## STATE OF MAINE

---

Augusta, Maine, December 1, 1920.

*To the Honorable Carl E. Milliken, Governor and the Executive Council of the State of Maine:*

I have the honor to submit herewith the sixty-fourth annual report of the Banking Department for the fiscal year ending November 30, 1920, and desire to call your attention to the remarkable increase in total resources of the banking institutions under the supervision of this Department. These resources now amount to \$266,253,952.30 as compared with \$241,059,944.97 one year ago. This gain of \$25,194,007.33 in resources during the past year is far in excess of the growth of any preceding year in the entire history of the Banking Department.

It is especially pleasing to note that this unprecedented growth of our state banking institutions is due in a large measure to a very rapid increase of the savings deposits of Trust Companies and Savings Banks. These institutions show a gain of approximately \$16,000,000. in the total amount of savings deposits, which is the largest annual increase in the history of banking and exceeds that of the previous year by approximately \$5,500,000. I also desire to call your attention to the tables submitted herewith which show a very gratifying increase of 23,485 in the total number of savings depositors of Trust Companies and Savings Banks during the past year.

The foregoing increase in number and amount of savings deposits has been made notwithstanding the fact that certain banking institutions without the State have been actively soliciting deposits by mail and offering higher interest rates. While on first thought, high interest rates may seem attractive, nevertheless depositors are primarily interested in the safety of their deposits and the privilege of withdrawing their savings at any time without delay. Consequently, the conservative investment of such savings and adequate provision against

future loss are of the utmost importance. The banking institutions of Maine have wisely pursued the sound policy of maintaining their rates at four percent rather than undertaking to increase their rates in competition with banking institutions of another state. That such a conservative policy inspires public confidence is indicated by this remarkable increase in number and amount of deposits.

During the past year there have been no bank failures in Maine, and no banking institutions within the State has had occasion to require the statutory notice of depositors desiring to withdraw their deposits.

The resources of the Loan and Building Associations of Maine are small in comparison with the resources of other classes of banking institutions, yet they serve an equally worthy purpose and have shown a corresponding progress and prosperity. During the past year the number of shareholders in these Associations has increased 2,064 as compared with an increase of 427 during the preceding year and an increase of 98 during the year 1918. These Associations have also increased their resources \$1,198,029.94 as compared with an increase of \$799,762.39 in the year 1919, and an increase of \$579,929.45 in 1918.

The number, classes and resources of the institutions under the supervision of this department as compiled from the annual returns of September 27, 1919 and September 25, 1920, respectively, are as follows:

In the absence of a later report from the Comptroller's office it is impossible to state the present combined resources of state institutions and National Banks of Maine. It is apparent, however, from the foregoing statement of June 30, 1920, that the National Banks have made a large gain, and that the combined banking resources of the State are now in excess of \$377,000,000.

## SAVINGS BANKS

On September 25, 1920, there were forty-three Savings Banks doing business in Maine, with total resources amounting to \$114,138,163.90, as compared with forty-four institutions one year previous having resources amounting to \$107,463,351.59. The following is a comparative statement of their liabilities and resources on September 27, 1919 and September 25, 1920:

The foregoing comparative statement shows a very remarkable increase of \$6,277,799.77 in the total amount of Savings Bank deposits as compared with an increase of \$3,550,576.07 during the preceding year. As already indicated, this annual

increase in savings deposits has never been equalled in previous years.

There was also an increase of 2,261 in the total number of depositors, and the average amount of each deposit increased from \$418.64 to \$441.07. During the past year the Reserve Fund and Undivided profits available for the protection of depositors increased from \$8,757,353.28 to \$9,284,041.05—an increase of \$526,687.77.

In connection with these comparisons it should be borne in mind that they are made between the totals of the forty-four Mutual Savings Banks existing on September 27, 1919 and the forty-three Mutual Savings Banks doing business on September 25, 1920. During the past year the Tremont Savings Bank, having 352 depositors and deposits amounting to \$75,960.28, merged with the Union Trust Company of Ellsworth. Consequently, the deposits of said Tremont Savings Bank are not included in the 1920 Savings Bank summary, but now appear in the Trust Company Statement. Taking this fact into consideration, the deposits of the forty-three Savings Banks now doing business actually increased \$6,353,760.05 and gained 2,613 in number of depositors.

The average rate of dividend has increased to 3.96½% as nearly every Savings Bank is now paying four per cent on its deposits. During the past year the total dividends paid depositors amounted to \$3,828,156.63. The Savings Banks also added \$526,687.77 to their Reserve Fund and Undivided Profits as further protection of their depositors against future loss.

The following table shows the several classes of investments held by Savings Banks, the amount of each class and its percentage to the whole, and a comparison with the same classes of one year and ten years previous:

The only noticeable change of the past year in the percentage of each class of investments has been the further increase of United States Securities, from 17.42% to 21.12% of the total resources. In making a comparison with the resources of Savings Banks ten years previous, the outstanding feature has been the increase of United States Securities from .03% to 21.12% and a somewhat corresponding decrease of out of Maine Municipals from 18.71% to 1.85% of total resources. This radical change from out of Maine Municipals to Government Securities has resulted in a very material increase in income from such holdings, and a decrease in the amount of taxes resulting from the exchange of taxable for tax exempt investments. This change in investments, together with the material reduction in the rate of taxation by the last Legislature, results in a very substantial increase in net earnings of our Mutual Savings Institutions, which should be used in the further charging down of their investments. You will also note from the foregoing table that during the past ten years there has been a very material reduction in the relative amount of Railroad Bonds from 43.3% to 34.66% of the total resources.

Occasionally criticisms come to the attention of the Banking Department in reference to the alleged tendency of our Savings Banks to invest the funds of Maine people in enterprises located outside the State. Such criticism is, in my opinion, due to a lack of knowledge of the actual conditions.

For the purpose of showing the relative amount of Maine investments as compared with investments made without the State, your attention is called to the following table:

RESOURCES.	1920.	1910.
United States securities.....	\$24,113,642 22	21.12 .03
Investments in Maine.....	52,023,673 18	45.58 44.87
Investments out of Maine.....	35,472,687 08	31.08 53.22
Cash.....	2,518,461 52	2.21 1.68
Premium account.....	9,700 00	.01 .20
Total.....	\$114,138,163 90	100.00 100.00

You will note from the above table that 47.79% of the present total Savings Bank resources represents cash and investments within the State, while 31.08% represents out of Maine investments. A comparison of the present investments

with those of ten years previous discloses the fact that the remaining 21.12% of present resources consists of United States Securities, the acquiring of which has reduced the percentage of out of Maine investments from 53.22% to 31.08%.

It has been the policy of the State to encourage Maine investments by exempting from taxation such investments as State and municipal obligations and loans secured by mortgages on real estate. In determining the franchise tax of Mutual Savings Banks the statute further permits the deduction of three-fifths of the value of all other Maine investments which are not exempt from taxation in the hands of the individual. Such legislation makes it to the advantage of the Savings Banks to invest in Maine enterprises in so far as is consistent with sound banking. It is not, however, to be expected or desired that all the Savings Bank funds should be invested within the State. The successful management of the Savings Institutions requires that there should be a proper distribution of its investments both as to their nature and also as to their location. In view of the recognized principals of sound investing and the legal restrictions placed on the investment of Savings Bank funds, I consider the above proportion of Maine holdings as very satisfactory.

During the past several years we have come to realize more fully the importance of maintaining our banking institutions in a more liquid condition. As the average rate of return on Savings Bank investments is comparatively low, it is desirable that the bank's balance of idle funds should be as small as is consistent with its needs. At the same time it is important that the bank should maintain an adequate secondary reserve to meet unusual withdrawals in excess of current deposits. High grade securities are no longer looked upon as a desirable secondary reserve as the bank is liable to have occasion to resort to such reserve at a time when securities can be disposed of only at a great sacrifice.

The Savings Bank's secondary reserve should consist of a suitable amount of assets which yield a fair rate of return, and at the same time, are immediately convertible into cash without sacrifice even under abnormal conditions. Bank acceptances, eligible for rediscount with Federal Reserve Banks, are readily

convertible into cash without material loss even under depressed market conditions and therefore make an ideal secondary reserve. As the acceptances approach maturity, they become even more attractive as a liquid investment and the savings banks, having occasion to dispose of them before maturity, can often do so at a better rate than that at which they were purchased. With such a reserve in times of stress, the savings institutions would no longer have occasion to liquidate their long term securities or depend upon their correspondent banks for assistance. In this connection I desire to call the attention of Savings Bank trustees to the provisions of Chapter 50 of the Laws of 1919. This Act of the last Legislature permits Savings Banks to invest in acceptances which are eligible for rediscount with Federal Reserve Banks, provided they have been accepted or indorsed by a Trust Company incorporated under the laws of this State, or a member of the Federal Reserve System located in New England or the State of New York.

The investment of savings deposits in such acceptances would in no respect lower the conservative standard established for savings bank investments. In fact, bank acceptances would be even safer than the deposit of funds in the accepting bank, as the acceptance is not only the obligation of the bank accepting the bill, but also has the added strength of the drawer and indorsers thereon. Such investments are not only as safe but also nearly as liquid as the interest bearing deposits held by correspondent banks, and the rate of yield would be much larger than on such deposits.

At the present time eight Savings Banks of the State have approximately five hundred thousand dollars invested in such acceptances. It is earnestly urged that the remaining savings institutions give careful consideration to the advantage of such investments for secondary reserves and as a means of temporarily absorbing surplus funds not available for long term investments.

The Trust Companies of Maine also show a remarkable growth, having increased their total resources \$17,183,389.41. During the year their savings deposits increased \$9,633,311.30, which is by far the greatest increase of savings deposits during

any one year since the establishment of the Trust Company system. There was also a gain of \$3,567,775.45 in the amount of demand deposits and of \$1,079,890.91 in the amount of certificates of deposit. You will further note that there was an increase of 37,964 in the total number of depositors, of which number 21,224 were savings depositors.

The growth of Maine Trust Companies is indicated by the following table, showing their number, the amount of capital, surplus, deposits and total assets for each of the past twenty years:

The foregoing table discloses the very rapid growth of our Maine Trust Companies especially during recent years. The total resources now amount to \$141,723,240.26 as compared with resources amounting to \$69,707,168.45 in the year 1915. This shows a gain of \$72,016,071.81, or in other words the total Trust Company resources have more than doubled during the past five years.

### NEW TRUST COMPANIES.

The Washburn Trust Company of Washburn, Maine, was organized on January 26, 1920, to succeed the Washburn Branch of the Aroostook Trust Company. On March 1st, 1920, the Bank Commissioner authorized said Washburn Trust Company to begin the transaction of business with a capital stock of \$50,000. and a paid in surplus of \$12,500.

The Corinna Trust Company of Corinna, Maine, received its preliminary certificate from the Bank Commissioner on December 1st, 1919. On July 7th, 1920, said Trust Company filed its certificate of organization with the Secretary of State and began business with a capital stock of \$25,000. and a paid in surplus of \$10,000.

The Danforth Trust Company of Danforth, Maine, received its preliminary certificate from the Bank Commissioner on April 17th, 1920. Said Trust Company expects to begin business on January 1st, 1921, with a capital stock of \$50,000 and a paid in surplus of \$12,500.

#### BRANCHES AND AGENCIES.

The Kittery Branch of the York County Trust Company was authorized under certificate of the Bank Commissioner, December 30, 1919. Said Branch was opened for business at Kittery, Maine, on January 2, 1920.

The Union Branch of the Security Trust Company was authorized under certificate of the Bank Commissioner, issued January 22, 1920. Said Branch was opened for business at Union, Maine, on May 17, 1920.

The Brooks Branch of the Waldo Trust Company was authorized under certificate of the Bank Commissioner issued September 4, 1920. Said Branch expects to open for business at Brooks, Maine, on December 1, 1920.

The Brownville Junction Agency of the Kineo Trust Company was authorized under certificate of the Bank Commissioner issued August 27, 1920. Said Agency was opened for business at Brownville Junction, Maine, on September 3, 1920.

The Waterboro Agency of the Sanford Trust Company was authorized under certificate of the Bank Commissioner, issued October 12, 1920, but has not yet opened for business.

#### INCREASE OF CAPITAL STOCK.

On December 9, 1919, the Department approved an increase of the capital stock of the Merrill Trust Company from \$300,000 to \$400,000. The Department also approved an increase of the capital stock of the Augusta Trust Company from \$100,000. to \$200,000. on January 24, 1920, and on September

17, 1920, approved an increase from \$50,000. to \$60,000. of the capital stock of the Waldo Trust Company of Belfast.

The capital stock of Maine Trust Companies has increased from \$1,601,700. to \$4,939,400. during the past twenty years. During the last twelve months there has been a gain of \$316,000. in the amount of capital stock, while the deposit liabilities have increased \$14,280,977. during the same period. This rapid growth of bank deposits gives rise to a problem requiring careful consideration.

Those familiar with the fundamental principles of banking realize the importance of maintaining a proper ratio between capital and deposit liabilities. An increase of banking capital is also necessary for the proper development of commercial and industrial enterprises of the State. Because of the limited amount of capital stock, many banking institutions are unable to properly take care of the requirements of larger enterprises. The last legislature very wisely restricted the loan limit of Trust Companies to twenty-five percent of their capital, surplus and undivided profits. Such legislation has been very helpful to the banking situation. It is also reassuring to the public when they realize that it is no longer possible for a Trust Company to make an excessive loan that would involve the safety of the deposits if such loan should prove a total loss. While such legislation protects the depositors it necessarily restricts the small bank's ability to properly serve its larger customers. Such bank would undoubtedly find it advantageous to increase its capital if it were able to find a market for such additional stock.

There is no statutory provision enabling the Department to require an increase of capital stock when such increase seems advisable. The recommendation of such increase is usually not with the contention that the bank is unable to find a market for additional bank stock, and I realize that there is much truth in this contention. This is due to the present tax legislation discriminating against bank stocks, and consequently making such securities unattractive to the investor. The average investor finds it to his advantage to invest in securities that escape taxation, although in such instances the capital usually goes into enterprises without the State. In my judgment, the increase of our banking capital should be brought about, not

by compulsion, but rather by a change in the present method of taxation so that bank stock would become as attractive as other classes of investments.

The average rate of municipal taxation for the State was a little rising three percent for the year 1919, and will probably average approximately three and one-half percent for the year 1920. Bank stock pays the above tax in addition to the franchise tax paid by the bank, while other classes of stock escape taxation. It is apparent therefore that this is not merely an injustice to the holders of bank stock, but also greatly retards the proper increase of banking capital in Maine.

During the past year there has been an increase of one in the number of Loan and Building Associations now doing business in Maine, the Bank Commissioner having issued his certificate on June 9, 1920, authorizing the establishment of the Paris Loan and Building Association at South Paris, Maine.

Since the filing of the last report of this Department the total resources of Maine Loan and Building Associations have increased \$1,198,029.94, as compared with an increase of \$799,762.39 during the preceding year and an increase of \$579,929.45 during the year 1918. In fact the growth of our Loan and Building Associations during the past year has been greater than that of any previous year in the history of the Loan and Building Associations. The number of shareholders has increased 2,064 as compared with an increase of 427 during the preceding year and 98 during the year 1918.

There has also been a gain of \$28,680.31 in the guaranty fund, and \$52,141.34 in the amount of undivided profits.

The growth of Loan and Building Associations during the past twenty years is shown by the following table:

## INDUSTRIAL BANKS AND SMALL LOAN AGENCIES.

The Portland Morris Plan Bank continues to be the only Industrial Bank organized under the provisions of Chapter 19 of the Public Laws of 1917. This institution has shown a very substantial growth during the past year, its resources having increased from \$134,595.27 on October 16, 1919, to \$227,820.93 on October 30, 1920. On July 19, 1920, the Bank Commissioner issued his certificate approving an increase of the capital stock of said Portland Morris Plan Bank from \$50,000 to \$75,000.

There are seventeen Small Loan Agencies now operating in Maine, under the provision of Chapter 298 of the Public Laws of 1917, as compared with nineteen Agencies doing business during the preceding year. The annual fees received from such Agencies amounted to \$825.00, which amount was ample for the enforcement of the provisions of said Act.

## DEALERS IN SECURITIES.

The so-called "Blue Sky Act" provides that no person, co-partnership or corporation shall engage in the business of selling securities within the State, except those specifically exempted, unless registered by the Bank Commissioner as a Salesman or Dealer in securities. Under the above act, as amended by the last Legislature, the Bank Commissioner must not only be satisfied that "the Dealer is of good repute, but also that the proposed plan of business of the dealer is not unfair, unjust or inequitable, and that the dealer intends to honestly and fairly conduct its business, with a disclosure of pertinent facts sufficient to enable intending purchasers to form a judgment of the nature and value of the securities, and without intent to deceive or defraud, and that the securities that it proposes to issue or sell are not such as in his opinion will work a fraud upon the purchasers thereof."

The recent amendments also enable the Commissioner to require such information as he deems necessary relative to the applicant and the securities offered for sale, and have proven very effective in checking the sale of fraudulent and worthless securities within the State.

At the present time there are 199 Dealers and 264 Salesmen registered under the provisions of this act. The fees received under the act amounted to \$7,645., which sum has proven ample to make this branch of the Banking Department self-supporting.

Accompanying this statement, you will find comparative tabulations of all the banking institutions of the State, and also individual reports of the examinations of each institution.

Respectfully submitted,

FRANK L. PALMER,

Bank Commissioner.

PEOPLE'S SAFE DEPOSIT AND SAVINGS BANK,  
BATH, MAINE.

FINAL REPORT OF RECEIVERS.

Hon. Frank L Palmer, Bank Commissioner,  
Augusta, Maine.

Dear Sir:

We beg to submit to your Department a final report of our liquidation of the People's Safe Deposit & Savings Bank, as Receiver, under decree of the Supreme Judicial Court.

Prior to January 1, 1920, as shown by our previous annual reports to your Department, we have paid to the depositors of the People's Bank four dividends, amounting in the aggregate to 100% of their respective claims, as allowed by the Commissioners appointed to receive and report on all claims.

On March 10, 1920, under authority of a decretal order made January 23, 1920, we declared and paid a final dividend of 3-3-10th per cent. A cash statement as of March 10, 1920, is hereto attached.

On April 1, 1920, we filed in the Supreme Court our Final Report and Final Account as Receiver. The Final Account shows total receipts of \$805,288.95 and total payments to the same amount; leaving no balance in the Receiver's hands except unclaimed and unpaid dividends to depositors, checks for which had been drawn and signed by the Receiver, and cash necessary to pay the same segregated for that purpose.

April 27, 1920, after due notice by publication, as ordered by the Court, a decree was signed by Mr. Justice Philbrook, accepting the Receiver's Final Report and Account, and directing that after giving public notice thereof, all unpaid and unclaimed dividends remaining in the hands of the Receiver on September 10, 1920, including dividends, if any, the title to which may be in dispute, should be paid by the Receiver into the Treasurer of the State of Maine, there to be held for final disposition according to law.

In accordance with this decree unclaimed and unpaid dividends to the amount of \$9,174.39 were paid to the State Treasurer, September 21, 1920, and we can therefore report that our administration of this trust has been fully executed and

completed, in fact, and all that remains to be done is the filing of a final decree, and the formal discharge of the Receiver, which will be done before the end of the current year.

Yours very truly,

BATH TRUST COMPANY, RECEIVER,
