FIFTY-SECOND ANNUAL REPORT

OF THE

## Insurance Commissioner

---

AUGUSTA, September 1, 1920.

*To the Honorable Governor and Council:*

In compliance with the provisions of Section ninety-two, Chapter fifty-three, Revised Statutes of Maine, I herewith submit the Fifty-second Annual Report of this Department for the year ending December 31, 1919.

Respectfully,

G. WALDON SMITH,

*Insurance Commissioner.*

### THE INSURANCE DEPARTMENT.

The expansion of this Department, with the rapidly increasing lines of insurance coverage to administer, the financial income growing in leaps and bounds, is most impressive and it is quite reasonable to quote and be considered in the category as one of the most important branches of the State Government. While the activities of the Department have largely exceeded previous years in every branch of its operations the cost of maintenance and staff employed has remained practically the same only the exceptional splendid co-operative spirit of everyone connected therewith has made this possible. As an indication of this growth during the year

1919 there was admitted *Eighteen New Companies* writing various forms of insurance, the largest number admitted in any one year in the history of the Department save that of the year 1913 when a number of factory mutuals were admitted. It might be of interest to add at this time that up to going to press of this report for the eight months of 1920 there have been admitted *Twenty-three New Companies*, with several applications pending, so that it is apparent the growth in this direction is of the most healthful character, indicative of appreciation of Maine as a desirable field for insurance development. Many of these companies are of the highest type, all have fully qualified so far as assets and solvent, sound business requirements demand. During the past two years only three companies have withdrawn, this being a most exceptional showing. The income yielded the State from the business of this Department for 1919, including all fees and taxes reached the impressive figures of \$266,418.52, compared with the year 1909, ten years of development, which year yielded \$139,413.49, shows a growth in the receipts of the Department of \$127,005.03. Compared with the year 1918 of \$234,379.67 an increase of \$32,038.85. Present indications warrant the statement that 1920 will reach the splendid figures of \$300,000.

The total amount of Fire Insurance written during the year 1919 was \$497,690,867.89, the premiums paid by the people of Maine for this insurance for fire protection alone reached the unbelievable figures of \$7,067,788.87, the losses paid being \$2,393,570.08.

New life insurance written was \$52,044,562.36, this will serve to indicate the volume of business passing through the channels of the Department. The details of these transactions follow in the various schedules and tables herewith presented. These show that the Insurance Department is one that not only is yielding a large financial revenue for the State but that its transactions are of the most important nature, involving as many believe transactions that are of the most vital importance from the standpoint of economics and business stability covering the interests of persons and property to a most vital and important degree.

## LIFE INSURANCE.

The annual statements filed by the authorized insurance companies operating in this State show that Life Insurance occupies a prominent place in the economic life of the country, notwithstanding that the Federal Government had written at net cost approximately forty billions of dollars of insurance upon the lives of those engaged in military and naval service of the United States, a large percentage of which is continued since military activities ceased, thus creating a coverage that probably under normal conditions would not have prevailed, and despite the fact that the year 1918 produced an unusual increase in business, the insurance written during 1919 by the companies transacting business in this State, shows a large percentage of increase over the previous year. The combined assets of these companies thus engaged in this State aggregate nearly \$5,000,000,000.

During the year 1918 the life insurance companies were required to meet unprecedented losses because of the abnormal mortality due to the influenza epidemic so prevalent throughout the country. This was not experienced in so large a degree in 1919, but when it is known that the mortality exceeded 300% during the former year it will be readily understood that extraordinary burdens were sustained by these companies. That the companies authorized to operate in this State were able to meet this tremendous drain upon their resources without impairment is a tribute to the strength and soundness of life insurance.

## MAINE LIFE INSURANCE COMPANIES.

	<i>Premiums.</i>	<i>Losses.</i>
1919 .....	\$405,904 84	\$356,126 41
1918 .....	377,012 74	265,091 96

## COMPANIES OF OTHER STATES.

1919 .....	\$6,959,643 28	\$3,113,258 67
1918 .....	6,015,220 15	3,109,327 74

## FIRE INSURANCE.

The business of Fire Insurance, all things considered, continued with rather favorable results despite the unusual hazards due to the unsettled conditions following the war. As a whole there has been a most healthful increase of business written due to the awakened interest that replacement values, owing to the great cost of labor and material, requires larger lines of coverage be secured in order that insurance returns might better equalize losses sustained.

The question of arbitrarily increasing premium rates on fire insurance coverage is one that must sooner or later be regarded by legislative enactment, and it is the intent of the Department to carefully formulate plans whereby some equitable, sane measures providing for arbitration in the disposition of this problem. One of the most important changes that was effected during the year 1919 and in which this Department was among the very first in its support in paving the way, was the removal of the so-called sur-charge tax involving 10% increase over previous fire insurance rates. There are other concessions that it would seem from present indications might reasonably be granted and can be fully established upon the completion of the work now in hand by this Department and which will form a basis for the proposed legislation alluded to.

The adjustment of claims by fire insurance companies has been of the most satisfactory nature. No contested litigations of any moment compared with the tremendous transactions involved has been attracted to the attention of the Department and the wisdom of the so-called forty-five day law requiring that losses shall not be paid until that period shall have expired from the time proofs were filed has upon many occasions demonstrated the wisdom of such legislation.

The question of taxes is one of the perplexing problems which call for adjustment, under existing laws insurance companies pay in some states taxes to various departments other than the Insurance Department. The matter is one that has been bandied by various states in an attempt to increase their income and at the present time is being given the most careful thought by the Committee on Taxes of the National Convention of Insurance Commissioners, a committee of which

I am a member and whose recent action was unanimously sustained by the Convention that until some solution of a permanent nature is evolved any increase of taxes be negatively regarded.

## MAINE MUTUAL FIRE INSURANCE COMPANIES.

	<i>Premiums.</i>	<i>Losses.</i>
1919 .....	\$305,039 61	\$165,453 96
1918 .....	296,959 52	\$232,954 10

## FIRE COMPANIES OF OTHER STATES.

1919 .....	\$6,272,613 72	\$2,032,509 33
1918 .....	5,649,902 42	2,099,016 99

## WORKMEN'S COMPENSATION INSURANCE.

For the first time in its history the Department presents in this report a comparison of the business done by the various Insurance Companies writing Workmen's Compensation, it doubtless will prove of great interest to employers carrying this form of insurance but employees may learn something in connection with what is regarded as an insurance protection in the case of injuries sustained causing death or disability, while engaged in their occupation.

It will be readily seen upon reference to the schedules as presented that the increase of total writings for the year 1919 by carriers operating in the State of Maine is most substantial and indicative of the industrial importance steadily growing along all branches of business activity in Maine.

*It may be of interest* to state that following the enactment of the amendment by the last legislature whereby the benefits were substantially increased the carrier companies through the National Workman's Compensation Service Bureau submitted to this Department figures upon which they based their claim an increase of 35% should be added to the manual rates now existent. After several conferences of the representatives of the carrier companies, and the Service Bureau also the Insurance Commissioner, this Department ruled such increase was not proven to be necessary, that the prevailing rate was adequate and that until at least one full year under the new schedule of benefits had been experienced it would be imprac-

licable to consider any increase as suggested. Inasmuch as the total premiums for the year 1919 reached the tremendous figures of \$1,275,000 the acquisition of 35% increase would have imposed a further premium expense to the wage-paying business life of Maine the tremendous sum of nearly \$446,250, and as the subsequent reports of the companies shows the losses sustained less proportionately than the year preceding the judgment of the Department was amply sustained and the satisfaction that an experiment as costly as the one proposed had been denied.

At the present time this Department is making a most exhaustive examination of the experience of Maine industrial wage paying interests based upon the actual doings of the State solely and wholly independent of the experience of other States and upon this, so far as the Department is concerned, must be established the final solution as to whether or not the premium rates shall advance as proposed by the National Council of Workmen's Compensation, an organization evolved from the Service Bureau and now having charge of the subject matter throughout the United States. Workmen's Compensation so far as rate making is concerned is a vastly larger proposition and more important in its contemplation than what at first appeared and it is the earnest effort of the Department that there would be recognized in the consideration as to whether or not increase should be sustained, the citizenship of the State, the fact that no industrial disturbances of any moment have occurred within its borders, that in the round-up of elements disturbing economic and industrial conditions there were none of the so-called "Reds" found in Maine, thus at once establishing the fact that a higher grade of citizenship, at least one that was of the type that could be regarded as essentially careful in the risks to which they might be exposed in their industrial and everyday work life.

The complete and illuminative reports required by the Insurance Department to be filed by compensation insurance carriers of all kinds and as contained in the so-called Schedule "W" and "Z" will, we believe, establish the final basis for compensation rates dependent entirely upon the experience of the State of Maine in such findings.

## WORKMEN'S COMPENSATION INSURANCE.

	<i>Premiums.</i>	<i>Losses.</i>
1919 .....	\$1,274,634 07	\$432,734 42
1918 .....	1,101,302 80	312,050 65

## MARINE INSURANCE.

A new impetus has been created in the matter of Marine Insurance because of the activity of the sub-committee on Merchant Marine and Fisheries and United States Shipping Board appointed by the Federal Congress to inquire into various phases increasing the service in America of Marine Insurance Underwriting and as a result thereof new capital has been attracted, a number of companies being newly organized for such purpose or carrying on only a fire insurance business assumed additional marine powers while several companies of foreign countries have acquired the necessary authority to carry on business in this State.

This Department upon invitation of the Congressional committee entered very fully into a discussion of the subject and gave as its opinion that Maine would strictly support any movement which would better the opportunities of increasing our American Insurance Companies interests and protecting business by American underwriting, inasmuch as American companies have entered the field to such an extent as to become keen competitors of foreign underwriters. It is a desirable undertaking and in the interests of American shippers who have heretofore found it necessary to obtain much of the required insurance coverage abroad. The two domestic marine insurance companies have indicated by the growth and development of their business that there is a large undeveloped field of accomplishment in store and I am of the opinion that Maine may well enter very fully and cordially the ranks of such states as will not be found wanting but rather will be in the forefront and offering every proper advantage and opportunity for the larger development of the business.

## CASUALTY AND SURETY INSURANCE.

From a survey of the reports filed it is apparent the companies generally writing these lines have had a prosperous and successful year. This business has largely developed into one of the most important branches of the insurance field within the last twenty years. The total volume of casualty and surety premiums received by all companies operating in Maine for the year 1897 amounted to \$128,882.27; for the year 1919 these premiums amounted to \$2,495,093.40, more than one-half of the increase during this period of twenty-two years is due to two comparatively new lines, viz.: automobile and workmen's compensation.

From all indications the operations of 1919 have strengthened the companies generally in a financial way and the insuring public may with safety place confidence in the ability of these institutions to fulfill and carry out their obligations.

## FRATERNAL INSURANCE.

Fraternal insurance furnishes protection to a large number of our people who are either unable to obtain same in the so called "old line companies" or for some other reason prefer this form of insurance protection. The total amount of insurance in force on December 31st, 1919, in the fraternal societies and orders operating in the State of Maine amounted to \$49,534,178. Like the legal reserve companies the fraternal during the past two years have been subjected to abnormal demands because of the excessive mortality due to the influenza epidemic. The societies authorized in this State have thus far been able to meet these extra payments.

The Convention of Insurance Commissioners held in 1919 has most exhaustively taken this subject into consideration and there will be a new arrangement of rates so far as possible to provide the conduct of the business upon an adequate basis without imperiling the older societies in their work and plans by such readjustment. Doubtless this will occur during the year 1920 and I have no question but what the various organizations reporting to the State of Maine, 28 in all, will in the most co-operative spirit meet such conditions as may be imposed by these various State supervising officials in the Convention to be held in December, 1920.

## MAINE FRATERNAL INSURANCE COMPANIES.

	<i>Premiums.</i>	<i>Losses.</i>
1919 .....	\$145,377 69	\$118,889 82
1918 .....	109,169 31	\$136,308 75

## FRATERNAL COMPANIES OF OTHER STATES.

1919 .....	\$742,424 35	\$499,403 73
1918 .....	712,846 16	551,598 79

## HEALTH AND ACCIDENT INSURANCE.

With few exceptions the companies reporting to this Department show a satisfactory increase in business written and decrease in losses sustained so that it may well be regarded that this form of insurance is being soundly administered and satisfactorily exploited, the operations in detail of the companies thus engaged in this form of insurance, is worthy of close examination, the satisfaction of the Department is herewith expressed with the favorable showing as relating to decrease in losses sustained.

## HEALTH AND ACCIDENT—STOCK COMPANIES.

	<i>Premiums.</i>	<i>Losses.</i>
1919 Accident .....	\$419,935 44	\$159,305 53
Health .....	83,777 99	39,486 64
1918 Accident .....	\$387,317 25	\$177,155 22
Health .....	65,148 06	34,701 58

## CO-OPERATION.

The co-operation of companies, underwriters and agents has been most gratifying to the Commissioner, this relates to all branches of insurance. The splendid spirit manifest toward the administration from the beginning of his term is deeply appreciated. Upon many occasions there have been serious differences of opinion, rulings that were at times regarded as being drastic or at variance with what was hoped might be the viewpoint of the Commissioner, but in every instance there has been a willingness in yielding to such rules that have been laid down and it has been generally conceded that such action was purely in the interests of the best condi-

tions involving underwriting and agreeable to the statutes provided under the laws of the State of Maine.

The Commissioner has been called upon to address various functions, conventions and meetings of interest connected with the insurance fraternity, meeting at "close range" the active, red-blooded men and women who are engaged in underwriting and it has been my endeavor to support helpful suggestions and to explain any misunderstandings that may have prevailed, in this direction it is earnestly hoped much good has been yielded. It is also gratifying to note that in many of the suggestions looking toward simplifying the process of reporting the business of the companies, system of bookkeeping and lax methods of conduct, immediate compliance has obtained and it is a most noticeable incident that in the examination of the year's statements a most emphatic improvement is discernible. The sincere thanks of the Department is herewith extended to all who have endeavored to thus help improve by compliance and correction of methods and means in connection with the above statement.

#### LIGHTING ROD INSURANCE.

The notable growth of this form of insurance, the rodding of buildings of various types, especially those of farm buildings, is attracting the attention generally of fire insurance underwriters and the fact that there has not been reported to this Department for the past two years a single instance of fire destroying property that had been properly rodded. Requirements of the Department before any company is authorized to sell or install lighting rod equipments is of such a character that the science involved has proven to carry confidence as well as safety into the field of this industry. Every equipment in connection with such installation is subjected to the Underwriters' Laboratories for the most exhaustive test, and unless a certificate setting forth that these tests have been satisfactorily met no company is authorized to transact business in Maine despite its financial or other position. Engaged in this form of insurance are six companies duly operating in the State employing close to 100 agents, in all cases licensed by the State before authority is given for the sale or the instal-

lation of such goods. A report from the National Fire Underwriters Association indicates that during the year 1919 not a single case, in the losses involving many millions of dollars has there been a fire loss from lightning where buildings have thus been rodded under conditions such as obtain in Maine, and with the increased growth and development of lightning rod installations it is quite within the range of possibility the lightning fire losses in Maine will be materially reduced. The high standard of inspection maintained by the Department of these installations organized during the current year, the companies agreeing to reimburse the Department in all expenses relating to such service, it is hoped by such investigations the highest efficiency will obtain in work thus installed in this State.

#### FIRE INVESTIGATIONS.

Unusual activity prevailed during the year, many arrests were made following the investigation of suspected cases of incendiarism and a fair percentage of convictions obtained, but the largest force that has been the strongest factor is the moral effect that has gone forth, for it is generally known the Department had established a corps of investigators and system of investigation that indicated its determination to stamp out incendiarism by a thorough, efficient and energetic process.

The municipal authorities in all instances when appealed to have rendered splendid service, the various County Attorneys have accorded earnest co-operation and while it is an established fact that for almost all other forms of crime convictions would have obtained in the most cases presented, because of the quality of evidence submitted, it is a settled fact in cases of arson where the penalty imposed is of the severest order conviction does not apparently obtain, where many times it would and should were it not for this phase of the situation.

This work must vigorously continue, inasmuch as the function of Fire Marshal duties are part of the work of the Insurance Department, liberal appropriations must be made for its development and maintenance, the lessened fire toll

as indicated in the report of losses from suspicious origin proves this arm of the Department's activity must be strengthened for the public safeguarding.

#### CONTESTED CLAIMS.

It is with appreciation the Department acknowledges the satisfactory adjustment of every contested claim submitted by the insured and the companies alike. Many of the complaints made relative to misrepresentation and twisting appears upon investigation to have been based upon misunderstanding, not a single claim covering the several scores submitted to the Department but what there existed a reasonable doubt as to the correctness thereof, the Department was successful in securing satisfactory adjustment of all claims submitted, the companies co-operating to a most satisfactory degree. The companies seem to be exercising considerable care in their selection of agents, the agents appear to be co-operating with the companies in establishing the confidence of our people in the insurance business. Whenever there was reasonable willingness upon the part of the contestant and the company very little difficulty was experienced in having a meeting of minds and satisfactory adjudication.

#### FIRE PREVENTION.

"Precaution is the greatest fire prevention device," was expressed by leading experts at the recent Convention of Fire Marshals upon the subject, careful estimates establishes the absolute fact that 60% of fires are preventable, many place the figures at 75%. During the year many inspections were made of institutions, much correspondence was had calling attention to buildings and other sources that were regarded as being a fire menace. Immediate remedying of conditions were insisted upon and strict compliance with the law has provided for this especial field of fire science.

Many communications received from fire chiefs and fire wards throughout the State calling attention of the Department, in response to an invitation through circular letters, to many buildings and equipments at variance with safety, in

all such instances the Department immediately advised chiefs or wards of the rights and authority vested in them through the statutes and assured them of the support of the Department in the enforcement of such proceedings as might be invoked. It has been of immeasurable value, this especial phase of the Department's work, for in almost every case thus reported immediate compliance, correction or removal, of the objectionable structure obtained and the fire fighting forces of Maine today fully appreciate and realize this Department will back them to the limit and will undertake, if their forces are unavailing, to correct through the machinery of the Department such cases as may be thus reported.

In common with other states this Department waged a campaign for Fire Prevention and Clean-Up Day October 8th with most satisfying results. The work of the Department in its campaign of educational clean-up, closer inspection of risks, closer co-operation of the companies and agents and the public have all been beneficial in bringing before the people the need of greater care. It is extremely important this campaign continue, that every effort be made not only to reduce the fire loss but the fire hazards in the State, that by such reduction of loss insurance rates be decreased and thus not only the economic conditions of communities be greater safeguarded and loss prevented, but definite saving in fire insurance premiums be accorded.

Our citizens are daily increasing their requests to the Department for information upon insurance matters, building constructions and fire fighting equipments and it is the earnest desire of the Department that they make the fullest use of the service at its disposal.

#### FINANCIAL EXAMINATION OF COMPANIES.

The Department has carefully audited the books of all domestic companies annually excepting some of the smaller mutual fire companies which the statutes provide permissive examinations every other year. With these few exceptions a thorough review and comparison with the annual statements filed with the Department have been closely scrutinized and it is very gratifying to be enabled to record that there

is no evidence of conditions other than are entirely acceptable to the Department. Soundness, solvency and careful administration seem to be manifest in all directions and Maine may well feel a thrill of pride in its splendidly conducted domestic institutions covering life, casualty, health and accident, assessment and fraternal organizations operating within its borders. There has been a sincere disposition upon the part of the officials in charge of these various arms of insurance to fully meet not only the requirements of the Department but adopt such suggestions for the simplification of their books and records so that examinations are readily made and accessibility given to any who may be interested to know the true status and condition at any time. No extended actuarial examination has been made of any of the larger companies, but it is designed during the year 1920 to conduct in an amplified form of such companies as it is believed will not only welcome for their own sake the examination, but the Department believes is essential on behalf of the public for such examinations to be made. At all times the co-operation of the officials in these various examinations has been of the finest order and the Department recognizes and appreciates the splendid assistance accorded.

#### WAR RISK INSURANCE.

Early in the year 1918 I tendered the active co-operation and assistance of the Department to the officials having in charge the conduct of the War Risk Insurance in Washington, believing every encouragement and assistance should be rendered to strengthen the confidence of former service men to keep in force their insurance and to that end every request received by this Department from the officers having that especial line of work in charge, prompt service has been rendered and the Department has been accorded the highest praise from officials for the spirit of co-operation and the practical work accomplished. Many requests have been received from men regarding changes in their policies, reducing the amounts or seeking other information concerning their policies, all have been cheerfully and promptly accorded the best attention possible and we have endeavored through the public press

and circulars to make known our desires to render whatever assistance possible that men may understand more fully and more generally the provisions under which their insurance was issued.

Under the War Risk Insurance Act providing protection for soldiers and sailors about 90% in the service have taken Government insurance, the average policy being a trifle over \$8000, the total amount insured is greater than that on the books of all the life insurance companies and of the fraternal orders in the country.

As first written this insurance was on the term plan with step-rate premium, the Government has now issued regulations governing the conversion of these term policies into ordinary life, limited payment life and endowment policies with level premiums payable monthly, quarterly, semi-annually or annually. The policies are very liberal and are free from all restrictions as to residence, travel, occupation, military or naval service. Applications for this insurance must be made during the five years following the termination of the war, but in order to avail themselves of the privilege the persons holding the present Term insurance must keep their insurance in force until the conversion is made.

#### UNAUTHORIZED INSURANCE.

Returns filed with this Department under Section 57, Chapter 9, Revised Statutes 1916, requiring a tax of  $2\frac{1}{2}\%$  on premiums paid for insurance on Maine property to unauthorized insurance companies, associations, etc., by persons or companies residing or doing business in Maine, show for the year ending December 31st, 1919, that insurance amounting to \$14,963,471.69 was placed on property in this State with such companies and that gross premiums amounting to \$225,491.80 were written on such risks. The amount received by the State Treasurer for tax on the above was \$4,065.62.

It has been a vexatious question regarding the correct returns obtainable from this source of insurance, many are evading honest returns to this Department. It is a question pure and simple of honesty and it is the hope of the Department with the advent of new companies seeking admission

to do business in this State the necessity of using companies unauthorized, may soon be a thing of the past, for when it is further understood that insurance in such companies becoming claims and payments resisted, legal proceedings could not obtain in Maine, action must be in such states in which the companies have been organized and the domicile of its home office. An earnest endeavor has been made to interest many of these unauthorized companies and it is with pleasure that the statement is made some twelve companies have thus accepted our invitation and have been regularly authorized and licensed to do business in this State, that more will follow is the belief of the Department for it will be its constant endeavor to keep the matter before these various companies so they may do business regularly as companies duly licensed for the State of Maine.

#### NATIONAL CONVENTION OF INSURANCE COMMISSIONERS.

The 50th session of the National Convention of Insurance Commissioners of the United States met at Hartford, September 9th, 10th, 11th and 12th, 1919. The number of states and territories represented was the largest of any of the Conventions ever held—37 being thus represented, the number of persons in attendance representing various interests of insurance was probably larger than at any other session.

These meetings of the Insurance Commissioners have come to be an important affair, are really of great advantage to the insurance world during fifty years in which they have been held much has been done to bring the different states on a common basis. Uniformity in laws and practices have developed as a result thereof and although there is still much that remains to be done it is evident the future will be fraught with much-to-be-desired results.

It was the privilege of your Commissioner to have a place upon the program of the Convention, the paper prepared and read by him, "The Adjustment of Fire Losses and the Payment Thereof" not only was subjected to one of the lengthiest discussions of the Convention, but was privileged to be reprinted and circulated throughout the country among the fire insurance companies and underwriters. In addition to

this recognition the Commissioner of Maine was placed upon several of the most important committees, notably, Taxation; Fire Insurance; Publicity and Conservation; Credentials and Assets of Insurance Companies. It was with deep regret that I found it impossible to attend the Fifty-first Convention to be held Sept. 1, 2, 3, 1920, at Los Angeles, California, while His Excellency Governor Milliken expressed his entire willingness your Commissioner might attend this most important Convention, because of the increase in business of the Department, the fact that the Compensation rating was being actively conducted led me to forego what would have been not only a most profitable trip, but doubtless enjoyable in many respects.

Respectfully Submitted,

G. WALDON SMITH,

*Insurance Commissioner.*
