STATE ASSESSORS' OFFICE,

AUGUSTA, MAINE, December 1, 1919.

To His Excellency, Carl E. Milliken, Governor, and the  
Honorable Executive Council:

GENTLEMEN:

In accordance with the statutes of the State, we herewith submit for your consideration the Twenty-Ninth Annual Report of the Board of State Assessors, including tabulations of statistics returned to us by all municipal boards of assessors throughout the State, as made by them on April first, 1919, and lists of all corporations on which taxes have been assessed during the present year.

The total valuation of the cities, towns and plantations on April first, 1919, as made and returned by the local boards of assessors is \$526,896,991, representing an increase of \$23,459,948, as compared with similar returns made on April first, 1918.

The following comparison is given of the counties in 1918 and 1919, exclusive of the unorganized townships:

The policy adopted several years ago of holding a larger number of meetings with local assessors, and of devoting more time to ascertaining property conditions and values has been continued and carried out the past year. No effort has been spared in obtaining first hand, reliable information relative to local property conditions. We have diligently emphasized the fact that the law contemplates no basis of value other than the true and just value of all property, unless specifically exempt by statute. All taxable property in the state should be assessed at the full and just value thereof. This is the law of the state and should be invariably recognized and followed by every public official who has anything to do with the assessment of taxes, and the valuation problem in Maine will never be solved until this law is justly and equitably administered.

We have adopted the plan of sending to local assessors a questionnaire asking for general as well as specific information. These have been filled out and returned to us by the assessors in every city and town in the state. We obtained data relative to at least three pieces of property in every city and town, viz: location, condition of property, improvements, insured value, assessed value, etc. We have also obtained the judgment of the local assessor as to what the actual cash market value of these pieces of property is (the value that would obtain between a willing seller and a willing buyer). All this data is to be assembled in workable form and used by this Board in making the next state valuation. Under this system we have gotten together information that will be invaluable and will materially aid us in this work.

We believe that the matter of taxation is the most vital one to be met by the tax official and tax payer. We know that to keep state, county and local machinery moving, revenue must be found. We know that this revenue must come from the property owner. We also know that this burden should be equitably divided. And to this end we have continually urged the tax payer and tax official to get together for a clear understanding of the law, and a harmonious and just administration of the same.

We have found that there are certain kinds of property in the state about which only an expert engineer can give us the information we want. We asked the Legislature for an appropriation for expert work. This was granted and the money

has been expended in obtaining information relative to mill properties, manufacturing plants, water powers, electrical developments, etc. Reports have been filed with this Board for our use, and will also be available for use by the local assessors in the cities and towns where the work has been done.

We have always known and always shall know the amount required of us in taxes, and we also know that these amounts are assessed for certain specific purposes, but we have not been as well informed relative to the equality in the distribution of the assessment. Under the recent tremendous increase in tax rates and assessments there is a general and wide-spread sentiment that some property owners are paying far less than they ought and are thus violating the constitutional provision and adding to the burden of those least able to bear it.

From such investigation as we have been able to make, we have become convinced that the tax bills annually distributed to the average tax payer have become a burden in fact, and it remains a burden until it is receipted and in many cases he gets a receipt just prior to getting another assessment. This condition has become so acute that one of two things must be done. Either appropriations must stop increasing or new property must be found. Several attempts have been made to reach the taxable intangible personal property in this state. These attempts have thus far resulted in failure. It seems to us that it would be wise for all property owners to take careful note of conditions as they exist today and consider whether it is not just and equitable to tax this property upon some basis.

The local rate under the general property tax would in most cases confiscate the income and therefore it is nearly impossible to enforce this law.

The income tax seems to be in conformity with modern economic conditions and in this respect seems to be preferable to any other method.

The fundamental purpose in taxation is to provide revenue which it must be agreed ought to be raised as equally, certainly and economically as possible. And we think fair minded men must agree that it is not raised equally, economically or conveniently so long as a large portion of the wealth of the state escapes taxation entirely.

Justness and fairness would indicate that every person having taxable property should pay some sort of a tax on all of

that property to the government under which he is domiciled and from which he receives the benefits that government confers.

It has been very gratifying to this Board to note the readiness with which tax officials have co-operated with us in our efforts to equalize property values.

We find that property owners do not seriously object to equalization on the full value basis, provided all tangible property is assessed on that basis, and we believe that a majority of the tax payers will be ready to accept this solution of the problem when it is made certain that the law will be enforced without sham, camouflage, evasion or avoidance and when it can be made just as certain that intangibles will be taxed on some equitable basis.
