STATE OF MAINE.

EDUCATIONAL DEPARTMENT.

AUGUSTA, December 30, 1915.

*To the Governor, Oakley C. Curtis, and the
Honorable Executive Council:*

GENTLEMEN:—In accordance with the requirements of chapter 7 of the Resolves of 1895, I respectfully submit the following report of the condition, progress and needs of the public schools of Maine.

Very respectfully,

Your obedient servant,

PAYSON SMITH,

State Superintendent of Public Schools.

CONTENTS.

I. OF THE REPORT.

CHAPTER I.

Report of Schools.

Summary of all public appropriations and expenditures for current expenses of schools for fiscal years terminating within the twelve months ending July 1, 1915.

	PAGE
Resources	1- 4
Expenditures	4- 7

CHAPTER II.

Common Schools.

Number and Registration of Pupils	8
Attendance and Length of Year	9- 10
The Teaching Force	10- 11
Schools and School Buildings	11- 12
Financial Support	12- 13
Schools in Unorganized Townships	13- 16

CHAPTER III.

Secondary Schools.

General survey	17- 23
Courses of Study in Small Schools	23- 26
Certain Problems	26
(a) Training in Citizenship	27- 28
(b) The School Library	28- 29
(c) Extension of Industrial Education	29- 32
(d) Academies	32- 35
School Activities	36
(a) Extension Courses	36- 37
(b) High School Music	37- 38
(c) Graduation Programs	38- 40

CHAPTER I.

REPORT OF SCHOOLS.

SUMMARY OF ALL PUBLIC APPROPRIATIONS AND EXPENDITURES FOR CURRENT EXPENSES OF SCHOOLS FOR FISCAL YEARS TERMINATING WITHIN THE TWELVE MONTHS ENDING JULY 1, 1915.

RESOURCES.

I. Amounts available from towns (for fiscal year 1914-15)	
Raised for common schools..	\$720,125 00
Unexpended balances for common schools..	140,482 00
From local funds for common schools	53,664 00
	<hr/>
	\$914,271 00
For school superintendence..	86,777 00
For school committee expenses	12,818 00
For free text books	132,132 00
For repairs, apparatus and appliances	245,212 00
For manual training and domestic science	23,069 66
For evening schools	9,839 89
For secondary education (direct support, contracts, tuition and conveyance)..	554,729 84
For miscellaneous expenses (compulsory education, medical inspection, rent, etc.)	20,023 00
	<hr/>
	\$1,998,872 39

For interest on funds	\$590 00
For support of state normal schools and training school	90,000 00
For insurance, normal school buildings	1,800 00
For expenses of trustees of state normal schools	1,500 00
For aid to academies	24,000 00
For support of the University of Maine:	
For general support	122,500 00
For animal husbandry	5,000 00
For conducting scientific investigations	5,000 00
For cooperative agriculture	4,389 00
For expenses of trustees of University of Maine	400 00
For support of Maine Industrial School for Girls	28,500 00
For support of Maine Industrial School for Girls from interest on funds on deposit in State Treasury	540 96
For support of State School for Boys	38,000 00
For State School for Boys Sanford Legacy	42 00
For expenses of trustees of Juvenile Institutions	1,000 00
For support of Maine School for Deaf	28,000 00
For education of the blind	8,000 00
	<hr/>
	\$461,322 89

IV. Amounts available from State for State administration purposes (annual appropriation, 1915)

For salaries and expenses of state superintendent of schools and office assistants	\$8,850 00
For high school inspection	2,200 00

PUBLIC SCHOOLS.

For supervision of schools of unorganized townships ...	\$2,200 00	
For distribution of Equaliza- tion Fund	2,000 00	
For printing, postage and office expenses	6,500 00	
For state c e r t i f i c a t i o n of teachers	1,000 00	
For Rhodes scholarship	100 00	
For plans for school buildings	200 00	
	<hr/>	\$23,050 00
Total amount available from public funds and appropriations for current expenses of schools		\$4,222,992 06

EXPENDITURES.

I. For activities supported wholly by amounts appropriated by towns (fiscal year 1914-15)		
For school committee expenses	\$12,053 00	
For free text books	135,422 00	
For miscellaneous e x p e n s e s (compulsory education, medical inspection, rent, etc.)	20,243 00	
	<hr/>	\$167,718 00
II. For activities supported jointly by amounts appropriated by towns and State.		
For common schools (fiscal year 1914-15)	\$2,326,795 00	
For repairs, a p- paratus and ap- pliances (fiscal year 1914-15)	266,835 00	
For school superintendence:		
By towns (fis- cal year 1914-15) ...	\$87,161 00	
By State (year ending July 1, 1915) ...	70,429 84	
	<hr/>	\$157,590 84

For secondary education :

Direct support (fiscal year 1914-15) .	\$533,481 00	
Contracts (fiscal year 1914-15) ..	57,481 00	
Tuition (year ending July 1, 1915) .	39,171 97	
Conveyance (fiscal year 1914-15) ..	8,580 00	
	<hr/>	\$638,713 97
For manual training and do- mestic science (industrial education) (fiscal year 1914-15)		51,714 00
For evening schools (indus- trial education) (fiscal year 1914-15)		17,585 00
	<hr/>	\$3,459,233 81

III. For activities wholly supported or aided by amounts appro-
priated by State (year ending July 1, 1915).

For industrial courses in state normal schools	\$5,032 33	
For industrial courses in academies ...	5,079 53	
	<hr/>	\$10,111 86
For schools in unorganized townships		23,473 99
For summer schools for teachers		2,221 41
For teachers' meetings		835 95
For teachers' pensions		21,462 71
For payment of interest on funds		590 00

PUBLIC SCHOOLS.

For support of state normal schools and training school	\$87,662 98
For insurance of normal school buildings	768 00
For expenses of normal school trustees	1,428 09
For aid to academies	21,750 00
For support of the University of Maine:	
For general support	\$122,500 00
For animal husbandry ..	5,000 00
For conducting scientific investigation	5,000 00
For cooperative agriculture	2,194 50
For reports and bulletins	529 88
	<hr/>
	\$135,224 38
For expenses of trustees of University of Maine	152 63
For support of Maine Industrial School for Girls	30,786 95
For support of State School for Boys	41,938 28
For expenses of trustees of Juvenile institutions	1,000 00
For support of Maine School for Deaf	28,726 98
For education of the blind	5,129 12
	<hr/>
	\$413,263 33
IV. For State administration purposes from amounts appropriated by State (year ending July 1, 1915).	
For salaries and expenses of state superintendent of schools and office assistants	\$7,800 38
For high school inspection..	2,036 93

High School Building, Brunswick. Erected 1915.

For supervision of schools in unorganized townships	\$1,485 62	
For distribution of Equaliza- tion Fund	1,164 31	
For printing, postage and of- fice expenses	4,149 44	
For state certification of teachers	751 33	
For Rhodes scholarships ...	—	
For plans for school build- ings	2 50	
	<hr/>	\$17,390 51

Total expenditures from public funds and ap-
propriations for current school expenses..\$4,057,605 65

CHAPTER II.

COMMON SCHOOLS.

Returns for the school year ending July 1, 1915 have been made by the municipal and school officers of the several cities, towns and plantations of the state as required by law. Statistics taken from these reports have been compiled and appear in Tables I to VIII, which form a part of this report.

NUMBER AND REGISTRATION OF PUPILS.

The number of persons between the ages of five and twenty-one years, as shown by the school census for April 1, 1915, was 225,013 of whom 113,438 were boys and 111,575 were girls. This shows a gain of 3,742 since April 1, 1914 and a gain for the ten year period since April 1, 1905 of 17,729. The increase thus indicated over the number for 1914 is approximately the same as that for the preceding year, while it is more than double the average for the ten year period.

The number of different pupils registered in the common schools from July 1, 1914 to July 1, 1915 was 133,036. This is an increase of 2,120 over the figures for the preceding year and maintains the proportion in relation to the gain in school population. In 1905 there were 132,448 different pupils registered in the common schools which would apparently indicate that during the ten year period the relative increase in the number of pupils registered is very small in comparison with the gain in the number of persons of school age. In this connection, however, it must be remembered that a considerable part of this difference may be accounted for by the variation in the manner of recording school registration.

The number of pupils conveyed at the expense of towns was 7,910, a slight increase over the number conveyed for the preceding year, but sufficient in connection with figures covering a period of years to indicate the continued dependence upon this method of furnishing children with school privileges outside the immediate neighborhood in which they live.

ATTENDANCE AND LENGTH OF YEAR.

A considerable number of persons of compulsory school age are reported as not attending school regularly. Since, however, the number reported for the year 1914 was 2,510, while the number for 1915 was 1,764, it is gratifying to note the marked decrease thus indicated, which amounts to nearly 30 per cent. Of the total number, 910 are reported as having been excused from regular attendance by school authorities leaving 854 who apparently were absent from school without reasonable excuse. While it is manifestly impossible to reach a point at which the failure of towns to enforce the compulsory education law will no longer be a factor in the statistics of school attendance, a very determined effort on the part of school officials in those towns in which the delinquency is most marked would reduce the number to a very appreciable extent.

While the increase in the average length of the school year may serve to mitigate the evil effects of irregular attendance upon the individual pupil, yet the effect on the school organization as a whole should not be underestimated. A pupil who is not in regular attendance must necessarily interfere seriously with the class organization of which he forms a part so that other pupils must suffer from the disturbance which his absence and subsequent return occasions.

For the first time in several years there is noted no gain in the number of days during the year for which schools were maintained. It must be remembered, however, that since 1905 the average length of days for the school year has increased from 139 to 166, or considerably more than five school weeks. The number of weeks for which schools are maintained in any town is rarely above thirty-six, or 180 school days, including holidays and days during which schools are not in session for other reasons. It is evident therefore, that the very considerable number of towns and cities which now report thirty-six weeks as the length of the school year cannot be expected to contribute to a further gain in the average length of the year for the state as a whole. Nearly all the gain must come from those towns which now maintain schools for less than the average for all the towns and cities of the state. The law passed by the 1915 legislature, fixing thirty weeks as the minimum requirement for the

school year, affects those towns to an extent which must result in a decided rise in the average number of days for which schools are maintained.

THE TEACHING FORCE.

The tendency toward permanency in the teaching force is further emphasized by figures which show a reduction in the number of different persons employed as teachers during the school year. This is also indicated by the increase in the number of teachers continued in the same school for the entire year from 3,288 in 1914 to 3,427 in 1915. The number continued in the same school for the year was 54 per cent of the total number of different persons employed. Of this total of 6,273 teachers 5,349 are reported as having had previous experience. While this number is 35 less than for the preceding year, yet the percentage is higher on account of the decrease in the total number of teachers.

An increase of 2 per cent is shown in the number of graduates of normal or training schools employed as teachers during the year, the number in 1915 being 2,245 as against 2,128 for the preceding year.

A comparison of figures covering the above items for the ten year period serves to show most satisfactory progress. Especially is this true with relation to the percentage of teachers who are graduates of normal or training schools. The number reported in 1905 was 1,613. Such a gain furnishes a most gratifying basis upon which to judge the continued progress of the school system of the state from a professional point of view.

In 1914 the average wages of male teachers per month was \$54.16. The average reported for 1915 is \$53.04, while the average wages of female teachers per week for 1914 was \$10.47, and for 1915, \$10.77. A slight decrease is therefore, noted in the average wages of male teachers. At the same time an approximately equal increase is shown in the wages of female teachers. Since the total number of the latter is very much in excess of the former the net change shows a gain. While the progress in reaching a satisfactory standard of wages for teachers is not such as to guarantee the future place of the state in the position which it ought to occupy, yet the fact that

High and Grade School Building, Winslow. Erected 1915.

there continues to be even a small increase in the average from year to year shows that towns are not assuming a wholly reactionary attitude on the subject.

Out of the total of 6,273 teachers employed during the year 4,203 are reported as having attended teachers' meetings. That this number should have taken advantage of the opportunity offered them to come in touch with the broadening influences arising from contact with other teachers and other administrative officers outside the particular systems in which they are employed is a point for commendation. One point in this connection seems, however, to be worthy of special mention. During the year for which these figures are compiled the meeting of the Maine Teachers' Association in Portland showed a total registration of 3,964 or only 239 less than the total number reported as having attended any teachers' meetings. It is to be remembered of course that a certain small percentage of those registered at this state teachers' meeting are not employed as active teachers. Even with this reservation, however, the inference is strong that since the total number of teachers who attended teachers' meetings during the year is only slightly in excess of the number registered at the meeting of the state association there must have been comparatively few taking advantage of the county meetings who were not in attendance at the state convention. In other words, a very large proportion of those teachers who did not attend the state meeting remained away from the county meetings also. Such a condition serves to emphasize the necessity of a larger number of teachers' institutes of more local character in order that a greater number of those teachers who are not under present conditions reached by the larger meeting shall be brought within the influence of some professional stimulus.

In another part of this report appears a discussion of the state certification of teachers which covers the first year of the operation of the law passed by the legislature of 1913.

SCHOOLS AND SCHOOL BUILDINGS.

School buildings of one room were in use during the year 1915 to the number of 2,358 or thirty-eight fewer than during the preceding year, while the number of rural school buildings of

more than one room increased from 134 to 169. Schools located in villages increased from 1,293 to 1,315, while those in the cities were 811 in 1914 and 821 in 1915. The total number of common schools reported is 4,663. These figures while showing a gain in the total number of common schools also indicate the tendency toward abolishing schools which are held in one room buildings in rural communities with the consequent conveyance of pupils from those communities to others which are more thickly settled. This movement is further accentuated by the increase of 117 in the number of schools to which conveyance is provided. Grade schools show an increase from 3,252 to 3,415.

The number of schools not using a course of study is further reduced from 670 to 613. In 1905 there were reported 2,002 schools not using a course of study. It is apparent therefore, that towns have voluntarily accepted to a very great degree the judgment of school administrators who hold that school work to be most effective must follow a well defined plan. Such voluntary acceptance of this principle assures the cooperation of almost all towns in carrying out the act of the 1915 legislature making compulsory the use either of the course of study prescribed by the state or of one which has received state approval.

Coordinate with the increased number of common schools comes a decrease of 195 in the number of school buildings in which schools were maintained. The number of these reported in good condition was 3,082 which still leaves 646 which superintendents do not consider in a proper state of repair. The decrease of 61 in the number of such buildings, however, taken in connection with the decrease in the total number is highly encouraging.

FINANCIAL SUPPORT.

Table VI of the Appendix shows in detail the receipts and expenditures reported for the fiscal year of the several towns, cities and plantations. The amount available from town treasurers was \$860,607, an increase of \$49,122 over the amount available for the preceding year, while the amount available from state school funds was very slightly less. In comparing these figures for the ten year period it appears that a very

much greater total sum was placed at the disposal of local school authorities in 1915 than that similarly placed in 1905. While the amount available from local taxation in 1905 was \$984,856, which is \$124,249 more than was available from the same source in 1915, yet the amount available from state school funds in 1905 was only \$567,192 as compared with \$1,531,163 in 1915. The total school revenue from both sources in 1905 was \$1,552,048, while the total amount for 1915 was \$2,098,355, a difference of \$546,307, the average increase being \$54,630 per year. In addition to these amounts there was available from local sources other than taxation \$53,664 in 1915 as compared with \$45,608 in 1905.

SCHOOLS IN UNORGANIZED TOWNSHIPS.

The department for the schooling of children in the unorganized townships furnishes problems and difficulties in school administration unlike those found in any other school administrative unit in the State and probably in the Union.

The widely scattered location of the many unorganized townships in which educational privileges are provided, the most remote in the different sections of the State being hundreds of miles apart, and the difficulties of travel in making frequent visits to these places make it impracticable to exercise supervision over these schools in the same manner which is possible and by established custom demanded in most units of school administration where any attempt is made for professional supervision. And again the long distance of most of these places from the administrative office together with the fact that not a few are remote from regular mail routes furnishes new and novel problems in the business administration of school affairs.

However, with all of the problems peculiar to this distinctive type of schools, it has been found possible to find means and methods for the administration of their affairs, both of a business and professional nature, in such a manner as to insure their success in furnishing commendable educational privileges to practically the entire school population of the unorganized territory of the State.

The history of this special branch of educational work since undertaken by the State shows a gradual increase in its efficiency and a constant broadening in the scope of its benefits and activi-

ties, while a still greater advancement remains to be attained through a continued improvement in administration, new legislation, and through the active co-operation of the other factors essential to its success.

During the past year school privileges have been provided under the direction of this department for the children living at the numerous light stations which are scattered along the coast of the State. The rugged and irregular coast line of Maine has made necessary the location of many of these light stations at remote and isolated places and usually without regular communication with the mainland. In many cases light keepers bring their families to live at these stations and the problem of educating their children has been for many years a difficult one to solve.

The idea of employing a traveling teacher for the benefit of these children has been considered for some time and was put into active operation during the early part of the summer of 1915. While it was at first in the nature of an educational experiment, the plan has proved to be practicable and successful and bids fair to be a permanent solution of the problem. A teacher, known as "The Lighthouse Teacher," is employed who makes visits to each light station and remains from several days to a week at a time. She gives the pupils regular instruction during her visit and upon her departure leaves an outline of work for the pupils until she comes again. During her absence the pupils are taught by the parents or some other person living at the station; upon her return visit the pupils' work is reviewed, the pupils taught by her for another period and directions left as before at the close of her visit for continuing the instruction and study.

The parents at the light stations have received the plan very favorably and cooperated actively with the teacher in carrying out all the details of the work. While it has not been found practicable or desirable to teach the pupils wholly by the usual method of formal instruction it has been found possible to adapt the usual course of elementary school work for these pupils and their progress in the various subjects has been most encouraging.

Most of the light stations are out of the usual routes of travel and it is often necessary for the teacher to reach these places

Some of the Children at the Light Stations.

by going for some distance in a small boat. The usual hardships of this mode of travel are experienced in unfavorable weather and especially during the stormy season of the year but nevertheless the teacher is able to follow a schedule of visits with sufficient regularity to carry on the work successfully. The light stations at present included in the teacher's list extend from York to Machias and are as follows: Boon Island, Seguin Island, Ram Island, Franklin Island, Matinicus Rock, Egg Rock, Petit Manan, Nash Island, Libby Island, and Avery Rock.

By reference to the statistical reports for the unorganized townships for the past year and the year immediately preceding, interesting facts and comparisons are shown. School privileges have been provided in one less township the past year, while there has been a considerable increase in the school population of this unorganized territory. There has been a decrease of two in the number of townships where schools have been maintained and a decrease of five in the total number of schools. On the other hand, there has been a considerable increase in the enrollment during the past year, which indicates an increase in the average number of pupils per school, this average for the past year being 13.4. At this point it is of interest to note the large percentage of the school population of the unorganized townships which is enrolled in the schools. For the school year of 1914-15 this was 89 per cent as compared with an average of 59 per cent for the towns and cities of the State. The percentage of average attendance as compared with enrollment, however, fails to show such a high average. This average of 65 per cent will seem low to those not understanding the situation, and while no doubt it should and can be considerably raised the conditions surrounding these schools will never be favorable to high attendance records.

This year's report shows a slight increase in the school year, but the average for all the schools in the unorganized townships appears to be low in comparison with the average for the town and city schools of the State. However, a careful study of the statistics will show that the average length of the school year where schools have been regularly maintained is considerably higher than the general average shown, as the average for the unorganized township schools as a whole is lowered on

account of that considerable number of schools which each year are closed, re-opened or newly established, and consequently are in session from a few to many weeks less than they would have been if regularly maintained.

The number of teachers employed shows a slight decrease from 1913-14 while the percentage of permanency remains about the same. A comparison on this latter point over a space of a few years, however, might give a wrong impression as to any improvement in this direction, the number of schools irregularly maintained largely affecting these statistics as in the case of the average school year. It will be seen that the number of experienced and trained teachers employed has been large, and there seems no reason why this favorable condition cannot be continued or even improved upon.

The fiscal statistics show a considerable variation in the different items of expenditure, but the total expenditure is about the same as that of the preceding year, approximately \$25,000.

CHAPTER III.

SECONDARY SCHOOLS.

The great number of young people who are seeking the opportunities offered by the high school has practically forced upon the school authorities two very serious problems. The first is purely physical and concerns housing, teaching staff and ordinary equipment. The second involves the kind of opportunity which the school may offer, the courses and subjects. These new conditions have been met with the characteristic energy of the American people. The result is a new educational institution—the modern high school. This school reaches out to all the youth of the community because it affords them a means of fitting themselves for life tasks. It is rapidly becoming an efficient school for it is sending out competent young men and women who have in a measure found themselves and can do things effectively. As compared with the elementary it is a costly school. The expense of housing has greatly increased and the effort to meet the educational needs of young people has added greatly to the outlay for secondary education. The strong reaction from academic or book education to that which deals more directly with everyday life has made necessary laboratories and work shops and the cost of their installation has been considerable.

The cost is increasing. In relation to the high schools of the State the cost and worth will be considered. If the cost is increasing as it will appear, then the worth of the schools to the commonwealth must be demonstrated or the system may be rightly open to criticism. In the following paragraphs the increasing cost will be studied in the light of the service rendered and the growth of the schools.

In estimating the cost of maintaining the high schools of the state the amount paid for instruction is the largest constant factor. This has risen from \$353,540 in 1910 to \$470,461 in 1915, yet the average cost per pupil has only advanced from \$31.58 to \$32.11 in the same period. During this period eleven

buildings for high school purposes costing approximately \$742,000 and twenty-two combination high school and grade buildings costing \$280,000 have been erected. Of the latter item at least one-fourth of the cost properly may be charged to the high school account. The general running expenses also show a steady increase.

Worth shown by growth. If the cost of maintenance is increasing the schools are or are not proving their worth. This may be measured in part by growth and service. If they are attracting more young people, if they are holding them longer, they are proving their worth by growth. If they are offering a wider range of subjects and courses they may be deemed to be proving their worth by service. The statistics furnish the following information.

In 1911, the first year for which the data are available, the enrollment in the first year classes of the high schools was 4,254. The first year class for 1914-15 was 5,266, a gain of 23 per cent. The total school population of the state during the same period increased 4.7 per cent showing that the growth of the high schools is clearly due to larger numbers who are entering the schools.

Again, the fourth year class for the current year was larger by 25 per cent than that of 1911, and in spite of the large increase in the total school enrollment, nearly 25 per cent, this class was 16.4 per cent of the total as compared with 16.6 per cent shown by the fourth year in 1911. Further a comparison of the gain made by the fourth year classes to that made in total enrollment from 1911 to 1915 shows that the increase except for one year was equal to or exceeded that of the schools as a whole. While such figures are not conclusive, it would appear that more pupils are staying on through the four years and thus deriving the fullest benefit from the high school course.

But are our high schools as effective in this particular as those of other states? The United States Commissioner's Report for 1914, the latest available data, shows a gain in permanence of high school scholars, the percentage of fourth year to the total number of students being 11.68 in 1911 and 13.84 in

1914. Maine is considerably in advance of the nation as a whole in this respect. The Commissioner's Report shows that only five states have a higher percentage of students in the fourth year class than does Maine.

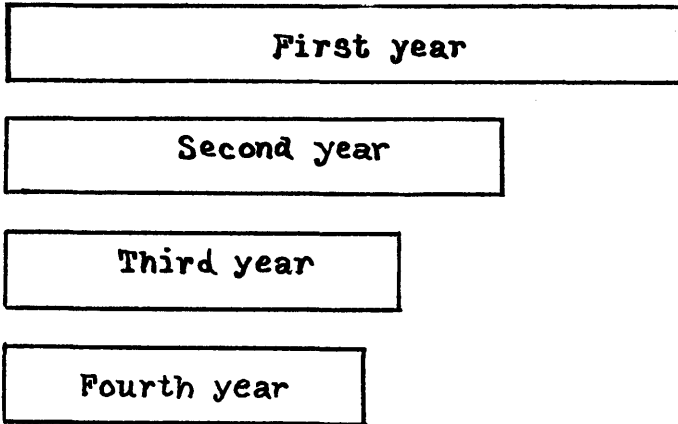

Figure showing change in enrollment of the class of 1915 in high schools for the four years of high school life.

On the other hand, there is much to be done in the matter of prolonging high school life if nearly one-half of those entering leave school before the completion of the course. The chart showing the school life of the class entering in 1911 is suggestive on this point. It should be a matter of serious concern to school authorities, teachers and the community at large when a boy or a girl leaves the high school before the completion of the four years' course.

Worth shown by the service rendered. Another factor in determining the worth of the school is the number of pupils who continue their education beyond the high school. Only the statistics of the classes entering the Maine Normal schools and colleges are available. The information shows that the number who have entered has risen in the normal schools from 282 to 334 since 1912, a very appreciable gain in the face of the great demand for teachers who have had at least high

school training. For the colleges the figures are even more significant. Since 1912 when complete data were first available the number of students entering Maine colleges from the standard high schools has risen from 443 to 544. It is evident that the schools are stimulating more and more students to continue their education in higher institutions.

The service which the schools are rendering must also be measured by the courses and subjects offered. If a greater number of courses are offered by the schools of the state or if these show an increase in the enrollment, it may be taken as evidence that the schools are endeavoring to provide a more varied training for those who may attend.

A study shows that in 1910 one hundred and twenty standard high schools were offering 241 different courses, or more properly curricula, including English, college preparatory, commercial, agriculture, mechanic and domestic arts. In 1914-15 one hundred and forty-six class A high schools were offering 368 of the curricula mentioned. It will be seen that not only through the establishment of new schools but in a very great degree by the introduction of new curricula the opportunities have been extended.

While not closely related to the discussion, it may not be out of place to consider at this point the changing trend of educational interests as shown in the number of pupils studying certain subjects. The data show only registration in subject groups like science, mathematics. Hence general tendencies rather than the gain or loss in any particular subject like physics may be traced. The following table will, however, be of interest.

Showing the number of pupils studying various subjects and the per cent of the total enrollment for the years ending July 1, 1910 and 1915. This table includes only the statistics for the high schools.

Subject.	Number of pupils.	Per cent of total.	Number of pupils.	Per cent of total.
English	11,305	.96	14,267	.97
Mathematics	9,987	.87	11,289	.77
History	6,568	.56	7,246	.49
Science	4,208	.35	6,997	.48
French	4,603	.39	5,940	.40
German	798	.06	802	.05
Latin	5,012	.42	4,814	.32
Greek	152	.01	35	.002
Music	4,474	.38	5,897	.40
Commercial*	1,233	.10	2,997	.20
Mechanic Arts ..	114†	.009	369	.025
Domestic Arts ...	102†	.009	463	.03
Agriculture	28†	.002	82	.006

The effort which the State as a whole is making to improve the high schools is very commendable. The appeal which these schools are making to the young people encourages larger outlay of money and effort. The influence in the commonwealth of this ambitious, educated, well trained body of young citizens entering year by year into active life is of great significance. The future of the state will be moulded in large measure by the influence of the high school upon its students.

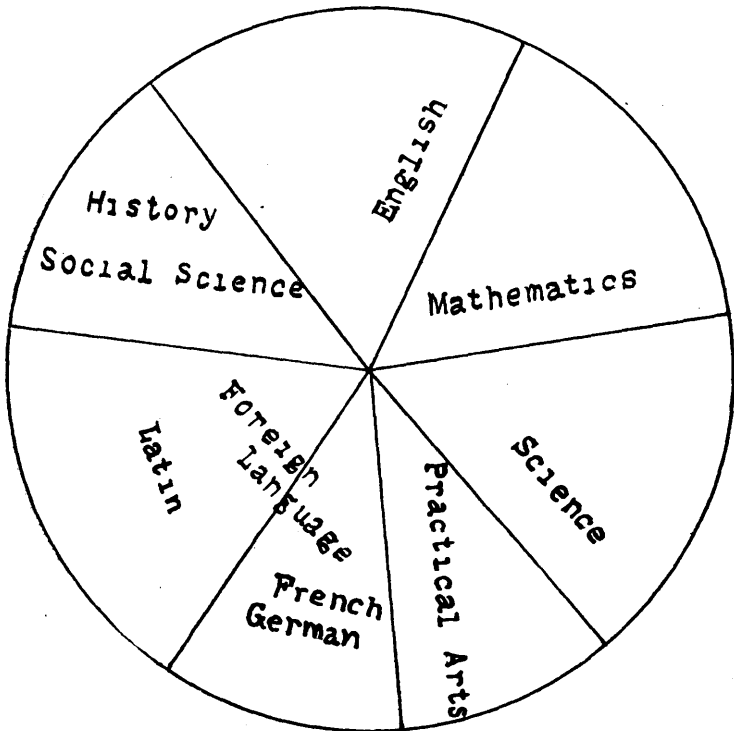

COURSES OF STUDY IN SMALL SCHOOLS.

The increase in enrollment in high schools throughout the country has tended to broaden the curricula of the schools, owing to the greater variety of needs represented by those who attend. In the larger schools of the state considerable effort has been made to adjust courses to serve better the interests of the students. The courses introduced are related to certain phases of vocational training. Thus far the commercial course is the most generally adopted. The diagram on a following page indicates the relative attention which this course is commanding. A study of the figure will show how large a place

*The commercial course.

†Figures for 1912. The first year in which the Industrial Education Act was effective.

the college preparatory and English courses continue to occupy. The practical arts work, namely, agriculture, household arts and mechanic arts, holds a very insignificant place. When the study is carried further and the programs of studies of the smaller high schools are considered, the absence of work of vocational nature is still more conspicuous.

Showing the relative time given to various subjects of the course of study of 64 two teacher high schools.

In order to determine the relative emphasis given to different subjects of the program the courses of study of sixty-four two-teacher high schools were tabulated. Each subject was measured by a unit of value. A subject offered one period per week for one year was taken as the unit. Thus if English was given five periods per week for four years it was counted as twenty units. On this basis it was found that the courses provided a total number of units varying from 98 to 137 units

per school, the average being 103.5. The relative importance of different subjects is shown by the average number of units assigned to each. English was offered an average of 18.5 units or slightly less than five periods per week for the four years. Mathematics including arithmetic review, algebra, geometry and reviews had 16.4 units. Science comprising physical geography, physics, botany and the like had 17 units. History together with civics, economics, commercial geography and similar subjects averaged 13.4 units. Foreign languages, Latin, French and German were assigned 30.4 units. Practical arts comprising commercial subjects and other work of a similar nature averaged 10.8 units.

The accompanying diagram based on this study shows graphically the relative proportion of time and effort given to each group of subjects.

The prominence of foreign languages is particularly noticeable. While the actual teaching program for any one year would probably not call for the full amount specified in the course of study, yet the place which foreign languages occupy in the thought of those who arrange the work for the schools is very strikingly shown. In a lesser degree formal mathematics stands out sharply. It may also be said that a large part of the science and history is organized in a formal rather than a practical manner for the purpose primarily of meeting college entrance requirements. On the other hand courses of a distinctly vocational type popularly described as "practical" have a very small space in the composite program. If the work of this nature offered in five of these schools which have undertaken rather extensive commercial, agriculture or household arts courses were omitted the work directly vocational in character would be small indeed.

This study would indicate the need of a more rational program of work for the smaller schools. In arranging a program of studies for these schools two things may be done: the subject matter and aims may be modified while the subjects themselves are retained or special subjects may be introduced. In either case in attempting such a program some traditions may have to be sacrificed and a few pupils denied the privilege of studying certain subjects.

There are at least three factors in such a program which may be made use of at once in any of the schools. First, every opportunity for relating the work of the school to the home interests of the children should be utilized. Second, each subject of the curriculum should have a direct, immediate and tangible influence in the development of the pupil; that is, if geometry is taught it must be for its effect on the growth of the pupil rather than for its value as a preparation for advanced mathematics in college. Third, the interests of the many who will not go to college should not be sacrificed because of demands which the colleges make upon the few who may enter. When the community attaches as much importance to the service the school has rendered those who remain at home as those who go to college, the last condition will be speedily adjusted. Thus the first move in a more rational program is largely a teaching problem dealing with the subject matter and aims of instruction.

The program will need to be adjusted further by introducing subjects or courses which will touch more directly community interests and by giving to them prominence and dignity. A careful study of the careers of the pupils after leaving school, not overlooking those who left school before completing the course, and of the major community interests will suggest the kind of work to be developed. As a result of such a study it may be found desirable to introduce a course in agriculture, household arts, commercial work and the like, replacing one or more of those now offered.

Of the plans suggested the readjustment of subject matter and aims is the more easily handled and will often lead to the introduction of special courses. Comment upon the introduction of courses authorized by the industrial education act will be found elsewhere in this section of the Report.

II. CERTAIN PROBLEMS.

Among the many important problems pertaining to the secondary school system of the state, attention is called to four which are of very general significance. They should receive thoughtful consideration on the part of school authorities for their solution for the most part will be the result of local initiative.

(a) *Training in Citizenship.*

The dependence of democratic institutions upon an intelligent citizenship is too obvious to call for comment. General intelligence, however, or even a liberal education does not necessarily imply that the possessor will be a good citizen. Citizenship is a vocation, a business and as such requires on the part of the citizen intelligent understanding of the principles that underly the management of the body politic, a sense of duty trained to active participation, a real interest in all that pertains to social welfare. The schools are intimately concerned with preparation for citizenship. The high school has a most remarkable opportunity. In this State are about 19,000 young men and women now in these schools who in a short time are to become active in community affairs. Three thousand graduated from the secondary schools this year. In five years at most a very large part of them will be of voting age and must assume the responsibility of citizenship.

Whether they go about it seriously, intelligently and with unselfish interest will depend in a large measure upon the influence and teaching of the school. The state may reasonably expect that this body of young men and women for whom special advantages have been provided will in return give the state the benefit of education in civic activities equal at least to that which they bring to its industrial and social life.

In order that such a condition may obtain, much greater emphasis must be given to instruction in citizenship in all the schools. A study of the curricula of the high schools of the state shows that very few schools require of all students courses relating directly to the study of civics. Practically all the schools offer courses in civil government and American history. But these are so arranged as to be elective for the greater part of the student body or so placed that many may not reach them because of leaving school before the completion of the course. Furthermore, as shown in the study made of the proportion of time given to certain subjects in the small schools, the subject of social science in its broadest interpretation including all history courses, economics, civics and geography occupies only 13 per cent of the total program. If the subjects mentioned were confined to those which may be regarded as

immediately concerned with the teaching of citizenship, namely, civics, economics and American history, it would appear that these subjects receive not more than 5 per cent of the total time of instruction. There is ample evidence that a similar condition prevails in the larger schools. Furthermore, the total number of pupils studying "History" as shown by the table on a previous page, is less than one-half of the total enrollment and includes a large number who are studying the history of European countries.

If the schools are to train the young men and women in the secondary schools for citizenship it will be essential to secure a larger enrollment in the courses offered. This may be done in two ways; by requiring some course or courses of all students or by making the courses of such a nature that pupils will choose them voluntarily. It would seem as reasonable to require civics as algebra or geometry or perhaps English itself. At least, one year's work in this subject ought to have the value of equivalent time in either of the subjects mentioned. An alternative consists of making the courses offered effective for the purpose designed. These courses as a rule have dealt largely with the theory of government and details of mechanical organization. They have not concerned sufficiently the everyday activities of the citizen in his community. "Practical civics" is a name given to the subject when it deals with the immediate local affairs from the point of view of disinterested social service and real patriotism. When the course is presented in this form it invariably attracts and holds pupils.

At the last session of the legislature provision was made for the publication of a pamphlet which would aid in bringing about more practical methods of instruction and study. Professor Orren C. Hormell of Bowdoin College placed at the disposal of the state the results of a most careful study of the problem. These have been published in a pamphlet entitled "Guide to the Study of the Town, City, County, State and Nation." This pamphlet is already proving of greatest value to teachers as the basis of courses in citizenship.

(b) *The School Library.*

Among the immediate needs of the secondary schools is that of adequate library facilities. The school library has two im-

portant functions. The first is to provide supplementary material without which the course in several important subjects is incomplete. The second is to provide general reading suited to the tastes and interests of high school pupils. Both these objects are vital in high school education. It appears from investigation of the libraries of the high school that outside of a few large schools and a very small number of schools in towns where the public library is cooperating in a really effective manner, the library equipment is very meager indeed. The state department has not formulated requirements for school libraries but has constantly urged upon school officials the importance of securing regular appropriations for this purpose. Its development and upkeep are fully as essential to the efficiency of the school as that of any other department. It should be properly housed, carefully managed and liberally supported.

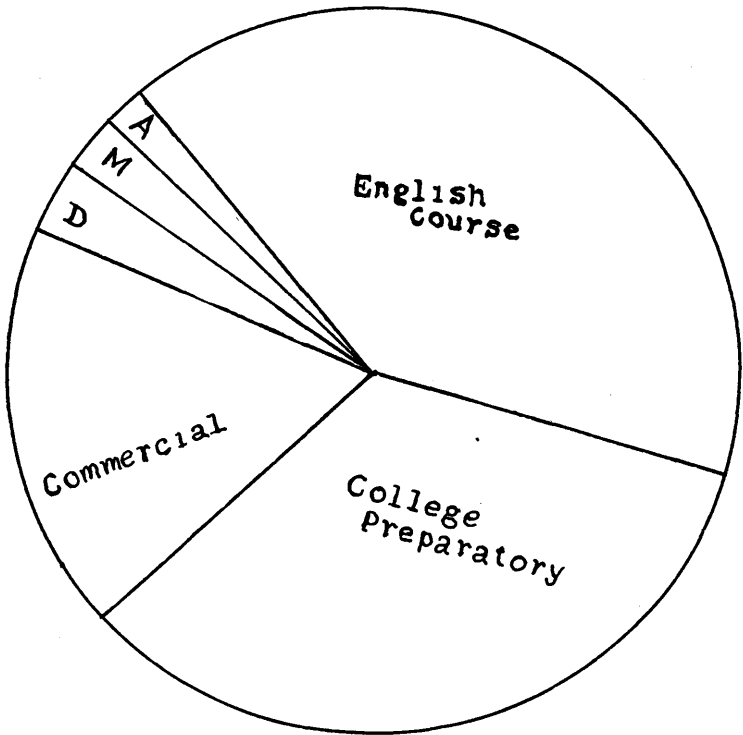

As an accessory to the permanent school library the special traveling libraries for high schools authorized by act of the last legislature will be of great value. The State Library in this way places at the disposal of schools a large amount of useful material at a very small cost.

(c) *Extension of Industrial Education.*

Attention has already been called to the very limited field now occupied by practical arts courses as shown by the enrollment of students. The act for industrial education provides a liberal subsidy for the maintenance of courses in agriculture, household and mechanic arts in secondary schools. The returns for the year show that agriculture has been taught in four high schools. Nine academies offered the course. In the former 82 students were enrolled and 160 in the latter. The mechanic arts course was offered in thirteen high schools and in three academies with 369 and 104 students respectively. Household arts has a stronger following, being represented in eighteen high schools and five academies with 463 and 170 students respectively.

There is a healthy and increasing interest in the course in agriculture in the schools where it has been in operation. The work is becoming more practical and more closely related to local interests. During the past year the boys in one school

made two hundred pounds of butter at a churning at a local creamery. At another school the class in orcharding packed one hundred barrels of apples. At another they built their own

Showing enrollment by courses. High Schools and Academies.

- A. Agriculture
- M. Mechanic Arts
- D. Domestic Arts

sorting tables, packing boxes and did some practical work in packing. Another group have done extensive milk testing for neighboring farmers. A friendly contest over the relation of feeds and milk production between a boy and his grandfather is reported in which the boy with the same cow was the winner by thirty per cent. Many of the courses are directly related to the boys' and girls' clubs, directed by the University of Maine extension work.

Cattle Judging at East Corinth Academy.

In practically every case where the undertaking has the confidence and support of the community and sufficient money is invested to produce favorable conditions a good degree of progress has been made.

At the beginning of the school year a pamphlet outlining courses of instruction in agriculture together with lists of apparatus needed and reference material was made available for distribution.

The course in mechanic arts is in some respects a more highly specialized course particularly if it undertakes to give a boy the elements of a trade. A measure of general training in manual arts may be properly offered in any school and should always be a part of the course in agriculture, but work of this nature when carried on through the four years may lead to more definite preparation for a vocation. Hence its introduction will be conditioned largely upon the local demands for special industrial training. It is interesting to note that several schools have made such an extension of mechanic arts work with good results. Westbrook has maintained for several years a special industrial course which is closely correlated to the local paper and cotton industries. Bangor, Portland, Bath and several other towns are making provision to train young men in line with the demands of important industrial activities. Employers are looking with increasing favor upon the product of such schools and are lending their aid in many important directions.

The household arts courses have made a larger growth both in number and in enrollment than have either of the other two. The practical nature and wholesome influence of this course are commending themselves to both students and parents. They are primarily home-making courses and as such have a vital significance to every girl. The tendency is strong to eliminate frills and fads and teach the essentials of making and keeping a modern home.

The essential difference between the practical arts courses of the high school and similar courses given in the grades lies in the adaption of subject matter to the age of the pupils. In the high school the work is given a broader scope, approached more scientifically and taught with the thought that the student will within a short time make some actual application of what he has learned in connection with his life work.

These courses are no longer an experiment. Their worth in practical life is daily being demonstrated. Their grip on the student through their contact with real things and dominant interests is most evident. The time is ripe for much wider extension of the opportunities which they provide.

The undeveloped agricultural resources of the state are calling for men who can engage in the business of farming intelligently and efficiently. The constant demand of the industries for men who know something of the use of tools and are familiar with machinery places a premium upon the young man who has had an opportunity for such training in the schools. Intelligent home making is too significant to call for comment. The courses offering the chance of training in vocational activities should be found very generally in the secondary schools. The returns to the community in a greater interest in school work and in a higher intelligence and skill in those who come from the schools to take part in the industrial life fully offset the additional cost.

The whole question of special training as here outlined should be made the subject of frequent discussion before granges, parent-teacher associations and similar gatherings of citizens. When there is sufficient interest to insure a serious effort on the part of those in charge, courses may be undertaken with promise of success. The state office is prepared to give assistance in the direction of the work. It remains for the community to realize the need and to see the significance of such work in the education of its young men and women.

(d) *Academies.*

The rise of high schools in all parts of the country has made a notable change in the relative registration in public and private secondary schools. Thus in 1890 32 per cent of the pupils in such schools were enrolled in academies or private schools and 68 per cent in high schools. In 1914 the ratio was 11.2 per cent for academies and 88.7 per cent for high schools.

For this state a similar condition though not quite so marked is noticeable. The increase in the number of students in academies during the past five years has been only 237 or not quite 6 per cent compared with nearly 25 per cent for high schools.

Poultry House Construction at Parsonsfield Seminary.

Many friends of these schools will look with deep regret upon the seeming decline in the private schools. Beyond question the academies have rendered the state splendid service in the education of its youth, and their great work was done at a time when the public did not make general provision for education beyond the elementary course. Largely through the influence of the academy the importance of affording a wider educational opportunity has become recognized, the high school has been made a part of the school system and the privileges of a secondary education opened to all qualified youth. If, then, it appears that the academies have in some instances suffered loss in numbers through the rise of the high school, it is only the inevitable result of the leaven of secondary education which they themselves have spread throughout the state.

The academies of the state may be divided into three fairly distinct types according to their organization. The first consists of a small number of large schools with considerable endowment serving a widely scattered constituency. Most of these are in the ordinary sense of the term private schools. They usually have dormitory facilities. They are largely independent of state control, unless they receive financial aid, except through the approval of their courses for tuition purposes.

In the second group are several schools which serve a considerable territory in the immediate vicinity of the school. One of these schools within a year or two has had pupils from eleven different towns within a radius of fifteen miles.

The third group includes a considerable number of academies which are in practically all respects the high schools of the towns in which they are located. Their enrollment is made up very largely of resident pupils. There is often a contract between the town and the academy, by which the former makes the academy its high school. In several cases the major part of the funds is derived from local taxation.

While the conditions which prevailed in the academies a generation ago are not likely to be found again, these schools will continue to serve an important field. Many of them will become more and more identified with the local school system and will be recognized and supported as the high schools of the town. Such a relation is likely to prove highly advantageous both to the school and to the community. Some other schools

will continue to furnish educational opportunities to a considerable number of nearby towns. In this capacity they will serve the state in an effective manner. A number of schools are likely to undertake distinctive types of work which environment or special conditions make possible for them to carry on to their advantage and to that of the constituency which they serve.

The state comes into contact with the academies first through the tuition law. This law makes it obligatory upon towns to pay the tuition of pupils attending, under prescribed conditions, any approved academy or secondary school. If the academy is to receive pupils, expecting the town to become responsible for their tuition, its courses must be approved by the state office. This approval must also obtain if a contract is to be valid between the town and the school. In the second place if an academy receives state aid for maintaining certain courses as provided by law these courses as well as the conditions of maintenance are under state supervision and control.

The nature and extent of public support for this class of schools is sometimes not well understood. The provisions of the law are somewhat complicated making the state aid conditional upon various factors including the courses offered, attendance, income from invested funds and other items. In general it may be said that an academy may receive from five hundred to one thousand dollars directly from the state provided the legal requirements have been met. In addition to this, reimbursement for the maintenance of special courses under the industrial education act, may be granted to the extent of five hundred dollars. Thus an academy may receive to the extent of \$1,500 annually from direct state aid. Indirectly the school may also receive state aid through tuition and from towns through contact relations.

The application of these provisions may be illustrated by a specific case. One of the academies offers two of the courses authorized by law and receives \$750 as direct academy aid. The town makes a contract with the school and pays \$1,800 for the schooling of its high school pupils; of this \$500 is reimbursed by the state for the support of high school education. The academy receives about \$300 tuition from adjoining towns. It might have instituted a course in agriculture, mechanic or

Some Practical Work in Secondary School Agriculture.

household arts, and, if conditions of maintenance were satisfactory, received \$500 additional from the state. This school has an income from invested funds amounting to less than \$400. Its real estate including the building is valued at about \$1,500. Three teachers are employed. There is an enrollment of 75 resident and 10 non-resident pupils. The cost of instruction per pupil is \$32.70, and of this cost the state pays through the academy aid and high school aid to the town \$13.33 or forty per cent. It is proper to compare with this the cost of instruction in a high school of three teachers and of approximately the same number of resident pupils. This school receives from the state \$500. The cost per pupil is \$31.85, of which the state pays \$6.66 or twenty-one per cent. It will be seen that the state pays nearly twice as much per pupil for the support of secondary education in the town having the academy as in the other.

Another source of support for academies has been in the form of special grants by the legislature. The resolves carrying these grants have described the purpose for which the funds were to be devoted. These purposes have comprised such items as repairs on buildings, construction of new buildings, including dormitories, payment of debts on property and the support of special courses like agriculture.

The following table will show the extent of aid to academies by special legislative resolves from 1905 to 1910.

Session of 1905	\$2,000.00
" " 1907	8,500.00
" " 1909	12,600.00
" " 1911	25,500.00
" " 1913	15,292.83
" " 1915	24,800.00

Total for the last six sessions, \$88,692.83

These general statements of fact lead to a pertinent question in regard to appropriations for secondary education, namely, on what grounds may private or semi-private institutions be favored by special bequests or aided by much larger subsidies than are granted to public high schools?

III. SCHOOL ACTIVITIES.

Certain activities connected with the high schools deserve special mention owing to their influence upon the school in various ways. Of the three mentioned it will be seen that each suggests a new adjustment in the aims or factors in high school education.

(a) *Extension Courses.*

Opportunities for prospective secondary school teachers to secure professional training in the science of teaching are rapidly increasing. For teachers in service to acquire such training is much more difficult. The summer school has been practically the only opportunity for such study beyond private reading. The need of some means by which the teachers might during the year undertake some systematic study for which proper recognition could be given was made one of the subjects for discussion at the conference of secondary school principals at Castine a year ago.

General proposals for extension courses were presented by Professor Arthur J. Jones, at that time head of the department of education of the University of Maine. The very cordial response of the principals and superintendents led to the calling together of the teachers of education in the colleges by the State Superintendent of Schools for a consideration of plans of procedure. Arrangements were finally made to offer courses at a limited number of centers. As a result of an announcement of the plan one hundred and seventy teachers pledged themselves to take the course if offered. Eight centers were established and one hundred and thirteen teachers were enrolled. A series of twelve lessons were given based on educational psychology. These were conducted by college teachers of education along the lines of college work. A regular text-book was used and a list of additional reading was required. The class meeting involved discussion and reports with a minimum of lecture work by the instructor. At the close of the course an examination was given. Credit for this examination toward a professional secondary certificate was allowed.

The instructors were Prof. H. H. Britain of Bates, Prof. James L. McConaughy of Bowdoin, Profs. A. J. Jones and

D. W. Pearce of the University of Maine, President Roberts of Colby conducted a course for teachers of Waterville and vicinity on somewhat similar lines, but the work was not coordinated with the plan described. It is proper to add that the part of the state office was limited to the distribution of literature and the initial correspondence. The general plans were worked out by the instructors in conference with the State Superintendent and the agent for secondary education, but all the details of the work itself were left entirely in the hands of the men conducting the courses. The financial matters were handled by Mr. Philip R. Gibson of the Cony high school, Augusta, who acted in the capacity of financial manager at the request of the committee.

The courses were well received and were felt to be very profitable by those who participated. A very great deal of credit is due the men who conducted the courses. Much real hardship was involved as well as sacrifice of time and effort. There was no way in which the state could contribute toward the expense of the undertaking and the conductors were dependent for traveling expenses and remuneration upon the fees.

The interest in extension work of this kind appears fully sufficient to warrant an appropriation by the state for carrying it forward in an effective manner in the future. The readiness of teachers to avail themselves of the opportunity offered and the feeling on the part of school officials of the importance and value of such courses makes it extremely desirable that some measures be taken to insure their continuation on a firm basis.

(b) *High School Music.*

At the last meeting of the State Teachers' Association a unique and in some respects very remarkable program was attempted. Arrangements were made to bring together for a school music festival a number of high school orchestras and a chorus made up of high school students. At the Portland meeting in 1914 the first program of this kind was offered and was carried out with great success. The chorus numbered over two hundred voices and represented twenty-five schools. The orchestra was composed of fifty pieces representing eight schools. The music rendered was of high order and the performance called forth highest expressions of praise on all sides. The fact that so large an orchestra and chorus could be brought together and

with but one rehearsal produce so satisfactory results gives some impression of the extent to which music is being carried on in the high schools as well as an idea of the quality of the work.

Music is rapidly growing in favor in the high schools. A number of schools have regular instruction. Several have recently added courses in music appreciation. The school orchestra is becoming more and more common. There is a growing tendency to give credit toward graduation for school music. This is sound from every point of view. Work in music whether vocal or instrumental offers a kind of training which should certainly receive recognition as a part of the education of a boy or girl. In fact it seems proper to accept work of this kind done apart from the school in lieu of some school subject. It is only essential that the instructor be competent and definite results be secured. Judged from any point of view it deserves a place in the high school curriculum. It is gratifying to note that its importance is being more and more widely recognized and that an increasing number of schools are giving attention to its development.

(c) *Graduation Programs.*

Early in the school year a letter was addressed to principals of secondary schools and superintendents calling attention to the artificial and extravagant character of the graduation exercises in many schools. It was pointed out that the public high school was not justified in making these exercises so expensive as to entail hardship upon any who might participate and further that the programs failed to give expression to the real work of the school. The suggestion was made that modifications be attempted which would reduce the expense through a more simple taste in dressing and less display in such details as music, decorations and the like. It was suggested that the program be more closely related to the work done by the pupils and that some of the traditional parts adopted from the college customs be sacrificed.

The reaction on the part of school authorities was very favorable though in many localities the traditions of the school were too strong to permit any marked change in the plan of the exercises. Practically all who have discussed the matter feel strongly that the exercises should be more consistent with the character of a public institution like the high school.

Grade School Building, Standish. Erected 1915.

Several schools have undertaken notable changes. In a number of cases the parts of the program of interest to the students principally, like the prophecy, have been given at a special occasion. Music has been furnished by the school orchestra and chorus. Several graduating classes by vote limited the cost of dress on the part of the girls. In one school the cost allowed per pupil was five dollars, and in another the girls' dresses were cut from the same piece and at another the girls made their own dresses. Other expenses such as decoration, flowers, gifts, programs and the like have been reduced to a minimum.

The most significant changes have been in the program itself. One large school has given a Shakespearian play with success. Another has exemplified in pageant form local history and industry. Several programs have included demonstration exercises in science, commercial work, mathematics and English. Thus a graduate of the commercial department took down a letter in shorthand at dictation, transcribed it on the typewriter and read it back to the audience. Two students demonstrated a scientific test for certain food adulterations, giving necessary explanations. Exercises of this nature have been very cordially received by the public.

The program, a part of which is given below, was presented by a school of about eighty pupils. It shows a very marked reaction from the ordinary type of graduation program and exemplifies in a large degree the work of the school. It shows a kind of exercise which may be undertaken successfully in many schools. For this program the demonstration table and the projecting lantern for pictures and original photographs were used effectively.

The following parts taken from the program illustrate the nature of the modifications made.

Typewriting	A five minutes demonstration.
Essay	Business College or High School.
Shorthand	New matter taken at dictation.
History	Article on Germany
Mathematics	Chalk Talk.
Chemistry	Tests for food values.
Civics	Civic conditions illustrated by local photographs.
Music	Furnished wholly by the school.

The following resolutions are significant: We the members of the class of 1914, Caribou High School, in recognition of the fact that graduations have too often been occasions of lavish display, involving hardships on parents and pupils alike, and desirous of being influential in correcting rather than promoting this evil, do adopt these resolutions for our coming graduation.

First, we pledge ourselves not to purchase expensive hot-house flowers for personal adornment and request our friends to make no expensive floral purchases in our behalf.

Second, the girls shall procure for their graduation dresses some simple and inexpensive material and the dresses shall be made by the graduates or, to whatever extent possible, completed within the family circle, competition being permissible only in securing simplicity and lack of expense.

Third, the boys recognize no obligation to purchase graduation suits, but if buying suits for the occasion, will see that they are of the same kind and quality as would ordinarily be purchased for Sabbath wear.

Fourth, the program for commencement exercises shall be simple and inexpensive.

Fifth, we solicit the services of the high school orchestra for our graduating exercises.

Sixth, on approval of these resolutions by our principal the same shall be printed in the Aroostook Republican.

Signed,

MEMBERS OF THE CLASS OF 1914.

The high school is in every sense a public institution maintained by general taxation, open to all the youth of the community, democratic in all its essentials. It must be equally democratic in all its activities and functions. Neither tradition nor desire for display on the part of a few should be allowed to destroy the simplicity and effectiveness of the exercises which mark the completion of its courses.

CHAPTER IV.

STATE NORMAL SCHOOLS.

FOLLOWING ARE THE REPORTS OF THE PRINCIPALS OF THE STATE NORMAL SCHOOLS FOR THE YEAR ENDING JULY 1, 1915:

FARMINGTON, MAINE, June 30, 1915.

To the Trustees of the State Normal Schools:

GENTLEMEN:—I have the honor to submit the following annual report of the Farmington Normal School for the year ending June 17, 1915. The attendance for the year has been as follows:

Number entering	87
Number registered in the fall term.....	167
Number registered in the winter term.....	198
Number registered in the spring term.....	184
Number of different pupils registered.....	223
Number in the graduating class, regular course.....	81
Number in the graduating class, Household Arts course..	6
Number graduating, advanced course, Household Arts..	4

The teachers for the year have been: Principal, Wilbert G. Mallett, A. B.; assistant principal, Arthur M. Thomas, A. M.; assistants, Hortense M. Merrill, Katherine E. Abbott, Carolyn A. Stone, Virginia A. Porter, Florence A. Walker, A. B., Franca Camp; Household Arts Department, Marion C. Ricker, Cora J. Chase, Flora T. Norton; supervisor of training school and critic teacher, Lillian I. Lincoln; assistants, Louise W. Richards, Eva L. Sawtelle, Edith A. Luce, Julia A. Gile, Inez M. Rolfe; secretary, Mildred S. Gay.

The classes which were recommended for graduation and which received diplomas were as follows:

REGULAR COURSE.

S. Jennie Adams	New Portland	Lulu M. Hoyt	Rumford
Ruth H. Austin	Phillips	Marion B. Johnson	Madison
Ruth L. Avery	Lubec	Mariane E. Kennison	Temple
Marion L. Black	Vinalhaven	Muriel L. Kennison	Temple
Velma A. Blake	Boothbay	Zella L. Lewis	Springfield
Cassie M. Brown	Abbot	Edith A. Lovett	Portland
Blanche E. Butterfield	Springfield	Kate M. Lyle	Lubec
Harriet E. Campbell	Southport	Agnes P. Mantor	Skowhegan
Mary E. Campbell	Farmington	Chrystal Marsh	Eddington
Marion D. Carleton		Ellen S. Marshall	Bowdoin
	Plymouth, Mass.	Lydia M. Marshall	Bowdoin
Nora M. Chandler	Belgrade	Margaret F. Miller	Jay
Mildred B. Chute	Skowhegan	Berneice A. Morrill	Farmington
Mildred R. Covell	Farmington	Annie B. Morris	Concord
Ethel M. Craig	Farmington	Fred H. Moulton	Jay
Olive F. Craig	Farmington	Ethel V. Munsey	Warren
Florence M. Davis	Farmington	Helena Murphy	Portland
Mary F. Day	Lyman	Fannie M. Niles	Monmouth
Lucy P. Dougherty	Skowhegan	Lena E. Noyes	Wilton
M. Cornelia Dwelley	Brunswick	Lottie F. Oliver	Industry
Florence Dyer	Harrington	Ethel J. Philbrick	E. Livermore
Eva M. Elwell	Brunswick	Helen M. Pike	Jay
Josephine S. Emerson		Laura E. Pratt	Troy
	Boothbay Harbor	M. Estelle Ramsdell	Eastport
Beryl A. Fletcher	Starks	Ruth H. Randlett	Clinton
Harriet M. Fogg	York, Pa.	Elenora B. Richards	Farmington
Berle A. Frost	Monmouth	Stella M. Roberts	Andover
Iva M. Furber	Hartland	Edith a Silver	Stonington
Ethel J. Gilman	Bingham	Marion Southwick	Acton
Hilda L. Goodwin	Farmington	Florence E. Springer	Bethel
Eva A. Gotlander	Waterville	Mary C. Stanley	Bethel
Olivia E. Gotlander	Waterville	Louise B. Sullivan	Lubec
Virginia P. Gray	E. Machias	Grace E. Thoman	Brownville
William O. Hayden	Canton	Ilda B. Thomas	Jay
Elizabeth Hickey	Biddeford	Charles E. Varney	Turner
Lucy A. Hill	Lebanon	Roxa C. Varney	Turner
Agnes L. Howard	Monmouth	Anna R. Vehue	Farmington
Grace M. Hoyt	Rumford	Evelyn M. Waugh	Winthrop
Hazel C. Webber	Jay	Paula Williams	Gardiner
Edith S. Webster	Farmington	Rose B. Wolman	Gardiner
Mabel B. Webster	Farmington	Gertrude L. Yeaton	Wilton
Harriet M. Wentworth	Thomaston		

HOUSEHOLD ARTS COURSE

Mary E. Bailey	Brunswick	Ida R. Russ	Mount Vernon
Mabel F. Booth	Saco	Rosa Skillings	Auburn
Beulah Oldread	Saco	Laura A. Smith	Gardiner

Primary School Building, Auburn. Completed 1915.

ADVANCED HOUSEHOLD ARTS COURSE

Mary G. Flint	Farmington	Stella S. Hutchins	Phillips
Margarette L. Holt	Clinton	Louisa M. Talbot	Freeport

We have graduated this year the first class to take the two year course in Household Arts. Experience with this course seems to indicate that it should be a temporary course; that is, offered for only a few years and that thereafter the school should maintain in special training for Household Arts only the advanced class. Three years of study and training are none too long to impart the required knowledge and professional spirit, also to secure the maturity of judgment which a teacher of Household Arts needs to possess.

During the past year five undertook the work of the advanced Household Arts course and four completed the work and received diplomas as given above. Of these five, four were graduates of the Farmington Normal School and one of the Gorham Normal School.

The urgency for better facilities for carrying on our Household Arts work which was urged in my last annual report has been happily provided for by an appropriation by the last legislature for a new Household Arts building. This will furnish much better accommodations for carrying on this important line of work.

Purinton Hall, the new dormitory, was open for occupancy at the beginning of the year and has proved a most useful and convenient building.

The last legislature on recommendation of your Board provided for the extension of the dormitory lot by the purchase of about 30 sq. rods, with buildings situated thereon and which came into the market through the death of the previous owner. This is a valuable addition for the state to possess.

Respectfully submitted,

W. G. MALLET.

EASTERN STATE NORMAL SCHOOL.

CASTINE, MAINE, June 22, 1915.

To the Trustees of the State Normal Schools:

GENTLEMEN:—I respectfully submit my 27th annual report of the Eastern State Normal School.

TEACHERS.

The teachers have been Albert F. Richardson, A. M., principal; assistants, Edward E. Philbrook, M. D., Nellie F. Harvey, Kate S. Russell, Mary C. Richardson, A. B., Mabel P. Ridley, Mary L. Hastings, Hattie A. Wiggin, Mary S. Coombs, A. B., Mary B. Bills, Beth M. Jellison, Lillian I. Ryder and Edna C. Harquail. Miss Hastings is the director of training; Miss Wiggin has had charge of manual training; Miss Coombs of household arts; Misses Bills, Jellison and Ryder have had charge of the training schools in the normal school building and Mrs. Harquail of the village grammar school where the students of the normal school practice.

Miss Myra A. Fitch, who taught Grades III and IV last year, left us to teach in Keene Normal School, N. H. She was succeeded by Miss Lillian I. Ryder, a member of the class of 1914. Miss Ryder is an energetic and resourceful teacher and has done excellent work.

ATTENDANCE OF STUDENTS.

Number entering the school.....	30
Number attending the fall term.....	63
Number attending the winter term.....	64
Number attending the spring term.....	72
Total enrollment for the year.....	199
Number of different students.....	90

AGRICULTURE.

The regular course has been followed with the addition of some experimental work in pruning and grafting. New tools have been added and special emphasis laid on their care with good results.

The community conference which was held early in April was a decided advantage both to this and to the Household Arts Department.

The work this year has been very efficient and the school garden shows in part the value of the course.

MANUAL TRAINING.

While the work of this department is constantly varied to meet changing conditions, it has resulted in the same success as previous years.

Sixty-six children from the training school have had the privilege of work here and also from the village grammar school.

Beside carrying on its own course this work proves a valuable aid to other departments by working in correlation with them.

If any one in the beginning had any doubt of the advantage of such work he would be convinced by the eight years of work since it has been introduced.

HOUSEHOLD ARTS.

This course, established four years ago, gives training in both cooking and sewing. The fundamental principles in each course are presented with a view to their use by the students in their own schools.

Grades IV, V, VI, and VIII from the training school have instruction in sewing; Grades VII and IX in cooking. This year a course in camp cooking was offered to the Boy Scouts in Grade IX, which proved a decided success.

Not only are these courses in sewing, cooking and manual training a great advantage to the normal school but they are of great value to the village children. The interest the pupils have shown proves their appreciation of the work.

THE LIBRARY.

Two new factors have strengthened the library work of the school this year; a course of twelve lessons in children's literature; and the extension of the work to include the children of the training school. Grades III to VI have come to the library for a few simple lessons in care and treatment of books and have drawn books for home reading.

TRAINING DEPARTMENT.

Each year during the last ten years the amount of work each student is required to do in the training schools has been increased until this year we have been able to carry out a plan for practice teaching toward which we have been working for several years. Now each student spends twelve weeks of the senior year in the training schools. During this time the student is an assistant teacher, assisting in all the work of the room. Both teachers and students are enthusiastic about the change and feel that the present plan gives just the training needed.

THE DORMITORY.

The dormitory debts are all paid and all running expenses have been paid this year although the numbers are considerably less than a year ago. The probability of a large attendance next year makes it reasonable to expect a margin for necessary repairs and supplies. Nearly all the rooms are already engaged.

The matron, Mrs. Ella G. Hussey, leaves at the end of the year to take up new duties in the west. Her management has been efficient and satisfactory to both students and teachers. It is rare to find a person capable in as many lines of work as Mrs. Hussey.

I am glad to report some improvement of our grounds and buildings. A concrete walk has been laid between the dormitory and the normal building; the grading of the dormitory grounds has been completed. A great improvement of the normal school grounds has been effected through the efforts of the children of the training school under the charge of the Grade V and VI teacher, Miss Beth M. Jellison. The janitor has looked after the filling of an old well, edging walks and painting woodwork on the buildings.

The library room has been enlarged by connecting it with a side room by means of an archway, thus securing much needed space. The ninth grade has built shelves in an attic room for the storage of books.

The principal's office has been newly fitted up and furnished with modern furniture, making a very convenient and attractive room.

RECOMMENDATIONS.

The appropriation of \$5000.00 for a new gymnasium and other improvements, when a much less sum was recommended by the principal, is something new in legislation and shows the wisdom of the Educational Committee which appears in other respects as well as in this. I hope that an inexpensive gymnasium will be built but sufficiently commodious for a school of this kind. I suggest that it be located at the corner of Main Street and Battle Avenue, not too near the street and heated from the main building. I hope it will be built of brick to correspond to the other buildings.

Some change ought to be made in the school basement so that the coal may be put in directly from the street so that the grounds need not be crossed by heavy teams. Grounds can never be made to look well until this is done.

Some repairs ought to be made on the wood work of the normal building, but shingling and painting can go two years.

The floors in the dormitory ought to be refinished, but perhaps there may be sufficient profit from the board to pay for that as the expense would not be very great. The walls should be tinted, but that too can wait.

I wish in closing to say a few words of appreciation of the work of the assistant teachers. They have been especially loyal and willing to do all they possibly could for the good of the school. They have not waited to be told what to do but have seen what was needed and have done it.

They have also tried to improve themselves; one has been in Europe and others have visited schools outside the state. They have attended the State convention and several county conventions and have taken part in these meetings.

I recommend that diplomas be granted to the following students:

Lulie A. Ames	Union	Bernice Thurston Hamblin	
Minnie Beatrice Ball			Stonington
	Hancock Point	Carmen A. Harper	Center
Helen Barker	Newport	Marjorie Overman Harvey	
Jessie Florence Boynton			S. Brooksville
	West Lubec	Dorothy May Holden	Bangor
Katherine Culbert Bowler	Palermo	Grace Adele Hutchins	Orland
Addie Gertrude Bowden	Penobscot	Florence R. Keene	Searsport

Florence M. Cole	Winterport	Mary Hortense Kenniston	
Gertrude M. Conant	Winterport		Amherst
Myrtle A. Cornforth	Unity	Mary A. Ladd	Dover
Ellen Gertrude Curley	Bangor	Mary Ellison Mills	W. Brooksville
Zina Hazel Davis	E. Eddington	Ida Frances Murphy	Bernard
Grace Elmena Dearborn	Corinna	Lucy M. Murphy	Bernard
Maude Estella Dubay		Doris L. Nickerson	Searsport
	Sherman Mills	June Elizabeth Penney	Bangor
Mildred S. Donlin	Winterport	Arlettie M. Richardson	Clinton
Maynard Frederic Douglas	Castine	Lilla Bernice Severance	S. Brewer
Winifred Monaghan Doyle		Sara B Stinson	E. Surry
	Ellsworth	Charlotte Christiania Thompson	
Hoyt Davis Foster	Deer Isle		Winterport
Dora F. Goldrup	Yarmouth	Mildred Viola Tibbetts	Corinna
Minnie Reynolds Gove	Dennysville	Margaret Barrons Watson	Monroe

Respectfully submitted,

ALBERT F. RICHARDSON.

WESTERN STATE NORMAL SCHOOL.

GORHAM, MAINE, June 16th, 1915.

To the trustees of the State Normal Schools:

GENTLEMEN:—I hereby submit the annual report of the principal of the Gorham Normal School for the year ending June 16th, 1915.

I.

The faculty of the normal school consisted of 32 members distributed as follows: Principal, Walter E. Russell; teachers devoting their entire time to normal school students, Viola M. White, Katharine Halliday, Gertrude L. Stone, M. Grace Fickett, Jessie L. Keene, and Louis B. Woodward; teachers devoting a major part of their time to the normal school students and a part of the time to practice school students, George A. Brown, Emma S. Daggett, Pamela C. Ware, Ethel G. Wooldridge, George E. Hutcherson and Benjamin H. Van Oot. Teachers devoting their entire time to practice schools, Miss Katherine C. Aageson, Miss Lou M. Buker, Miss Marjorie M. Blanchard, Miss Mary M. Reed, and Miss Welthie B. Buker. The remaining 14 were teachers of schools in Westbrook and

South Portland, in which members of the graduating class did their practice teaching.

The other officers of the school consist of R. Estelle Bradbury, secretary and librarian; Mrs. Addie I. Andrews, matron of the dormitories; Bert L. Libby, caretaker of the normal school building; and James Cullen, engineer at the dormitories.

II.

The student enrollment for the year was as follows:

Whole number of pupils present during the year.....	220
Number entering during the year.....	122
Number attending during the first semester.....	211
Number attending during the second semester.....	203
Number of graduates in the regular course.....	85
Number of graduates in the manual training course.....	4

These 220 pupils were classified as follows:

Graduates of standard high schools.....	218
Non-graduates of standard high schools.....	2

Of the 122 entering 121 were graduates of class A high schools. The practice school students numbered 635, distributed as follows:

Number in the normal school building.....	152
Number in West Gorham school.....	23
Number in Westbrook.....	400
Number in South Portland.....	160

Each member of the graduating class had approximately three weeks of observation in the regular practice schools at Gorham and the rural school at West Gorham and seven weeks of teaching either in Gorham, Westbrook, or South Portland.

III.

The expenses of the normal school were met last year as in years past. The state supported the regular normal school work, the state and the town of Gorham bore the expense of the practice school and the observation school in Gorham, and the state paid a bonus to the schools in Westbrook and South Portland whose schools were used for practice work.

IV.

The 86 young women and 3 young men whose names are given below make up the class on whom the state conferred dipomas:

Frances E. Abbott, Bethel; Effie E. Akers, Andover; Florence E. Akers, Andover; Mollie Alexander, Portland; Vena F. Anderson, Gorham; Sarah A. Alexander, Richmond; Geneva L. Avery, No. Lubec; Elizabeth G. Bailey, Lovell; Isabella M. Banks, South Portland; Edith L. Beckett, Calais; Lillie A. Bennett, Gorham; Bertha G. Bore, Portland; Rosa M. C. Bothel, South Portland; Marguerite L. Boynton, E. Parsonsfield; Marion D. Buzzell, Bangor; Ruth W. Carter, Portland; Bertha E. Clarke, Portland; Margaret M. Cole, Portland; Mary H. E. Colley, South Poland; Annie M. B. Cook, Portland; Mary E. Concannon, Portland; Evilena M. Cummings, Portland; Nellie F. Cunningham, Portland; Mary E. Curran, Portland; Elizabeth E. Curtis, Topsham; Ruth E. Davis, Westbrook; Helen B. Dick, Auburn; Anna W. Dunton, Gardiner; Effie M. Dunton, Boothbay Harbor; Frances K. Dunton, Boothbay Harbor; Hester Eastman, Chatham, N. H.; Iva J. Elwell, Westbrook; A. Louise Emery, Boothbay Harbor; Catherine A. Foley, Portland; Bertha C. Ford, Everett, Mass.; Lillian M. Franks, Auburn; Thelma M. Gerry, Norway; Idella B. Goodwin, E. Lebanon; Mary E. Gormley, Portland; Helen M. Gowen, Auburn; Gertrude M. Grant, Alfred; Teresa M. Harrington, Bangor; Gertrude M. Hasty, Standish; Frances L. Hearne, Lubec; Florence L. Hemenway, South Jefferson; Helen C. Hickson, Bangor; Madaleen G. Higgins, Brunswick; Nora F. Honan, Portland; Lois P. Hutchins, Bucksport; Esther M. Johnson, Woodfords; Mabel L. Johnstone, Peaks Island; M. Helen Jordan, No. Bridgton; A. Urania Kennedy, Portland; Dorothy E. Kirk, Bar Harbor; Dorothy A. Knowlton, Auburn; Sarah M. Malone, Bangor; Gladys J. McGillicuddy, Bath; Gladys R. Merryman, South Portland; Edna L. Miller, Bristol; Gladys E. Morgan, Portland; Olive M. Murray, Bath; Annie M. Newcomb, No. Waterford; Elsie A. Norton, York Beach; Lena L. Nixon, South Portland; Mary Phyllis Odlin, Cape Elizabeth; Helen M. Perry, Lincoln; Madeleine M. Pillsbury, Pine Point; Agnes E. Prince, Waterville; Catherine Corinna Prince, Waterville; Blanche L. Richardson, E. Baldwin; M.

Charlotte Richardson, E. Baldwin; Elizabeth E. Rowe, Portland; Maud A. Russell, Gorham; Margaret A. Seavey, Thomaston; Gladys B. Skillin, W. Boothbay Harbor; Almira T. Sturtevant, Bath; Mary E. Sullivan, Portland; Effie S. Towne, Oxford; Helen M. Varney, Rochester, N. H.; Rena G. Waterhouse, Hollis Center; Emma A. Weeks, Westbrook; Emma F. Wentworth, Scarboro; Floy E. Wheelock, Milltown; Ethel Wright, Portland; Alice B. Winn, Cape Neddick; M. Imogene Wood, Hallowell; S. Dickson Allen, Springvale; Charles E. Clarke, Biddeford; Ray C. Banks, Auburn; and Mary R. Young, Augusta.

V.

The library is being more extensively used each year for study purposes. The number of bound volumes at the present time is 1,661. Many of these are badly dilapidated and should be replaced, and additional books could be used with profit.

VI.

The manual training course is proving very popular to the young men of the state. More students have applied for admission than can be wisely cared for at the present time. Upon the completion of the new dormitory Academy Hall which has been used for the last five years as a dormitory will be available for the special work of the students taking the manual training course. It will provide room for woodworking, metal work machinery, for drafting rooms, and finishing rooms. This will relieve the congestion in the rooms now used by the students preparing for general teaching and by the practice school students, and enable the students in both courses to do their work to better advantage.

VII.

One of the most urgent needs at the normal school at the present time is an addition to the recitation building to provide better facilities for the practice schools, more sanitary coat rooms and toilet rooms for the young ladies, and an assembly room large enough to seat the entire school body.

Respectfully submitted,

W. E. RUSSELL.

AROOSTOOK STATE NORMAL SCHOOL.

PRESQUE ISLE, MAINE, June 9, 1915.

To the Trustees of the Maine Normal Schools:

GENTLEMEN:—I have the honor to submit the following report of the Aroostook State Normal School for the year ending June 9, 1915.

Number registered fall term.....	46
Number entering fall term	22
Number registered winter term.....	67
Number entering winter term.....	6
Number registered spring term.....	49
Number of pupils in graduating class.....	26
Number of different pupils enrolled.....	83
Average enrollment	54

The teachers for the year have been: San Lorenzo Merri- man, A. B., principal; William D. Hall, A. B., assistant prin- cipal; Ardelle M. Tozier, Nellie W. Jordan, Ida M. Folsom, Gertrude T. Morrell, Helen C. Welch, Ethel M. Edwards, assistants; Florence M. Hale, principal of training school; Alice M. Coffin, assistant critic teacher; Doris Pride, Alma Moody, Clara Cooper, Hazel Mills, Daisy Klein, Erdine Morgan, Ger- trude Gray, Maude Goggin, model teachers.

The following students have completed the prescribed course and are recommended for graduation:

Hazel F. Arbo, Oxbow; Gladys Bagley, Caribou; Wealtha Beckwith, Presque Isle; Blanche Berce, Woodland; Katherine Bigelow, Easton; Pearl Briggs, Houlton; Eula Butterfield, Danforth; Eva Carlisle, Patten; Etta Collins, Bridgewater; Luella Coote, Patten; Lillie Cumming, Houlton; Belle Everett, Presque Isle; Maude Goggin, Washburn; Eda Grant, Sherman; Frances Hartley, Bridgewater; Blanche Kingsley, Gouldsboro; Daisy Klein, Island Falls; Romie L. Lee, Patten; Nellie Mc- Donald, Canterbury, N. B.; Margaret Mullany, Mattawamkeag; Lelia Randall, Easton; Isabel Richmond, Sherman; June Webb,

High School Building, Houlton. Erected 1914.

Patten; Naomi Weeks, Presque Isle; Ella York, Mars Hill; Nellie Young, Fort Fairfield.

The year has been without interruption or unusual incident. The interest manifested throughout the year has been very good and the quality of the work excellent.

Respectfully submitted,

SAN LORENZO MERRIMAN.

REPORT OF SUMMER TERM.

The sixth annual summer term of the Aroostook State Normal School opened Tuesday, July 13, 1915, and continued for six weeks, closing Friday, August 20.

Number registered	24
Number entering	19

The teachers employed were: San Lorenzo Merriman, principal; Ardelle M. Tozier, E. M. Libby, A. B., Gertrude T. Morrell, assistants.

This school was conducted in connection with the summer school for teachers and although the registration was small the work proved very profitable.

Only three courses were given: The first half of the 1st term, the second half of the 2nd term, and the second half of the 3rd term.

Respectfully submitted,

SAN LORENZO MERRIMAN.

MADAWASKA TRAINING SCHOOL.

FORT KENT, MAINE, July 1, 1915.

To the Trustees of the State Normal Schools:

GENTLEMEN:—I have the honor of presenting to you the report of the Madawaska Training School, for the year ending June 11, 1915.

ATTENDANCE.

Number attending autumn term.....	169
Number attending winter term.....	185
Number attending spring term.....	149

The teachers for the year have been Mary P. Nowland, principal; assistants, May Brown, Katherine L. Lawlis, Sara H. E. Doone, Eleanor F. Welch, Martha B. Greene, Richard F. Crocker, Beulah C. Bates, Dora M. Bradbury.

Richard F. Crocker, a graduate of the University of Maine, was elected to fill the position left vacant by the resignation of Donald W. Sawtelle. Mr. Crocker began his work with the true Maine spirit, and has done it effectively.

Because of the increased numbers, Miss Dora M. Bradbury, a graduate of Mt. Holyoke College, was elected, after the autumn term began for the remainder of the year, and proved herself an interested and efficient assistant.

Desirable improvements were made during the summer, noticeably the addition of a bath room for the boys in the house.

The boys' dormitory and dining hall, for which the Legislature has appropriated money, will be a benefit, long needed and much desired. We hope to have it ready for occupancy by Jan. 1, 1916.

The names of the graduating class are as follows: Gertrude M. Albert, Madawaska; Annie M. Bellefleur, Madawaska; Carrie Bolstridge, Portage; Madeline Boulier, Fort Kent; Lizzie A. Brown, Eagle Lake; Alice M. Cyr, Madawaska; Délima Cyr, Madawaska; Madeline V. Cyr, Madawaska; Irène H. Daigle, Fort Kent; Emélie O. Dionne, Madawaska; Frank M. Eaton, Fort Kent; Stella B. Freeman, Fort Kent; Ida L'Abbé, Soldier Pond; Irène E. L'Abbé, Winterville; Dieudonné F. Long, Clair, N. B.; Yvonne E. Michaud, Wallagrass, Marie C. Nadeau, Fort Kent; George H. Pelletier, Daigle; Laura M. Pelletier, Daigle; Emma L. Pinette, Eagle Lake; Julia B. Raymond, Fort Kent; Aurore Roy, Frenchville; Rose M. St. John, Fort Kent.

Respectfully submitted,

MARY P. NOWLAND.

WASHINGTON STATE NORMAL SCHOOL.

MACHIAS, MAINE, July 1, 1915.

To the Trustees of the State Normal Schools:

GENTLEMEN:—I hereby submit to you the fifth annual report of the Washington Normal School. The attendance for the past year has been as follows:

Number registered in fall term, 1914.....	51
Number registered in winter term, 1915.....	53
Numbered registered in spring term, 1915.....	56
Number graduated in June 1915	29

The teachers for the year have been as follows: Wm. L. Powers, principal; Thomas C. Chaffee, Earle D. Merrill, Ella B. Quinn, Martha M. Tobey, Ethel I. Duffy, Cleora M. DeCoster, Elgiva B. Luce, assistants; Carrie M. Wight, critic teacher; Blanche E. Whitney, A. Genevieve O'Donnell, Roberta Puffer, Esther T. Kilby, model teachers; George F. Grafton, janitor.

The following named persons received diplomas June 11th, 1915:

Isabelle Cook Abernethy .	Edth Avis McRae
Gladys Look Allen	Florence M. Mealy
Bessie Mildred Babb	Dorothea Estelle Moore
Genesta Sawyer Beal	Grace Shaw Morrison
Carrie Jane Bell	Merle Caswell Norton
Ava Mae Davis	Ira Wayland Noyes
Ethel Augusta Dorr	Lena Oakes
Ralph George Foss	Grace Elizabeth O'Donnell
Alta Lillian Grant	Teresa Alma Parker
Grace Heffron Harmon	Ida Miller Peterson
Mildred Huntley	Grace Mildred Reed
Carolyn Mabelle Leighton	Adelaide Dudley Sargent

Margaret Gertrude McGuire	

Thomas C. Chaffee, who began the year as teacher of Science, was elected to the position of principal of the Gardiner High School, and went to his new field during the fall term. Mr. Earle D. Merrill, A. B., a graduate of Bates College, was elected

to the position. Mr. Merrill's experience both as an assistant teacher and as a high school principal fitted him for the position and the work of the science department has gone on without a break.

PRACTICE SCHOOL.

Our practice school consists of 150 pupils from the town of Machias. This practice school is maintained in the normal school building and every graduate from the normal school department has had twelve weeks of actual teaching experience under the supervision of a competent critic teacher. This teaching experience extends over the entire day, from the time the model school children arrive in the morning until they go home at night. About 30 of our model school children bring their dinners and the girls in training prepare warm food for these children every day. This actual experience in preparing school lunches gives to our students a thorough and practical training in one great school problem, namely, "What to do during the noon period."

Every student who graduates from the normal department is required to teach in every grade from the first to the ninth inclusive during her practice teaching. After a trial of a week in each of the four rooms a student is encouraged to select the grade for which she seems best adapted, and here she spends the remainder of her training. By trying each grade before her final choice is made, many a student is able to orient herself. We find that many who thought they preferred the lower grade work select upper grade teaching after a trial in all the rooms, and students who had desired to train for upper grade work often find primary work so attractive that they spend the last six weeks in grades one and two.

LIBRARY.

Our library has now been in use for two years and it is filling a long felt want.

MANUAL TRAINING.

Manual training continues to attract the students. Furniture making is taken up by the older students. A cabinet for mate-

rials has been made and several pictures for the school framed. Additional equipment has been provided for the Science and Domestic Arts Departments.

AGRICULTURE.

Mr. Merrill began to conduct the work in agriculture in January, 1915. The principles of the subjects are presented by means of recitations and laboratory work in the winter term, and the students apply these principles in the garden during the spring.

Next year the students will lay out their plots after the plan used in the course in practical gardening at the Massachusetts Agricultural College. These plots will be cared for during the summer vacation and the crops will be harvested in the fall. Such vegetables as can be used for preparing school lunches will be given to the domestic science department.

The work in gardening is not confined to the school garden, for the normal school students are required to supervise the home gardens of the model school pupils. The fact that over \$50 has been won by model school students in the state, county, and local contests of the Boys' Clubs is proof positive that the work in agriculture is valuable.

MUSIC.

Special attention is given to the principles of musical expression and their application. These include the right use of the voice, individual sight singing, ear training, study of interval, elements of harmony, and musical history. These subjects are studied in their relation to grade work and all pupils are required to present teaching exercises. Lessons in conducting are given and practice is required of all. Much time is devoted to the methods of teaching music in primary grades and in rural schools. In the latter part of each student's course opportunity is given for teaching in the grades.

Chorus practice is required twice a week. This enables the students to become acquainted with the work of the great composers, and to gain in appreciation of music.

The orchestra, which all are urged to join, meets each week and many classics are studied and performed in public.

The male quartet adds much to the enjoyment of the social functions in the school.

NATURE STUDY.

Nature study as distinct from zoölogy, agriculture, and botany is taken weekly throughout the two years. The aim of this course is (1) to familiarize the students with plant and animal life of this part of the state; (2) to awaken in them a love for nature and an understanding of and respect for her laws; (3) to present methods for teaching nature study in the grades.

The situation of the school makes it possible, during the fall and spring, to take classes on field excursions to study trees, flowers, insects, animals, and birds in their natural haunts. During the winter various pets are brought to school and cared for in the schoolrooms, and vivaria and aquaria are maintained.

The following animals have been studied alive in the school-room during the past year: Chipmunk, guinea pigs, English rabbit, alligators, green snake (snakes' eggs have been hatched and the young studied as well as the adults), frogs and toads in all states of metamorphosis, salamanders, and newts, predacious diving beetles, dragon flies in nymph and adult stages, grasshoppers in nymph and adult stages, spiders, black swallowtail, cabbage, and Compton tortoise butterflies, and cecropia, polyphemus, luna, and io moths in all stages.

During the winter term when long trips are impossible, a part of the time is given to the subject of astronomy and the prominent constellations are learned.

The school library contains many excellent reference books and manuals, and laboratory materials such as bird skins, mounted specimens of insects, pictures, microscopes, etc., are supplied.

Respectfully submitted,

WM. L. POWERS.

SUMMER SCHOOLS FOR TEACHERS.

Following are the reports in detail of the several state summer schools for teachers held in accordance with the provisions of Paragraph IV of Section 100 of Chapter 15 of the Revised Statutes :

CASTINE, MAINE, August 7th, 1915.

To the State Superintendent of Public Schools, Augusta, Maine:

DEAR SIR:—The state summer school for teachers held at the Eastern State Normal School, Castine, opened July 13th, and closed August 6th, under the instruction of the following teachers:

Albert F. Richardson, director; William D. Hall, teacher of school management and history of education in Maine; Edward E. Philbrook, geography and civil government; Helen M. King, methods in arithmetic and reading; Laura Belle Young, United States history and local history; Beth M. Jellison, local geography and English.

Special lectures in English were given, during one week, by Miss Esther Dunn of Bryn Mawr College.

Jerry March, of Philadelphia, who has for fourteen years been director of the famous choirs at Bethany church in that city and for nineteen years director of music in Girard college, took charge of the music course.

The students were very enthusiastic over this course and formed a "Jerry March Music Association of Maine," with a regular constitution and board of officers.

While the principal was director in name, after the school began the work was all done by William D. Hall.

Total number registered	92
Average age	22
Number who have taught.....	67
Average experience of these.....	168 weeks
Average experience of all.....	136 weeks
Graduates of normal schools.....	6
Graduates of high schools or academies.....	52
Number having elementary education only.....	11
Number of different towns represented.....	63

Number who have taught ten years or more.....	7
Number who have taught five years or more.....	10
Number taking course I.....	40
Number taking course II.....	13
Number taking elective or special courses.....	39

Several evening lectures were given during the term.

Respectfully submitted,

ALBERT F. RICHARDSON,

Director.

FARMINGTON, MAINE, Sept. 1, 1915.

To the State Superintendent of Public Schools, Augusta, Maine:

DEAR SIR:—The following is the report of the state summer school held at the Farmington Normal School for western Maine from July 13 to August 6, 1915. The instructors and subjects were as follows: Wilbert G. Mallett, school management, school law, civics; Samuel H. Reed, geography and history; Virginia A. Porter, English and penmanship; Katherine C. Aageson, arithmetic, primary methods in reading and number; Esther Cloudman Dunn, special lecturer in English for one week; Dr. Albert E. Winship of Boston, one lecture.

The total number registered	70
Number who had had teaching experience.....	52
Number under twenty years of age.....	20
Average age	23 years and 9.84 mo.
Graduates of secondary schools.....	56
Graduates of normal schools.....	3
Number teaching in Maine.....	70
Number taking course in arithmetic.....	53
Number taking course in grammar.....	53
Number taking course in history.....	22

Number taking course in reading.....	39
Number taking course in geography.....	24
Number taking course in school laws.....	15
Number taking course in penmanship.....	30

Respectfully submitted,

W. G. MALLETT,

Director.

MACHIAS, MAINE, Aug. 21, 1915.

To the State Superintendent of Public Schools, Augusta, Maine:

DEAR SIR:—A state summer school for teachers was held in Washington Normal School, Machias, for four weeks. The instructors were:

Wm. L. Powers, School Management and History of Education.

Martha M. Tobey, Grammar, Geography, and Arithmetic.

Elgiva B. Luce, U. S. History, Civics, and local History.

Dorcas R. Hoyt, Reading and local Geography.

Last year a six weeks' summer school was held and the work of the regular normal school for the first half of the fall term was offered. Of the six students who took this work five have since entered the normal school. There was no call for advanced normal school work this year, but several calls for F term's work. I feel that there are several teachers each year who would like to begin their normal school work during the long summer vacation and that the most of these would enter the regular normal school classes as soon as they learn what normal training means.

STATISTICS.

Number of students registered	27
Average age	20 4-11 years
Graduates of Secondary Schools	19
Graduates of Normal Schools	5
Graduates of Colleges	0
Number teaching in Maine	19
Average teaching experience	40 7-11 weeks
Number who have never taught	8
Number studying School Management	27
Number studying Arithmetic	18
Number studying Grammar	20
Number studying Reading	3
Number studying Local Geography	3
Number studying Geography	19
Number studying History	19
Number studying Local History	3

Number studying Civics.....	4
Number studying History of Education.....	7
Number studying Penmanship.....	2

Respectfully submitted,

WM. L. POWERS,

Director.

PRESQUE ISLE, MAINE, July 8, 1915.

To the State Superintendent of Public School, Augusta, Maine:

DEAR SIR:—The summer school for teachers held at the Aroostook State Normal School, Presque Isle, opened Tuesday, July 13, and closed Friday, August 7.

Number enrolled	22
Number entering	20
Number receiving certificates.....	17

Two courses were given; the first and second year's work as outlined by the Educational Department. This school was conducted in connection with the summer term of normal school and opened at the same date.

The teachers were: San Lorenzo Merriman, director; Ardelle M. Tozier, E. M. Libby, A. B., Gertrude T. Morrell, and Alice M. Coffin, assistants.

Respectfully submitted,

SAN LORENZO MERRIMAN,

Director.

TEACHERS' INSTITUTES AND CONVENTIONS.

Teachers' institutes have been held during the year as provided by Section 89 of Chapter 15 of the Revised Statutes. Table XXXII shows in detail statistics of these several institutes and of the convention of the Maine Teachers' Association. Addresses on the subjects named were given at the county meetings by the following persons not residents of the counties wherein the conventions were held:

Supt. George L. Farley, Brockton, Mass.:

"Special Classes for Special Schools."

Rabbi Stephen S. Wise, New York City:

"War Against War or Is War Cureless?"

Hon. H. C. Morrison, State Superintendent of Public Instruction for New Hampshire:

"The Purpose of the Modern School."

Miss Lucy Wheelock, Wheelock Training School, Boston:

"The Old and New in Education."

Principal W. G. Mallett, Farmington:

"Seeing and Knowing Things."

"The Fundamentals."

Principal A. F. Richardson, Castine:

"The Importance of the Primary School."

Principal W. E. Russell, Gorham:

"An Educational Comparison and Contrast."

President Robert J. Aley, University of Maine.

Professor James L. McConaughy, Bowdoin College:

"Habit and Memory in the School Room."

"The Training of Memory and Habit in the High School Classroom."

Professor F. D. Tubbs, Lewiston:

"Field Work in Physical Geography."

"Peace and War."

"Recent Events in Mexico."

Professor A. J. Jones, Orono:

"Efficiency as a Teacher?"

Professor Orren C. Hormell, Brunswick:

"Practical Civics."

- Professor W. B. Mitchell, Brunswick:
 "Teaching—A Dangerous Occupation."
 "The Boy and the Book."
- James A. Spalding, M. D., Portland:
 "Conservation of Vision."
- Mr. Ralph P. Mitchell, Orono:
 "Boys' Agricultural Clubs."
- Mrs. Frederick H. P. Abbott, Saco:
 "Nature Study a Dynamic."
- Rev. A. J. Torsleff, Bangor Anti-Tuberculosis Association:
 "The Air We Breathe."
 "Our Children and Our Schools."
- Payson Smith, State Superintendent of Public Schools:
 "The Tests of the Teacher."
 "The Rural School Situation in Maine."
- Josiah W. Taylor, State Inspector of High Schools:
 "A Course in Social Science for High Schools."
 "The Promotion of Pupils."
 "Range Finding."
- B. H. Van Oot, State Director of Practical Arts:
 "Practical Manual Training in the Public Schools."
 "Correlation of Manual Arts with Other Subjects."
 "Practical Art in Rural Schools."
 "The Educational Phase of Manual Arts."
- Marion C. Ricker, State Director of Household Arts:
 "Home Economics in the Rural Schools."
- Superintendent Charles N. Perkins, Waterville:
 "Teachers and Teachers."
 "The Superintendent's Part in Making an Efficient Teacher."
- Superintendent Charles E. Ball, Bingham:
 "Rural School Equipment."
- Superintendent John A. Cone, Brunswick:
 "The Saving Grace of Humor."
- Superintendent W. D. Fuller, Old Town:
 "The Relation of the Rural Teacher to the Community."
- Miss Florence M. Hale, Aroostook State Normal School:
 "Some Rural School Problems."
 "The Margin."
 "The Rural School."
 "The Teacher in the Community."

- Miss Lillian I. Lincoln, Farmington State Normal School:
 "School Play for the First Grade."
 Miss Mary M. Reed, Gorham State Normal School:
 "Socializing Language Teaching."
 "Primary Number."
 "Language Teaching."
 Miss Ella B. Quinn, Machias:
 "Practical Physiology in Intermediate Grades."
 Miss Helen M. King, Portland:
 "Saving the Individual."

STATE MEETING.

Following is the program of the meeting of the Maine Teachers' Association held in Portland, October 29 and 30, 1914.

The attendance at this meeting was 3964, surpassing all previous meetings.

THURSDAY MORNING, 8.30.

DEPARTMENT OF SUPERINTENDENCE AND SECONDARY SCHOOL
 ADMINISTRATION.

ASSEMBLY HALL, HIGH SCHOOL.

Chairman—Superintendent H. H. Randall, Auburn.

Business Session.

Reports of Committees.

"Organizing Education on the Vocational Basis," Dr. Thomas M. Balliet, Dean of School of Pedagogy, New York University.

10.00—SCHOOL MUSIC FESTIVAL. AUDITORIUM, CITY HALL.

This meeting was arranged to exemplify the work in music in the public school of Maine. The chorus of over two hundred voices was selected from students of secondary schools in the following places: Auburn, Augusta, Bath, Biddeford, Brunswick, Canton, Cape Elizabeth, Cornish, East Livermore, Fairfield, Gardiner, Hallowell, Kennebunk, Lewiston, Lisbon Falls, Norway, Oakland, Portland, Rumford, Sanford, South Portland, Turner, Waterville, Webster and Westbrook.

Grade School Building, South Hiram. Erected 1915.

The orchestra of forty pieces was selected from the school orchestras of Auburn, Bath, Brunswick, East Livermore, Gardiner, Lewiston, Portland and Yarmouth.

PROGRAM.

- Overture: "King Mydas," *Eilenberg* Orchestra
 "Pilgrims' Chorus" (from "Tannhauser") *Wagner* Chorus
 Violin Solo: "Polinaise," *Seybold* Kenneth Weeks, Bath
 "The Evening Wind" (from "Sampson and Delilah")
Saint-Saens Chorus
 Vocal Solo: "The Beautiful Land of Nod," *Greene*
 Miss Hazel M. Brett, Auburn
 "The Battle of Dawn" (from "Martha") *Flowtow* Chorus
 "Autumn Thoughts" *Salzer* Orchestra
 Vocal Solo: "A Birthday," *Woodman*
 Miss Helen Purdy Huston, Portland
 "How Lovely are the Messengers of Peace" (from oratorio
 "St. Paul") *Mendelssohn* Chorus
 Violoncello Solo: "Romance," *Matys*
 Miss Frances Southard, Bath
 "Oh, Italia, Italia Beloved" (from "Lucrezia Borgia")
Donizetti Chorus
 Vocal Solo
 "America the Beautiful" *Macfarlane* Chorus
 "Commemoration Grand March" *Gruenwald* Orchestra
 Director—George T. Goldthwaite

THURSDAY AFTERNOON, 2.00.

A—ELEMENTARY SCHOOL GROUP, AUDITORIUM, CITY HALL.

Chairman—Miss Adelaide V. Finch, Lewiston.

Organ Recital, Will C. Macfarlane, Municipal Organist, Portland.

"Let Me Do It Myself," Miss Lillie A. Williams, Department of Psychology, New Jersey State Normal School, Trenton.

Music, Organ.

"The Problem of Moral Education," Dr. Thomas M. Balliet, Dean of School of Pedagogy, New York University.

B AND C—SECONDARY SCHOOL GROUP AND COLLEGE GROUP.
FIRST PARISH CHURCH.

Chairman—President Arthur J. Roberts, Colby College.

“What the College Owes the Freshman,” Principal Daniel W. Abercrombie, Worcester Academy.

“The Transition from School to College,” President W. H. P. Faunce, Brown University.

Discussion led by Principal J. Orville Newton, Maine Wesleyan Seminary, Principal Stanley R. Oldham, Maine Central Institute and others.

4.15—GENERAL SESSION, AUDITORIUM, CITY HALL.

This session was devoted entirely to the transaction of the business of the Association.

THURSDAY EVENING, 8.00.

Overture: “Titania,” *Hildreth*, Orchestra of the Deering High School.

“Teachers Made Over.” Under this title William McAndrew of the Washington Irving School, New York, spoke on some practical receipts for making almost any teacher a lovely person.

Music: “Antony and Cleopatra,” Suite de Ballet, *Gruenewald*
1. “In the Arbor,” 2. “Dance of the Nubians,” 3. “Solo Dance,” 4. “Antony’s Victory,” Orchestra.

FRIDAY MORNING, 9.30, DEPARTMENT SESSIONS.

I. DEPARTMENT OF RURAL SCHOOLS, AUDITORIUM, CITY HALL.

Chairman—Superintendent Clifton E. Wass, Freeport.

“The Rural School and Rural Co-operation,” President Robert J. Aley, University of Maine.

“The Relation of Church and School,” Professor Calvin M. Clark, Bangor Theological Seminary.

“Minimum Essentials in Rural Education,” Superintendent F. W. Wright, Uniontown, Pennsylvania.

II. DEPARTMENT OF ENGLISH, ASSEMBLY HALL, HIGH SCHOOL.

Chairman—Professor William Hawley Davis, Bowdoin College.

"The Opportunity of the Teacher of English," President William DeWitt Hyde, Bowdoin College.

Discussions—"Spelling: Difficulties and Remedies," Miss Anna E. Coughlin, Principal of Rockland High School.

"Are Literary Societies Out of Date?" Principal Nelson J. Mixer, Lisbon Falls.

Business.

Discussions—"The Function of Pictures in the Teaching of English," Professor W. B. Mitchell, Bowdoin College. "The Offer of the State Library," Professor W. H. Hartshorn, Bates College.

III. DEPARTMENT OF SCHOOL COMMITTEE MEMBERS, ALDERMEN'S ROOM, CITY HALL.

Chairman—Mr. Edward W. Hyde, Bath.

Round Table Discussion.

The following topics were suggested for general discussion.

1. What are the general legislative duties of a superintending school committee?
2. How can a committee assist the superintendent in his work?
3. Should there be restrictions in the authority given a superintendent over the management of a high school?
4. Tendencies in school administration particularly as applying to the size and functions of school committees.
5. The one session versus the two sessions plan for high schools.
6. What can the committee members do to foster the establishment of industrial courses?
7. What are reasonable regulations governing the matter of conveyance of pupils to schools?

IV. DEPARTMENT OF COMMERCIAL BRANCHES, COUNCIL CHAMBER, CITY HALL.

Chairman—Mr. W. E. Chapin, Portland High School.

"Some Phases of Commercial Education," Mr. Rupert P. SoRelle, New York City.

Business.

Round Table, conducted by Mr. SoRelle.

General Discussion.

V. DEPARTMENT OF MODERN LANGUAGES, ROOM 16, CITY HALL.

Chairman—Professor A. N. Leonard, Bates College.

Report of the Annual Meeting of the N. E. M. L. A., Professor George T. Files, Bowdoin College.

Address in German—"Schlesiens Rolle in der Deutschen Literatur," Mr. Arthur Schubert, Abbott School, Farmington.

"Tendencies of Modern Language Instruction in the University and College," Professor Philip W. Harry, Colby College.

"Some Notable Books in Modern German History," Professor Roscoe J. Ham, Bowdoin College.

"Successful Experiments in Modern Language Teaching," Miss Annie Torrey, Cony High School, Augusta; Miss Verna Corey, Morse High School, Bath; Miss Theresa Callahan, Jordan High School, Lewiston.

"The Present Movement Towards Better Prepared Teachers of Modern Languages."

"How Can We Increase Our Membership?"

Business.

VI. DEPARTMENT OF SECONDARY SCHOOL AGRICULTURE, ROOMS
A AND B, HIGH SCHOOL.

Chairman—Principal F. E. Fortier, Freedom Academy.

"What Should We Teach and How Should We Teach the Fourth Year Agriculture," Principal Herbert S. Hill, Foxcroft Academy.

"The Boys' Club in the Agricultural Secondary School," Mr. Ralph P. Mitchell, State Leader of Boys' Agricultural Clubs, Orono.

"How Should We Teach Second Year Agriculture."

Report on Agricultural Text-books, Mr. Harry W. Smith, University of Maine.

"Should We Endeavor to Prepare the Average Agricultural Student for College," Dean Leon S. Merrill, University of Maine.

FRIDAY AFTERNOON, 2.00.

VII. DEPARTMENT OF PRIMARY SCHOOLS AND KINDERGARTENS,
ASSEMBLY HALL, HIGH SCHOOL.

Chairman—Miss Edna M. Hatch, Sanford.

"Profitable Recreation for Primary Grades," Miss Lillian I. Lincoln, Director of Training, Farmington State Normal School.

"Progressive Paper Cutting for Small Folks," Miss Hazel Grace Andrews, Instructor in Drawing, Sanford.

"The New Freedom in Education," Mrs. Dorothy Canfield Fisher, Arlington, Vermont.

VIII. DEPARTMENT OF GRAMMAR SCHOOLS, AUDITORIUM,
CITY HALL.

Chairman—Miss Mary L. Taylor, Mexico.

"The Art Idea in State Economy," Mr. James Frederick Hopkins, Director of Massachusetts Normal Art School.

"Current Issues and Tendencies in the Teaching of Reading," Mr. H. A. Brown, Deputy State Superintendent of Public Instruction for New Hampshire.

"Waste or By-Products in Our Grammar Schools," Superintendent Frank W. Wright, Uniontown, Pennsylvania.

IX. DEPARTMENT OF PUBLIC SCHOOL MUSIC, ROOMS A AND B,
HIGH SCHOOL.

Chairman—Miss Pamela C. Ware, Gorham Normal School.

"A System in Public School Music," Mr. Percy Graham, Director of Public School Music, Lynn, Mass.

Discussion.

"A Training Course for Music Supervisors," Mr. Albert E. Brown, Director of Music, State Normal School, Lowell, Mass.

Discussion.

"A Universal Method of Sight-singing," Professor Samuel Winkley Cole, New England Conservatory of Music, Boston, Mass.

Questions.

Round Table Talk for Normal School Music Supervisors.

X. DEPARTMENT OF MANUAL TRAINING AND DRAWING, COUNCIL CHAMBER, CITY HALL.

Chairman—Mr. Stephen E. Patrick, Westbrook High School.
 "Pattern Making and Moulding," Mr. J. F. Parker, Manual Training Department, Portland.

Questions.

"The Amount of Time Which Should be Given to Manual Training," Mr. E. W. Ireland, Director of Manual Training, Auburn.

Discussion.

"Forge Shop Work in Secondary Schools," Mr. E. W. Davee, University of Maine.

Questions.

"The Principles Underlying Industrial Arts in the Elementary Schools," Mr. Benjamin H. Van Oot, State Director of Manual Arts, Gorham.

XI. DEPARTMENT OF HOME ECONOMICS, ALDERMEN'S ROOM, CITY HALL.

Chairman—Miss Dorothea Beach, University of Maine.

"The Work at Nasson Institute," Miss Louisa I. Pryor, Dean of Nasson Institute.

"Home Economics Classes in the Bangor Schools," Miss Arra Sutton, Instructor in Domestic Science, Bangor.

"Gleanings from the Home Economics Annual Meeting," Miss Frances R. Freeman, University of Maine.

"Extension Work Among Girls' Clubs," Miss Marie Gurdy, University of Maine.

Question Box conducted by Miss Marion C. Ricker, State Director of Household Arts, Farmington.

XII. DEPARTMENT OF HISTORY, ROOMS E AND F, HIGH SCHOOL.

Chairman—Mr. E. S. Lewis, Edward Little High School, Auburn.

"The High School Teacher's Belief as to the Purpose of History Teaching in the High School," Principal Arthur W. Reynolds, Biddeford High School.

"What the College Instructor Demands of the High School History Training," Professor James M. Matthews, University of Maine.

"What the Community Asks of High School History Training."

XIII. DEPARTMENT OF CLASSICS, ROOMS H AND I, HIGH SCHOOL.

Chairman—Miss Mary C. Robinson, Bangor High School.

Report of the Committee on the Present Status of Greek in the Schools of Maine.

"A Novel of Nero's Time," Professor Paul Nixon, Bowdoin College.

"Adventures with Spoken Latin," James A. Spalding, M. D., Portland.

"The Value of the Classics to the Student and Teacher of English," Professor Curtis Hidden Page, Department of English, Dartmouth College.

XIV. DEPARTMENT OF SCIENCE AND MATHEMATICS, ROOM 16, CITY HALL.

Chairman—Professor Ralph H. McKee, University of Maine.

"The Use of Graphs in Elementary Algebra," Miss Fannie Harlow Robinson, Bangor High School.

"What Should be the Content of the Course in General Science Given in the First Year of High School?" Principal Ernest M. Libby, Presque Isle High School.

"When, Where, How and What Chemical Apparatus can be Purchased to Advantage by High Schools by Duty Free Importation?" Professor McKee.

FRIDAY EVENING, 8.00, GENERAL SESSION.

Organ Prelude, Will C. Macfarlane, Municipal Organist, Portland.

Business.

Music, Organ.

"The New Education," Dr. Woods Hutchinson.

"America," Convention with Organ Accompaniment.

On Wednesday evening, October 28th, was held the meeting of the Maine Schoolmasters' Club which took the form of a Banquet and Cabaret entertainment.

OFFICERS OF THE ASSOCIATION, 1913-1914.

President—D. LYMAN WORMWOOD, Bangor.
Vice President—RICHARD J. LIBBY, Caribou.
Secretary—HAROLD A. ALLAN, Augusta.
Treasurer—JOHN A. CONE, Brunswick.
Assistant Secretary—MISS GRACE M. COBURN, Auburn.
Auditor—CHARLES N. PERKINS, Waterville.

EXECUTIVE COMMITTEE.

The President, Vice President, Secretary, Treasurer, Kenneth C. M. Sills, Brunswick, 1914; Herbert J. Chase, Gardiner, 1915; Miss Clara L. Soule, Portland, 1916.

CASTINE CONFERENCE.

The seventh annual conference of superintendents was held at Castine, July 6th to 9th, 1915. In addition a school of instruction for superintendents of limited experience was held from July 10th to 15th. The following is the program:

TUESDAY, JULY 6, 8 P. M.

Opening Exercises.

Music, under the direction of Mr. Jerry March.

Address—"The Six and Six Plan of School Organization,"
 J. E. Burke, Associate Superintendent of Schools, Boston.

Discussion and Questions.

WEDNESDAY FORENOON, 9.15 TO 12.

Opening Exercises, Assembly Hall.

Music, Direction of Mr. March.

I. Reports on School Reorganization.

Superintendents who have recently undertaken to modify the regulation nine grade system are requested to be prepared, without further notice, to give five minute reports on the results thus far achieved with suggestions and criticisms. An opportunity will be given for discussion and questions.

Recess.

2. "Home Study in Maine Schools," Supt. H. H. Stuart, Augusta.

Discussion and Questions.

3. Spelling Reform, Mr. Henry G. Paine, New York City.

WEDNESDAY AFTERNOON, 2 TO 4.

Discussion of the Course of Study.

1. Geography, opened by Supt. W. D. Fuller, Old Town, Orono.

Discussion and Questions.

2. Practical Observations on the Practical Arts in Maine Schools, Mr. B. H. Van Oot, State Director of Practical Arts.

Discussion and Questions.

3. Boys' Agricultural Clubs, Mr. Ralph P. Mitchell, University of Maine.

Discussion and Questions.

WEDNESDAY EVENING, 8 TO 11.

Social Meeting, Acadian Hotel.

THURSDAY FORENOON, 9.15 TO 12.

Opening Exercises.

Music, Direction of Mr. March.

1. "The Curriculum of a Rural School—I," Mrs. Katherine Cook, United States Bureau of Education.

Discussion and Questions.

2. "The State Normal Schools and the Public School System. Their points of contact and their mutual obligations," Principal W. G. Mallett, Farmington.

Discussion and Questions.

THURSDAY AFTERNOON, 2 to 4.

Discussion of the Course of Study.

1. History and Civics, opened by Supt. John C. Merrill, Machias, Machiasport and East Machias.

2. "A Just System of Appointment," Hon. Chas. D. Hine, Secretary, Connecticut State Board of Education.

FRIDAY FORENOON, 9.15 TO 12.

Opening Exercises, Assembly Hall.

Music, Direction Mr. March.

1. "The Rural School Curriculum—II," Mrs. Katherine Cook.

Discussion and Questions.

10.45 TO 12.

2. "The Responsibility of the College to the Freshman Student," Pres. R. J. Aley, University of Maine.

Discussion and Questions.

FRIDAY AFTERNOON, 2 TO 4.

1. Discussion of the Course of Study.

Language and Grammar Teaching, opened by Supt. Roscoe L. West, Farmington, Wilton.

2. The State Course of Study, State Supt. Payson Smith.

CONFERENCE OF SECONDARY PRINCIPALS.

All evening sessions and the session of Wednesday forenoon were held jointly with the superintendents of schools. See the foregoing program of superintendents' conference for details.

WEDNESDAY AFTERNOON, 2 TO 4.

Chairman—Prin. Arnold M. Sanborn, Waterville.

1. "Clean Athletics," L. H. Conant, Westbrook.

Discussion.

2. "The High School, a Part of Our Public School System," Prof. Jas. L. McConaughy, Bowdoin College.

Discussion and Questions.

THURSDAY FORENOON, 9.15.

Opening Exercises, Assembly Hall.

Chairman—Prin. W. B. Jack, Portland.

1. "Defective English, Placing the Responsibility," Prof. Herbert C. Libby, Colby College.

Discussion, to cover also college entrance requirement in English.

2. "Why Not Drop the Classics," Prof. K. C. M. Sills, Bowdoin College.

Discussion and Questions.

THURSDAY AFTERNOON.

Chairman—Mr. J. W. Taylor.

1. "Economy in the High School," Prof. Jas. L. McConaughy.

Discussion.

2. Meeting with superintendents of schools for address of Mr. Hine.

FRIDAY FORENOON, 9.15 TO 12.

Chairman—Prin. G. H. Larrabee, Bangor.

Opening Exercises, Assembly Hall.

1. "The High School and the Training of Public School Teachers," Prin. W. E. Russell, Gorham.

2. Meeting with superintendents of schools for the address of President Aley.

FRIDAY AFTERNOON, 2 TO 4.

Chairman—Prin. E. M. Libby, Presque Isle.

Topics for round table discussion without previous assignment:

A. The place of formal examinations in rating the progress of students.

B. In what subjects may fixed standards of measurement be employed?

C. Graduation exercises.

D. College entrance. Values and defects of present plans employed in Maine.

SUPERINTENDENTS' SCHOOL OF INSTRUCTION,

SATURDAY, JULY 10—THURSDAY, JULY 15.

The work of this school was planned for the purpose of assisting superintendents of comparatively brief experience and those who contemplate taking up the work of supervision.

Course I—Practical phases of school administration conducted by State Supt. Payson Smith.

Saturday, July 10—Business phases of school administration.

Monday, July 12—The superintendent and the school committee.

Tuesday, July 13—The superintendent and the teaching force.

Wednesday, July 14.—The superintendent and the community.

Thursday, July 15—School Law.

Course II—Essentials of Method, Miss Lillian I. Lincoln, Director of Training, Farmington State Normal School.

The work of this course was arranged so as to assist superintendents in measuring and judging the work of teachers.

Saturday, July 10—Conducting a recitation.

Monday, July 12—An efficient primary school.

Tuesday, July 13—Methods in arithmetic.

Wednesday, July 14—Geography and history.

Thursday, July 15—Teaching the language arts.

Course III—Problems of Rural Supervision, Prof. A. J. Jones, University of Maine.

Saturday, July 10—The school building and grounds.

Monday, July 12—The equipment of a rural school.

Tuesday, July 13—Problems of grading, promotion and course of study as found in the rural school.

Wednesday, July 14—Improving the efficiency of rural teachers.

Thursday, July 15—The rural school and the rural community.

CHAPTER V.

STATE CERTIFICATION OF TEACHERS.

July 1, 1915, marked the close of the first school year during which the state certification of teachers was in full force. Up to that time there had been granted 7251 certificates of elementary grade, 1279 of secondary grade and 370 for the teaching of special subjects. In these three groups the year showed an increase over that preceding of 4388 elementary, 711 secondary and 164 special. No comparison of these figures is to be made since those certificates which were granted previous to September 1, 1914, were upon purely voluntary application and in anticipation of the requirements of the law.

In addition to the certificates granted there were issued also 1386 temporary teaching permits, which entitle the holder to teach for a period of one year and are not renewable. The total number of teachers thus serving under temporary permits was approximately 25 per cent of the whole number employed. A marked reduction in this percentage may be expected as the requirements of the law become more generally known among those who intend to take up the work of teaching. Many of those to whom temporary permits were granted were undoubtedly eligible to receive certificates on the basis of teaching service, but did not make application until too late to receive certificates before the opening of the term for which they were to be employed.

Two general examinations of candidates for state certificates were held during the year—one on the last Saturday in February and the other on the last Saturday in June. At the examinations 837 candidates presented themselves. To accommodate the large number who were expected to appear, arrangements were made to hold these examinations in some 99 different places in the state under the immediate direction of local superintendents of schools. Whether or not it will prove desirable to continue this policy of holding the examinations in so many places each time must be determined by future developments.

Superintendents have shown a worthy spirit of coöperation by their willingness to conduct the examinations with little or no expense to the state. Under these circumstances it has not been necessary for candidates to travel long distances in order to reach a place of examination.

PENSIONS.

The total number of pensions granted to teachers of long service since the act establishing them became effective was 186 on July 1, 1915. Of the total number granted 15 were terminated on account of death. The number granted during the past year was 35, while 12 were terminated by the decease of the holder within the year. The amount paid by the state for pensions during the year was \$22,251.11. No appropriation made by the legislature can be conceived as being of greater value to those for whose benefit it is intended than this recognition of long and faithful service in training the youth of the commonwealth.

PROFESSIONAL SUPERVISION.

One of the most direct indications of school progress is shown by the continued increase in the number of towns employing the services of professional superintendents of schools who devote their entire time to the direction of schools. Within the year six new unions of towns have been formed and seventeen towns thus added to the list of those having professional supervision. The total number of schools under such supervision is 3,421, an increase of 223 over last year.

Three classes of cities and towns employ professional superintendents.

The first class includes those cities and towns that have united with others for the employment of a superintendent and receive State aid therefor. In this group are 238 cities, towns and plantations forming 87 unions.

The second class includes cities having more than fifty schools, also receiving State aid for supervision. Seven cities make up this group.

The third class includes one city which employs a professional superintendent devoting his entire time to the work of supervision but receiving no State aid therefor.

Figure showing number of public schools (elementary and high) under professional supervision for period of ten years.

The constant and steady growth of professional supervision indicates that a plan must soon be entered upon to make such supervision State-wide in its scope. An analysis of the percentage given in the accompanying figures indicates that although less than half of the towns employ professional superintendents, large proportions of the schools, the school enrollment and the school population are under professional supervision. In order to extend the plan to reach a greater number of smaller towns without materially increasing the State appropriation for the purpose, influence must be brought to bear for the admission of additional towns to unions already formed. In connection with this a study will be made of the union lines as they are now drawn with an attempt to determine the conditions favorable or unfavorable for the extension of these lines. Without doubt many cases will be found where one or more towns may be added to unions without economic loss to the towns of the original union and without the imposition of an extra burden upon the superintendent. This is practically true in unions wherein the schools are well centralized and in those well organized and served by superintendents of experience.

SCHOOL LEGISLATION.

The legislature of 1915 made several changes in the laws relating to schools which are of importance in their bearing upon certain well established educational policies of the state. In order that these changes may be seen as a part of the whole fabric of school legislation rather than as disconnected fragments, it may be well to present a brief resume of the more important changes which have been made in the statutes affecting educational activities during the past ten years.

In 1907 two very important acts were passed, both of which, while embodying no entirely new principles, fixed distinctly new standards and led in subsequent years to a far more intimate relation between the state and the individual towns and cities. The first act increased the tax for common schools known as the School and Mill Fund from one mill to one and one-half mills, thus placing in the hands of state authorities the collection and distribution of school funds to a much greater amount than previously. The second act was a general revision of the law providing for the union of two or more towns for the

employment of a professional superintendent of schools. By this act the payment of two-thirds of the superintendent's salary by the state instead of one-half as formerly provided was allowed and the maximum liability was increased from \$500 to \$800. This made it possible for the smaller towns to take advantage of this provision without large local assessments and resulted in an immediate and large increase in the number of towns acting favorably on the formation of unions with other towns. A discussion of the growth of professional supervision occurs in another part of this report.

Among other acts of the 1907 legislature was that which required the furnishing of flags to all schools by municipal officers at the expense of the municipalities upon report of the superintendent of schools showing what schools were not already provided.

THE LEGISLATURE OF 1909.

The session of the legislature of 1909 was especially notable for the amount of school legislation which it put into effect as well as for the sweeping character of the changes which were made. The complete redrafting of the Free High School law, the Act Relating to the Common School Fund, the creation of the Equalization Fund, and the increase in the minimum length of the school year were all of far reaching importance.

By the Act for the Improvement of Free High Schools a fundamental reorganization of the whole system of secondary education was effected. The classification of these schools in three groups was provided for under the immediate direction of the State Superintendent of Schools and provision was also made for their systematic inspection so that reports might be available upon which the classification could be based. The maximum amount of state aid in reimbursement to towns and cities for expenditures in the maintenance of high schools was at the same time increased from \$250 to \$500 per year on the basis of two-thirds the expenditure for instruction.

Towns not maintaining high schools of standard grade and consequently being liable for the tuition of pupils attending secondary schools in other towns were brought within the provisions of the act and state reimbursement for tuition thus paid was established upon the same two-thirds basis instead of one-

Two Room Rural School, North Paris. Erected 1915.

half as previously with a maximum liability on the part of the state of \$500 in place of \$250. Pupils having tuition paid by the towns in accordance with this statute were required to pass examinations in common school branches from questions provided by the state superintendent of schools. These examinations have been given under the direction of the local superintendents and the papers graded and the certificates issued by them.

Other secondary school legislation provided that towns might by special vote raise money for the conveyance of pupils to secondary schools. Free tuition was also made available for children in unorganized townships who were qualified to enter high school.

The Act Relating to the Common School Fund centralized still more completely the collection and distribution of money for the support of common schools by assessing a state tax for that purpose of one and one-half mills upon all property in the commonwealth in addition to the tax of one and one-half mills previously in force. Besides the increase in the amount of the fund thus raised an entirely new principle in the manner of its distribution was introduced. Up to this time the basis of distribution was furnished by the school census which included all persons between the ages of five and twenty-one years on April 1 of each year. The common school fund provided by this act was, however, to be distributed among the municipalities of the state as follows: one-third according to the number of persons between five and twenty-one years of age and two-thirds according to the valuation of the municipalities. The distribution of the School and Mill Fund arising from the original mill tax, the tax on savings banks and trust companies and the interest on the permanent school fund remained as before upon the basis of the number of persons of school age as determined by the school census.

Partly as a result of inequalities made evident by the adoption of the principle of distribution on the basis of valuation the legislature authorized the deduction of a certain amount from the School and Mill Fund and designated this as the Equalization Fund for Common Schools. It was specified that this fund should be apportioned under the direction of the State Superintendent of Schools to those towns whose tax rate for

common school purposes should exceed four mills on each dollar of valuation.

A long forward step was taken when the bill became law raising the minimum number of weeks for which schools should be maintained each year from twenty to twenty-six. Thus were all the youth of the state assured of school privileges for at least six months out of every twelve.

Worthy of special note also during this year was the establishing of the State Normal School at Machias making the total number of such schools five besides the Madawaska Training School at Fort Kent.

An act of considerable importance was that permitting towns and cities to authorize school committees to employ school physicians for the examination of pupils attending the public schools. The school committees of all towns and cities were further charged with the duty of arranging for the annual examination of all pupils to ascertain whether any were suffering from defects of sight or hearing. The principle that the physical as well as the mental welfare of the child must be safeguarded was thereby given legislative recognition.

In the act providing for the approval of plans for school buildings by the State Superintendent of Schools and the Secretary of the State Board of Health this idea was carried still further. Correct standards of lighting, heating, ventilation and arrangement of rooms could henceforth be required of those in whose hands is placed the responsibility of constructing buildings for school purposes. An appropriation was made available from which the State Superintendent of Schools could arrange for plans and specifications of model school buildings of not more than four rooms to be loaned to school officers without charge.

As further evidences of concern for the health conditions surrounding public school pupils, should be mentioned the amendment which specified that no second hand text-books should be purchased for their use; the act authorizing superintendents of schools to exclude temporarily pupils suffering from certain infectious diseases or those being in a condition of uncleanness, and requiring parents to take the necessary steps to have the conditions remedied; the act for the safeguarding

of schools against danger from fire by requiring the installation of proper fire escapes and other precautionary means.

Other acts of the legislature of 1909 perhaps of less importance but yet worthy of mention may be considered very briefly. Authority was given school officers to compel the attendance at school of persons between the fifteenth and seventeenth birthdays who were not able to meet certain elementary educational requirements. Towns and cities were to make returns of receipts and expenditures for common schools for their several fiscal years rather than for the school year. Authority was given for the payment of teachers' salaries at frequent intervals. The use of the appropriation for teachers' meetings for the payment of services as well as expenses of speakers was authorized.

LEGISLATION OF 1911.

By far the most important piece of school legislation passed by the legislature of 1911 was the Act for the Encouragement of Industrial Education. This act provided for the introduction of such courses in manual arts, domestic science and agriculture in the state normal schools as would make graduates competent to teach these subjects in elementary schools, while in one normal school the course in manual arts and in another the course in domestic science should be so extended as to train persons to qualify as special teachers of those subjects.

Further, the act made provision for the approval by the State Superintendent of Schools of courses in each of the three branches above mentioned in any secondary school and the reimbursement by the State on a two-thirds basis to a maximum amount of \$500 per year for any one school for expenditure for instruction in such courses provided the average attendance should be not less than twelve pupils for any course in which state aid was sought. For approved courses in manual training and domestic science in elementary schools the state assumed the payment by reimbursement of two-thirds the salary of all teachers of these subjects up to a maximum of \$800 per year for any one teacher, provided the appropriation made by the town for the purpose of maintaining such courses should be additional to other amounts required by law to be appropriated for common schools.

Reimbursement by the state for two-thirds the expenditure for instruction in evening schools maintained by towns in accordance with the law was provided for when such schools offered courses in industrial education.

The liberal provisions of this act brought within reach of any town the opportunity for the establishment of such courses, without resort to burdensome local taxation for their support.

A slight change in the law relating to the schooling of children in the unorganized townships made it possible to centralize the control of their schools and to furnish professional supervision of their work. Nearly one thousand children in these townships were thus given the advantage of the personal attention which was necessary for the adequate development of that part of the school system of the state formed by these schools.

Children living at fog warning stations and at life saving stations were granted the same privilege already granted in case of lighthouse children, that of free tuition at any public school within the state which they might wish to attend.

Superintending school committees were given authority to regulate within reasonable limits the admission of persons of school age to schools so that undue interference with the organization of the schools need not result. Committees were also given authority to discharge superintendents for cause and for protracted absence from duty.

Superintendents of schools were required to return not only the number but also the names and ages of all persons between five and twenty-one years of age resident of municipalities under their jurisdiction on April 1 of each year as the basis for the apportionment of state school funds.

Towns not maintaining high schools were allowed to authorize the superintending school committees to contract with the trustees of an academy in an adjoining town for the education of pupils qualified to do high school work. Previous to this time such towns were allowed to contract only with an academy within the town.

The basis of the apportionment of the Equalization Fund was changed, making eligible any town whose rate of taxation for common schools should be in excess of the average of such rates for the state.

LEGISLATION OF 1913.

An act affecting every school system in the State was that which provided for the state certification of all teachers in the public schools. Similar legislation had failed of enactment at several preceding sessions but in 1913 the law was passed to become effective September 1, 1914. Provision was made for the granting of different grades of certificates either upon examination or upon presentation of evidence of special training or of not less than two years of successful teaching service. Elsewhere in this report is found a discussion of the results of this act after one year of operation.

Another very important piece of legislation and one which met with very little active opposition was that providing for the pensioning of teachers of long service. This act prescribing various conditions under which teachers long in the service of the state may receive pensions marked a distinct recognition of the economic circumstances under which teachers are employed, and has proven most effective in the betterment of teaching service.

The compulsory education law was strengthened by an amendment defining as truancy an absence for five day sessions or ten half-day sessions in any period of six months.

A change in the law provided for the election of truant officers by superintending school committees instead of by towns.

More complete and accurate financial records were assured by requiring the approval of all bills by the superintendent of schools and by a majority of the members of the superintending school committee. The superintendent also was authorized to act as the agent of the committee in keeping all financial records.

Pupils in all public schools were forbidden to participate in or be members of any secret society which should be in any degree a school organization. Punishment by expulsion if necessary was authorized at the discretion of the school committee in the cases of pupils violating this act.

Provision was made for the holding of an annual conference of professional superintendents of schools and payment of mileage was authorized for those superintendents living remote from the place of meeting, but only on condition that they be in regular attendance at the sessions of the conference.

The salary of the state superintendent of public schools was increased from \$2500 to \$4000 per year.

Pupils who completed an elementary course of study approved by the state superintendent of schools were exempted from the regular examination for entrance to high school under the statute providing free tuition.

The date for the return of school statistics was changed so that they should include full school years between July 1 and July 1.

The law designating legal school holidays was radically changed to modify the ever increasing tendency toward the closing of schools in the observance of special anniversaries. In 1907 Patriots' Day, April 19, was substituted for Fast Day. In 1909 Lincoln's Birthday, February 12, was added to the list and in 1911 Columbus Day, October 12, was recognized. In 1913, the observance of New Year's Day was eliminated. Lincoln's Birthday was designated for observance by special exercises for a part of the day only, while Washington's Birthday and Columbus Day were designated as school holidays at the discretion of the superintending school committee.

THE 1915 LEGISLATURE.

Without doubt the most important educational act of the legislature of 1915 was that which fixed thirty weeks as the minimum length of time for which towns may maintain schools during each year. Taken in connection with the act of 1909, the increase in the minimum length of the school year as fixed by law now amounts to ten weeks, or exactly fifty per cent in a period of six years.

Another act affecting a large proportion of the towns is that requiring that all of them shall use either the course of study for elementary schools prescribed by the state or a course arranged by the local school committee and approved by the state superintendent of schools.

The amount of the equalization fund for the benefit of the poorer towns was increased and a new principle in its distribution was introduced by requiring that no town should be eligible to receive an apportionment unless it has a municipal tax rate in excess of the average for the state as well as an excess school tax rate as already provided.

High School Building, Sedgwick. Erected 1915.

The principle of requiring higher professional standards was further emphasized in the act providing that after July 1, 1916, all superintendents of schools should hold either teachers' state certificates or certificates of superintendence grade granted on examination covering professional subjects. Thus are teachers assured that those who have supervision and direction of their work shall have at least the minimum educational requirements demanded of a teacher herself.

For many years towns had been required to carry forward unexpended balances on the common school account while cities were exempt from this provision of the law. An amendment was adopted whereby these unexpended balances must in the future be carried forward by cities also.

The law relative to the furnishing of flags for all schools was strengthened and made more definite while superintendents of schools were further charged with the duty of seeing that they are displayed on appropriate occasions.

Evening schools which formerly had received state aid when offering courses of an industrial nature were no longer to be eligible to such aid unless the enrollment in such courses is at least twenty-five per cent of the total enrollment in the school.

An appropriation was made whereby high schools in towns having no public libraries may have the benefit of traveling libraries made up for that particular purpose and sent out by the State Librarian.

The maximum amount of income from invested funds which an academy may receive and still retain eligibility to state aid was increased from \$1600 to \$2000.

School committees of towns under contract with an academy for the education of their high school pupils were given participating authority with the trustees in arranging the course of study whenever the academy has less than \$25,000 endowment. Remotely situated plantations were offered the services of the general agent of schools in the unorganized townships for professional supervision upon payment of twenty-five dollars for each school maintained in the plantation.

The board of trustees of state normal schools was given full authority over the course of study of such schools.

APPENDIX

TABLE No. I.
COMMON SCHOOL STATISTICS.
Showing Attendance and Registration for Year Ending July 1, 1915.
 ANDROSCOGGIN COUNTY.

Towns.	Number of persons in town between the ages of five and twenty-one years.		Number of different pupils registered in common schools from July 1, 1914, to July 1, 1915.		Number previously registered in some other school in the town during the year.	Number previously registered in schools of some other towns or cities of the state during the year.	Number not previously registered in any other school during the year.	Number registered in rural schools.	Number registered in village schools.	Number registered in city schools.	Number conveyed at expense of town.	Aggregate attendance.	Average daily attendance for year.	Percentage of registration of all persons of school age.	Percentage of average attendance of pupils registered.	Average length in days of school year.	Number of days schools were maintained for year.	Number of compulsory school age attending private or parochial schools.	Number not of compulsory school age attending private or parochial schools.	Number of persons of compulsory school age not attending school regularly.	Number excused by school authorities from regular attendance.

APPENDIX.

TABLE No. VII.
COMMON SCHOOL STATISTICS.
Comparative Statement A—Annual.
Showing Comparison of Certain Items in School Reports
of the Years 1914 and 1915.

ITEMS.	1915.	1914.
Whole number of persons of school age.....	225,013	221,271
Number of different pupils registered in common schools.....	133,036	130,916
Number registered in rural schools.....	51,960	49,645
Number registered in village schools.....	48,330	47,595
Number registered in city schools.....	32,746	33,676
Number conveyed at expense of town.....	7,910	7,716
Average daily attendance for year.....	101,996	100,966
Average length in days of school year.....	166	166
Number of persons of compulsory school age not attending school regularly.....	1,764	2,510
Number excused by school authorities from regular attendance.....	910	1,225
Number of different males employed as teachers in common schools.....	530	484
Number of different females employed as teachers in common schools.....	5,743	5,876
Number continued in the same school for the entire year.....	3,427	3,288
Number having had previous experience.....	5,349	5,384
Number who are graduates of normal or training schools.....	2,245	2,128
Number holding State certificates.....	5,051	3,985
Number who attended teachers' meetings.....	4,203	4,038
Number attending summer schools.....	342	443
Average wages of male teachers per month.....	\$53 04	\$54 16
Average wages of female teachers per week.....	\$10 77	\$10 47
Number of common schools in the State.....	4,696	4,634
Number of one room, rural or suburban.....	2,359	2,396
Number of rural schools in buildings of more than one room.....	183	134
Number located in villages.....	1,314	1,293
Number located in cities.....	829	811
Number of graded schools.....	3,407	3,252
Number not using a course of study.....	605	670
Number having branches of the S. I. L. M.....	562	632
Number having libraries.....	1,198	1,191
Number of public school buildings in the State.....	3,728	3,923
Number of new school buildings during the year.....	44	44
Cost of same.....	\$237,270	\$850,728
Estimated value of all school property.....	\$10,021,081	\$9,492,836
Number of schoolhouses in good condition.....	3,082	3,021
Number supplied with flags.....	2,935	2,902
Amount of common school money available from town treasuries.....	\$860,607	\$810,485
Amount available from State treasury.....	\$1,531,163	\$1,532,581
Amount available from local funds.....	\$53,664	\$60,356
Total amount available, common school purposes exclusively.....	\$2,445,434	\$2,403,422
Total expenditures for common school purposes exclusively.....	\$2,326,795	\$2,264,288

TABLE No. VIII.
COMMON SCHOOL STATISTICS.
Comparative Statement B—Decennial.

**Showing Comparison of Certain Items in School Reports
of the Years 1905 and 1915.**

ITEMS.	1915.	1905.
Whole number of persons of school age.....	225,013	207,284
Number of different pupils registered in common schools.....	133,036	132,448
Number registered in rural schools.....	51,960	55,444
Number registered in village schools.....	48,330	41,766
Number registered in city schools.....	32,746	35,238
Average daily attendance for year.....	101,996	97,845
Average length in days of school year.....	166	139
Number of different teachers employed.....	6,273	6,658
Number continued in same school for entire year.....	3,427	2,584
Number having had previous experience.....	5,349	5,682
Number who are graduates of normal or training schools.....	2,245	1,613
Average wages of male teachers per month.....	\$53 04	\$38 32
Average wages of female teachers per week.....	\$10 77	\$7 37
Number of common schools.....	4,696	4,605
Number of rural schools.....	2,542	2,737
Number of schools located in villages.....	1,314	1,057
Number of schools located in cities.....	829	811
Number of graded schools.....	3,407	1,922
Number not using a course of study.....	605	2,002
Number of public school buildings.....	3,728	3,889
Number of schoolhouses in good condition.....	3,082	3,245
Number supplied with flags.....	2,935	2,002
Amount of common school money available from town treasuries.....	\$860,607	\$984,856
Amount available from State treasury.....	\$1,531,163	\$567,192
Amount available from local funds.....	\$53,664	\$45,608
Total amount available for common school purposes exclusively.....	\$2,445,434	\$1,597,656
Total expenditures for common school purposes exclusively.....	\$2,326,795	\$1,518,797

TABLE No. IX.
SECONDARY SCHOOLS—Comparative Statement.
Showing Comparison of Certain Items of Secondary School
Statistics of the Years 1914 and 1915.

HIGH SCHOOLS.

ITEMS.	1915.	1914.
Number of free high schools receiving State aid	195	189
Number of towns maintaining free high schools	192	185
Number of different pupils registered	14,650	13,704
Average attendance	12,899	12,090
Number of weeks schools were maintained	6,866	6,562
Number of resident pupils	13,147	12,261
Number of non-resident pupils	1,503	1,443
Number of different persons employed as teachers, males	255	259
Number of different persons employed as teachers, females	454	452
Average wages of male teachers per month	\$110 51	\$107 72
Average wages of female teachers per week	\$16 04	\$15 44
Amount available for high school purposes for fiscal year	\$576,520	\$530,259
Amount expended for instruction for fiscal year	\$470,461	\$445,531

CONTRACT TOWNS.

Number of towns contracting with academies	37	35
Number of different pupils registered	1,934	1,805
Average attendance	1,697	1,579
Amount available for secondary school purposes for fiscal year	\$59,840	\$57,808
Amount expended for instruction for fiscal year	\$57,481	\$52,898

ACADEMIES.

Number of academies reporting	50	49
Number of different pupils registered	4,292	4,205
Average attendance	3,778	3,731
Average number pursuing secondary school studies	3,811	3,601
Number of weeks schools were maintained	1,819	1,784
Number of different persons employed as teachers, males	98	103
Number of different persons employed as teachers, females	159	156
Average wages of male teachers per month	\$119 86	\$115 73
Average wages of female teachers per week	\$15 24	\$4 64
Amount of permanent assets	\$3,298,346	\$3,277,009
Amount of current income	\$337,448	\$332,349
Amount expended for instruction	\$176,613	\$167,163
Amount expended for all purposes	\$335,362	\$320,076

PAYMENTS FOR TUITION MADE BY TOWNS NOT MAINTAINING STANDARD SECONDARY SCHOOL COURSES.

Number of towns reporting	154	187
Number of pupils for whom tuition was paid	1,473	1,609
Amount expended for tuition	\$39,172	\$40,786

CLASSIFICATION OF SCHOOLS.

Number of high schools and academies approved in Class A	196	188
Number of high schools and academies approved in Class B	23	21
Number of high schools approved in Class C	29	30
Number of high schools classification undetermined	1	2

TABLE No. XX.
Showing Cities and Towns Employing Supervisors of
Drawing.

Towns.	Number of teaching positions.		Grades in common schools in which drawing is taught.	Classes in high schools in which drawing is taught.	Cost of special instruction in drawing for year ending July 1, 1915.

APPENDIX.

Summary of Statistics, Unorganized Townships.

I. NUMBER, SCHOOL POPULATION, ETC., OF TOWNSHIPS.

Number of townships for which school privileges were provided	72
Number of persons between five and twenty-one years of age, April 1, 1914 ..	834
Number of persons between five and twenty-one years of age, April 1, 1915 ..	879
Number of townships in which schools were maintained	47
Number from which children were schooled outside the township	25
Number of schools maintained within the townships	55

II. SCHOOL ENROLLMENT AND ATTENDANCE.

Number of different pupils registered from all townships in elementary schools	787
Number of different pupils registered in all schools maintained within the townships	738
Number of different pupils attending elementary schools in outside towns ..	49
Number attending secondary schools	12
Aggregate attendance in schools within the townships	67,236
Average daily attendance in schools within the townships	478
Average length in days of the school year	141

III. TEACHERS.

Number of teaching positions	55
Number of different teachers employed	83
Number having previous experience	75
Average weekly wages, including board	\$11 51

IV. SPECIAL SCHOOL CONDITIONS.

Number of pupils not absent one-half day	[317
Number of cases of tardiness	1,621
Number of citizens visiting schools	447

V. FISCAL.

Amount paid for wages and board of teachers	\$17,015 26
Amount paid for transportation of pupils	1,133 80
Amount paid for board and tuition of pupils	3,520 79
Amount paid for fuel and janitor	1,218 49
Amount paid for books and supplies	604 80
Amount paid agents for services and expenses	1,485 62
Total	\$24,978 76
