Alta W. Smith, Bethel; Lucy E. Sturtevant, Hebron; Teresa E. Sullivan, Lubec; Emma L. Tabbutt, Columbia; Susie A. Taylor, Farmington; Myrtle E. Thompson, Vanceboro; Bertha R. Thorne, Strickland; Florence A. Tibbetts, Boothbay; Flora S. Titcomb, Farmington; Kathryn R. Wadsworth, Gardiner; Grace D. Walker, Farmington; Nellie G. Walker, Farmington; S. Helen Wallingford, Auburn; I. Ruth Webster, Rangeley; Lina C. Weeks, Mexico; Myra S. Weeks, Farmington; Gladys L. Wright, Monmouth; Ralph W. Nowland, Gardiner; Myron L. Smith, Pembroke; Roland L. Stockford, Winthrop.

The regular work of the school has gone forward during the past year without interruption or unusual incident.

At the beginning of the year, a new course was offered in the household arts department open to all graduates of Class A high schools. This creates a course parallel to the regular normal school course. Only a limited number will be admitted to it and this year it numbers twelve. Six pupils also presented themselves for the third year of household arts. Four of them were graduates of the Farmington Normal School and two graduates of Machias Normal School. They have continued the work for the year and received the advanced course diploma. Their names are as follows: Elgiva B. Luce, Auburn; Elsie G. Means, Machias; Flora T. Norton, Taunton, Mass.; Herberta A. Penley, Rumford Center; Eula M. Skinner, Port Clyde; Lucy L. Thompson, Machias.

The additional course of two years makes more imperative than ever the need mentioned in my last annual report of additional and better facilities for conducting our household arts work. In order to maintain work on a plane suitable to its worth a new building is required, specially constructed for its use. This need is urgently recommended to your consideration.

A third teacher in this department will be necessary for the coming year and Miss Flora A. Norton, a graduate of this school, 1913, and of the advanced course, 1914, is recommended for the place.

The new dormitory which will accommodate one hundred students has been in process of construction during the year and will be ready for occupancy in the fall. It has been ur-

gently needed and will be a most useful adjunct to the school. The architects are Miller & Mayo of Portland; the general contractor, L. E. Bradstreet & Sons Co. of Hallowell; contractor for the testing apparatus, Willey & Calhoun, Portland; for the plumbing, Knight Brothers, Westbrook; wiring and light fixtures, A. T. Thurston Co., Rockland.

Respectfully submitted,

W. G. MALLET.

EASTERN STATE NORMAL SCHOOL.

CASTINE, MAINE, June 23, 1914.

To the Trustees of the State Normal Schools:

Gentlemen:—I respectfully submit my 26th annual report of the Eastern State Normal school.

The teachers for the year have been: Albert F. Richardson, A. M., principal; assistants, Edward E. Philbrook, M. D., Nellie F. Harvey, Kate S. Russell, Mary C. Richardson, A. B., Mabel P. Ridley, Mary L. Hastings, Hattie A. Wiggin, Mary S. Coombs, A. B., Mary B. Bills, Beth M. Jellison, Myra A. Fitch, Abbie M. Buck, and in the grammar school, W. G. Bisbee.

Attendance of Students.

Number entering the school	35
Number attending the fall term	81
Number attending the winter term	101
Number attending the spring term	99
Total enrollment	280

The number entering has been five less than last year, and the number enrolled has been 39 less.

The graduating class is the largest in the history of the school, 67.

Agriculture. Our work in this branch has been improved by a change of teachers, Miss Ridley having had charge instead of the principal. The school garden is better than last year and more work has been done in the class room. The boxes for hot beds were made in the manual training room.

Manual Training. The work in this department is constantly improving. Besides the regular work the pupils have made six boxes for libraries for the Sea Coast Mission, and fine frames for the pictures presented to the school.

The Library. Since being catalogued, the library has been constantly used by the students.

Several valuable books were presented by the class of 1913, some have been purchased from the proceeds of the sale of old text-books not of further use and 19 volumes of magazines have been bound by the State. We now have 2,296 bound volumes, very carefully selected.

The Dormitory. The students and teachers have greatly enjoyed life in the dormitory, and have been able to obtain board there at a low rate. The attendance at school has been much more regular, and the health of the pupils much better, especially in the winter, as they are so much nearer the school building and not obliged to walk long distances. Socially, the advantages have been enjoyed and appreciated.

Domestic Science. The work in this department has been of great value and pleasure to the students and has given the pupils who attend the grammar and model schools the advantages of instruction and practice without expense. During the winter term the members of the B class served eight breakfasts in the laboratory. Four girls were responsible for each breakfast, to which four guests were invited. The cost was limited to eighty cents, ten cents per capita. No two menus were alike though the general plan was the same. Fruit, cereal, coffee, hot bread of some kind, and a hearty dish of some kind—bacon, eggs, or meat, were served. These breakfasts were served in the Russian style and the laundering of the table linen was a part of the work. The chief aim was to train the girls to compute expenses carefully and apply these principles as they would in their own homes. At the close of the year the girls of the ninth grade served breakfast to a party of six at an expense of \$1.37.

Training School. The amount of teaching in the training school has been increased and the time each student teaches one grade has been lengthened.

Standard of Admission. As to the raising of the standard of admission to the requirement of the completion of a course

in a secondary school of standard (A) grade, we may repeat what was said last year that it has reduced our attendance and will do so for some time to come, located as we are among rural towns. But the loss is not more than was expected and the advantages are already felt in many ways, and there can be no doubt that the change will result in furnishing better teachers for the common schools.

Summary. The friends of this school have reason to be greatly encouraged by the advances made in every direction in school matters in this State. Among the best things for us are the new dormitory, the establishment of courses in agriculture, manual training and domestic science, and the action of the University of Maine in allowing the two years of normal training to count for two in the college course at that institution.

Graduating Class. I recommend that diplomas be granted the sixty-seven persons named below, the largest class ever graduating from this school.

William Wesley Armstrong, Brookton; Virgie May Beckwith, Belfast; Alta L. Bennett, Bucksport; Catherine Blaisdell, Winterport; Florence B. Blaisdell, East Franklin; Leon E. Blake, Searsport; Grace M. Brann, Kenduskeag; Flora I. Brooks, Ashland; Leah M. Brown, E. Corinth; Lois M. Candage, Surry; Ella M. Clark, Belfast; Mildred A. Clewley, Brewer; Doris Condon, S. Brooksville; Mary E. Coombs, Castine; Edward P. Crie, Castine; Myra J. Curtis, Dennysville; Jessie D. Cushman, Rockport, Mass.; Edith Wheeler Davenport, Topsham; Oren E. Decker, Ridlonville; Susie H. DeLaittre, Salisbury Cove; Russell C. Dodge, Boothbay; Carolyn L. Durham, Monroe; Ella A. Facteaux, Orland; Inez M. Fletcher, Stockton Springs; Winifred Hattie Gray, E. Orland; Blanche Ruth Grindle, E. Bluehill; Edna C. Harquail, Monroe; Mary L. Heal, Danforth; Barbara A. Heald, Lincolnville; Agnes O. Hibbert, Castine; Chrystal Hutchins, N. Penobscot; Gertrude Hutchinson, Bangor; Fannie May Ingalls, Bridgton; Bertha E. Jackson, Morrill; Minnie E. Jordan, Orland; Eunice A. Keller, N. Islesboro; Ruth Edna Kimball, Belfast; Edith I. Knutson, Maplewood, Mass.; Ada E. Leighton, Silver's Mills; Evelyn M. McPheters, Orono; Edna Muriel Miller, E. Holden; Nettie A. Morris, E. Holden; Lillian Nash, Jefferson; Priscilla

Augusta
Rural School. Erected 1914

A. Nickels, Searsport; Hazel M. Oakes, Milford; Minnie E. Paine, Searsmont; Ethel B. Parker, N. Islesboro; Hazel O. Parker, Lincolnville; Beatrice Parsons, Thorndike; Gladys K. Pendleton, Islesboro; Helen Pendleton, Islesboro; Ida G. Pinkham, Palermo; Addie S. Prescott, Rockland; Sadie Kathleen Proctor, Lincolnville Center; Sylvia E. Richardson, Burlington; Lillian I. Ryder, Winterport; Susan S. Sanborn, Dover; Adah P. Savage, W. Franklin; Blanch C. Sibley, Freedom; C. Valentine Soper, Orland; Katherine A. Spear, Rockport; Lena A. Sperry, Surry; Bertha A. Starrett, Warren; Veda Thomas, Lee; Etta F. Torrey, Deer Isle; Althea N. Yeaton, Islesboro; Jessie A. Young, Lincolnville.

Respectfully submitted,

ALBERT F. RICHARDSON.

WESTERN STATE NORMAL SCHOOL.

GORHAM, MAINE, June 17, 1914.

To the Trustees of the State Normal Schools:

Gentlemen:—I hereby submit my 9th annual report as principal of the Gorham Normal School for the year ending June 17, 1914.

I. The faculty of the school consisted of thirty-four members distributed as follows: Principal, Walter E. Russell, A. B.; teachers devoting their entire time to normal school students, Viola M. White, Katharine Halliday, Gertrude L. Stone, A. M., M. Grace Fickett, A. M., Jessie L. Keene, Ph. B., and Louis B. Woodward, A. B. Teachers devoting a major part of the time to normal school students and a part to the practice school students, George A. Brown, Emma S. Daggett, Pamela C. Ware, Eugene H. Harlacher, Ethel G. Wooldridge, B. S. Teachers devoting their entire time to practice schools, Miss Cora B. Dillingham, Miss Katherine C. Ageson, Miss Lou M. Buker, Miss Marjorie M. Blanchard. The remaining eighteen were teachers of schools in Westbrook and So. Portland in which members of the graduating class did their practice teaching. The other officers of the school consist of R. Estelle Bradbury, secretary and librarian, Mrs. Addie I. Andrews, matron at Robie Hall, Mr. Melville

B. Alley, caretaker of the normal school building until May, Bert L. Libby, caretaker of the normal school building for the remainder of the year, and James Cullen, engineer at the dormitories.

II. The student enrollment for the year was as follows:

Whole number of pupils present during the year	232
Number entering during the year	116
Number attending during the first half year	228
Number attending during the second half year	211
Number of graduates in the regular course	99
Number of graduates in the manual training course ...	4
Average attendance	219

These 232 pupils were classified as follows:

Graduates of standard high schools	230
Non-graduates of standard high schools	2

Of the 116 entered, one was admitted by examination. The other 115 were graduates of grade A high schools.

The practice school students consisted of approximately 888 distributed as follows:

Number in the normal school building	146
Number in the West Gorham school	22
Number in Westbrook	440
Number in So. Portland	280

Each member of the graduating class had approximately three weeks of observation in the regular practice schools and in the rural school at West Gorham and seven weeks of teaching either in Gorham, Westbrook, or South Portland.

III. The expense of the normal school was met last year as in previous years; the State supporting the regular normal school work, the State and town of Gorham bearing the expense of the practice school and the observation school in Gorham, and the State paying a bonus to the teachers in Westbrook and So. Portland whose schools were used for practice work.

IV. Two regular courses of study were offered, (a) a two years course for teachers of elementary schools and (b) a two years course for teachers and supervisors of manual training. The latter course graduated its first class this year. The four graduates found ready employment.

V. The one hundred young women and three young men whose names are given below constituted the class on whom the State conferred diplomas.

Hildred M. Ames, No. Haven; Lillian M. Ball, Westbrook; Gertrude A. Bodge, Gorham, R. F. D. Number 4; Gertrude L. Boothby, Standish; Mildred J. Boothby, Jenkins Road, Saco; Evelyn M. Bragdon, Gorham; Marjorie F. Brown, 275 Main Street, Waterville; Myrtie E. Buker, Bowdoinham; Welthie B. Buker, 508 Middle Street, Bath; Grace Burnham, Bridgton; N. Edith Campbell, Litchfield Corner; Florence I. Carroll, 49 Falmouth Street, Woodfords; Theodora C. Chandler, 131 Spring Street, Portland; Lizzie M. Clemons, Hiram; Louise V. Cobb, 412 Cumberland Avenue, Portland; Mildred B. Cobb, Millbrook Farm, Westbrook; Alice M. Corson, Rochester, N. H.; Esther M. Curran, 112 Birch Street, Bangor; Belle M. Dolley, 34 Edgewood Avenue, Woodfords; Helen M. Dougherty, 233 Oxford Street, Portland; Roxana V. Dow, Wiscasset, R. F. D. Number 1; Effie E. Edwards, New Gloucester, R. F. D. Number 1; Edna L. Farrar, Lisbon Falls; Alice M. Fay, 14 Bradford Street, Portland; Nina Felton, W. Paris; Eleanor M. Fogg, Readfield; Apphia I. Foss, So. Portland, R. F. D. Number 6; Evelyn Louise Foss, So. Portland Sta.; Eva M. Fowles, 805 Congress Street, Portland; Grace E. I. Gallagher, 11 Birch St., Bangor; Mary E. C. Gallagher, 267 State Street, Bangor; Alice D. Goodwin, So. Berwick; Helen E. Goodwin, So. Berwick; Bertha S. Gordon, 823 Main Street, Westbrook; Ruth E. Gove, 42 Prospect St., Biddeford; Bernice P. Grant, 57 Riverside Street, Portland; Helen L. Graves, Bowdoinham; Myra E. Hatch, Cumberland Mills, Edna F. Hawkes, So. Windham, R. F. D. 1; Esther J. Hession, 12 St. Lawrence Street, Portland; Gertrude H. Hession, 12 St. Lawrence St., Portland; Gladys L. Hill, Bridgton; Cecilia P. Hodgkins, 17 McDonough St., Portsmouth, N. H.; Ella R. Hodgkins, Damariscotta Mills; Edith L. Hopkins, No. Haven; Harriette M. Jordan, Kennebunkport; Mildred E. Keene, Waldoboro; Florence W. Leighton, 34 Lamb Street, Cumberland Mills; Miriam B. Libby, 42 Newbury Street, W. Somerville, Mass.; Grace E. Littlefield, Wells Beach, R. F. D. Number 2; Ruth C. Littlefield, Ogunquit; Iona F. Littlehale, W. Paris, R. F. D. Number 1; Emma E. Lombard, Fryeburg; Mildred A. Mahoney, 585 Washington

Avenue, Portland; Hazel M. Manchester, Limerick; Celia L. Martin, Kennebunkport; Marguerite B. Martin, 71 Federal Street, Portland; Flossie A. McCaulder, Wells; Amy G. McDaniel, Gorham; Ethel B. McEntee, 17 Reservoir Street, Cumberland Mills; Evelyn M. McKinney, 4 Downes Street, Calais; Anne W. McMaster, 7 Cushman Street, Portland; Irene M. Merrill, Gorham; Annie E. Nash, 29 Crescent Avenue, Malden, Mass.; Helen M. Nickels, Cherryfield; Helena H. O'Brien, 39 Beckett Street, Portland; Sara Louise Parker, Gorham; Ethelynn M. Peabbles, Cape Elizabeth; Leah E. Pike, Westbrook, R. F. D. Number 1; Rubie F. Pillsbury, 28 Harrison Avenue, Biddeford; Amy F. Piper, 38 Spruce Street, Portland; Edna L. Plaisted, Gorham; Mildred H. Plummer, Portland; Josephine E. Powers, 84 King Street, Westbrook; Clara L. Pratt, Freeport; Beatrice Pride, Westbrook, R. F. D. Number 2; Pearl H. Raymond, Bowdoinham; Lillian G. Rich, Gorham; Blanche W. Richardson, Bethel; Grace E. Richardson, E. Baldwin; Augusta D. Robinson, Bowdoinham; Mary E. L. Ross, 5 Seventh St., So. Portland; Carrie H. Russell, Gorham; Lizzie E. Saunders, 11 Fessenden Street, Portland; Helen E. Scully, 99 Sheridan Street, Portland; Eula L. Spaulding, 13 Dow Street, Portland; Alma H. Spruce, Milford; Alta L. Stone, Cornish; Ethel M. Swett, So. Windham, R. F. D. Number 1; Mildred V. Thomas, 19 Downes St., Calais; Beulah G. Towne, Bridgton; Martha M. Ward, 108 Water Street, Portland; Florence M. Watson, Richmond; Marguerite Weare, York Beach; Ruth E. Wight, W. Woolwich; Zillah W. Wilbur, Pembroke; Edna Willby, Bridgton; Gladys A. Young, York Beach; Mattie W. Young, 92 Kent Street, Woodfords; Austin Alden, Gorham; Ella M. Hewins, E. Winthrop; George E. Hutcherson, Gorham, R. F. D. Number 3; Harley N. Prescott, 7 Maple Street, Sanford.

VI. The present number of bound volumes in the library is 1,649. A new library table and eight chairs have been added to the library furnishings.

VII. The most urgent immediate needs of the normal school are the completion of the new dormitory, the plans of which are already drawn, the enlarging of the normal school building to make it balance the increased dormitory facilities, and the providing of a central heating plant. The building of

a new heating plant at the present time will save the expenses of equipping the new dormitory with boiler and coal rooms.

Respectfully submitted,

W. E. RUSSELL.

AROOSTOOK STATE NORMAL SCHOOL.

PRESQUE ISLE, ME., June 10, 1914.

To the Trustees of the State Normal Schools:

Gentlemen:—I have the honor to submit to you the following report of the Aroostook State Normal School for the year ending June 10, 1914.

Number registered the fall term	50
Number entering the fall term	23
Number registered the winter term	66
Number entering the winter term	4
Number registered the spring term	60
Number entering the spring term	3
Number graduated	22
Number of different pupils registered	121
Average enrollment	58 2-3

This has been a very profitable and pleasant year in our school. The quality of the work and the interest both on the part of the teachers and scholars has been especially good. The work of the Training School has been the best since its opening in the old high school building. Two changes only were made in the faculty: one through the resignation of Elizabeth Jenkins, the assistant critic teacher, for the purpose of accepting a similar position in Vermont; the other by the resignation of Alida A. Barrows, teacher of domestic science, on account of ill health. Miss Alice M. Coffin was selected to fill the vacancy caused by the resignation of Elizabeth Jenkins and has shown herself to be very efficient. Miss Helen C. Welch, a graduate of Framingham Normal School, succeeded Alida A. Barrows, as teacher of domestic science, and has had a most successful year.

The teachers for this year have been San Lorenzo Merriman, A. B., principal; William D. Hall, A. B., assistant principal; Ardelle M. Tozier, Nellie W. Jordan, Ida M. Folsom, Gertrude T. Morrell, Helen C. Welch, Mable H. Rich, assistants.

Florence M. Hale, principal of training school; Alice M. Coffin, assistant critic teacher; Doris Pride, Carrie Cooper, Mrs. S. E. Preble, Alice Coffin, Maudiste Campbell, Lillian Watts, Florence Wright, Ethel Smith, model teachers.

The following students have completed the prescribed course and are recommended for graduation: Marie Anderson, Stockholm; Nellie Beatty, Brewer; Mary Callaghan, Houlton; Ella Clarke, Presque Isle; Clara Cooper, Patten; Louise Crawford, Houlton; Harriet Deasy, Houlton; Augusta Dennett, Mapleton; Bertha Gooding, Presque Isle; Susie Gooding, Presque Isle; Gertrude Gray, Caribou; Therese Howard, Island Falls; Verna Long, Caribou; Rowena McGowan, Ashland; Hazel Mills, Caribou; Alma Moody, Weston; Erdine Morgan, Sherman Mills; Everett Rockwell, Smyrna Mills; Lucy Rockwell, Smyrna Mills; Georgia Sinclair, Castle Hill; Laura Sutherland, Portage; Katherine Wingate, Houlton.

As a whole our school is well equipped. However an increase in the apparatus for the teaching of the sciences, household arts and manual training would add to our efficiency. Our greatest need is a new school building.

Respectfully submitted,
SAN LORENZO MERRIMAN.

REPORT OF SUMMER TERM.

The fifth annual summer term of the Aroostook State Normal School opened Tuesday, July 21, and continued for six weeks, closing Friday, August 28.

Number registered	25
Number entering	17

Teachers employed: S. L. Merriman, director; Ardelle M. Tozier, Gertrude T. Morrell, Ida M. Folsom, Helen C. Welch, Mable H. Rich, and Mrs. M. L. T. White.

The registration for this term was much smaller than we anticipated, and seemed to have been caused by the anticipation on the part of the superintendents of a scarcity of teachers to supply their schools for the fall term.

Respectfully submitted,
SAN LORENZO MERRIMAN, *Director*.

MADAWASKA TRAINING SCHOOL.

FORT KENT, ME., June 19, 1914.

To the Trustees of the State Normal Schools:

Gentlemen:—I have the honor of presenting to you the report of the Madawaska Training School for the year ending June 9, 1914.

Attendance.

Number of new pupils	50
Number attending autumn term	136
Number attending winter term	152
Number attending spring term	118
Number graduating	21

The teachers of the year have been: Mary P. Nowland, principal; May Brown, Katharine L. Lawlis, Sara H. E. Doone, Eleanor F. Welch, Martha B. Greene, Donald H. Sawtelle, assistants.

Beulah C. Bates who during the autumn term devoted her time to visiting the schools of the territory with the object in view of bettering the schools by her assistance and advice—this was done under the direction of the State Superintendent of Public Schools—taught in the training school during the winter and spring terms.

Beginning with February, Miss Nowland was given leave of absence for the rest of the year during which time the school was fortunate in having for acting principal Miss Ardelle M. Tozier of Presque Isle Normal School whose well-known efficiency made very desirable her presence in the training school.

During the summer vacation the old fence enclosing the grounds was removed and the buildings painted, both of which changes add very materially to the appearance of the place.

The main room in the school building is rendered doubly pleasant by the addition of a steel ceiling and a much needed coat of paint.

The town has recently been supplied with good water which has been installed in the school buildings adding very much

to the comfort and convenience of all connected with the institution. But what has done most toward making nineteen hundred thirteen a "Red Letter" year, a *safer* year, has been the placing in the school buildings of the electric lights. The constant danger which attended the handling by the scholars of so many kerosene lamps is now a thing of the past.

During the year Miss Nellie M. Douglas of Bluehill and Miss Laura A. Richardson of Fort Fairfield have had charge of the model school. Here the ranks have been full and good work has been done. Below are the names of the members of the class who received diplomas.

Helen D. Allen, Ashland; Cecile Bouchard, Upper Frenchville; Victoire M. Boutôte, Fort Kent; Délie P. Charette, Fort Kent; Azalie Côte, Wallagrass; Christine Cyr, St. David; Louis O. Cyr, St. David; Rosa Cyr, St. David; Délina Daigle, St. Francis; Ella Daigle, Fort Kent; Leanna Daigle, St. Francis; Grace Hébert, Madawaska; Elsie Labbé, Winterville; Laura B. Mallett, Fort Kent; George F. Martin, Eagle Lake; Gertrude Michaud, New Canada; Laura Ouellette, Upper Frenchville; Mary D. Ramsey, Fort Kent; Marie Roi, Daigle; Thérèse Saucier, Wallagrass.

Respectfully submitted,

MARY P. NOWLAND.

WASHINGTON STATE NORMAL SCHOOL.

MACHIAS, MAINE, July 1, 1914.

To the Trustees of the State Normal Schools:

Gentlemen:—I have the honor to submit to you the fourth annual report of the Washington Normal School.

The attendance for the past year has been as follows:

Number registered in fall term, 1913	47
Number registered in winter term, 1914	47
Number registered in spring term, 1914	50
Number graduated in June, 1914	18

The teachers for the year have been as follows:

William L. Powers, principal; Thomas C. Chaffee, Ella B. Quinn, Martha M. Tobey, Mary E. Sterritt, Ethel I. Duffy, Cleora M. DeCoster, assistants; Carrie M. Wight, critic teacher;

Washington State Normal School, Machias
Dormitory—1914

Florence K. Vose, A. Genevieve O'Donnell, Roberta Puffer, Hattie H. Snell, model teachers; George F. Grafton, janitor.

Each assistant teacher connected with the school has rendered to the principal loyal and enthusiastic support.

Dormitory. The cut of our dormitory as completed to date appears elsewhere in this report. The lower floor is used for parlor, hall, and dining room. These rooms, as well as the rest of the building, are finished in golden oak and are very beautiful. On the second floor are the matron's rooms, and on the third floor are the hospital rooms; each suite consists of two rooms with a bath. Besides the above mentioned rooms there are twenty-six rooms for students, and lavatories on each floor.

The original plan called for two wings, neither of which could be provided from the original appropriation. In view of the fact that one of the wings is to contain the kitchen and that no accommodations can be made for a kitchen in the part already completed, it will be necessary for the building to lie idle until another appropriation has been made to complete the building. It is difficult to get students boarded near the school, and the completion of the dormitory will do much toward the development of our school.

Library. A small room large enough to accommodate our library for a few years was decorated and fitted with shelves last year. A bust of Lincoln and another of Shakespeare presented by the class of 1913 together with their class picture add greatly to the attractiveness of the room. Reading tables and reading lamps offer facilities to the students for study and investigation. It is probably true that no student who goes to this school has ever enjoyed such library advantages before.

Model School. The model school has continued along the lines as indicated in the report of last year. An epidemic of measles and whooping cough began near the close of the winter term and caused a loss of some three weeks' time for the model school students.

Mothers' Club. An energetic and successful Mothers' Club is maintained by the parents of the model school students. Meetings are held once a month and the members themselves conduct the meetings and carry on the work of the club. Every meeting is productive of good for the model school and for

the normal school as a whole. Funds have already been raised sufficient to make a good start on a library for the model school students and the books have been purchased and are eagerly read.

Domestic Science and Manual Training. During the past two years the courses in domestic science and manual training have increased the efficiency of both normal and model schools. Model school pupils before graduating learn the fundamental principles of cooking, sewing, and the use of wood-working tools. No student can take this course without being better fitted for life work. The boys learn to cook but, in place of sewing, extra bench work is offered. Playthings dear to the heart of a boy such as skis, sleds, bows and arrows, etc., as well as useful articles are made. Mechanical drawing is taught to all; boys and girls alike are required to make a working drawing of all models made at the bench.

Graduates. The call for our graduates is much greater than can be filled. We can not supply the demand for model rural school teachers, primary school principals, and grammar school principals. Young as the school is, out-of-state calls for teachers are coming in.

The following named persons received diplomas June 12:

Elizabeth Albee, Frances Atwater, Verna Brown, (A. B.).
Minerva Davis, Lucy Guptill, Grace Hobart, Harriette Holway,
Esther Kilby, Vera Loring, Clara McEacharn, Emma Perry,
Nora Plummer, Iva Ramsdell, Statira Roberts, Harold Roney,
Mary Vose, Blanche Whitney, Hazel Wilson.

Respectfully submitted,

WILLIAM L. POWERS.

COMPARATIVE SUMMARY.

SUMMER SCHOOLS FOR TEACHERS.

Following are the reports in detail of the several state summer schools for teachers held in accordance with the provisions of Paragraph IV of section 100 of chapter 15 of the revised statutes.

EASTERN STATE NORMAL SCHOOL.

CASTINE, MAINE, August 7th, 1914.

To the State Superintendent of Public Schools, Augusta, Maine:

Dear Sir:—The state summer school for teachers held at the Eastern State Normal School, Castine, opened July 13th, and closed August 7th, under the instruction of the following teachers:

Albert F. Richardson, director and teacher of school management and school laws; Edward E. Philbrook, music and hygiene; Mabel P. Ridley, history and civics; Helen M. King, reading and arithmetic; Virginia Porter, geography, grammar and penmanship; Marion C. Ricker, domestic science.

Total number registered	62
Average age	23
Number who have taught	51
Average experience of these	153 weeks.
Average experience of all	113 weeks.
Grâduates of normal schools	6
Graduates of high schools or academies	36
Number having elementary education only	26
Number of different towns represented	41
Number who have taught ten years or more	8
Number who have taught five years or more	20
Number studying school laws	12
Number studying school management	35
Number studying music	9
Number studying hygiene	6
Number studying domestic science	16
Number studying arithmetic	26
Number studying grammar	29
Number studying geography	24

Number studying nature	18
Number studying penmanship	19
Number studying reading	29
Number studying history	26
Number studying civics	26

Four evening lectures were given during the term.

Respectfully submitted,

ALBERT F. RICHARDSON,

Director.

MACHIAS, ME., August 21, 1914.

To the State Superintendent of Public Schools, Augusta, Maine:

Dear Sir:—The state summer school for teachers held at the Washington Normal School, Machias, opened July 13 and closed August 21. The instructors were W. L. Powers, psychology and school management; T. C. Chaffee, agriculture, zoölogy, and methods in arithmetic; Cleora M. DeCoster, methods in geography, calisthenics, and nature study; Hattie H. Snell, methods in primary language and reading, penmanship, and physiology; Beulah C. Bates, grammar, history and civics, and school law.

Number of students registered	31
Average age	20½ yrs.
Graduates of secondary schools	25
Graduates of normal schools	9
Graduates of colleges	0
Number teaching in Maine	28
Number teaching one room rural schools	20
Average teaching experience	7 terms
Number who have never taught	4

A change was made in our summer school program this year and work was offered for the first half of the F term. Six students, four girls and two boys, have taken the work. Three of the students will enter the regular F class in September, 1914, two are planning to enter in January, 1915, while the other will teach during the year and return next summer to complete her F term's work. I most heartily recommend the continuation of this course, the offering of regular normal school work during a six weeks' term in the summer, for I believe that many students who come for the summer course will remain or return during the year.

There is a call from normal school graduates who took their normal training before manual arts constituted a part of the normal school course, for bench work, cooking, and sewing, in the summer school. These should be offered in 1915.

Respectfully submitted,

WM. L. POWERS,
Director.

GORHAM, MAINE, Aug. 7th, 1914.

To the State Superintendent of Public Schools, Augusta, Maine:

Dear Sir:—The following is the report of the state summer school held in Gorham from July 13th to August 7th inclusive, 1914. The instructors employed and the subjects they taught were as follows: Walter E. Russell, school management and school law; Gertrude L. Stone, arithmetic and school games; Samuel H. Reed, geography and history; M. Grace Fickett, grammar and penmanship; Martha M. Burnell, hygiene; Clara C. Prince, music; Louis B. Woodward, agriculture; George A. Brown, manual training, Katherine C. Aageson, reading.

The total number registered	106
The number who have had teaching experience	87
The average teaching experience	172 weeks
The number under 20 years of age	30
The number over 30 years of age	18
The number between 20 and 30	58
The average age	20 years and 2 months
Graduates of secondary schools	97
Graduates of normal schools	17
Graduates of colleges	3
Non-graduates of high schools	10
Number who have taught in Maine schools	84
Number who have taught in other states	9
Number who have taught in rural school of one room	59
Number who have taught in village schools	20
Number who have taught in city schools	15
Number who have taught in secondary schools	1
Number without teaching experience	19
Number who expect to teach in rural schools next fall	43

West Gouldsboro
The Playground and the Noon Lunch
Model Rural School

The following indicates the number of students who were given certificates in the several courses:

Arithmetic	8
Grammar	25
Manual Training	33
History	14
School Management	56
Reading	20
Music	30
Geography	30
Hygiene	18
School Law	26
School Games	21
Agriculture	5
Penmanship	35

Besides those given certificates in these courses in many of the classes there were visitors attending a part or all of the recitations.

Respectfully submitted,

WALTER E. RUSSELL,

Director.

PRESQUE ISLE, MAINE, Sept. 1, 1914.

To the State Superintendent of Public Schools, Augusta, Maine:

Dear Sir:—The summer school for teachers held at the Aroostook State Normal School, Presque Isle, opened Tuesday, July 21st and continued for four weeks, closing Friday, August 14th.

Number entering summer school	14
Number receiving certificates	10

The teachers for the summer school were S. L. Merriman, Ardelle M. Tozier, Gertrude T. Morrell, Ida M. Folsom, Helen C. Welch, Mable H. Rich and Mrs. M. L. T. White.

Respectfully submitted,

SAN LORENZO MERRIMAN,

Director.

TEACHERS' INSTITUTES AND CONVENTIONS.

Teachers' institutes have been held during the year as provided by Section 89 of Chapter 15 of the Revised Statutes. Table XXXII shows in detail statistics of these several institutes and of the convention of the Maine Teachers' Association. Addresses on the subjects named were given at the county meetings by the following persons not residents of the counties wherein the conventions were held:

Hon. David Snedden, Commissioner of Education for Massachusetts:

"Some Problems Involved in Rendering Public Education More Efficient."

Hon. H. C. Morrison, State Superintendent of Public Instruction for New Hampshire:

"Liberty Under the Law in Education."

Dr. A. E. Winship, Editor of Journal of Education, Boston, Mass.:

"Making Boys Manly."

Charles W. Eliot, President-emeritus of Harvard University:

"The Education which will Contribute to the Earning of a Livelihood."

President Harry Garfield, Williams College:

"The Teacher's Greatest Task."

Professor William T. Sedgwick, Massachusetts Institute of Technology:

"Nature Study."

Superintendent Frank E. Spaulding, Newton, Mass.:

"The Challenge."

Principal Walter D. Head, Haverhill High School, Haverhill, Mass.:

"The Elementary School as Seen from the High School Teacher's Point of View."

Frank Palmer Speare, Dean of School of Commerce and Finance, Boston, Mass.:

"The Business of Life and the Function of the Public School."

Mr. Frank W. Wright, Cambridge, Mass.:

"The Science and Sentiment of Education."

- "Changing Conceptions of Rural Education."
 "The Reorganization of the Rural School."
 Dr. E. K. Dunham, New York City:
 "The Y. M. C. A. Movement in Hancock County."
 Dean Sarah Louise Arnold, Simmons College:
 "The Teacher as Interpreter."
 Miss Agnes Irwin, Former Dean of Radcliffe College:
 Address.
 Miss Bertha M. McConkey, Assistant Superintendent of
 Schools, Springfield, Mass.:
 "The Value of Play in Education."
 Miss Lucie P. Pray, Training School, Portsmouth, N. H.:
 "Story Telling."
 Mrs. Maude Andrews Lincoln, Boston, Mass.:
 Reading.
 Principal W. G. Mallett, Farmington:
 "One Phase of Education."
 "Problems of the Rural Schools."
 "The Most Important Factor."
 "Problems of the Elementary Schools."
 Principal A. F. Richardson, Castine:
 "The Value of Little Things in Teaching."
 "The Ideal Primary School."
 "Progress in Maine Schools."
 Principal W. E. Russell, Gorham:
 "The Self-Testing of the Teacher's Efficiency."
 "Varying Teaching for Individual Pupils."
 "The Quest of Greatness."
 Principal W. L. Powers, Machias:
 "Nature Study."
 President Robert J. Aley, University of Maine:
 "Care of the Individual in Education."
 "Relation of Knowledge to Progress."
 President William DeWitt Hyde, Bowdoin College:
 "Seeds of Morals."
 President Arthur J. Roberts, Colby College:
 Address.
 Professor Arthur J. Jones, Orono:
 "Education for Leadership."
 "What a Teacher can do to Improve his own Efficiency."

- "The Need of Definiteness of Aim."
 "The Liberal Education of the Future."
 Professor G. W. Stephens, Orono:
 "The Teacher and Social Responsibility."
 Professor Roland P. Gray, Orono:
 "What Should be Emphasized in the English Work of
 the High School."
 Professor H. H. Britan, Lewiston:
 "The Foundation for Character Building."
 Professor William H. Hartshorn, Lewiston:
 "Rambles in Germany."
 "Latter Day Fiction."

 "Moral Education."
 "Three Popular High School Fallacies."
 "The Use of Habit and Memory in the Schoolroom."
 Professor Herbert C. Libby, Waterville:
 "Public Speaking in the High School."
 A. A. Heald, Secretary of State Y. M. C. A.:
 "The Teacher's Responsibility."
 "Rural Life Engineers."
 F. H. Bickford, State Leader of Boys' Clubs:
 "Boys' and Girls' Agricultural Clubs."
 J. Wallace Blunt, State Insurance Commissioner:
 "Fire Prevention."
 J. W. Taylor, State Inspector of High Schools:
 "Preparation for Teaching."
 Payson Smith, State Superintendent of Public Schools:
 "Everyday Helps for Rural Teachers."
 "The High School Situation."
 "The Contact with Life."
 "The Essentials for the Betterment of the Rural Schools."
 Superintendent F. W. Burrill, Brewer:
 "Everyday Problems of the Teacher."
 Superintendent H. J. Chase, Gardiner:
 "The School and Society."
 Superintendent John A. Cone, Brunswick:
 "What the Superintendent may Expect of his Teachers."
 Superintendent B. E. Packard, Camden:
 "The Lawyer in the Schoolroom."

- Superintendent C. N. Perkins, Waterville:
 "Schoolroom Sanitation."
 Superintendent L. A. Ross, Dexter:
 "The Recitation."
 Superintendent F. G. Wadsworth, Hallowell:
 "Where the Honor Lies in Teaching."
 Principal S. R. Oldham, Pittsfield:
 "Teaching English in Secondary Schools."
 Miss Lillian I. Lincoln, Farmington:
 "The Daily Program."
 Miss Virginia Porter, Farmington:
 "Uses of Maps and Globes."
 Miss Ella B. Quinn, Machias:
 "First Aid."
 Miss Helen M. King, Portland:
 "Practical Child Study."
 O. W. Turner, M. D., Augusta,
 F. W. Mitchell, M. D., Houlton,
 S. L. Andrews, M. D., Lewiston,
 C. E. Norton, M. D., Lewiston,
 James A. Spalding, M. D., Portland,
 H. E. Gribben, M. D., Rockland:
 "Conservation of Vision."

State Meeting.

The Maine Teachers' Association met in Bangor, October 30th and 31st, 1913, with an attendance of 3011. Following is the program:

THURSDAY MORNING—9.30.

*Department of Superintendence and Secondary School Administration,
 Assembly Room, High School Building.*

Chairman—Superintendent F. G. Wadsworth, Hallowell.

Business Session

"The Reorganization of Our School System,"

Professor Arthur J. Jones, University of Maine

Discussion

"Measuring Efficiency,"

Superintendent Frank E. Spaulding, Newton, Massachusetts

Discussion

Reports of Committees

THURSDAY AFTERNOON—2.00.

General Session, Auditorium, City Hall.

Music—Concert Orchestra composed of representatives of the high school orchestras of Auburn, Augusta, Bangor, Bath, Brewer, Gardiner, Portland and Skowhegan

Prayer

Music, Orchestra
Address, Payson Smith, State Superintendent of Public Schools

Beginning at 7.30, a concert of one-half hour will be given by Pullen's Orchestra.

Music, Orchestra

Business

Music, Orchestra

"The Bad Boy," Jacob Riis, New York City

Music, Orchestra

The annual meeting and banquet of the Maine Schoolmasters' Club was held Wednesday evening, October 29th. John Kendrick Bangs was the speaker of the evening.

OFFICERS OF THE ASSOCIATION 1912-1913.

President—WILLIAM B. ANDREWS, Westbrook

Vice President—GEORGE H. LARRABEE, Bangor

Secretary—HAROLD A. ALLAN, Augusta

Assistant Secretary—MISS FLORENCE I. POLLISTER, Portland

Treasurer—HERBERT E. CONGDON, Bangor

Auditor—ERNEST H. WOODBURY, Saco

EXECUTIVE COMMITTEE.

The President, Vice President, Secretary, Treasurer,
MISS LILLIAN I. LINCOLN, Farmington—1913

KENNETH C. M. SILLS, Brunswick—1914

HERBERT J. CHASE, Gardiner—1915

CASTINE CONFERENCE.

The sixth annual conference of superintendents was held at Castine July 6th to 10th, 1914. The following is the program:

MONDAY—GENERAL SESSION, EMERSON HALL—8.00 P. M.

Music

Prayer

Music

Address, Dr. Booker T. Washington, Tuskegee, Alabama

TUESDAY—9.30 A. M. TO 12.00 M.—GENERAL SESSION—ASSEMBLY HALL,
NORMAL SCHOOL.

1. Larger Service from the Public School Plant,
W. Stanwood Field, Director of Public Evening Schools, Boston,
Mass.

Questions and Discussion

2. Vocational Guidance
Frank V. Thompson, Assistant Superintendent of Schools, Boston,
Mass.

Questions and Discussion

2.00 TO 3.30 P. M.

Superintendents of Larger Towns

More Efficient Evening Schools, Mr. Field

2.00 TO 3.30 P. M.

Principals and Superintendents of Smaller Towns

1. The Place of the Academy in the New England School System,
Principal W. G. Colby, Wilton Academy
2. The Place and Function of the Small High School,
Principal Maurice C. Foss, Franklin

Topic for discussion—The relations between academies and contract towns.

GENERAL SESSION 8.00 P. M.

Music

The New Brunswick School System,
Hon. W. C. Carter, A. M., LL. D., Chief Superintendent of Edu-
cation for New Brunswick

Albion
High and Graded School. Erected 1913

WEDNESDAY—GENERAL SESSION, 9.30 A. M. TO 12.00 M.

General Topic—School Hygiene

1. Some Duties of Superintendents in the Conservation of Vision,
Dr. James A. Spalding, Portland
Questions and Discussion
2. A Few Practical Suggestions for Combating Tuberculosis in the
Schools
A. J. Torsleff, Secretary Maine Anti-Tuberculosis Association
Questions and Discussion
3. Practical Experience in the Medical Inspection of Schools,
Dr. H. E. Hitchcock, Auburn
Questions and Discussion
4. Round table discussion of the following topic—Should there be
Legislation to Cover the Standardization of School Buildings
already Constructed, such Legislation to Treat of Lighting, Ven-
tilation, Heating and Sanitation?

2.00 TO 4.00 P. M.

Secondary School Principals

1. Differentiation of the Work in English for Secondary Students with
Different Aims and Tasks,
Professor W. B. Mitchell, Bowdoin College
Questions and Discussion
2. Co-ordination of the Work in English with that of the Grade Schools
and College,
Professor R. P. Gray, University of Maine
Questions and Discussion

2.00 TO 4.00 P. M.

Superintendents of Schools

General Topic—Problems of Rural Education

Round Table Discussion

1. Should Rural Schools be Standardized?
2. Should Larger State Funds be Given to Rural Schools?
3. The Improvement of Rural Teaching.
4. Consolidation and Conveyance.
 - a. Should the Law Fix Distance Limit?
 - b. Should the Law Fix the Proportion of Funds to be Expended?
 - c. Should Opportunity to Appeal from Decision of the Committee
be Given?

SCHOOL SUPERVISION.

The application of the law enacted in 1897 to provide some degree of professional supervision of the schools can no longer be regarded in the experimental stage.

Massachusetts originated the plan in 1870, added the state aid feature in 1888 and later made the adoption of its provision obligatory on towns. All the other New England states, with New York and several states of the middle west, have since adopted the essential principle with such modifications as local conditions have suggested.

In Maine, progress in the adoption of the provision by towns was, at the beginning, tardy. As soon, however, as a few pioneering towns had demonstrated the efficiency of the scheme other towns, profiting by their examples, voted favorably on the proposals to form unions. For the past ten years the process of bringing the State under skilled supervision has been reasonably rapid and the unions have been encouragingly permanent.

For the year ending July 1, 1914, there were eighty-one unions comprising 221 towns, these figures, representing an increase of two unions and seven towns over the preceding year. There were in these unions for last year 2,529 schools, an increase of 82 over the year 1912-1913. The cost of this supervision to the towns was \$47,682 and to the State \$63,643. The average cost of supervision to each school was approximately forty-four dollars. The cost of supervision, including

both local and professional, was for the year at the rate of \$33.27 for each common school. Supervision of secondary schools and all special activities comes within the jurisdiction of the superintendents employed. As the duties implied in these are variable in the different towns, they are disregarded in the foregoing computations.

Practically eighty per cent of the school population has now been brought under expert supervision. There are numerous instances of towns that desire to secure for their schools the advantages of the present act, but find themselves unable to do so because the neighboring towns have already perfected unions that reach the maximum provision of the law. The State should soon, in justice to these towns and to the interests of the small minority of children not served by present unions, contemplate measures for the districting of the State for permanent supervision.

DRAWING AND MUSIC.

Under Tables XX, XXI and XXII will be found detailed statistics of educational activities which are not generally offered in all schools under special direction. Drawing and music are taught in the great majority of schools. They are usually taught by the class room teachers, most of whom have received training in normal or other schools for the teaching of these subjects. It will be observed, however, that the tendency increases to place these subjects, especially in the larger school systems, under the direction of persons specially trained in the several departments.

In drawing, a total of forty towns and cities employed four men and thirty-eight women supervisors on whole or part time, at a total expense of \$18,249. The supervisors employed numbered one less than the previous year, while the cost of instruction was greater by about six hundred dollars.

In music, whole or part time supervisors to the number of ninety-five were employed in eighty-seven different towns and cities. The number of special instructors increased over 1912-1913 by nine and the cost of instruction was greater by approximately nineteen hundred dollars. The total expense of this special supervision of music was, for the year ending July 1, 1914, \$31,373.

KINDERGARTENS.

The statistics relating to public kindergartens are illuminating. It appears that the first public kindergarten was established in Portland thirty-one years ago. That city had last year nine public kindergartens, with seventeen teachers and a pupil registration of 430. Biddeford, seven years later, established a kindergarten and since that time other similar action has been taken by Saco in 1894, by Bangor and Lewiston in 1898, by Augusta and Skowhegan in 1905 and by Winslow in 1913. The total number of kindergartens in the State last year was thirty with fifty teachers and a pupil registration of 1264.

Unfortunately the movement for the establishment of kindergartens has been retarded by an impression that institutions of this kind are unduly expensive. It is doubtful whether a close analysis of the figures would prove that there is justification for this impression. In any event the kindergarten has so fully justified its function of providing the most logical and natural method of covering that transition period from the home to the school, and as an agency for adjusting the child to his new social relationships, that its introduction into our school systems may well be more energetically urged.

TEACHERS' PENSIONS.

Few legislative acts of recent years have been the occasion of so widespread and, on the whole, so favorable comment as the act of the legislature of 1913 entitled: "An Act to Increase the Efficiency of the Public Schools of Maine by Retiring Teachers of Long Service with Pensions."

The passage of this act was the conclusion of a long continued discussion of the topic. As a result of the presentation of the subject at the meeting of the department of school superintendents of the Maine Teachers' Association held in Augusta, in 1911, on the motion of Superintendent A. J. Knowlton of Belfast the executive committee of the Association was authorized to appoint a special committee on teachers' pensions. It was to be the duty of the committee to make an investigation of the matter in other states and countries and to report, if

deemed expedient, by bill to the legislature. This special committee, later appointed, included Mr. F. G. Marshall of Augusta, Mr. Louis B. Farnham of Portland and Miss Adelaide V. Finch of Lewiston.

The special committee on pensions performed its duty with great care and diligently followed its report with a well planned campaign of publicity. The bill originally reported to the legislature by the committee on pensions was later revised under the suggestion of members of the legislative committee on education and other interested members of the legislature.

Among the more important changes was that which provides for a pension to teachers who had retired from active service prior to the adoption of the act. A clause of this kind has been included in few State pension acts and reflects credit on the attitude of the State towards an especially deserving class of persons. The bill proposed was received with unusual sympathy by members of the legislature and was passed with little opposition. In its final form the act is as follows:

SECTION 1. Any person of either sex who, on September thirtieth, nineteen hundred thirteen, or thereafter, shall have reached the age of sixty years and who for thirty-five years shall have been engaged in teaching as his principal occupation, and who shall have been employed as a teacher in the public schools, or in such other schools within this state as are supported wholly or at least three-fifths by state or town appropriation and are under public management and control, twenty years of which employment, including the fifteen years immediately preceding retirement, shall have been in this state, and who shall be retired by his employer or shall voluntarily retire from active service after completion of the school year next preceding the thirtieth day of September, nineteen hundred thirteen, shall, on his formal application, receive from the state for the remainder of his life an annual pension of two hundred and fifty dollars; provided, however, that after the thirtieth day of September, nineteen hundred thirteen, no such employment as teacher within this state shall be included in its provisions unless the teacher shall hold a state teachers' certificate issued under the authority of the state superintendent of public schools.

SECT. 2. Any person of either sex who, on September thirtieth, nineteen hundred thirteen, or thereafter, shall have reached the age of sixty years and who for thirty years shall have been engaged in teaching as his principal occupation and who shall have in all other respects met the requirements of section one of this act shall, on his formal application, receive from the state for the remainder of his life an annual pension of two hundred dollars.

SECT. 3. Any person of either sex, who, on September thirtieth, nineteen hundred thirteen, or thereafter, shall have reached the age of sixty years and who for twenty-five years shall have been engaged in teaching as his principal occupation and who shall have in all other respects met the requirements of section one of this act shall, on his formal application receive from the state for the remainder of his life an annual pension of one hundred and fifty dollars.

SECT. 4. Any person who otherwise meets the requirements of the preceding sections of this act, but shall have retired or shall have been retired prior to the school year next preceding the thirtieth day of September, nineteen hundred thirteen, shall be entitled to receive a pension under the provisions of this act except that the amount of the pension allowed to such person shall be one-half of any amount designated under the foregoing sections.

SECT. 5. For the purposes of this act the sum of eight thousand dollars is appropriated for the year nineteen hundred thirteen and the sum of twenty-five thousand dollars is annually appropriated thereafter, which sum the treasurer of state shall deduct for said purposes out of the school and mill fund and the sum so appropriated and deducted shall be denominated the school pension fund.

SECT. 6. The state superintendent of public schools on or before the thirtieth day of September, nineteen hundred thirteen, shall formulate rules and regulations for carrying into effect the provisions of this act.

SECT. 7. On or before the thirty-first day of December, nineteen hundred and thirteen, and quarterly thereafter, the state superintendent of public schools shall certify to the governor and council the names of the persons who are entitled to pensions under the provisions of this act and the amounts thereof, and the governor and council shall draw warrants on the treasurer of state for payments from the said school pension fund in favor of said persons for said amounts. The payment of any pension shall be suspended whenever the person to whom said pension has been granted resumes teaching in any private or public school.

SECT. 8. All pensions granted or payable under the provisions of this act shall be and are hereby made exempt from levy and sale by virtue of an execution and from all process and proceeding to enjoin and recover the same by or on behalf of any creditor or person having or asserting any claim against, or debt or liability of a teacher or pensioner.

SECT. 9. All of the said school pension fund not distributed or expended for any financial year, shall, on the first day of July next following, be added to the permanent school fund.

As soon as the new act became operative in July, 1913, the following rules and regulations governing applications were made:

1. Application for a teacher's pension shall be made on the blank prepared for such purpose and forwarded to the State Superintendent of Public Schools.
2. The applicant must state in full all the information indicated by the form.
3. All statements made by the applicant must be under oath.
4. To prove eligibility the statements of school authorities or town officials showing that the applicant was employed for the time specified as a teacher are required. In any case where town records have been destroyed or lost the statements of responsible citizens will be accepted. The applicant will be expected to forward teachers' certificates, copies of town records or reports, official correspondence or other documentary evidence to cover any period of teaching service for which pension claim is filed.
5. In counting years of service the period of a school year in any town or in several towns shall be counted as one year, but in no case will an applicant be given credit for extra service for any exceptional number of weeks within any period of twelve months.
6. Evidence relating to the state certification of the applicant as a teacher will be supplied from the official records of the State Department of Education.
7. A certificate of eligibility will be forwarded to the applicant upon the approval of his claim by the state superintendent of public schools.
8. Certificates for payment of pensions will be issued by the State Superintendent of Public Schools to the Governor and Council quarterly on or before the last days of December, March, June and September.

Forms for making application for pensions were arranged and sent on the request of those persons who believed themselves eligible to the benefits of the law. These were accompanied with suitable forms for affidavits covering teaching service and other essential details.

The examination of the claims presented by the applicants for pensions has involved the careful scrutiny of many records, certificates, and other material bearing upon the several claims. The detailed statistics of teachers' pensions to July 1, 1914, will be found in Table XXXIII. Thirty of the pensioners retired since the school year next preceding September 1, 1913, and were, therefore, entitled to receive full pensions on the basis of their terms of service. Twenty-six of these had served thirty-five years or more and hence were awarded the maximum pension of \$250; three of this class had served up to the thirty year limit and receive pensions of \$200; while one, on the twenty-five year basis, receives a pension of \$150.

Of those pensioners to whom the retroactive feature of the law applies fifty-five receive one-half the maximum pension; thirty-seven, on thirty years of service, receive one-half the medium pension; while twenty-nine, on twenty-five years of service, receive one-half the minimum amount. Three of the teachers who were awarded pensions died during the year. Hence, of the 151 pensions awarded 148 were in force on July 1, 1914.

The claim that the enactment of this pension act would increase the efficiency of the public schools has already been proven. Not only have teachers whose efficiency had become impaired been retired, but a burden of anxiety has been lifted from the lives of a great many teachers who have hitherto been oppressed by the knowledge that their meager wages were affording little or no opportunity for saving against approaching age. The cost of this act will be but a fraction of one per cent of the total expense for education, and will yield advantages that will directly or indirectly reach every school.

MEDICAL INSPECTION OF SCHOOLS.

The act of 1909 providing for the appointment of school physicians and for the giving of tests of vision and hearing forms the basis of the rapid progress that has since been made in the direction of the more careful oversight of health conditions in the schools.

During the first full year of the operation of the medical inspection act, there were employed forty-nine school physicians. Eighty-seven thousand children were given the eye and ear tests. Last year, with a better understanding of the law, examinations were more generally and effectively given. In this last examination, 114,529 children were given the eye and ear tests with the result that 11,980 were found to have defective vision, and 3,673 to have defective hearing. Forty-four were found who were totally blind.

Superintendents report that much difficulty is experienced in securing the attention of parents to the notices that are sent. The school examination is intended only to reveal gross defects and should be followed with examination by an expert

arts courses in their secondary schools. These figures represented a gain of eight cities and towns offering elementary courses and six offering secondary courses. Thirty-three teachers of manual training were employed in the public schools in 1913-1914 where twenty-five were employed in the preceding year.

Household arts courses were given for the year ending July 1, 1914, in the elementary schools of twenty-six cities and towns against twenty-one for the previous year, while nine high schools representing an increase of four schools offered courses in household arts. These figures reflect the results of the encouraging legislation of 1911 that was enacted with a view to increasing the attention paid in the public schools to the practical arts.

The total expense to the towns and State of these practical arts courses in the public schools was \$42,794. This expense amounting to less than one per cent of the cost of maintaining public common and secondary education should allay the fears of those who believe that the school courses are too seriously invaded by education of this type.

Evening schools were conducted last year under the provisions of the enactment of 1911 in fifteen different cities and towns at a total expense of \$17,572. The enrollment in these evening schools was 2,734. The extent of individual instruction offered in the evening schools is implied by the number of teaching positions which was 145. Additional to these phases of industrial education are the courses offered in academies and similar private schools. Eleven of these schools conducted courses in agriculture in 1913-1914, three had courses in mechanic arts and three had courses in domestic arts. Further statements regarding these courses appear elsewhere in this report.

APPENDIX

TABLE No. I.
COMMON SCHOOL STATISTICS.
Showing Attendance and Registration for Year Ending July 1, 1914.

ANDROSCOGGIN COUNTY.

TOWNS.	Number of persons in town between the ages of five and twenty-one years.		Number of different pupils registered in common schools from July 1, 1913 to July 1, 1914		Number previously registered during year in some other school in the town.	Number previously registered during year in some other towns or cities of the State.	Number not previously registered during year in any other school.	Number registered in rural schools.	Number registered in village schools.	Number registered in city schools.	Number conveyed at expense of town.	Aggregate attendance.	Average daily attendance for year.	Percentage of registration of all persons of school age.	Percentage of average attendance of pupils registered.	Average length in days of school year.	Number of days schools were maintained for year.	Number of compulsory school age attending private or parochial schools.	Number not of compulsory school age attending private or parochial schools.	Number of persons of compulsory school age not attending school regularly.	Number excused by school authorities from regular attendance.

TABLE No. VII.
COMMON SCHOOL STATISTICS.
Comparative Statement A-Annual.

**Showing Comparison of Certain Items in School Reports
of the Years 1913 and 1914.**

ITEMS.	1914.	1913.
Whole number of persons of school age	221,271	217,592
Number of different pupils registered in common schools	130,916	127,045
Number registered in rural schools	49,645	48,633
Number registered in village schools	47,595	47,128
Number registered in city schools	33,676	31,284
Number conveyed at expense of town	7,716	7,182
Average daily attendance for year	100,966	98,152
Average length in days of school year	166	164
Number of persons of compulsory school age not attending school regularly	2,510	2,614
Number excused by school authorities from regular attendance	1,225	1,292
Number of different males employed as teachers in common schools	484	503
Number of different females employed as teachers in common schools	5,876	6,435
Number continued in the same school for the entire year ..	3,288	2,664
Number having had previous experience	5,384	5,962
Number who are graduates of normal or training schools ..	2,128	2,074
Number holding state certificates	3,985	2,305
Number who attended teachers' meetings	4,038	4,329
Number attending summer schools	443	482
Average wages of male teachers per month	\$54 16	\$55 12
Average wages of female teachers per week	\$10 47	\$10 06
Number of common schools in State	4,634	4,582
Number of one room, rural or suburban	2,396	2,392
Number of rural schools in buildings of more than one room	134	156
Number located in villages	1,293	1,251
Number located in cities	811	783
Number of graded schools	3,252	2,982
Number not using a course of study	670	827
Number having branches of the S. I. L. M.	632	650
Number having libraries	1,191	1,036
Number of public school buildings in the State	3,923	3,777
Number of new school buildings during year	44	42
Cost of same	\$850,728	\$348,322
Estimated value of all school property	\$9,492,836	\$8,878,397
Number of schoolhouses in good condition	3,021	3,127
Number supplied with flags	2,902	2,883
Amount common school money available, from town treasuries	\$810,485	\$801,135
Amount available from state treasury	\$1,532,581	\$1,474,449
Amount available from local funds	\$60,356	\$53,238
Total amount available, common school purposes exclusively	\$2,403,422	\$2,328,822
Total expenditures for common school purposes exclusively	\$2,264,288	\$2,137,842

TABLE No. VIII.
COMMON SCHOOL STATISTICS.
Comparative Statement—B-Decennial.
Showing Comparison of Certain Items in School Reports
of the Years 1904 and 1914.

ITEMS.	1914.	1904.
Whole number of persons of school age.....	221,271	206,214
Number of different pupils registered in common schools....	130,916	131,496
Number registered in rural schools.....	49,845	56,324
Number registered in village schools.....	47,595	41,531
Number registered in city schools.....	33,676	33,641

TABLE No. XIX.
SECONDARY SCHOOLS—Comparative Statement.
Showing Comparison of Certain Items of Secondary School
Statistics of the Years 1913 and 1914.
HIGH SCHOOLS.

ITEMS.	1914.	1913.
Number of free high schools receiving state aid	189	185
Number of towns maintaining free high schools	185	178
Number of different pupils registered	13,704	12,899
Average attendance	12,090	11,211
Number of weeks schools were maintained	6,562	6,385
Number of resident pupils	12,261	11,620
Number of non-resident pupils	1,443	1,279
Number of different persons employed as teachers, males	259	250
Number of different persons employed as teachers, females	452	420
Average wages of male teachers per month	\$107 72	\$104 68
Average wages of female teachers per week	\$15 44	\$14 98
Amount available for high school purposes for fiscal year	\$530,259	\$505,071
Amount expended for instruction for fiscal year	\$445,531	\$420,784

CONTRACT TOWNS.

Number of towns contracting with academies	35	34
Number of different pupils registered	1,805	1,695
Average attendance	1,579	1,493
Amount available for secondary school purposes for fiscal year	\$57,808	\$52,442
Amount expended for instruction for fiscal year	\$52,898	\$49,853

ACADEMIES.

Number reporting	49	50
Number of different pupils registered	4,205	4,287
Average attendance	3,731	3,681
Average number pursuing secondary school studies	3,601	3,743
Number of weeks schools were maintained	1,784½	1,783
Number of different persons employed as teachers, males	103	111
Number of different persons employed as teachers, females	156	178
Average wages of male teachers per month	\$115 73	\$109 93
Average wages of female teachers per week	\$4 64	\$12 97
Amount of permanent assets	\$3,277,009	\$2,968,148
Amount of current income	\$332,349	\$290,411
Amount expended for instruction	\$167,163	\$164,216
Amount expended for all purposes	\$320,076	\$293,086

PAYMENTS FOR TUITION MADE BY TOWNS NOT MAINTAINING STANDARD SECONDARY SCHOOL COURSES.

Number of towns reporting	187	157
Number of pupils for whom tuition was paid	1,609	1,469
Amount expended for tuition	\$40,786	\$36,525

CLASSIFICATION OF SCHOOLS.

Number of high schools and academies approved in Class A	188	182
Number of high schools and academies approved in Class B	21	21
Number of high schools approved in Class C	30	30
Number of high schools classification undetermined	2	2

Summary of Statistics, Unorganized Townships.

I. NUMBER, SCHOOL POPULATION, ETC., OF TOWNSHIPS.

Number of townships for which school privileges were provided.....	73
Number of persons between five and twenty-one years of age, April 1, 1913.....	891
Number of persons between five and twenty-one years of age, April 1, 1914..	832
Number of townships in which schools were maintained.....	49
Number from which children were schooled outside the township.....	24
Number of schools maintained within the township.....	60

II. SCHOOL ENROLLMENT AND ATTENDANCE.

Number of different pupils registered from all townships in elementary schools	767
Number of different pupils registered in all schools maintained within the township.....	708
Number of different pupils attending elementary schools in outside towns..	59
Number attending secondary schools.....	17
Aggregate attendance in schools within the townships.....	65,859
Average daily attendance in schools within the townships.....	478
Average length in days of the school year.....	138

III. TEACHERS.

Number of teaching positions.....	60
Number of different teachers employed.....	88
Number having previous experience.....	74
Average weekly wages, including board.....	\$8 98

IV. SPECIAL SCHOOL CONDITIONS.

Number of pupils not absent one-half day.....	379
Number of cases of tardiness.....	1,454
Number of citizens visiting schools.....	693

V. FISCAL.

Amount paid for wages and board of teachers.....	\$15,395 43
Amount paid for transportation of pupils.....	1,061 62
Amount paid for board and tuition of pupils.....	3,216 70
Amount paid for fuel and janitor.....	979 05
Amount paid for books and supplies.....	1,459 70
Amount paid agents for services and expenses.....	2,043 27
Total.....	\$24,155 77
