STATE OF MAINE.

EDUCATIONAL DEPARTMENT,

AUGUSTA, December 30, 1916.

*To the Governor, Oakley C. Curtis, and the Honorable
Executive Council:*

GENTLEMEN:—In accordance with the requirements of chapter 7 of the Resolves of 1895, I respectfully submit the following report of the condition, progress and needs of the public schools of Maine.

Very respectfully,

Your obedient servant,

GLENN W. STARKEY,

State Superintendent of Public Schools.

CONTENTS.

I. OF THE REPORT.

CHAPTER I.

Report of Schools.

Summary of all public appropriations and expenditures for current expenses of schools for fiscal years terminating within the twelve months ending July 1, 1916.

Resources	1-3
Expenditures	3-5

CHAPTER II.

General Survey of Conditions and Progress.

Common Schools	6
School Census, Registration and Attendance	6-7
Length of Year and Wages of Teachers	7-8
Physical Conditions	9
Financial Statement	9
Rural Schools	9-10
Schools in Unorganized Townships	10-11
Secondary Schools	11-13
Normal Schools and Training School	13-14
Summer Schools	14
Teachers' Institutes and Conventions	14-15
Administration	15
State Certification of Teachers	15-16
Teachers' Pensions	16-17
Equalization Fund	17-18
State Course of Study	18
Industrial Education	18-19
School Supervision	20-21

CHAPTER III.

Reports of State Agents and Principals of State Normal Schools.

Secondary Schools	22
(a) The Small Schools	23-25
(b) Recommendations	25-26
(c) Class B and Class C Schools	26-28
(d) Training Courses for Teachers	28-30

(e) The Junior High School	30-31
(f) Comparative Statistics	31-37
Rural Schools	38-39
Schools in Unorganized Townships	40-44
State Normal Schools	45
(a) Farmington	45-47
(b) Eastern (Castine)	48-51
(c) Western (Gorham)	52-55
(d) Aroostook (Presque Isle)	55-57
(e) Washington (Machias)	58-59
Madawaska Training School	60-61
Comparative Summary	62
Normal Schools and Training School—Fiscal Statement	63
(a) Appropriations, 1915	63
(b) Expenditures from Appropriations for 1915	63-65
(c) Balances Unexpended	65

CHAPTER IV.

Summer Schools for Teachers	66
(a) Castine	66-67
(b) Gorham	67-68
(c) Machias	68-69
(d) Fort Kent	69-70
Teachers' Institutes and Conventions	70-74
State Meeting	74-82
Castine Conference	83-87

II. OF THE APPENDIX.

Table Number I:	
Common School Statistics Showing Attendance and Registration and Summary by Counties	2-27
Table Number II:	
Common School Statistics, Summary by Counties Showing Distribution of Pupils in Common Schools	28
Table Number III:	
Common School Statistics Showing Facts Regarding Teachers in Common Schools and Summary by Counties	29-55
Table Number IV:	
Common School Statistics Showing Statistics Regarding Schools and Summary by Counties	56-81
Table Number V:	
Common School Statistics Showing Statistics Regarding School Buildings, School Property and Summary by Counties	82-107
Table Number VI:	
Common School Statistics Showing Appropriations and Expenditures out of State and Local Funds for Common Schools and Summary by Counties	108-135

Table Number VII:	
Common School Statistics Showing Comparison of Items in School Report of the Years 1915 and 1916	136
Table Number VIII:	
Common School Statistics Showing Comparison of Items in School Report of the Years 1906 and 1916	137
Table Number IX:	
Showing Amounts Due Towns in Aid of Common Schools out of the School and Mill Fund, Common School Fund, and Equalization Fund for the Year 1916	138-160
Table Number X:	
Secondary School Statistics Showing Facts Regarding At- tendance and Teachers in the High Schools	167-175
Table Number XI:	
Secondary School Statistics, Summary by Counties Showing Enrollment by Classes and Courses in Free High Schools and Academies	176
Table Number XII:	
Secondary School Statistics Showing Receipts and Ex- penditures in Free High Schools	177-183
Table Number XIII:	
Secondary School Statistics Showing Amounts Expended by Towns Contracting with Academies and Other Towns with Attendance of Resident Pupils	184-185
Table Number XIV:	
Secondary School Statistics Showing General Statistics of Academies	186-187
Table Number XV:	
Secondary School Statistics Showing Statistics Regarding Teachers in Academies	188-189
Table Number XVI:	
Secondary School Statistics Showing Permanent Assets, Cur- rent Income and Expenditures of Academies	190-193
Table Number XVII:	
Secondary School Statistics Showing Payments Made by Towns not Maintaining Standard Secondary School Courses for Tuition of Pupils	194-197
Table Number XVIII:	
Secondary School Statistics Showing Approved Secondary Schools	198-199
Table Number XIX:	
Showing Comparison of Items of Secondary School Statis- tics of the Years 1915 and 1916	200
Table XX:	
Showing Cities and Towns Employing Supervisors of Draw- ing	201
Table Number XXI:	
Showing Cities and Towns Employing Supervisors of Music	202-203

Table Number XXII:	
Showing Statistics of Kindergartens	203
Table Number XXIII:	
Showing School Statistics, Unorganized Townships	204-208
Table Number XXIV:	
Industrial Education, Showing Statistics of Courses in Man- ual Training	209
Table Number XXV:	
Industrial Education, Showing Statistics of Courses in Do- mestic Science	210
Table Number XXVI:	
Industrial Education, Showing Statistics of Evening Schools	211
Table Number XXVII:	
Industrial Education, Showing Apportionments of State Aid for Industrial Courses and Evening Schools	212-213
Table Number XXVIII:	
Showing Cities and Towns Reporting Employment of School Physicians	214
Table Number XXIX:	
Showing Results of Sight and Hearing Tests	215
Table Number XXX:	
Summary of Wages Paid to Teachers in Public Schools	216-217
Table Number XXXI:	
Showing Statistics on State Aided Supervision of Schools	218-222
Table Number XXXII:	
Showing Statistics of Teachers' Conventions	223
Table Number XXXIII:	
Showing Statistics of Pensions for Teachers of Long Service	224-227
Table Number XXXIV:	
Showing Resources and Expenditures Connected with the General Support of Schools, All Purposes	228-276
Table Number XXXV:	
Showing Report of Treasurer of the University of Maine	277-278

CHAPTER I.

REPORT OF SCHOOLS.

SUMMARY OF ALL PUBLIC APPROPRIATIONS AND EXPENDITURES FOR CURRENT EXPENSES OF SCHOOLS FOR FISCAL YEARS TERMINATING WITHIN THE TWELVE MONTHS ENDING JULY 1, 1916.

RESOURCES.

I. Amounts available from towns (for fiscal year 1915-16)

Raised for common schools..	\$754,461 00	
Unexpended balances for common schools	118,027 00	
From local funds for com- mon schools	60,309 00	
		\$932,797 00
For school superintendence.....	89,239 00	
For school committee expenses.....	12,282 00	
For free text books	132,108 00	
For repairs, apparatus and appliances..	266,456 00	
For manual training and domestic science	32,401 10	
For evening schools	9,978 68	
For secondary education (direct sup- port, contracts, tuition and conveyance)	557,395 87	
For miscellaneous expenses (compulsory education, medical inspection, rent, etc.)	22,463 00	
		\$2,055,120 55

II. Amounts available from State for distribution to towns and school superintendents

For common schools (fiscal year 1915-16)		
School and Mill Fund.....	\$777,330 99	
Common School Fund	747,731 77	
Equalization Fund	38,435 00	
		\$1,563,497 76
For school superintendence, (annual ap- propriation, 1916).....	74,000 00	
For repairs, apparatus and appliances (from Equalization Fund) (fiscal year 1915-16)	3,055 00	

PUBLIC SCHOOLS.

For free high schools and tuition reimbursement (fiscal year 1915-16).....	136,785 43	
		\$1,777,338 19

III. *Amounts available from State for special educational activities, higher education and educational institutions (annual appropriation 1916)*

For industrial education....	\$50,000 00	
For schools in unorganized townships	22,800 00	
For schools in unorganized townships from taxes and interest paid on fund.....	3,432 04	
		\$26,232 04
For summer schools for teachers.....	2,500 00	
For teachers' meetings.....	1,000 00	
For teachers' pensions	25,000 00	
For interest on funds	590 00	
For support of state normal schools and training school	90,000 00	
For insurance, normal school buildings	1,000 00	
For expenses of trustees of state normal schools	1,500 00	
For aid to academies	24,000 00	
For support of the University of Maine:		
For general support	122,500 00	
For animal husbandry.....	5,000 00	
For conducting scientific investigations	5,000 00	
For coöperative agriculture.....	8,047 00	
For expenses of trustees of University of Maine	400 00	
For support of State School for Girls..	30,500 00	
For support of State School for Girls from interest on funds on deposit in State Treasury	540 96	
For support of State School for Boys..	37,000 00	
For State School for Boys, Sanford Legacy	42 00	
For expenses of trustees of Juvenile Institutions	1,000 00	
For support of Maine School for Deaf	28,000 00	
For education of the blind.....	8,000 00	
		\$467,852 00

IV. *Amounts available from State for State administration purposes (annual appropriation, 1916)*

For salaries and expenses of state superintendent of schools and office assistants	\$9,200 00
--	------------

For high school inspection.....	2,200 00	
For supervision of schools of unorgan- ized townships	2,200 00	
For distribution of Equalization Fund..	2,000 00	
For printing, postage and office expenses	6,500 00	
For state certification of teachers.....	1,000 00	
For Rhodes scholarship	100 00	
For plans for school buildings.....	200 00	
		<u>\$23,400 00</u>

Total amount available from public funds and appropriations for current expenses of schools.....\$4,323,710 74

EXPENDITURES.

I. For activities supported wholly by amounts appropriated by towns
(fiscal year 1915-16)

For school committee expenses.....	\$12,135 00	
For free text books.....	133,679 00	
For miscellaneous expenses (compulsory education, medical inspection, rent, etc.)	22,040 00	
		<u>\$167,854 00</u>

II. For activities supported jointly by amounts appropriated by towns and State

For common schools (fiscal year 1915-16)	\$2,407,220 00	
For repairs, apparatus and appliances (fiscal year 1915-16)	289,019 00	
For school superintendence:		
By towns (fiscal year 1915-16)	\$89,561 00	
By State (year ending July 1, 1916)	77,869 47	
		<u>167,430 47</u>
For secondary education:		
Direct support (fiscal year 1915-16)	\$580,469 00	
Contracts (fiscal year 1915- 16)	61,347 00	
Tuition (year ending July 1, 1916)	57,110 52	
Conveyance (fiscal year 1915-16)	10,653 00	
		<u>709,579 52</u>

PUBLIC SCHOOLS.

For manual training and domestic science (industrial education) (fiscal year 1915-16)	67,504 00
For evening schools (industrial education) (fiscal year 1915-16).....	17,992 00
	\$3,658,744 99

III. For activities wholly supported or aided by amounts appropriated by State (year ending July 1, 1916)

For industrial courses in state normal schools.....	\$6,220 96
For industrial courses in academies	6,343 66
	\$12,564 62
For schools in unorganized townships..	24,394 00
For summer schools for teachers.....	2,495 19
For teachers' meetings	1,105 86
For teachers' pensions	22,921 39
For payment of interest on funds.....	590 00
For support of state normal schools and training school	98,012 91
For insurance of normal school buildings	2,642 19
For expenses of normal school trustees	1,455 02
For aid to academies	22,500 00
For support of the University of Maine:	
For general support.....	\$122,500 00
For animal husbandry.....	5,000 00
For conducting scientific investigation	5,000 00
For coöperative agriculture.	8,047 00
	140,547 00
For expenses of trustees of University of Maine	237 19
For support of State School for Girls..	30,778 31
For support of State School for Boys..	41,594 04
For expenses of trustees of Juvenile institutions	1,379 57
For support of Maine School for Deaf	28,280 25
For education of the blind.....	7,462 61
	\$438,960 15

IV. For State administration purposes from amounts appropriated by State (year ending July 1, 1916)

For salaries and expenses of state superintendent of schools and office assistants	\$8,510 99
--	------------

SUPERINTENDENT'S REPORT.

For high school inspection.....	2,185 23	
For supervision of schools in unorgan- ized townships	1,973 15	
For distribution of Equalization Fund..	1,003 54	
For printing, postage and office expenses	6,288 16	
For state certification of teachers.....	602 96	
For Rhodes scholarship	76 84	
For plans for school buildings.....	197 50	
	<hr/>	\$20,838 37

Total expenditures from public funds and appropria-
tions for current school expenses.....\$4,286,397 51

CHAPTER II.

GENERAL SURVEY OF CONDITIONS AND PROGRESS.

As required by law returns have been made for the school year ending July 1, 1916, by the municipal and school officers of the several cities, towns and plantations of the State. Statistics taken from these returns have been compiled and appear in the appendix of this report.

COMMON SCHOOLS.

An analysis of the figures contained in the returns for common schools furnishes in concrete form evidence of the continuance in a general way of those tendencies which have been noted in preceding years. For the most part these tendencies are toward growth and greater efficiency. Attention is directed in a few instances, however, to conditions which must be regarded as showing the necessity of increased effort and the setting of higher standards in order that some functions of the school system almost fundamental in their importance may be performed under more advantageous circumstances.

SCHOOL CENSUS, REGISTRATION AND ATTENDANCE.

The school census, including all persons between the ages of five and twenty-one years on April 1, 1916, showed a total of 226,237 of whom 113,942 were boys and 112,295 were girls, a gain in the total of 1224 over the figures for 1915. This gain is somewhat less than that for the preceding year.

The number of different pupils registered in the common schools from July 1, 1915 to July 1, 1916, was 133,407, an increase of 371 over the figures for 1915 and showing only a very slight change in the number of children for whom the public schools of the State were required to furnish school privileges. A slight decrease is noted in the number of pupils

conveyed at the expense of towns but this number remains practically at the same point as for 1915.

The percentage of registration of all persons of school age remains at fifty-nine, while the percentage of average attendance of pupils registered increased from seventy-six to seventy-seven, the actual average daily attendance for the year increasing by 881, while the total registration increased only 371 as noted above. In spite of this increase in the percentage of average attendance the number of persons of compulsory school age not attending school regularly increased from 1,764 in 1915 to 1,962 in 1916. This would indicate that regularity of attendance was less general among children of school age, but that the irregularity in individual cases was not so marked. It must be regarded, however, as a distinctly unfavorable situation when nearly 2,000 children whom the law specifically includes in its compulsory attendance provisions are allowed to remain out of school or to attend more or less irregularly. Any influence which can be brought to bear to bring about a more strict adherence to the provisions of this statute on the part of school authorities either through legislative enactment or community sentiment should be welcomed as contributing to the general welfare of schools throughout the State.

In certain industrial communities it may be wise to increase the compulsory age limit to sixteen years for pupils who have not completed the elementary school course, but any such provision of the law should for the present at least leave such compulsory attendance at the discretion of the superintending school committee. This would provide a means for keeping in school those boys and girls who are not allowed to work under the provisions of the child labor law except by special permission through the issuing of a work permit by the superintendent of schools, but who are not required to continue in school for that year under the present statute.

LENGTH OF YEAR AND WAGES OF TEACHERS.

An increase in the average length in days of the school year from 166 to 170 is indicated by the returns. This increase may undoubtedly be attributed in large part to that change in the law fixing the minimum school year at thirty weeks. The addition of an average of four school days to the attendance of each

child in the school system furnishes a factor whose importance should not be underestimated. Not only does this increase to an average of thirty-four weeks of school for all pupils reflect increased opportunity for them, but it also has a vital effect upon the annual wages of teachers.

The average wages of male teachers per month increased \$3.90 during the year, while the average wages of female teachers per week increased 36 cents. While these increases are comparatively slight, yet the added length of the school year brings these even small gains into greater prominence and shows a tendency toward the establishing of a reasonable level of teachers' salaries when figured on the basis of the amount received per year.

The number of teachers continued in the same school for the entire year increased by 260 over the year preceding, thus showing a continuance of the tendency toward permanency in the teaching force. The number of teachers who are graduates of normal or training schools also increased by 97. Both of these gains contribute to raising the standard of teaching efficiency and justify a further increase in the salary budget. The number of teachers having had previous experience is slightly less than that of the preceding year, but this does not necessarily indicate a corresponding lowering of the efficiency of the schools since the total number of different teachers employed was correspondingly less.

A considerable increase in the number of teachers attending teachers' meetings is noted over the preceding year which in turn showed a still further gain over the number attending in 1914. This fact serves to show either that teachers are voluntarily taking advantage more than ever of the opportunities offered for professional improvement, or that school authorities are emphasizing more generally the desirability of such improvement. Except for the fact that the number of teachers who attend summer schools has decreased during the past two years, the tendency toward professional improvement might be regarded as receiving an impetus worthy of special mention. A discussion of the summer school situation will be found in another section of this report.

PHYSICAL CONDITIONS.

Superintendents report a smaller number of school buildings in good condition than during the preceding two years. This is an encouraging fact, since it probably indicates not so much that the actual number of buildings in poor condition has increased, as that the standard by which such condition is judged is gradually being raised so that buildings which would have been considered good a few years ago are now recognized by school authorities as not conforming to accepted standards. It is of course necessary to recognize that an undesirable condition exists before the defects can be remedied. There is probably no one matter upon which special effort may be used to better advantage throughout the state at the present time than that of school building improvement. The program should include not only the properly constructed new building, but special attention to those schoolhouses which have long done duty in the community which they serve, but which are no longer in keeping with the standards of the present day. The number of such buildings, especially in rural communities, is undoubtedly greater than any ordinary census would indicate. The interest which has been shown during the past few years in the improvement of physical conditions may well be made the foundation of a general campaign for such improvement with some possible changes in the law which would serve to encourage this movement.

FINANCIAL STATEMENT.

The value of all school property in the state is estimated at \$10,597,424.00. This includes new construction to the amount of \$494,302.00, during the past year.

By local taxation towns raised for the support of common schools \$872,488.00 in 1915 while the amount available from state school funds was \$1,559,236.00 and local gifts amounted to \$60,309.00. The total amount thus available shows an increase over the preceding year of \$46,599.00.

RURAL SCHOOLS.

Beginning with January 1, 1916, the General Education Board appropriated the sum of \$5,600.00 to be expended under the direction of the state superintendent of public schools for

the purpose of employing two agents for work especially in rural schools. The appropriation was made available also for use in paying the services of a clerk for these agents. The selection of these agents was made early in the year and a report of their work for the first six months under the arrangement will be found in succeeding pages.

In the beginning the work to which these agents were to give their attention was outlined on a basis sufficiently broad to admit of their carrying out so far as possible a campaign of improvement in the schools of rural communities without confining their activities to any particular phase of the situation. Their work has included the visiting of many rural communities in order that they might become familiar with actual conditions and for the purpose of conferences with school authorities and with teachers under their direction. Attention has also been directed toward the arousing of community interest through public meetings and through coöperation with existing agencies and in general, following up, at the request of local school officers, programs of improvement which have already been initiated. A partial survey of the state has also been made with a view to the extension of professional supervision through unions of towns and aid extended through personal conference to such towns as desired to organize under the provisions of the law for the employment of a superintendent of schools through the union of two or more towns.

The possibilities of more extensive coöperation through the rural school agents between the state department of education and towns more or less remote have become increasingly evident. Especially is this true with relation to improvements which are recommended as a definite program in connection with the making of physical conditions surrounding country schools more attractive and more sanitary, and in bringing to the schools suggestions in methods of instruction and more efficient school management.

SCHOOLS IN UNORGANIZED TOWNSHIPS.

Statistics showing in detail items relative to schools in the unorganized townships will be found in table XXIII of the appendix and the report of the agent in charge of these schools is included elsewhere. The general situation in these townships

remains practically the same as for several years. While the quality of instruction offered to the children in these remote parts of the state is as good as that given in similar groups of schools in rural communities, yet the surrounding conditions in many instances are so far from what is to be desired that some action on the part of the state must soon be taken to provide more suitable school buildings in a considerable proportion of these settlements. Their place as state schools should be such that they may be pointed out as furnishing model school conditions. This can never be true so long as the buildings in which the schools are held are below the standards which are set for other sections of the state.

It has seemed unwise during the period within which provision has been made for these schools to direct the funds available to other purposes than those of furnishing instruction and the necessary equipment for actual school room work. The experimental stage in connection with these schools has now long since passed and they have come to be recognized as an integral part of the state school system. In communities which have proven reasonably permanent there seems now no reason why the state should not assume the further responsibility of directing the erection of buildings which may be regarded as meeting reasonable standards.

SECONDARY SCHOOLS.

During the year the attention of the agent for secondary education was given almost exclusively to the small high schools. By an amendment to that section of the law relating to inspection of high schools modifying the requirement of annual inspection, more time was available for certain schools. Advantage was taken of this change to limit the inspection to certain groups of schools with longer visits for each. Following out a prearranged schedule the work was confined almost wholly to the small class A schools, for the most part to those with two teachers, and to the class B and class C schools. The agent was able in general to devote a day each to the schools of the first group and at least half a day each to the others. It was found that this gave much more time for conference with teachers on matters of classroom management, content of courses and general school activities.

The longer visits made it practicable for the visitor to take part from time to time in the recitations for the purpose of helping the teachers by illustration or suggestion. Frequently the teachers and superintendent spent an hour or more at the close of the session with the visitor discussing suggestions for the improvement of the school. The uniformly cordial response on the part of the teachers seemed to be evidence that work of this kind was of practical value.

In many cases the report of the visit was followed by a letter calling the attention of the committee to deficiencies or possible lines of improvement and asking for action. In practically all such cases immediate steps were taken to comply with the recommendations made.

The field work of the agent has not differed materially from that of previous years in the general plan; but the longer visit when needed was found to be of very great importance. Hitherto rarely more than a half day, and that often considerably reduced by exigencies of travel could possibly be allowed to a school. Such a visit was necessarily too limited for more than very superficial observation of the work, especially in the larger schools. It usually gave very little time for conference with teachers or school authorities.

During the past year contact with the larger schools was made for the most part through group conferences of teachers at the county teachers' meetings. In several of these a special program on the round table plan was arranged. Topics of general yet immediate interest were outlined, including such matters as the grading of pupils, study habits of pupils, securing supervised study, coöperation of the home, and the teaching of certain subjects such as English. As these meetings brought together the teachers of all classes of schools, the more important activities could be followed and new lines of progress developed. Altogether the round table conference proved a very acceptable and seemingly profitable program.

The report of the agent for secondary education found on another page refers especially to the comparative burden placed upon towns of varying valuation in maintaining high schools for the communities which they serve. This is a matter which is becoming increasingly important especially in the case of towns having a small amount of taxable property and which

find the burden of high school maintenance a problem for serious consideration.

The Junior high school has during the past year received its first introduction to the school system of Maine. The report of the agent deals somewhat fully with the organization of this school. It is undoubtedly true that the next few years are likely to see a great extension of school systems organized on this basis. Whether or not an attempt may be made successfully to carry the Junior high school into any except the most concentrated systems remains to be determined through careful experiment. It seems probable on account of the fact that comparatively few Maine towns and cities are adapted to centralization below the high school grade that school authorities in any except the largest school units will do well to follow rather than lead in the Junior high school organization.

NORMAL SCHOOLS AND TRAINING SCHOOL.

During the year the five state normal schools and the Madawaska Training School have continued to increase slightly the total of their attendance. The reports of the principals found on another page give in detail the work of these schools together with recommendations for their improvement. Included in these recommendations it will be noted that there is still a considerable amount of building construction necessary to make the schools fully able to meet the requirements which are placed upon them as state institutions and in order that their work may not be handicapped by lack of equipment.

There is now no school which does not have dormitory facilities and in only one instance, that of the Aroostook State Normal School at Presque Isle, is a school without a reasonably adequate school building. The needs of this school in that direction become more evident each year and not until the deficiency is remedied will it be possible for it to serve most efficiently the large and constantly growing territory in which it is located.

The increase in the expense of maintaining the several school plants and the large amount of detail connected with the business management of the schools makes it highly desirable that funds be made available for employment by the trustees of the normal schools of a man to act as their business agent in

all ways pertaining to the business transactions entered into in the maintenance of these schools and the additions which are constantly being made to their equipment.

SUMMER SCHOOLS.

Including the summer term at the Aroostook State Normal School there were enrolled 312 students in the state summer schools. The reports of the directors of these schools show that the usual amount of interest in them was manifested. The fact remains, however, that this opportunity for self improvement is not being taken advantage of to the extent that should be expected.

There are a large number of inexperienced and untrained teachers requisitioned each year for positions in the rural towns of the state. Most of them know late in the spring or early in the summer that they are to be employed at the opening of the fall terms of school. To these teachers the state summer schools offer the opportunity for a brief course of study of a professional nature which would eliminate a considerable amount of the aggregate waste annually involved in the attempts of such untrained teachers to adjust themselves to situations with which they are entirely unfamiliar. The benefits of even three weeks of practical professional training such as that which the summer schools afford should be so apparent to superintendents of schools that they could well make the employment of every candidate without training or experience conditional upon summer school attendance. The normal school plants could then be operated at full capacity and at a comparatively slight per capita expense.

TEACHERS INSTITUTES AND CONVENTIONS.

Elsewhere will be found statistics relative to the several county conventions of teachers and the programs of the meetings of the State Teachers' Association and the annual Castine Conference of Superintendents and Secondary School Principals. These meetings were all marked by the spirit of hearty coöperation which invariably characterizes them. The Castine Conference included in its enrollment practically all the professional superintendents of schools in the state and a good percentage of the secondary school principals. Each year the

number attending this meeting increases and it may safely be stated that there is no other single factor so potent as that in its influence upon the administration of Maine schools.

As noted in this report for the past two years there is a constantly increasing demand for institutes or conventions of teachers to include those from a much smaller unit than the county. There are approximately one-third of those making up the teaching force of the state who each year, are not brought into direct contact with any outside agency which can bring them inspiration or practical assistance in their work from other and broader fields of educational activity. So valuable an exchange of ideas results from small group meetings that some provision looking toward an increased number of these conferences is regarded as of really vital importance in helping to blend the educational forces of the state into an actively coöperative and coherent whole. A comparatively slight increase in the appropriation available for the purpose can be made to return a very disproportionate increase in effective service.

ADMINISTRATION.

In addition to its financial obligations the state, through its legislature, has assumed to a greater or less extent, responsibilities of an administrative nature to which specific reference has not been made in the preceding pages of this general survey. The following brief mention of some of these relations is for the purpose of calling attention to those which may be considered as of special importance in their bearing upon the school system of the state as a whole.

STATE CERTIFICATION OF TEACHERS.

The total number of teachers in elementary schools serving during the year under the authority of state certificates was 5,450, while the number of teachers holding temporary permits was 721. It is gratifying to note the reduction of 464, or more than one-third, thus indicated in the number serving under such local authority.

Three opportunities were offered for candidates to qualify for certificates of all grades by examination. A total of 665 persons appeared at these examinations which were held in

some ninety different places for the accommodation of those who could not well arrange to present themselves at a great distance from their homes.

No evidence has come to hand of undue hardship occasioned any town by reason of inability to secure teachers holding the required certificate or permit. While the system of state certification has been in effect for only two years, yet its advantages have been demonstrated in many individual instances. There are numerous cases in which teachers have determined to take further professional training in order that they might be able to qualify for certificates of a higher grade while still others have been encouraged and even required to make more complete their training along academic lines as a prerequisite to the granting or renewal of certificates. Thus is the standard of qualifications constantly being advanced and justification afforded for the demand on the part of teachers that the schedule of wages be raised in accordance with the advanced standard of service.

TEACHERS' PENSIONS.

Up to July 1, 1916, there had been granted a total of 210 pensions to teachers of long service under the provisions of the act passed by the legislature of 1913. Twenty-four were granted within the year and of the total number 189 were in force at the close of the year, showing that during the period since the law became effective twenty-one of those to receive pensions had died, four of them being within the year for which this report is made. The amount paid during the year from the pension appropriation was \$22,921.39, an increase of \$670.28 over the preceding year. A slight increase in the cost of these pensions may be looked for annually for a number of years on account of the fact that the majority of those pensions now in force were granted for half the regular amount under the retroactive provision of the law while those which will be granted in the future will come under the regular provisions. It is not likely that the total number will increase to any great extent.

Regardless of the amount which the state may be called upon to appropriate for this purpose under the present law there is no feature of the school system more worthy of active support

than this recognition of faithful service in the teaching profession. The fact that this law is on the statute books of Maine serves to place the state in the front rank of those in which progressive legislation is no longer something to be hoped for, but rather is an accomplished fact. Evidence is constantly coming to hand to show the wisdom of thus providing for those teachers who have given their best years to the most devoted form of service for the benefit of the rising generation.

EQUALIZATION FUND.

During the year \$46,475.00 has been apportioned from the equalization fund to those towns coming within the provisions of the law by furnishing evidence of tax rates for school purposes and tax rates for all municipal purposes both in excess of the average of such rates for all towns and cities of the state. The average of rates for school purposes was found to be .00295 and the average of rates for all municipal purposes was .0247. There were found to be 164 towns having rates for both purposes in excess of these averages, and apportionments were made to each of them in accordance with reports received from local authorities showing the specific needs of the schools in those towns. The particular purposes for which apportionments were made were increasing the length or sustaining a previous increase in the length of the school year, increasing or sustaining a previous increase in teachers' wages, the providing of needed equipment, special repairs on school buildings and the installation of modern heating or ventilating systems in rural schools. Aside from those towns which received apportionments from this fund because their tax rates were both in excess of the required rate there were 148 towns having one or the other of these rates in excess of the average, but which failed to secure an apportionment because the other was less than the average.

So long as the present inequalities exist in the burdens which different towns are required to bear in the support of their common schools the equalization fund furnishes an effective means for bringing about a more equitable condition. The total amount of the appropriation for the past two years has been \$50,000.00 per year, and under the present law it does not seem advisable that the amount should be very largely increased. A

change in conditions, however, may easily arise, making desirable an increase in the amount available for this purpose.

STATE COURSE OF STUDY.

At the Castine Conference of Superintendents of Schools, held in July, 1915, a movement was inaugurated looking toward the preparation of a revised state course of study for the elementary schools. Seven committees of three members each were appointed for this work and during the year following these committees formulated in a tentative way the material for such a course. At the Conference held in July, 1916, these committees presented the reports covering their work in each subject. A discussion of these reports was held and the particular points brought out in these discussions were recommended for further consideration by the committees. It is expected that these reports will be in complete form and that the course of study will be issued so that it may be placed in the hands of teachers considerably before the opening of the schools in September, 1917. This course uses the eight grade system as a basis, but is intended to be in sufficiently flexible form so that it may be adapted without special difficulty to those systems which have found it necessary, on account of a short school year, to continue their organization on a nine grade basis.

INDUSTRIAL EDUCATION.

While the increase in the number of towns and cities offering courses in industrial education during the past year has not been large, yet it has served to show that these courses have in the last six years become more and more general throughout the state. The records show that thirty-four towns and cities offered courses in manual training in the elementary schools, while thirty-five offered courses in domestic science. In the high schools and academies were offered seventeen courses in mechanic arts, twenty-five courses in domestic arts and eleven courses in agriculture. Of these courses in secondary schools, three in mechanic arts, eight in domestic arts and eight in agriculture were offered in academies, while the remainder were in free high schools. Aside from these strictly industrial courses, evening schools were maintained by sixteen towns and

cities. These schools are included under the general topic of industrial education, however, since the law now requires that state aid in reimbursement for instruction in evening schools shall not be paid unless the average attendance in industrial courses offered in them shall amount to at least twenty-five per cent of the average attendance in the school as a whole and because the law provides for the payment of state aid for evening schools out of the appropriation for industrial education.

The total cost of instruction for courses in manual training was \$38,963.00 and for domestic science was \$22,433.00. The cost of instruction in evening schools amounted to \$18,022.00. State aid in reimbursement for all courses in industrial education including evening schools for the year ending July 1, 1916, was \$56,158.87.

In accordance with the law provision has been made during the year for special instruction in manual training to be given in the Western State Normal School at Gorham in special preparation of persons desiring to qualify as teachers of that branch, while a similar course in domestic science has been given in the Farmington State Normal School for the preparation of special teachers of that branch. The attendance in these courses has been limited and persons applying for admission to them have not been encouraged to enroll in numbers beyond that which may reasonably anticipate securing positions as teachers in these special subjects.

The appropriations made by the last legislature for providing a household arts building at Farmington and for purchasing equipment for the course in manual training at Gorham have resulted in placing these courses upon a permanent basis and the future development of them depends very largely upon the number of such courses offered in the state for which specially trained teachers will be required.

It now appears that many of the smaller towns which have not heretofore taken advantage of the provisions of the act for the encouragement of industrial education may well consider the advisability of establishing at least one course in industrial training. Such a course does not involve the expenditure of a large amount of money and may be made to yield returns far in excess of expenditures frequently made for other purposes.

SCHOOL SUPERVISION.

The system of professional supervision through unions of towns has received during the past year a strong impetus. For the first time since the enactment of the law providing for these unions the number of towns included in them has become greater than the number not included in them. For the year ending July 1, 1916, the number of towns having professional superintendents was 319, while the number having local superintendents was 204. The number of schools under professional supervision was 3,742 and the number under local supervision, 1,132. The number of pupils registered in schools under professional supervision was 123,754, while the number registered in schools under local supervision was 25,395. The school population under professional supervision was 190,321 and that under local supervision 35,916. Thus it is seen that some eighty-two per cent of the number enrolled in school and seventy-seven per cent of all the public schools are included under this system. A total of fifty-six towns entered upon the plan during 1916.

With so large a majority of the pupils registered in towns under professional supervision it is evident that the time is not far distant when all towns should be included under the union arrangement. It will be necessary, however, when this time arrives that provision be made for combining towns under some definite plan in order that the unions may be most effectively administered. At the present time there are 102 such unions and in a large majority of cases these are made up of towns which logically should be together, yet consideration for some communities which have heretofore not seen fit to authorize their superintending school committees to join with other towns makes it evident that some readjustment will be necessary in order that all may have a fair opportunity to be served in an effective manner. It is probable that no great difficulty would be experienced in combining towns in such a way that the additional number of unions required to include all towns, cities and plantations would not be excessive.

One very important phase of the situation as it now exists is that relative to the inability of a considerable number of towns which, having voted in favor of joining a union with other towns, are so situated that it has been impossible for them

to secure admission and they have, therefore, been barred from the benefits of such an arrangement. It is manifestly unjust that the location of a town with reference to other towns should make it impossible to secure admission to a union. These cases have existed in past years, but never in sufficient numbers to seriously menace the effectiveness of the system as a whole. It is certain that some legislation is advisable in the immediate future looking either to the adoption of the system of professional supervision for all towns of the state or at least providing a means whereby those towns which have voted favorably on the matter of uniting with other towns may be guaranteed an opportunity to benefit by the authority thus conferred upon the superintending school committee.

CHAPTER III.

REPORTS OF STATE AGENTS AND PRINCIPALS OF STATE NORMAL SCHOOLS.

SECONDARY SCHOOLS.

AUGUSTA, MAINE, July 1, 1916.

To the State Superintendent of Public Schools:

DEAR SIR:—I herewith submit my report as Agent for Secondary Education for the current year.

In accordance with plans approved by the state superintendent of public schools I directed my attention to the small high schools including in that class schools with three teachers or fewer. Visits in other schools were made upon the request of school authorities in charge of the school or for the purpose of special investigations. The advantage of the change of procedure became apparent in the greater opportunity which was given for personal assistance to teachers and conference with superintendents and committees. In all one hundred and forty-five schools were visited. The length of the visit was in many cases a full day, in others a half day supplemented by a conference at the close of the session.

To secure further information as to the progress of the schools reports were called for showing the extent and nature of the work accomplished. An effort was made to follow up these reports with recommendations for improvement as to the extent or plan of the work attempted. These reports were confined for the most part to the smaller schools.

The county teachers' meetings served as a means for keeping in touch with the progress in the larger schools. The program in several instances consisted of an informal discussion of topics directly related to school work and administration. These conferences served to stimulate interest in certain special

topics and to direct the attention of teachers to important steps in school progress.

Owing to the extended discussion of statistical matters in the report last year, I have not given any space to the tabulated returns. In brief the progress of the schools measured by expenditure for maintenance and by increase in enrollment, rise of teachers' wages and similar items compares favorably with that of recent years. The first year class in secondary schools shows a gain of eight per cent, the fourth year class also shows a gain of somewhat over seven per cent. This is indicative not only of continued growth but also of a strong tendency for the pupils to complete their secondary school course. There was a slight gain in teachers' salaries showing a steady upward trend. Similar progress is evident in the number of teaching positions, an item noted under the discussion of the small high schools.

The Small Schools.

The more thorough study of internal conditions in the small schools confirmed what has been said in previous reports as to the needs, limitations and peculiar problems of this group of schools. No discussion will be made of this subject here, except to summarize the more important facts for the sake of emphasis.

This is notably a state of small high schools. During the past year there were 56 standard high schools with two teachers and 37 more with fewer than four teachers, several of the latter employing a fourth teacher but not on full time. When the schools were classified in 1910 there were 61 schools of the two teacher type and 31 with three or four teachers. It is very interesting to note the growth of these schools in terms of teaching force. Of these 61 two teacher schools 26 have added one or more teachers; in other words more than fifty per cent of these small schools have thus given evidence of growth and progress during the past six years.

Measured in the number of pupils it appears that 58 Class A schools enrolled this year fewer than 50 pupils each; 34 more enrolled fewer than 75 pupils each. The average enrollment for this large group of schools, more than half of all the standard high schools of the state, was 44 pupils during the past year.

As might be expected the cost of maintenance of the small school in proportion to the valuation of the town is relatively high. One-third of these schools are expending, exclusive of state aid and tuition, a sum equal to 2.5 mills or more for each dollar of valuation. The rate for the schools at large on the same basis is 2 mills. The real significance of the effort required to maintain high schools in these communities is shown when compared with the average cost for the three largest cities of the state. The corresponding rate in these cities is 1.1 mills and for eleven other large towns or cities is 1.4 mills. The average for the entire group of small schools is about 2.3 mills.

Putting this into concrete terms the town of A with a valuation of \$450,000 levies a rate of 3.1 mills for the support of common schools and raises a sum equivalent to a rate of 2.5 mills per dollar of valuation for the maintenance of its high school. The pupil cost on the basis of instruction is \$37.50. This is a fairly typical example of the two teacher group. The town of M has a valuation of \$2,148,000, its tax rate for common schools is 2 mills, the rate for high school is 1.8 mills, and the pupil cost is \$35.42. Thus it is apparent that the small town is making at least a third greater effort to maintain its high school. In spite of the high rates in the small town the salaries are uniformly low, the tenure of teachers is short and the equipment very limited. While these conditions are found in many of the large schools, the effects are obviously more serious in the former type.

Reference has frequently been made in other reports to the salaries, training and tenure of teachers in the small schools. The closer study of the situation confirms the opinion that permanency in the teaching force secured through adequate increases in salary is the most effective means of improving the school. It was found almost without exception that when the same teachers return to a school for succeeding years the work was taken up promptly in the fall, the activities of the school were carried forward without interruption, projects such as room decoration and library development taken up with renewed interest, teaching plans developed and followed, the records more carefully kept, and more important than all, the teachers were at once acquainted with the pupils and the

community. A study of the changes occurring in the smaller schools makes it clear that in a very large number of cases the salary increases were small. While promotion to a large school is an important factor in changes it is evident that recognition of service and worth by an advance in salary holds many teachers in face of the apparent advantage of the larger school.

A very small increase in the amount provided for the high school will take care of salary increases. Thus in a specific instance, the town mentioned above by adding a half mill to the high school rate would provide \$225 for salary advances, a sum sufficient in most cases to hold both teachers for another year. It is most unfortunate when committees are so limited by the action of the town as to be unable to retain competent teachers if it may be done by a reasonable increase in salaries.

Other needs of the smaller schools may be briefly summarized. Many of them are common to larger systems. A well considered effort on the part of the committee will result in much improvement. In many schools the physical conditions especially of lighting and ventilation are very unsatisfactory. The janitor work is often very poorly done and needs the supervision of the principal. The rooms are often in need of thorough cleaning. The blackboards are often very poor and are not kept clean or in a usable condition. In many cases the outbuildings are very unsatisfactory and not properly supervised. The records of teaching plans, progress of pupils, syllabi in different subjects are very frequently lacking. The school library is uniformly inadequate, poorly cared for and without satisfactory support. The school equipment, including textbooks, science apparatus, furniture and the like often lacks care.

Recommendations.

As a result of the study of the small schools I would offer the following recommendations for increasing their efficiency.

1. Specific improvements in physical conditions should be undertaken each year, e. g. changes in lighting, ventilation, blackboards, to bring the building up to standard requirements.
2. Teachers should be retained by salary increases and by coöperation of the community with their efforts.

3. Teachers should be selected with view to their qualifications to carry on the course of study outlined.
4. The efficiency of the teachers should be increased by providing visiting days, reading courses, or special institutes.
5. In two teacher schools but one course should be attempted with high grade work in all subjects, and a reasonable balance between academic and vocational or practical work should be arranged.
6. The program should be reduced to seven periods per teacher to provide for supervised study and to increase the teaching efficiency by time for more thorough preparation.
7. Syllabi of subjects taught, outlines of work accomplished and complete records of pupil progress should be insisted upon and carefully preserved for succeeding teachers.
8. Provision for a regular increase of the equipment of the school, including the library, should be made.
9. Teachers, and in turn the pupils, should be held strictly accountable for the care of all school property and equipment. For the latter complete lists should be properly checked at the beginning and close of the school year.

Class B and Class C Schools.

The schools of class B and C were given special attention during the year. These schools are doing a good service in giving opportunity to many young people to begin their high school course at home thus saving considerable expense and with the important advantage of being under home influence during this period. The pupils appear to have but little difficulty in adjusting themselves without loss of time on entering standard schools. There is a strong tendency for these schools to advance to a higher class as is shown by the fact that twenty-one of the schools in these classes in 1910 have, since that time, advanced to class A and have maintained their standing. This progress is rendered all the more significant by the fact that during the past year the twenty-one schools were furnishing standard school opportunities to nearly 600 pupils. Usually schools of these classes are remote from standard schools and without the privileges they offer a large percentage of the children enrolled would be unable to attend high school at all.

It seems apparent that many of these schools are attempting too difficult a program in spite of efforts on the part of the state

department to keep the course within practical teaching limits. Thus a program calling for ten, twelve and even fifteen periods is frequently found. Few teachers are so versatile and so well prepared as to be able to handle so many subjects effectively. It is very evident that only one course, usually the English or general course should be attempted. The teaching program should be further reduced by alternating subjects and combining classes. In this way the daily schedule may be limited to eight, or at the most, ten periods. To assist in bringing about better conditions in this respect the daily programs of these schools have been called for early in the fall term and advice has been given as to practical changes for securing fewer classes and longer periods.

Another serious defect in these schools is the lack of equipment for different phases of the work attempted. Maps, library material and apparatus for elementary work in science and agriculture are generally needed. Anticipating a later advance to class A grade, the school should be well furnished for the more elementary work during the time it is under the B or C classification. It has been found repeatedly that when the school is advanced the requirements for the later courses and other additional items are so great that the needs of the first two years are neglected.

In view of the facts that many schools, especially of class B, are endeavoring to provide a third year of work or are frequently attempting to advance at once to class A, it seems advisable to recommend that the law be amended to provide for the third year in such schools. At present the law does not recognize a school that offers a three year standard course with tuition benefits. With such a provision the transition to the A grade would be made more slowly and standard requirements for the third year could be more justly enforced. The services of a second teacher on part time at least would be required and the advanced work would be taken up with suitable preparation.

On the whole, the class B and class C schools are a useful type of school and are performing a worthy service in opening up new fields in remote and sparsely settled communities, and in arousing interest in education beyond the elementary schools. They may become more useful by adapting their courses to the immediate needs of the pupils, introducing elements of agricul-

ture and science, practical accounting for the home and farm, practical civics, thorough training in English and the like. The work attempted calls for skillful teaching and material with which to work. Because changes are necessarily frequent, the teaching plans and records should be very complete and carefully kept.

It is probable that these schools can be made the initial point of a plan for reorganizing the elementary schools in certain cases. It seems that it would be practical to reduce the very heavy teaching programs in many of the rural schools by bringing together in the high school the older boys and girls who would be ordinarily found in the two upper grades. Conveyance could be provided with the result that a larger group of young people of approximate age and like interests would be brought together and a suitable course could be arranged. The present plan of the class C school would lend itself admirably to this arrangement. With a slight extension of the teaching force and accommodations the additional pupils could easily be provided for. Such a plan would seem to be immediately practical in several communities of the state and properly administered would result in a distinct improvement in both the elementary schools and the high school.

Training courses for teachers.

I wish to call attention to the training courses for teachers offered in academies. The special laws relating to state aid for academies provide that an institution may offer a training course for teachers and may receive reimbursement to the extent of \$250 under specified conditions. Since the law became operative about twelve schools each year have taken advantage of the privilege. No complete record of the number of graduates has been kept, but the number of pupils enrolled has averaged about 200 each year.

A few years ago the course was revised and an effort made to strengthen the work done. At present the special work is given in the third and fourth years of the regular academy course and occupies about one-half the pupil's time for two years. The course consists of prescribed work in elementary psychology, school management, school law and observation in the junior year, and review of common school subjects, meth-

ods of teaching, observation and practice teaching in the junior year. English, four years, general biology and American history and civics are required. The remaining subjects may be chosen from the regular academy courses. The special work must be under the direction of a normal school graduate or a teacher of equivalent professional training. The teacher is expected to handle the special subjects related to teaching and to supervise the observation and practice. Thirty half-hour periods of observation are required in the junior year and an equal number of periods of practice teaching in the senior year. It is expected that the latter will be done in schools where normal trained teachers are employed. The practice work is done for the most part in the lower grades. Emphasis has been placed upon preparation for teaching in rural schools.

There is evidence that these courses have been of considerable service both to the pupils who have taken the work and to schools in which they have taught. Superintendents have found that the graduates in general show more skill in their work from the first than the ordinary high school graduate. They understand better how to organize their schools and handle their classes more effectively. Fairly complete records for the past six years show that most of the graduates teach for a time at least and that a fair percentage sooner or later go to normal school. An examination of the map shows that for the most part the schools offering these courses are advantageously placed to serve the needs of rural schools.

No effort has been made on the part of the State to increase the number of such courses or the enrollment. As has been pointed out attention has been given to making the courses more efficient. Besides regular visits by the Agent for Secondary Education, representatives of the State normal schools visited the schools during the past year for the purpose of assisting the teacher in charge to organize her work more effectively.

Judging from the experience of other states it would seem practicable to extend this plan somewhat so as to give at least the elements of training for graduates of secondary schools who must at once begin teaching in rural schools. In spite of a steady increase in normal school attendance, there are a very large number of untrained teachers entering upon their work

each year. Twenty schools carefully selected as to location with thoroughly competent teachers and adequate facilities would be able to supply the immediate need of a considerable number of young people having at least an elementary knowledge of teaching requirements. Such a plan would be still more effective if a fifth year were provided and proper coördination with the normal schools were secured. It would be highly important that the number of these schools be limited and that they be carefully selected as to location and facilities.

The Junior High School.

The first attempt in the state at a complete reorganization of a school system on what is known as the six and six plan was made in Oldtown under Superintendent Wm. D. Fuller. The results of his work proved to be of much interest to the educators of the state inasmuch as he was able to carry out in detail the division of the upper grades into the junior and senior high school plan. Local conditions made it practicable as well as desirable to group all the seventh and eighth grade pupils and the first year high school pupils in one building. The second, third and fourth year high school pupils occupied the regular high school building.

Following out the general plans of organization for the junior high, or intermediate school, which have been widely discussed in the educational press for the past few years, departmental teaching was introduced, the course of study made a unit so far as content is concerned, a modern language and Latin were begun early, and student activities were adapted to the age and interests of the pupils.

The work of the senior high school for the present is but slightly modified. As soon as the new program for the three grades below can be worked through, necessary adaptations will also be made in the senior school. The plan of reorganization further undertakes the completion of certain essentials in the first six grades of the elementary course.

The junior high school embodies certain reorganized factors essential to the education of young people at this age namely from twelve to fifteen. It provides for the introduction of certain subject matter at a time and in such a form as to be assimilated by the pupils, it permits a degree of departmental

teaching but retains the supervision and guidance of the room teacher. It broadens the course of study and allows some exploration on the part of the pupil under proper guidance. It brings together young people of common interests and gives opportunity for such activities as will be wholesome and interesting. It tends to prolong school life because of the greater variety of studies, the opportunities for the beginning of vocational training and the better adjusted transition from the work of the grades to that of the high school.

Comparative statistics.

The accompanying table shows certain comparative facts regarding the high schools. This table is intended to exhibit the relative ability of towns, as measured by valuation, the actual effort made for high school maintenance as shown by the rate percent of valuation expended for this purpose together with the kind of school defined in terms of the number of pupils, the teaching force and the proportion of resident pupils to the whole number of pupils attending school in the town.

In detail, column I of the table gives the percent of the valuation of the town expended for high school maintenance, including instruction, fuel, janitor service, textbooks, and supplies, less the state aid. It thus shows the actual burden of high school support measured in terms of the valuation of the town.

It was found to be very difficult to show the comparison of high school support to that for elementary schools, though a rough approximation may be secured by a comparison with the rates for elementary school support found in table VI column 18 of this report. It must be kept in mind however that the basis upon which the two rates is computed is quite different and can be used for comparison only in a very general way.

Column II shows the cost per pupil on the basis of the amount paid for instruction and *average* attendance. These factors are relatively constant and for schools as a whole furnish a fair basis for comparison.

Column III. The ratio of high school pupils to all pupils is secured by taking the whole number registered in elementary schools and the number of *resident* pupils in high school as a basis. It gives a fair index of the extent to which the high school is reaching the youth of the town.

Column IV shows simply the total enrollment for the sake of comparison with figures in column V which gives the number of teachers.

It is believed that this table should be of service to school authorities who wish to study a local high school situation in the light of comparative statistics. Thus a comparison might show that the teaching force was below that provided by other towns for schools of approximate enrollment, or that the town might reasonably increase the amount provided for the high school in view of what other towns in its class are doing in this respect. It is not to be understood that the table gives any fixed answers to such questions but it should furnish material which may properly be used in a discussion of the factors involved.

Respectfully submitted,

JOSIAH W. TAYLOR,
State Agent for Secondary Education.

RURAL SCHOOLS.

AUGUSTA, MAINE, July 1, 1916.

To the State Superintendent of Public Schools:

DEAR SIR:—The general program undertaken by the agents for rural education has aimed at improvement of the following rural school factors: the teacher, the school building and grounds, the equipment, the course of study, the supervision and the community interest and support. While no distinct division of labor has been undertaken, in general, the efforts of one have been toward the betterment of physical conditions and extension of professional supervision while the other's chief work has been in the direction of the improvement of the teacher and her methods, the course of study and the interest of the community. Both of the agents, however, are prepared to encourage any feature of rural school improvement that may seem most desirable in the community under consideration.

The visitation of schools has been an important part of the work. These visitations have been followed by direct discussion of conditions with the teachers, school officers or citizens through personal conference, correspondence or public meetings. The attitude of teachers and school officers in respect to these visits has been most cordial and positive results of the visitations have been observed.

The agents have taken part in many public meetings held under the auspices of county teachers' associations, local teachers' organizations, parent-teacher associations, granges, women's clubs and other organizations. They have appeared before town meetings in support of improvements presented for the consideration of the voters. They have met with school committee members and superintendents for the discussion of both general and special problems. At meetings attended by teachers all talks given have been of the most practical type illustrated by exhibits of seat work material, sample daily programs and blackboard work.

School officers have been furnished with helpful statistical material, working drawings and sketches for school building improvement, printed matter for distribution to citizens, etc.

One of the agents has been especially interested in the promotion of the School Improvement League of Maine, an organization founded nearly twenty years ago which has been and will continue to be an important factor for rural school improvement. An attempt is made to get into close contact with teachers interested in the work of the League and to offer help and suggestions in carrying on the organization.

The extension of the plan of professional supervision of schools is an important part of the work of one of the agents and the results of endeavors in this line have been positive and gratifying. Every available means is used to impress on citizens and school committee members the importance of full time professional supervision. The agent has assisted in all parts of this work from the creation of favorable public sentiment to the actual organization of a union.

To one of the agents has been assigned the duty of making recommendations for the distribution of the equalization fund, a state appropriation available for special aid to towns having excessive financial burdens. This fund used for increasing teachers' wages, increasing the length of the school year, betterment of physical conditions, etc., as recommended when the apportionment is made, will, therefore, in part be available for the direct improvement of conditions already observed by the agents. Money apportioned for improvement of physical conditions will be used almost entirely for the betterment of heating and ventilation, lighting and sanitation in one-room rural schools.

The agents have taken charge of programs for teachers' meetings; of preparing, revising and editing pamphlets and circulars of interest to rural school teachers; of investigations and reports on special conditions; have secured material for and arranged exhibits and have been prepared to assist in the general work of the department when required. They have at all times endeavored to impress on school officers the fact that their work is not inspectory in type but that they wish to co-operate and serve as expert helpers and advisors to those in charge of schools.

Respectfully submitted,

HAROLD A. ALLAN,
FLORENCE M. HALE,

State Agents for Rural Education.

SCHOOLS IN UNORGANIZED TOWNSHIPS.

AUGUSTA, MAINE, July 1, 1916.

To the State Superintendent of Public Schools, Augusta, Maine:

DEAR SIR:—The schooling of children in the unorganized townships has been continued the past year on the same general plan as in the past and practically the same sections of the State have come under this special branch of the State educational system. School privileges have been provided for children living in seventy-eight different unorganized townships and unorganized places, nine new townships having been added to those of the previous year and three of those appearing in the list of last year not appearing this year. Perhaps the most noticeable changes have been the addition of a new county, Knox, to the list of counties where school privileges have been furnished under the provisions of this law and the opening of two new schools on the coast where but a few unorganized township schools have ever been maintained. The total school population, which it perhaps should be explained does not include the children living at light stations, shows an increase of thirty-eight over the previous year and is the largest, with the exception of two years, since statistics in connection with the unorganized townships have been kept. The past year shows an increase of five in the number of schools maintained and an increase of thirty-one in the number of pupils for whom school privileges have been furnished outside of the township in which they lived.

The proportion of the school population attending school is slightly smaller than for the previous year, but still continues to be relatively very high and the past year there has been a most encouraging gain in attendance as compared with the enrollment. Another encouraging gain has been in the considerable increase in the number of pupils attending secondary schools and also the large number of pupils of the unorganized townships who took and successfully passed at the end of the

school year in June the state examination for entrance to secondary school. There are at the present time students from the unorganized townships in fourteen different secondary schools in the State.

There has been an increase of three days in the school year, making the average length for all schools for the past year approximately twenty-nine weeks. However, in nearly all places where schools have been regularly maintained there have been at least thirty weeks of school. The past year three different arrangements were outlined for the school year and these arrangements planned to fit the varying conditions in unorganized townships in different parts of the State. It has been found desirable to have a school year with spring, summer and fall terms and a long winter vacation in some places, in others, a long fall and long spring term with vacations during the winter and summer, and in still others, a year somewhat similar in arrangement to that of towns and cities. With a few exceptions every school is now on a regular schedule in accordance with one of the three approved arrangements. A considerably smaller number of summer terms, which have not been found as profitable as terms at other times of the year, have been held the past year and people of townships where the summer term is still maintained are asking frequently to have their school changed to one of the other arrangements. In fact it would seem that it is only a question of a short time when the summer session will be a thing of the past.

The total cost of schooling of children in unorganized townships for the past year was \$28,534.87, an increase over the previous year of about \$3,500.00. While the greater part of this expenditure is paid from the appropriation of \$25,000.00 for the schooling of children in unorganized townships, there are two other sources which are drawn from by law, per capita taxes and the interest on lands reserved due townships from the State.

The per capita tax is a tax of forty cents assessed and collected from all persons resident in unorganized townships on April 1 where school privileges are provided under this statute. This tax of course varies as to the population, but has in some years amounted to over \$1,000.00 and is all available for school purposes.

The appropriation made by the State for the payment of interest on lands reserved due plantations and unorganized townships is also drawn upon for the payment of the expense of schooling in any unorganized township having such interest to its credit but the limited amount of this appropriation has never permitted the expenditure of more than a few thousand dollars from this source in any year. Most of the unorganized townships have interest on lands reserved due them and the amount varies from a few dollars to several thousand, one unorganized township having between nine and ten thousand dollars due it at the present time in accrued interest.

The cost of schooling per pupil varies a great deal in the different unorganized townships and furnishes some interesting figures. The average cost per pupil attending elementary schools for the past year was \$34.73, this covering all expenses including supervision and comparing very favorably with the average cost per pupil in the towns and cities of the State. On the other hand the variation in cost will probably be found greater than elsewhere, the minimum cost per pupil being \$7.53, and the maximum cost \$120.00. The high maximum cost is in cases where it has been found necessary to board pupils or to maintain small schools. The past year in every case where it has been possible without additional expense and the arrangement has met with the approval of parents small schools have been closed and pupils either conveyed or boarded where they could attend a larger school. The small schools are not only maintained at a relatively high cost, but are generally unprofitable for pupils as compared with schools of larger enrollment and it would seem a wise policy to maintain as few as possible of these schools which have always been rather common in these townships.

The very nature of the whole proposition for the schooling of children living in the unorganized townships will probably cause this branch of our educational system always to be a distinct one and require as long as it exists different methods of administration and supervision than found in connection with any other school system. However, there is always present the opportunity for development and improvement as elsewhere and the perfecting of this unique educational system offers a most interesting problem. The principal efforts up

to this time have been toward a better organization of the system, a more efficient teaching service and an improvement in equipment.

Just at present the great need for improvement is in the direction of better physical conditions under which these pupils may work. This means a great improvement in general in the buildings of the townships and requires new building in many cases. The people of the unorganized townships have always been expected to provide and maintain school buildings almost wholly at their own expense. This has worked a hardship in numerous cases and explains the existence of conditions in connection with these schools which should not be allowed to continue longer. It is hoped that a means will be found in the near future to provide sufficient funds to make the much needed improvements and that the State will thereby set an example in the only elementary schools directly under State control for the improvement in general of rural schools.

The plan introduced last year for the schooling of children living at the United States Government Light Stations along the Maine coast has been continued this year without important change. The traveling teacher has made fairly regular visits to the light stations throughout the year except during the months of January and February when the work was discontinued. At present twenty-eight pupils living at ten different light stations and ranging in age from five to fourteen years are receiving school privileges under this plan. Additional traveling teachers which would make possible more frequent and longer visits or the employment of a regular teacher for each light station for several months during the summer under the direction of the traveling teacher would greatly increase the efficiency of this work. It is hoped that coöperation by the United States Government to this end may be brought about in the near future.

With the provision for school privileges for the children of the unorganized townships and extension of this system to the children living at light stations it can be said that the opportunity for free elementary education is universal as an actual fact in Maine. Considering the large area of the State that is unorganized together with the many small, remote and often isolated communities of this territory, the large number of small

island settlements without regular communication with the mainland and the numerous light stations with one or two families of children, the universality of the Maine educational system should be a matter of pardonable pride to its citizenship.

Respectfully submitted,

ADELBERT W. GORDON,

General Agent.

STATE NORMAL SCHOOLS.

FARMINGTON STATE NORMAL SCHOOL.

FARMINGTON, MAINE, July 1, 1916.

To the Trustees of the State Normal Schools:

GENTLEMEN:—I have the honor to submit the following annual report of the Farmington Normal School for the year ending June 20, 1916. The attendance for the year has been as follows:

Number entering	130
Number registered in the fall term.....	200
Number registered in the winter term.....	204
Number registered in the spring term.....	200
Number of different pupils registered.....	231
Number in the graduating class, regular course.....	60
Number in the graduating class, Household Arts course	8
Number graduating, advanced course, Household Arts.	5

The teachers for the year have been: Principal, Wilbert G. Mallett, A. B., Pedagogy, Psychology, Civics. Assistant principal Arthur M. Thomas, A. M., Natural Sciences. Assistants, Hortense M. Merrill, English Literature, History, Reading, Botany; Katherine E. Abbott, House Decoration, Drawing, Mathematics, Reading; Carolyn A. Stone, Physiology, Physical Culture, Arithmetic, Biology, U. S. History; Virginia A. Porter, English, Reading, Geography, Penmanship, History, Commercial Geography; Florence L. Walker, A. B., Manual Training; Louise M. Butz, Music; Mrs. A. D. Ingalls, Arithmetic (winter term). State Director of Household Arts, Marion C. Ricker, Household Arts. Assistants Household Arts, Cora J. Chase, Flora T. Norton. Supervisor of Training, Lillian I. Lincoln, Psychology and Methods, History of Education. Assistant Supervisor of Training, Louise W. Richards, Grades 7, 8 and 9. Other assistants, Ruth L. Avery, Grades 5 and 6; Ethel J. Philbrick, Grades 3 and 4; Ethel M. Craig, Grade 2; Inez M. Rolfe, Grade 1. Secretary, Mildred S. Gay.

The classes which are recommended for graduation and which received diplomas were as follows:

Ethel M. Asnault, 168 Danforth St., Portland; Clara M. Bacon, W. Paris; Hazel M. Bailey, R. F. D. 2, Norridgewock; Marion E. Baker, Bingham; Helen F. Beane, New Sharon; Sadie M. Benner, R. F. D. 1, Rockland; Marion B. Clark, Caratunk; Gladys D. Cobb, 14 Winter St., Portland; Hazel B. Colbath, Dexter; Mattie F. Dingley, W. Farmington; Blanche M. Dow, Jonesport; Nellie M. Elden, Charleston; E. Edna Emery, Shawmut; Ola M. Fairbanks, Mt. Vernon; Blanche A. Fitzhenry, Lubec; Albra L. Foss, Harmony; Elva A. Fuller, Livermore; Ruby E. Fuller, 25 Highland Ave., Auburn; Helen P. Gale, Jackson, N. H.; Lelia M. Gerry, Dover; Ethel M. Gilman, Boothbay; Ellen M. Glover, Hebron; Winifred A. Gould, Farmington; Margaret M. Goulding, Eastport; Bernice A. Gracie, Warren; Agnes L. Gray, W. Paris; Mabel K. Hall, R. F. D. 7, Skowhegan; Stella W. Hallowell, Thomaston; Beulah M. Hammond, R. F. D. 5, Farmington; Erna B. Haskell, Turner; Loretta A. Henzie, Pittsfield; Bessie E. Higgins, Clinton; Alice H. Hinds, Flagstaff; Harriet Howard, Winslow; Maude E. Huckins, Eastport; Christine F. Johnson, Greene; Frieda A. Knauff, 12 Dalton St., Waterville; Doris F. Lake, Farmington; C. Hazel Lathe, Augusta; Asha F. Lawry, Farmington; Pearl M. Magoon, Harmony; Maude L. Marston, Dexter; Marguerite E. McQuaide, Mt. Vernon; Edith E. Merrill, S. Poland; Gretchen Merrill, Farmington; Beatrice E. Mitchell, Greene; Grace J. Morrell, N. Berwick; Gladys S. Morrill, Sumner; Isla M. Mower, 16 Harvard St., Auburn; Vannie E. Oakes, Farmington Falls; Nina M. Reynolds, Lubec; Estelle J. Ritchie, Foxcroft; Esther E. Simpson, Monmouth; Esther H. Tarr, 78 Summer St., Auburn; Ruth M. Thomas, Farmington Falls; Lucille F. Walker, Warren; Violette L. Welch, 10 Linden St., Bangor; Bertha M. White, Dixfield; Edith M. Wiggin, N. Berwick; Mildred A. Wright, R. F. D. 4, Farmington.

Household Arts Course:

Advanced Course—Frances H. Butler, R. F. D. 1, Rockland; Marion Gould, 8 Water St., Randolph; Ella A. Starrett, R. F. D., Warren; Minnie M. Stinson, Clinton; Florence M. Thomas, 8 Spruce St., Rockland.

Two Year Course—Katharine M. Bradstreet, Bridgewater; Winifred M. Bradstreet, Bridgewater; Maude E. Bridges, Dryden; Adelaide J. Hooker, Colebrook, N. H.; Helen G. Kidder, 35 Boutelle Ave., Waterville; Helen M. Lawrence, Saco; Adelaide Merriman, Woodfords; Helen D. Walker, 28 Highland Ave., Gardiner.

In my report one year ago I expressed the judgment that our Household Arts work should eventually be offered only to normal school graduates and that the two year course be dropped. One year more of work has confirmed me in that opinion. Of the five members of the advanced course, all are graduates of the Farmington school. It seems very desirable that this advanced class should not be large but that it should contain representatives from the other normal schools of the state.

Because of the increase of the school in size during the past few years the new dormitory, Purington Hall, accommodating one hundred students has proved so inadequate for boarding accommodations that it is as difficult to find board for students in the town today as it was when the school was only half as large. This makes it imperative for increased dormitory accommodations and I recommend to the Trustees that the legislature be asked to provide another dormitory which can be placed on the lot on which Purington Hall is located.

We received this year the resignations of Miss Florence L. Walker, teacher of manual training; Miss Louise M. Butz, teacher of music; Miss Cora J. Chase, an assistant in Household Arts and Miss Flora T. Norton, an assistant in Household Arts; Miss Inez M. Rolfe, teacher of the first grade in the training school. Their going makes a serious break in the teaching force of the school which we can hardly expect to overcome in a single year. Their services have been efficiently rendered.

With the appropriation granted by the last legislature for repairs the property of the state has been kept up as thoroughly as was consistent with the funds provided. Careful economy is exercised in all departments, both in the matter of repairs and general maintenance.

Respectfully submitted,

W. G. MALLETT.

EASTERN STATE NORMAL SCHOOL.

CASTINE, MAINE, June 22, 1916.

To the Trustees of the State Normal Schools:

GENTLEMEN:—I respectfully submit my 28th annual report of the Eastern State Normal school.

The teachers for the year have been: Albert F. Richardson, A. M., principal; assistants, William D. Hall, A. B., Edward E. Philbrook, M. D., Nellie F. Harvey, Kate S. Russell, Agnes P. Mantor, Mary L. Hastings, Hattie A. Wiggin, Mary S. Coombs, A. B., Mary B. Bills, Beth M. Jellison, Dorothy M. Holden, and Edna C. Harquail in the grammar school. Gertrude M. Conant has been stenographer; Myra A. Ferguson, matron in Richardson Hall, and Arthur G. Thombs, janitor.

ATTENDANCE OF STUDENTS.

Number entering the school.....	71
Number attending the fall term.....	108
Number attending the winter term.....	100
Number attending the spring term	98
Whole number of different pupils.....	117

The graduating class is the largest in the history of the school, 68.

Thirty-eight of those entering belong to the regular class and 33 to the special class.

Agriculture:

The work in this department has been in charge of W. D. Hall and has been well done. A large garden has been planted by the graduating class under his supervision and this has been a source of pleasure and profit to them.

Manual Training:

All the pupils in the school have had work in this department and it has been very much enjoyed. The pupils in the training schools, except the two lowest grades, have had the advantage of this work as also have the students in the village grammar school, giving the scholars of the village advantages they could not very well have enjoyed in any other way.

Domestic Science:

This work has been of great value and pleasure to the students and here too the pupils of the grammar and model schools have had the advantages of practice and instruction in this very important subject, without expense. The 32 ladies in the regular class made their own graduating dresses at an expense of less than \$5 each.

The Library:

The library, since being scientifically cataloged, has been used constantly by the students. We now have 2,488 bound volumes not including text books. These books have been very carefully selected, giving us a fine working library suited to the needs of a normal school.

The Training Schools:

Under the supervision of an efficient training teacher, the pupils are devoting a whole term to practice teaching besides the work done in their class recitations.

The Dormitory:

The students and teachers have greatly enjoyed life in the dormitory under the careful management of Mr. Hall. The pupils have been able to obtain good board there at the extremely low price of \$3.25 a week. Mrs. Ferguson has been very efficient and satisfactory as matron and Devereux Hanson an ideal cook.

The School Grounds:

These have been greatly improved, much of the work being done by Miss Jellison and her pupils. They have used the lawn mower and the wheelbarrow and have seemed to derive much pleasure from it. The lawns have been mowed and considerable grading has been done with little expense.

The Teachers:

We all felt a great loss in the resignation of Mary C. Richardson and Mabel P. Ridley, two of the finest teachers we have ever had here.

Your board elected William D. Hall, a graduate of this school and of the University of Maine and who has had six years' experience as first assistant in Presque Isle Normal school, and Agnes P. Mantor, a recent graduate of the Farm-

ington Normal School, to fill these vacancies. The result has proved the wisdom of your selection. Mr. Hall has been very enthusiastic and ready for any kind of work that would help the school, and Miss Mantor is a remarkable teacher for one so young, and with so little experience.

All the teachers have tried to render themselves more efficient by attending Teachers' Conventions and by visiting schools. All of them attended the State Teachers' Convention at Bangor. Dr. Philbrook has visited schools in Boston and Chelsea. Miss Harvey attended the Panama-Pacific Exposition at San Francisco during the summer. Miss Russell has visited Lowell Normal School and schools in Boston, Miss Bills in Newton and Cambridge, Miss Wiggin in Chicago, and Miss Hastings in Westbrook, Portland, and the Keene, New Hampshire Normal School. Misses Coombs, Hastings and Mantor expect to attend the summer school at Columbia, New York. The work of the principal has been much easier by having a very efficient stenographer and typewriter.

The Special Class:

We are all pleased with this class. They number thirty-three and have taught on an average nearly ten years in eighty-eight different towns. Their work has been fine and their attitude towards the teachers and other pupils remarkable. They voted unanimously that the class parts should all be given to the regular class, but consented by invitation of the regular class to have their division represented at graduation by one speaker. They are graduates from twenty-three of the best schools and academies in Maine. Quite a number of them have already life certificates to teach.

We are pleased to report that we already have over fifty applicants to take this course next year.

Discipline:

The utmost harmony has prevailed among teachers and pupils during the year and there has not been an occasion to correct the pupils in discipline.

Graduating Class:

I recommend that diplomas be granted to the sixty-eight persons named below, the largest class ever graduating from this school.

Marion Lula Achorn, Waldoboro; Nora Belle Alley, Tenant's Harbor; Inez Nancy Ayer, Union; Flora E. Baldwin, Prentiss; Adelia W. Barron, Ellsworth; Elizabeth Mae Bates, N. Islesboro; Myra Verena Billington, Surry; Sarita Elizabeth Blake, Castine; Geneva F. Bragdon, Franklin; Belle I. Butterfield, Prentiss; Nellie Winnifred Callaghan, Houlton; Bessie S. Clark, Southwest Harbor; Pearl Folsom Clay, Bucksport; Susan Segers Coffin, Ashland; Martha Alice Colburn, Orono; Carrie Ellen Crockett, Lisbon Falls; Doris Crook, Brewer; Rose Pearl Danforth, Madison; Ida Bernice Dix, Bernard; Grace Bell Douglas, Orland; Eunice Hurtle Dunbar, Bluehill; Edna Frances Dyer, Franklin; Avis M. Emery, Monroe; Helene Frances Fahey, Brewer; Annie Ruth Field, Ellsworth; Florice D. Foster, Burnham; Beatrice Helen Gordon, N. Sullivan; Lizzie M. Gray, Surry; Vera C. Gray, S. Brewer; Gladys Isabelle Greenleaf, W. Southport; Albra V. Gross, Vinalhaven; Angie Annah Hall, Casco; Vera Noyes Harding, Sargentville; Ellen E. Hogan, Houlton; Martha Louisa Hogan, Houlton; Carolyn Ellen Hooper, Franklin; Lucinia E. Hopkins, Bucksport; Wills Burton Hussey, Albion; Ella M. Jarvis, Surry; Kate Belle Lyford, Sebec Station; Edna MacArthur, Milltown; Fannie Esther Maddocks, Bluehill; Lenora Aletha Miller, E. Holden; Richard J. Mograge, Castine; Lyda M. Moore, Jackman; Winnifred M. Murphy, Eastport; Emma Nichols, Searsport; Bessie Edna Nickerson, Belfast; Hattie E. Orcutt, Brooksville; Winfield F. Packard, Princeton; Ramona Lillian Parsons, W. Farmington; Sula L. Rafford, Ashland; Addie May Robinson, Isle au Haut; Delia Helen Rogers, Machias; Mary Alice Rogers, Dover; Marian Doris Russell, Dexter; Anna G. Ryder, Winterport; Marcia Lucretia Springer, E. Franklin; Lennie Marion Stanley, Center; Grace Mary Thompson, Winterport; William H. Tibbetts, Stillwater; Leah Verna Viles, Flagstaff; Mary Stanley Whitmore, Southwest Harbor; Gladys Wiggin, Albion; Edith H. Wilson, Thomaston; Effie Inez Wing, South Leeds; Mary E. Wood, Stonington; Manter M. Young, Houlton.

Respectfully submitted,

ALBERT F. RICHARDSON.

WESTERN STATE NORMAL SCHOOL.

GORHAM, MAINE, June 21, 1916.

To the Trustees of the State Normal Schools, Augusta, Maine:

GENTLEMEN:—I hereby submit the report of the principal of the Gorham Normal School for the year ending June 21, 1916.

I.

The faculty of the Gorham Normal School consisted of 31 members distributed as follows: Principal, W. E. Russell; teachers devoting their entire time to normal school students, Viola M. White, Katharine Halliday, Gertrude L. Stone, M. Grace Fickett, Jessie L. Keene, Louis B. Woodward; teachers devoting a major part of their time to the normal school and part of their time to practice school students, George A. Brown, Emma S. Daggett, Pamela C. Ware, Ethel G. Woolbridge; George E. Hutcherson; Benjamin H. Van Oot; teachers devoting their entire time to the practice school, Miss Lou M. Buker, Marjorie M. Blanchard, Mary M. Reed, Welthie B. Buker, Alice M. Coffin. The other 13 were teachers of the schools in Westbrook and South Portland in which members of the graduating class did their practice teaching. The other officers of the school consisted of R. Estelle Bradbury, secretary and librarian; Mrs. Charles E. Ray, matron of the dormitories; Bert L. Libby, caretaker of the normal school building; James Cullen, engineer at the dormitories.

II.

The student enrollment for the year was as follows:

Full number of pupils present during the year.....	235
Number entering during the year.....	132
Number attending during the first semester.....	234
Number attending during the second semester.....	223
Number of graduates in the regular course.....	88
Number of graduates in the manual training course.....	10
The practice school students numbered.....	691

Distribution as follows:

Number in Normal school building.....	148
Number in West Gorham School	23

Number in Westbrook	280
Number in South Portland	240

Each member of the graduating class had approximately three weeks of observation in the regular practice schools at Gorham and the rural school at West Gorham, and seven weeks of teaching either in Gorham, Westbrook, or South Portland.

III

The expenses of the normal school for last year were met as follows:

The state supported the regular normal school work. The state and town of Gorham bore the expense of the practice school and the observation school in Gorham. The town's share of this expense was in round numbers \$1,700. The state paid a bonus to the teachers in Westbrook and South Portland whose schools were used for practice work.

IV.

The 88 young women and 10 young men who made up the class on whom the state conferred diplomas are as follows:

Annie Albert, Sanford; Elinor P. Allen, Gorham; Geneva S. Allen, Gorham; Helen M. Bartlett, Portsmouth, N. H.; Grace E. Bedell, No. Berwick; Clara W. Bickford, Lisbon Falls; Helen G. Billings, No. Berwick; Elizabeth H. Blanchard, E. Lebanon; Celia E. Bowie, Lisbon; Hazel C. Boynton, E. Parsonsfield; Helen M. Brown, So. Portland; Nina M. Butterfield, Baldwin; Mabel A. Carr, Portland; Sarah L. Carr, Frankfort; Ruth B. Coffin, Freeport; Alice L. Cowan, Pittsfield; Catherine E. Craven, Portland; Freda M. Curren, Patten; Nellie E. E. Davis, Rochester, N. H.; Anna M. Drysdale, Woodfords; Ethel M. Durgin, E. Waterboro; Mary Abbie Ericksen, Portland; Sarah G. Feeney, Portland; Mabel E. Fitch, E. Rochester, N. H.; Dorothy E. Foley, Portland; Alice H. Fossett, Randolph; Annie Furvoll, Kennebunk; Alice H. Garland, Center Conway, N. H., Hazel E. Geele, Waldoboro; Anna R. Glovsky, Portland; Gladys E. Hazzard, Berlin Mills, N. H.; Sadie E. Hughey, Woodfords; Helen M. Humphrey, Augusta; Thirza M. Huntress, Cornish; Sylvia C. Hurlburt, Portland; Maud C. Huston, Woodfords; Gertrude L. Irving, Biddeford; Margaret E. Jackson, Portland; Hannah M.

Jacobs, Rochester, N. H.; Ruth W. Jameson, Cornish; Gladys Jenkyn, Boston, Mass.; Olivia E. Johnston, So. Sebec; Mary Ann Keller, W. Rockport; Laura B. Kelsey, Walpole; Marion J. Kimball, Saco; Cecelia M. Lambert, Bridgton; Anna L. Larrabee, Limington; Marie S. Leighton, Portland; Marion A. Littlefield, Sanford; Gladys L. Lord, Limerick; Honora E. Lynch, Portland; Ina W. Loring, Walnut Hill; Lottie B. MacArthur, Milltown; N. Margaret MacMillan, Portland; Lucy E. MacVane, Portland; Mary A. Martin, Liberty; Louise M. McCabe, Kennebunkport; Elizabeth C. Nason, York Village; Olive E. Nutter, Brunswick; Ethel A. Overlock, Waldoboro; Marjorie E. Packard, Ashland, N. H.; Elizabeth M. Packhem, Portland; Marjorie E. Parsons, New Harbor; Florence L. Pettee, Portland; Esther Plaisted, Gorham; Florence M. Pollard, Waterville; Etta Press, Portland; Elizabeth K. Purington, Topsham; Doris Rankin, Woodfords; Ruth A. Remick, Hebron, N. H.; Abbie Richardson, Bar Harbor; Eunice G. Richardson, Limington; Ruth H. Robinson, Gorham; Alice J. Rowe, Portland; Earle S. Russell, Gorham; Ella B. Seekins, Hartland; Ruth B. Spence, Berwick; Katie M. Stacy, Kezar Falls; Edna L. Stone, Cornish; Emma F. Storer, Gorham; Adelaide S. Titcomb, Portland; Bertha L. Tripp, Hollis Center; Louise M. Tyler, Rockland; Rita B. Upton, Milbridge; Cynthia O. Vickery, Bangor; Harriet C. Vinal, Vinalhaven; Elizabeth Walton, Woodfords; Honora M. Wren, Lisbon Center; Lawrence N. Cilley, Portland; Henry E. Douglass, Woodfords; Robert K. Hughey, Portland; Walter H. Johnson, Gorham; Philip A. Libby, Gorham; Archibald J. Rich, Gorham; Earle S. Russell, Gorham; Clifford S. Sawyer, Walnut Hill; Dorr H. Woodward, Dresden Mills; Lloyd F. Stair, Portland.

V.

The library is an increasingly important part of our school equipment. The number of bound volumes reported last year was 1661. The present number is 1673. Many of these books are being worn out each year as they are under constant use by many pupils. There ought to be a considerable sum set aside each year for the continuing and upbuilding of our library.

VI.

Our manual training course this last year graduated a class of ten. Of that class one is now in the University of Maine and the other nine are now teaching manual training.

During the year the manual training department was moved into Academy Hall. The metal working machinery and the wood turning lathes and the drafting room are on the first floor, and on the second floor is the wood working machinery and the wood working shop. This building together with the forge shop comfortably cares for two classes of twelve students each.

VII.

The most pressing need of the normal school in the line of equipment is the enlarging of the recitation building. Our steadily increasing numbers have outgrown the capacity of the assembly room. The cloak rooms and the toilet rooms are inadequate for the present number and more recitation rooms are needed.

Respectfully submitted,

WATER E. RUSSELL.

AROOSTOOK STATE NORMAL SCHOOL.

PRESQUE ISLE, MAINE, June 16, 1916.

To the Trustees of the Maine Normal Schools:

GENTLEMEN:—I have the honor to submit the following report of the Aroostook State Normal School for the year ending June 16, 1916.

Number entering fall term	46
Number enrolled fall term	79
Number entering winter term	14
Number enrolled winter term	93
Number enrolled spring term	73
Number of different pupils enrolled.....	101
Average enrollment	81.6

The teachers for the year have been: San Lorenzo Merri-
man, A. B., principal; Ardelle M. Tozier, Nellie W. Jordan,

Ida M. Folsom, Gertrude T. Morrell, Helen C. Welch, Ethel M. Edwards, assistants; Florence M. Hale and Nellie M. Teed, principals of the training school; Alma Moody and Erdine Morgan, assistant critic teachers; Hazel Arbo, Nellie Young, Daisy Klein, Lelia Randall, Gertrude Delano, Elsie T. Stover, model teachers.

Mr. William D. Hall, assistant principal, was transferred to Castine during the early part of July and no successor was chosen. Mrs. M. L. T. White assisted in the Normal School during the winter term. At the opening of the winter term Florence M. Hale, principal of the training department, resigned to accept the position of Rural School Agent for the State. Her place was taken by Nellie M. Teed, who filled it most admirably for the remainder of the year. During the first days of October Nellie Young, sixth grade model teacher, was transferred to Madawaska Training School, Fort Kent. Her place was taken by Gertrude Delano. Elsie T. Stover filled the fourth grade model position left vacant by the promotion of Miss Teed to the principalship. At the opening of the winter term Kit B. Flanagan was chosen first grade model teacher to succeed Etta B. Collins.

In spite of all these changes the work in the Normal School and in the training department was maintained at its usual standard of excellence.

Diplomas were conferred upon 29 young women and two young men whose names are given below:

Elizabeth Akeley, Presque Isle; Helen Bartlett, Ashland; Carrie M. Bates, Patten; Katherine Beatty, Brewer; Emma R. Blackstone, Perham; Ruth Bliss, Island Falls; Marie A. Bourgoin, Daigle; Elizabeth Carroll, Houlton; Linwood Chase, Presque Isle; Bessie A. Conant, Presque Isle; Delphine Daigle, Fort Kent; Mary B. Fuller, Brownville Junction; Alice R. Harrison, Houlton; Rhoda Hartley, Bridgewater; Clara Hussey, Sherman Mills; Grace Ingalls, Sherman Mills; Patience Jackins, Hodgdon; Gladys Johnson, Fort Fairfield; Agnes L. Kinney, Danforth; Dwight L. Moody, Danforth; Mildred E. Noble, Fort Kent; Villa M. Orcutt, East Sullivan; Catherine Ouelette, Fort Kent; Eoline Porter, Houlton; Marion Pray, Tremont; Emma Rediker, Washburn; Elizabeth Savage, Fort

Kent; Blanche E. Scott, Presque Isle; Emma Sleeper, Sherman Mills; Myrtle Stairs, Washburn; Dorothy Wyman, Mars Hill.

Although we were greatly hampered by the loss of our sub-master, which made the work of each individual teacher somewhat harder, the work was maintained at its usual standard because of the feeling of personal responsibility for the work by each teacher. The spirit on the part of the faculty was one of coöperation and helpfulness and although the conditions were rather unfavorable each one did his best.

The one great need of the school which stands out before all others is a new school building. It is most earnestly hoped that the coming legislature will appropriate money sufficient to build us a building equal to our needs and properly equipped.

Respectfully submitted,

SAN LORENZO MERRIMAN.

REPORT OF SUMMER TERM.

The seventh annual summer term of the Aroostook State Normal School opened Tuesday, July 17, 1916, and continued for six weeks, closing Friday, August 25.

Number registered	55
Number entering	44

The teachers employed were: San Lorenzo Merriman, principal; Ardelle M. Tozier, Ida M. Folsom, Dorr H. Woodward, Helen C. Welch, Alma Moody, assistants.

Four courses were given: The first half of the first term, the second half of the first term, first half of the second term, and the first half of the third term.

The large entering class had to be separated into two divisions as no classroom would seat so many. On this account one extra teacher was employed.

Unusual interest was manifested as all those attending expected to teach in the fall. Fifty-three out of the fifty-five registered secured fall term positions.

Respectfully submitted,

SAN LORENZO MERRIMAN.

WASHINGTON STATE NORMAL SCHOOL.

MACHIAS, MAINE, July 1, 1916.

To the Trustees of the State Normal Schools:

GENTLEMEN:—I have the honor to submit to you the sixth annual report of the Washington State Normal School.

The attendance for the past year has been as follows:

Number registered, fall term, 1915.....	53
Number registered, winter term, 1916.....	60
Number registered spring term, 1916.....	50
Number graduated in June, 1916.....	19

The teachers for the year have been as follows: Wm. L. Powers, principal; Earle D. Merrill, assistant principal; Carrie M. Wight, critic teacher; Martha M. Tobey, Ethel I. Duffy, Florence C. Moore, Cleora M. DeCoster, Elgiva B. Luce, assistant teachers; Blanche E. Whitney, Florence M. Mealy, Emily M. Longfellow, Grace S. Morrison, model teachers; George F. Grafton, janitor; Ella B. Quinn, matron.

DORMITORY.

Our dormitory was occupied for the first time at the opening of the winter term, January 4th. It fills an urgent need and has been greatly enjoyed by students and teachers. Board and room have been provided at \$3.25 per week, a saving of seventy-five cents over what had been previously paid by students rooming in the homes of Machias. The fifteen young men of the school take their meals in the dormitory, but room outside at the same cost per week as is paid by the young ladies. The attendance has been more regular and the social life of the dormitory has been greatly enjoyed by pupils and teachers. Three hundred and fifty people visited the dormitory at the housewarming, inspected all the rooms, and listened to a delightful musical program furnished by the normal school orchestra and Wiswell's Saxophone quartet.

DOMESTIC SCIENCE.

Upon the completion of the dormitory, the domestic science classes moved into their new quarters on the second floor of the wing. Here are provided a large, well lighted, and convenient kitchen, with a range, sinks, hot and cold water, china closets, and laboratory tables for individual use, a sewing room, a dining room for practice work, and a store room. The rooms are a great improvement over the small quarters in the O'Brien house.

This department has taken upon itself and carried out successfully the furnishing of hot lunches for the thirty children of the model department who bring their dinners. One warm dish is provided each day and the children eat their dinners together in the model school kitchen, learn table manners, and have a share in the preparation of the food and other necessary work.

We have enjoyed our work for the past year and now that we have a more complete equipment and a dormitory, we expect still greater results. A wonderful spirit of loyalty has marked the work of both students and teachers, and though our list of graduates is not large, they are making themselves felt throughout the state of Maine. The following are the names of those who were graduated in 1916:

Carrie Beal, Jonesport; Lena A. Beverly, Machias; Winifred B. Beverly, Machias; Kathryn S. Black, Eastport; Vena V. Burritt, Harrington; Alice E. Clark, Machias; Laura V. Colwell, Princeton; Doris B. Damon, Eastport; Rose Gaffney, Machias; Verna A. Lingley, Edmunds; Helen T. MacDonald, Eastport; Blanche I. Mallar, Machias; Elizabeth H. Macomber, Seal Harbor; Ena E. Myers, Lubec; Pearl M. Olsen, East Machias; Nettie M. Perry, Machias; Jeanie C. Sanborn, Machias; Ralph H. White, Jonesboro; Holt A. Whitney, Jonesboro.

Respectfully submitted,

WM. L. POWERS.

MADAWASKA TRAINING SCHOOL.

FORT KENT, MAINE, June 1, 1916.

To the Trustees of the State Normal Schools:

GENTLEMEN:—I have the honor of presenting to you the report of the Madawaska Training School for the year ending June 2, 1916.

ATTENDANCE.

Number of new pupils	56
Number attending autumn term	207
Number attending winter term	210
Number attending spring term	178
Number graduating	22

The teachers for the year have been: Mary P. Nowland, principal; Mary Brown, Katherine L. Lawlis, Sara H. E. Doone, Eleanor F. Welch, Nellie Young, Mary Robbins, Richard F. Crocker, Carl W. Maddocks, Noel D. Godfrey, assistants.

Miss Clara Cooper, who took up the work carried on the two previous years by Beulah C. Bates, that of visiting the rural schools, taught a special class in the Training School during the winter term.

The new dormitory for the boys for which money was appropriated by our last legislature, was built during the summer, the first and second floors being ready for occupancy, January first.

The first floor contains besides an entrance hall and cloak room, a large and well furnished dining-room, which is very well lighted and pleasant, also a commodious kitchen well furnished with closets and cupboards.

To the left of the entrance hall is a cosy room for the Director of the Household Science Department. Too much cannot be said in praise of Miss Robbins' management of the work in the dining-room and kitchen and the splendid spirit with which she has met the difficulties incident upon the starting of this new enterprise. Miss Robbins has an assistant, Miss Ida Russ, who comes to us from the Farmington Normal School.

The girls from the different classes in the Training School, at regular times, go to the new dormitory to help in the preparation of the meals and the care of everything connected with that department.

All this goes on on the first floor and in the basement where most of the cooking is done. Between these and the second floor which is the dormitory for the boys there is no connection.

The boys take turns in helping to prepare the breakfasts. They rise earlier than the others and descend to the kitchen, where under the supervision of Miss Robbins, or her assistant, they set tables, prepare the breakfast, get the bread ready for baking and the vegetables ready for dinner. During the meal they assist in waiting upon the tables. After the meal is over they put the dining-room in order and their work for the day in that line is done.

Twenty-four boys have places in the dormitory. The two young men, Mr. Maddocks and Mr. Godfrey room in the building and have charge there. The boys take the entire care of their rooms and are required to keep them in good order.

It is hoped that the legislature will appropriate money at its next session to finish the upper floor in the dormitory, extend the school building to accommodate the increasing number of scholars, and to supply us with necessary books and apparatus.

During the year much hard work has been done by the teachers in the Training School and I think well done.

The names of those who this year received diplomas are: Rose M. Austin, Fort Kent; Albert Bouchard, Fort Kent; Cora M. Clare, St. Francis; Rose M. Coulombe, Fort Kent; Anne M. N. Cyr, Fort Kent; Alice V. Daigle, Fort Kent; Marie A. Daigle, Fort Kent; Modeste Daigle, Daigle; Alexandre J. Doucette, Fort Kent; Rose L'Abbé, Wallagrass; Alma Lapointe, Fort Kent; Leanna Levesque, Fort Kent; Flavie C. Marquis, Guerette; Emma Michaud, New Canada; Hermina Michaud, Eagle Lake; Lauré Pelletier, Daigle; Corinne Pinette, Fort Kent; Florence Pinette, Fort Kent; Léona Rioux, Fort Kent; Eva Roy, Fort Kent; Ethel Savage, Fort Kent; Thérèse Violette, Fort Kent.

Respectfully submitted,

MARY P. NOWLAND.

COMPARATIVE SUMMARY.

CHAPTER IV.

SUMMER SCHOOLS FOR TEACHERS

CASTINE, MAINE, August 5, 1916.

To the State Superintendent of Public Schools, Augusta, Maine.

DEAR SIR: The state summer school for teachers held at the Eastern State Normal School, Castine, opened Monday, July 17th, and closed Friday, August 4th, 1916, under the instruction of the following teachers:

Albert F. Richardson, director; William D. Hall, school management; Edward E. Philbrook, civics and geography; Mary C. Richardson, arithmetic, history of education and local geography; Laura Belle Young, U. S. history and local history; Mildred A. Beatham, reading and English grammar. Jerry March of Philadelphia, who has for fourteen years been director of the famous choirs in Bethany church in that city and for nineteen years director of music in Girard college, took charge of the music course. Mr. March was even more popular than last year, if possible, and all hope for his return next summer:

Total number registered	104
Number who have taught	94
Number who have taught five years or more.	31
Average teaching experience	4.8 years
Number who are graduates of normal schools.	11
Graduates of academy or high school.	74
Number of different towns represented.	63
Number taking course I.	39
Number taking course II.	24
Number taking course III.	18
Number not in any regular course.	23
Number taking school management.	71

Number taking arithmetic	43
Number taking English grammar.....	43
Number taking reading	31
Number taking geography	35
Number taking civics	6

Respectfully submitted,

ALBERT F. RICHARDSON,

Director.

GORHAM, MAINE, August 5th, 1916.

To the State Superintendent of Public Schools, Augusta, Maine.

DEAR SIR:—The following is the report of the state summer school held in Gorham from July 17 to August 4 inclusive, 1916. The instructors employed and the subjects they taught were as follows: Walter E. Russell, school management and history of education; Samuel H. Reed, grammar, United States history, and geography; Adelaide Moffitt, reading and language; Welthie B. Buker, advanced arithmetic and primary arithmetic; Louis B. Woodward, civics.

The total number registered	80
The number who have had teaching experience....	57
The average teaching experience	155 weeks
The number under 20 years of age.....	20
The number over 30 years of age.....	12
The number between 20 and 30.....	48
The average age	23 years and 9 months
Graduates of secondary schools	69
Graduates of normal schools	4
Graduates of colleges	2
Non-graduates of secondary schools.....	9
Number who have taught in Maine schools.....	65
Number who have taught in other states.....	9
Number who have taught in rural schools of one room	47
Number who have taught in village schools.....	15
Number who have taught in city schools.....	9
Number who have taught in secondary schools....	0
Number without teaching experience.....	14

Number who expect to teach in rural schools next

fall 31

The following indicates the number of students who were given certificates in the several courses:

Advanced arithmetic	28
Primary arithmetic	34
Grammar	56
U. S. History	43
School Management	60
Reading	50
Geography	48
Civics	9
English	13
History of Education	21

Respectfully submitted,

W. E. RUSSELL, *Director.*

MACHIAS, MAINE, August 5, 1916.

To the State Superintendent of Public Schools, Augusta, Maine.

DEAR SIR:—The second term of the state summer school for teachers held in Machias under the new plan opened July 29th and closed August 4th. The instructors were William L. Powers, Director school management, course 1, school management, course 3, history of education, course 2, and history of education, course 3; Carrie M. Wight, school management, course 2, reading, course 2, English, course 2; Martha M. Tobey, Grammar, course 1, arithmetic, course 1, and arithmetic, course 3; Elgiva B. Luce, history, course 1, history, course 2, and civics, course 2; Matilda Doland, geography, course 1, geography, course 2, and geography, course 3.

The number of students registered.....	27
Graduates of secondary schools.....	23
Graduates of normal schools	6
Graduates of colleges	2
Number who have taught	18
Number of superintendents	1
Number of towns represented	16

Number taking the 1st year course.....	10
Number taking the 2nd year course.....	2
Number taking the 3rd year course	1
Number of special course students	14
Number teaching in Maine	25
Number teaching one room rural schools.....	10

What seems most surprising is the fact that only two, Mary McDowell and Annie McLellan of Princeton, from the large class who took first year's work last year, returned for second year's work. There seems to be a lack of definite information on the part of teachers concerning the value of summer school attendance.

No lectures of a popular nature were offered this year, but Superintendent D. H. Corson of Jonesport and Miss Florence M. Hale, State Agent for Rural Education, gave very inspiring and helpful lectures along strictly professional lines. Miss Talbot's violin class furnished entertainment for one period and demonstrated how much may be accomplished in orchestral work by students of grammar school age. The increased interest in school music and school orchestra made Miss Talbot's entertainment especially interesting and valuable.

A reception was tendered to the students and their friends on Friday evening of the first week. An interesting program of plays and dances was offered. Music was furnished by the regular normal school orchestra, or rather by as many of the players as could be collected for the occasion.

A beautiful and helpful spirit of coöperation and enthusiasm marked the work of both students and instructors.

Respectfully submitted,

WM. L. POWERS, *Director.*

FORT KENT, MAINE, August 20, 1916.

To the State Superintendent of Public Schools, Augusta, Maine.

DEAR SIR:—The special summer school for the teachers employed in the schools of this Madawaska Territory opened at Fort Kent, on Monday, August seventh, closing on Friday, August 18th.

The teachers employed were, Miss Mary P. Nowland, director, Miss Matilda B. Doland of the Fitchburg Normal School, Massachusetts, Miss Dorcas Hoyt, Miss Elizabeth Jenkins, of Presque Isle and Miss Nellie Young of Fort Fairfield.

Forty-six teachers were in attendance, of whom twenty received certificates.

That the work was both pleasant and profitable was evidenced by the interest which all present evinced.

Respectfully submitted,

MARY P. NOWLAND,

Director.

TEACHERS' INSTITUTES AND CONVENTIONS

The following schedule gives the names of speakers and the subjects of their addresses at teachers' institutes held during the year in accordance with the provisions of Section 89 of Chapter 15 of the Revised Statutes. Names are given only of those speakers not residents of the county in which the institute or convention was held:

Principal John G. Thompson, Fitchburg Normal School Mass.:

"How to Tell a Teacher from a School-Marm."

Miss Mary McSkimmon, Principal of the Pierce Grammar School, Brookline, Mass.:

"The Teacher's Equipment for Service."

Professor James L. McConaughy, Dartmouth College:

"Habit and Memory in the Schoolroom."

Dr. D. A. Sargent, Director of Physical Training, Harvard University:

"Athletics in College and Secondary Schools."

Dr. Sidney E. Goldstein, Rabbi of the New Synagogue, New York City:

"A Neglected Opportunity for Social Service in the Public Schools."

Superintendent C. S. Lyman, Hudson, Mass.:

"The New Geography Teaching."

Principal Charles F. Warner, Springfield, Mass.:

"Practical Physics."

- Lemuel H. Murlin, D. D., President of Boston University :
 “To What End?”
- Dr. A. E. Winship, Boston, Mass. :
 “That Boy of Mine.”
- Dr. Edward F. Bigelow, Sound Beach, Conn. :
 “The Child or You?”
- Principal W. G. Mallett, Farmington :
 “Schools and Citizenship.”
- Principal A. F. Richardson, Castine :
 “Loyalty.”
- Principal W. E. Russell, Gorham :
 “Am I a Good Teacher?”
 “A Lesson in Optimism.”
- Principal W. L. Powers, Machias :
 “Interest.”
 “Training for Efficiency.”
- Professor R. F. Richardson, University of Maine :
 “The Individual Pupil.”
- Professor D. W. Pearce, University of Maine :
 “Instinct and Behavior.”
 “Habit and Habit Building.”
 “Reading Meaning into Sense Impressions.”
 “The Hygiene of the School Child.”
- Dean Kenneth C. M. Sills, Bowdoin College :
 “Why Not Drop the Classics?”
- Professor Wilmot B. Mitchell, Bowdoin College :
 “Teaching: A Dangerous Profession.”
- Dr. Frank D. Tubbs, Bates College :
 “The Course and Conduct of the World War.”
- Professor Robert A. F. MacDonald, Department of Education,
 Bates College :
 “The Child and Society.”
- Mr. R. P. Mitchell, State Leader of Boys' Clubs :
 “Boys' and Girls' Agriculture Clubs.”
 “Boys' Clubs.”
- Dr. Arthur S. Phelps, Waterville :
 “The Human Touch.”
- Mr. J. W. Taylor, State Agent for Secondary Education :
 “Whither and What.”

- Mr. H. A. Allan, State Agent for Rural Education:
 "The Well Arranged Schoolhouse."
 "A School in Which You Would Like to Teach."
- Miss Florence M. Hale, State Agent for Rural Education:

"Personality," Professor J. D. Taylor, Colby College.

Bass solo, John W. Thomas, Bowdoin College.

Address, Professor Wilmot B. Mitchell, Bowdoin College.

FRIDAY MORNING.

9.30.

DEPARTMENT SESSIONS.

I. DEPARTMENT OF RURAL SCHOOLS, AUDITORIUM, CITY HALL.

Chairman, Superintendent C. A. Record, Sanford.

"Some Practical Suggestions for Increasing the Efficiency of our Rural Schools," Superintendent W. O. Chase, Presque Isle.

"The Vitalizing of the Teaching of Geography and History," Superintendent John E. DeMeyer, Abington and Bridgewater, Massachusetts.

II. DEPARTMENT OF INTERMEDIATE SCHOOLS, ASSEMBLY HALL,
HIGH SCHOOL.

Chairman, Miss Florence M. Hale, Aroostook State Normal School, Presque Isle.

"The Psychology of the Recitation," Miss Mary Hastings, Eastern State Normal School, Castine.

"You and I—and the Boy," Mr. William D. Hall, Eastern State Normal School, Castine.

"Stories for Intermediate Grades," Miss Mildred Beatham, Fort Fairfield.

"Doing Things," Principal John G. Thompson, State Normal School, Fitchburg, Massachusetts.

III. DEPARTMENT OF ENGLISH, VESTRY, FIRST BAPTIST CHURCH.

Chairman, Miss Anna E. Coughlin, Rockland.

"The Study of English and Newspaper Writing," Mr. Oliver L. Hall, Editor, Bangor Daily Commercial.

"Interscholastic Debating in Secondary Schools," Prof. A. Craig Baird, Bates College.

"The Magazine in the English Class," Miss Florence Rideout,

Norway High School.

"Little Experiences from our English Classes."

Discussion.

"Shall There be a Course in Business English in our High Schools?" Mr. George F. Dickinson, Rockland High School.

"The New Movement in English Poetry," Professor Charles Wilbert Snow, formerly of the English Departments of Bowdoin and Williams Colleges and New York University.

IV. DEPARTMENT OF SCHOOL COMMITTEE MEMBERS, ROOM 211,
SECOND FLOOR, HIGH SCHOOL.

Chairman, Mr. Prescott H. Vose, Bangor.

"Layman and Expert in School Supervision—Their Respective Fields of Service," Deputy Commissioner William Orr, Massachusetts.

Address, President Carroll G. Pearse, State Normal School, Milwaukee, Wisconsin.

V. DEPARTMENT OF SCIENCE AND MATHEMATICS (SCIENCE
SESSION), LECTURE ROOM, THIRD FLOOR, HIGH SCHOOL.

Chairman, Principal George R. Gardiner, Brunswick.

"High School Chemistry for its Own Value," Mr. A. B. Yeaton, Edward Little High School, Auburn.

"How Certain Physiographic and Geologic Features Common to Many Parts of Maine Can be Utilized in Class Work," Dr. Homer P. Little, Colby College.

VI. DEPARTMENT OF COMMERCIAL BRANCHES, ROOM 303, THIRD
FLOOR, HIGH SCHOOL.

Chairman, Mr. B. D. Charron, Rumford.

Preliminary Business: Election of officers for the ensuing year.

"What a High School Business Course Should Be," Mr. William E. Chapin, Principal of Commercial Department, Portland High School.

Discussion.

"How all other Subjects of the Commercial Course should be made to Coördinate with Bookkeeping," Mr. Bennett D. Charron, Principal of Commercial Department, Rumford.

Discussion.

Final Business.

VII. DEPARTMENT OF MODERN LANGUAGES, ROOM 205, SECOND FLOOR, HIGH SCHOOL.

Chairman, Miss Carrie Cunningham, Portland.

Report of the Twelfth Annual Meeting of the N. E. M. L. A., Professor George T. Files, Bowdoin College.

Address in French, "La premiere annee de francais," Mr. Francois Joseph Kueny, Instructor in French, University of Maine.

Paper Entitled, "A Four Years' Course of Reading in German and French," by Professor Bagster-Collins of Clumbia University, Mr. Daniel F. Kougham, Portland High School.

Address in German, "Die Rolle Schlesiens in der deutschen Literatur," Mr. Arthur Schubert, Brewster Academy, Wolfborough, N. H.

Some Practical Suggestions on the Teaching of French and German, Madam Beaupre, Bangor High School, and Professor Garrett W. Thompson, University of Maine.

VIII. DEPARTMENT OF SECONDARY SCHOOL AGRICULTURE, ROOM 210, SECOND FLOOR, HIGH SCHOOL.

Chairman, Principal Roland H. Verbeck, Parsonsfield.

"Poultry Husbandry as High School Agriculture," Mr. William C. Monahan, University of Maine.

"How the Home Project can be Applied or Adapted to High School Agriculture in Maine," Principal Herbert S. Hill, Foxcroft Academy.

Question Box on "Suggested Outlines and Courses in Secondary Agriculture," Mr. Harry W. Smith, College of Agriculture, Orono.

IX. DEPARTMENT OF DRAWING, ROOM 302, THIRD FLOOR, HIGH SCHOOL.

Chairman, Miss Lena F. Cleveland, Camden.

"Public School Drawing and the Home—A Relationship," Miss Nellie F. Harvey, Eastern State Normal School, Castine.

"Holiday Lessons for Little People," Miss Mary B. Bullard, Portland.

"Costume Design," Miss Katherine E. Abbott, Farmington State Normal School.

"The Eastern Art and Manual Training Teachers' Association,—An Inspiration for Drawing Teachers," Miss Mabel L. Dealing, Bangor.

FRIDAY AFTERNOON.

2.00.

X. DEPARTMENT OF PRIMARY SCHOOLS AND KINDERGARTENS,
AUDITORIUM, CITY HALL.

Chairman, Miss Mary B. Bills, Eastern State Normal School, Castine.

"What is Patriotism?" Dr. Charles H. Levermore, Acting Director, World Peace Foundation.

(Through coöperation of the American School Peace League)

"The Value of the Kindergarten to the Primary School," Miss Nellie E. Brown, Bangor.

"The Beginning of Nature Study in School," Miss Cleora M. DeCoster, Washington State Normal School, Machias.

"Children's Literature," Mrs. Mary E. S. Root, Children's Librarian, Providence, Rhode Island.

XI. DEPARTMENT OF GRAMMAR SCHOOLS, ASSEMBLY HALL,
HIGH SCHOOL.

Chairman, Miss Gertrude H. McKellar, Calais.

"Plain Truths from Recent School Surveys," Miss Adelaide V. Finch, Lewiston Normal Training School.

"Intellectual Dishonesty," Superintendent John A. Cone, Brunswick.

"The Use of the Phonograph in Grammar Schools," Miss Helen M. King, Portland.

"Value of Standards in Education," Principal John L. Alger, State Normal School, Providence, R. I.

XII. DEPARTMENT OF SECONDARY SCHOOL PRINCIPALS, VESTRY,
FIRST BAPTIST CHURCH.

Chairman, Principal L. H. Conant, Westbrook.

"The Graduation Program," Principal Ernest M. Libby, Presque Isle.

"Clean Athletics," Discussion led by Principal W. E. Sargent, Hebron Academy; Principal Clarence Quimby, Westbrook

Seminary; Principal Drew T. Harthorn, Coburn Classical Institute; Principal S. R. Oldham, Maine Central Institute; Principal J. O. Newton, Maine Wesleyan Seminary.

Business, election of chairman and committee on athletic affairs.

XIII. DEPARTMENT OF SCIENCE AND MATHEMATICS (MATHEMATICS SESSION), LECTURE ROOM, THIRD FLOOR, HIGH SCHOOL.

Chairman, Principal George R. Gardner, Brunswick.

"The Teaching of Secondary School Mathematics," State Superintendent H. C. Morrison, New Hampshire.

Discussion led by Principal J. A. Hamlin, Old Town; Miss Nellie F. Hill, Thornton Academy.

XIV. DEPARTMENT OF PUBLIC SCHOOL MUSIC, ROOM 101, FIRST FLOOR, HIGH SCHOOL.

Chairman, Mr. George W. Horne, Lewiston.

"Practical Hints for the Grade Teacher," Miss Bertha J. Lattie, Portland.

"The School Orchestra," Miss Elizabeth Gale Littlefield, Bangor.

XV. DEPARTMENT OF MANUAL TRAINING, ROOM 303, THIRD FLOOR, HIGH SCHOOL.

Chairman, Mr. Benjamin H. Van Oot, Gorham.

PART I.

"Manual Arts and Agricultural Problems," Principal R. H. Verbeck, Parsonsfield Seminary.

"Industrial Education and College Entrance," Mr. Stephen E. Patrick, Westbrook.

"The Influence of Industry on Civilization and History of Education," Professor D. W. Pearce, Department of Education, University of Maine.

"A New Movement in Manual Arts and Local Coöperation," Mr. D. F. Meserve, Calais.

PART II.

Open Discussions on the following topics:

"Academic Credit for Manual Training." Discussion opened by Mr. William H. Morton, Portland.

"Possibilities of Establishing Part Time or Coöperative Schools." Discussion opened by Mr. N. E. Corthell, Bath.

"Things that Can be Done in the High School Machine Shop." Discussion opened by Mr. Benjamin C. Kent, Bangor.

"The Problems of Pre-Vocational Classes." Discussion opened by Mr. George E. Hutchinson, Gorham.

"Printing and Book-binding in the Public Schools." Discussion opened by Mr. Frederick J. Bryant, Saco.

There was an informal dinner on Friday noon for all Manual Training men.

XVI. DEPARTMENT OF HOME ECONOMICS, ROOM 205, SECOND FLOOR, HIGH SCHOOL.

Chairman, Miss Katharine M. Lynch, Lewiston.

"Methods of Work," Miss Flora T. Norton, Farmington State Normal School.

Discussion.

"Camp Cookery," Miss Elgiva B. Luce, Washington State Normal School, Machias.

"Gleanings from the State," Mrs. F. D. Tubbs, Chairman of the Department of Household Arts of the Maine State Federation of Women's Cubs, Lewiston.

Question Box conducted by Miss Louisa I. Pryor, Dean Nasson Institute, Springvale.

TABLE No. VII.
COMMON SCHOOL STATISTICS.
Comparative Statement A—Annual.
Showing Comparison of Certain Items in School Reports
of the Years 1915 and 1916.

ITEMS.	1916.	1915.
Whole number of persons of school age.....	226,237	225,013
Number of different pupils registered in common schools...	133,407	133,036
Number registered in rural schools.....	50,030	51,960
Number registered in village schools.....	49,913	48,330
Number registered in city schools.....	33,464	32,746
Number conveyed at expense of town.....	7,897	7,910
Average daily attendance for year.....	102,877	101,996
Average length in days of school year.....	170	166
Number of persons of compulsory school age not attending school regularly.....	1,962	1,764
Number excused by school authorities from regular attendance.....	1,005	910
Number completed work of elementary schools.....	6,979	-
Number of different males employed as teachers in common schools.....	516	530
Number of different females employed as teachers in common schools.....	5,669	5,743
Number continued in the same school for the entire year...	3,687	3,427
Number having had previous experience.....	5,248	5,349
Number who are graduates of normal or training schools...	2,342	2,245
Number holding State certificates.....	5,450	5,051
Number holding teaching permits.....	721	1,185
Number who attended teachers' meetings.....	4,501	4,203
Number attending summer schools.....	307	342
Average wages of male teachers per month.....	\$56 94	\$53 04
Average wages of female teachers per week.....	\$11 13	\$10 77
Number of common schools in the State.....	4,664	4,664
Number of one room, rural or suburban.....	2,353	2,358
Number of rural schools in buildings of more than one room.....	139	169
Number located in villages.....	1,348	1,315
Number located in cities.....	824	821
Number of graded schools.....	3,205	3,415
Number not using a course of study.....	710	613
Number having branches of the S. I. L. M.....	573	562
Number having libraries.....	1,285	1,198
Number of public school buildings in the State.....	3,699	3,728
Number of new school buildings during the year.....	39	44
Cost of same.....	\$494,302	\$237,270
Estimated value of all school property.....	\$10,597,424	\$10,021,081
Number of schoolhouses in good condition.....	2,997	3,082
Number supplied with flags.....	2,981	2,935
Amount of common school money available from town treasuries.....	\$872,488	\$860,607
Amount available from State treasury.....	\$1,559,236	\$1,531,163
Amount available from local funds.....	\$60,309	\$53,664
Total amount available, common school purposes exclusively.....	\$2,492,033	\$2,445,434
Total expenditures for common school purposes exclusively.....	\$2,407,220	\$2,326,795

TABLE No. VIII.
COMMON SCHOOL STATISTICS.
Comparative Statement B—Decennial.

**Showing Comparison of Certain Items in School Reports
of the Years 1906 and 1916.**

ITEMS.	1916.	1906.
Whole number of persons of school age.....	226,237	210,288
Number of different pupils registered in common schools...	133,407	130,547
Number registered in rural schools.....	50,030	53,307
Number registered in village schools.....	49,913	42,894
Number registered in city schools.....	33,464	34,346
Average daily attendance for year.....	102,877	97,581
Average length in days of school year.....	170	136
Number of different teachers employed.....	6,185	6,650
Number continued in same school for entire year.....	3,687	2,594
Number having had previous experience.....	5,248	5,042
Number who are graduates of normal or training schools...	2,342	1,653
Average wages of male teachers per month.....	\$56 94	\$38 99
Average wages of female teachers per week.....	\$11 13	\$7 48
Number of common schools.....	4,664	4,549
Number of rural schools.....	2,492	2,677
Number of schools located in villages.....	1,348	1,110
Number of schools located in cities.....	824	762
Number of graded schools.....	3,205	2,009
Number not using a course of study.....	710	1,856
Number of public school buildings.....	3,699	3,901
Number of schoolhouses in good condition.....	2,997	3,318
Number supplied with flags.....	2,981	2,187
Amount of common school money available from town treasuries.....	\$872,488	\$1,018,601
Amount available from State treasury.....	\$1,559,236	\$570,982
Amount available from local funds.....	\$60,309	\$49,161
Total amount available for common school purposes exclusively.....	\$2,492,033	\$1,638,744
Total expenditures for common school purposes exclusively.....	\$2,407,220	\$1,574,345

TABLE No. XIX.
SECONDARY SCHOOLS—Comparative Statement.
Showing Comparison of Certain Items of Secondary School
Statistics of the Years 1915 and 1916.

HIGH SCHOOLS.

ITEMS.	1916.	1915.
Number of free high schools receiving State aid	191	195
Number of towns maintaining free high schools	193	192
Number of different pupils registered	15,742	14,650
Average attendance	13,692	12,899
Number of weeks schools were maintained	6,876	6,866
Number of resident pupils	13,994	13,147
Number of non-resident pupils	1,748	1,503
Number of different persons employed as teachers, males	276	255
Number of different persons employed as teachers, females	504	454
Average wages of male teachers per month	\$112.47	\$110.51
Average wages of female teachers per week	\$16.50	\$16.04
Amount available for high school purposes for fiscal year	\$625,965.00	\$576,520.00
Amount expended for instruction for fiscal year	\$505,618.00	\$470,461.00

CONTRACT TOWNS.

Number of towns contracting with academies	35	37
Number of different pupils registered	1,883	1,934
Average attendance	1,683	1,737
Amount available for secondary school purposes for fiscal year	\$67,646	\$59,840
Amount expended for instruction for fiscal year	\$61,347	\$57,481

ACADEMIES.

Number of academies reporting	50	50
Number of different pupils registered	4,321	4,292
Average attendance	3,798	3,778
Average number pursuing secondary school studies	3,737	3,811
Number of weeks schools were maintained	1,819	1,819
Number of different persons employed as teachers, males	98	98
Number of different persons employed as teachers, females	158	159
Average wages of male teachers per month	\$144.46	\$119.86
Average wages of female teachers per week	\$15.30	\$15.24
Amount of permanent assets	\$3,283,731	\$3,298,346
Amount of current income	\$338,168	\$337,448
Amount expended for instruction	\$177,306	\$176,613
Amount expended for all purposes	\$337,408	\$335,362

PAYMENT FOR TUITION MADE BY TOWNS NOT MAINTAINING STANDARD SECONDARY SCHOOL COURSES.

Number of towns reporting	178	154
Number of pupils for whom tuition was paid	1,636	1,473
Amount expended for tuition	\$57,111	\$39,172

CLASSIFICATION OF SCHOOLS.

Number of high schools and academies approved in Class A	195	196
Number of high schools and academies approved in Class B	26	23
Number of high schools approved in Class C	27	29
Number of high schools classification undetermined	-	1

TABLE No. XX.

Showing Cities and Towns Employing Supervisors of Drawing.

TOWNS.	NUMBER OF TEACHING POSITIONS.		Grades in common schools in which drawing is taught.	Classes in high schools in which drawing is taught.	Cost of special instruction in drawing for year ending July 1, 1916.
	Males.	Females.			
1	2	3	4	5	6

APPENDIX.

Summary of Statistics, Unorganized Townships.

I. NUMBER, SCHOOL, POPULATION, ETC., OF TOWNSHIPS.

Number of townships for which school privileges were provided	78
Number of persons between five and twenty-one years of age, April 1, 1915 ..	880
Number of persons between five and twenty-one years of age, April 1, 1916 ..	918
Number of townships in which schools were maintained	52
Number from which children were schooled outside the township	26
Number of schools maintained within township	58

II. SCHOOL ENROLLMENT AND ATTENDANCE.

Number of different pupils registered from all townships in elementary schools	781
Number of different pupils registered in all schools maintained within the townships	721
Number of different pupils attending elementary schools in outside towns ..	71
Number of different pupils attending unorganized township schools as tuition pupils from adjoining towns	11
Number attending secondary schools	17
Aggregate attendance in schools within the township	70,840
Average daily attendance in schools within the townships	492
Average length in days of the school year	144

III. TEACHERS.

Number of teaching positions	58
Number of different teachers employed	87
Number having previous experience	73
Average weekly wages, including board	\$11 32

IV. SPECIAL SCHOOL CONDITIONS.

Number of pupils not absent one-half day	412
Number of cases of tardiness	1,803
Number of citizens visiting schools	620

V. FISCAL.

Amount paid for wages and board of teachers	\$17,887 82
Amount paid for transportation of pupils	1,306 60
Amount paid for board and tuition of pupils	3,904 50
Amount paid for fuel and janitor	1,152 40
Amount paid for books and supplies	2,023 39
Amount paid agents for services and expenses	2,260 16
Total	\$28,534 87
