STATE OF MAINE  
REPORT OF THE BOARD OF PRISON  
COMMISSIONERS

*To the Governor and Council:*

The Board of Prison Commissioners respectfully submits the following report for the two years ending June 30, 1920.

The Commission presented to the last Legislature a comprehensive plan for the reconstruction and general improvement of the prison structure in accordance with the suggestions made in its last report. This plan included the construction of a new heating and lighting plant, the erection of a general building to meet many and varied needs of the institution, the construction of a new cell wing for the better housing of the inmates and the purchase of two large adjoining farms.

An appropriation of \$15,000.00 was made for the purchase of the farms and a further appropriation of \$50,000.00 to be expended by the Commission for the general improvement of the prison buildings and new construction. A sale of standing timber, not needed in connection with the prison, has substantially reduced the cost of the two farms and their use has been very profitable in many ways. Aside from the slight financial gain, the operation of these farms has permitted the employment of inmates of the prison in outdoor work, thus improving their physical health. Men are selected for this work who are most in need of outdoor exercise as well as those who are best adapted to farm labor.

The central heating and power house and the general building, which were made possible by the general appropriation above referred to, are now in process of construction. New boilers were installed in 1917 and the erection of the new building will furnish a modern and efficient heating

and power system which will be entirely adequate for the prison for many years to come. The general building will include a dining-room and kitchen, storeroom, laundry, bathroom, school, chaplain's office, dispensary, physician's office and the blacksmith shop.

The Commission will present to the incoming Legislature the urgent need of a new cell building to complete the programme of new construction already commenced. With the decrease in the number of inmates, due to the establishment of a Men's Reformatory and the practical elimination of drunkenness as a cause of crime, it is believed that all of the inmates can be suitably accommodated by extending the cell building constructed in 1916 to the office building, removing the old block of cells between these two buildings. The need of these new cells cannot be too strongly urged. The cells at present in use in the old part of the prison are very small, poorly ventilated and without sanitary conveniences. The erection of a new cell block will undoubtedly result in improving the health of the inmates and conditions generally within the institution. The necessity for this improvement was fully discussed in our previous report and we earnestly hope that it may be authorized at the next session of the Legislature.

Better facilities for the care of prisoners who are ill, especially those suffering from contagious or infectious diseases, are needed. While accommodations can be provided in the new general building for use in cases of emergency, this building will not be suitable for the care and treatment of the sick. It will contain the blacksmith shop and will adjoin the wood-working shop, making it far too noisy for regular use as a hospital. We believe that some arrangement should be made by which the section of the prison now used by the women prisoners may be made available for this use. The rooms now occupied by the women are in the administration building, with good light and ventilation, removed from the noise and confusion of the prison shops, and could be easily converted into an excellent hospital at small expense.

We are earnestly of the opinion that a suitable department for the care and detention of women prisoners, com-

mitting felonies, should be established at the Reformatory in Skowhegan, to which institution all women offenders should be committed regardless of the nature of their offenses or the terms of their sentences. The next Legislature should make appropriate changes in the law so that no women will hereafter be sentenced to the State Prison.

As soon as the buildings now under construction are completed, a new cell block erected and the women's quarters converted into a hospital, our State Prison in its structural features will commend itself to the approval of the people of the state for the first time in its history.

Rev. H. W. Norton, who had been Chaplain of the prison since 1917, died in the early part of the year and Rev. E. W. Webber, of Hallowell, was selected to fill the vacancy in this position. Mr. Norton had performed the various and difficult duties of this office to the entire satisfaction of the Commission and he enjoyed the confidence and respect of all of the inmates of the institution, who had come to look upon him not alone as a spiritual adviser, but also as a helpful teacher and a sincere and devoted friend. His successor is well fitted by training, experience and natural aptitude for this service, to carry forward the work of this important department in accordance with the high standards established by his immediate predecessors.

The accompanying report of the Warden shows the results of the operation of the prison industries and other details of the prison management. It is not to be expected that the same financial returns can be maintained in the face of a decreasing demand, falling prices and the probable limitation of the market for prison-made goods under existing and anticipated legislation. While the financial report for the past two years is very satisfactory and gratifying, the success and efficiency of the prison management must not be judged by this standard alone. We must look upon the prison not as a business enterprise, but as an agency of society, and future improvements in prison management should be chiefly along humanitarian rather than business or commercial lines.

A physical and psychopathic examination of all inmates of the prison has been made during the past year by the

Prison Physician and by Dr. H. M. Swift, of Portland, a specialist in mental and nervous diseases, and such examinations will be continued in the case of other inmates committed to the institution. Such examinations are of great assistance in the proper classification of prisoners and in the judicious and intelligent consideration of applications for pardon and parole.

A competent dentist has also been employed to examine and treat the teeth of the prisoners and an oculist will be engaged to give similar attention to their eyes as soon as satisfactory arrangements can be made.

Upon completion of the new general building it is proposed to exhibit moving pictures at regular intervals. Such pictures, carefully selected, should prove of great assistance in creating the right mental attitude upon the part of the prisoners and should have a beneficial influence upon the morale of the institution.

Statistics compiled by Dr. Swift show that more than 60 per cent. of the inmates of our State Prison have committed previous offenses. Practically the same percentage would be found in the other penitentiaries of the country. In a group of eighty-three prisoners at Thomaston committed for larceny, breaking and entering and similar offenses, 67.5 per cent. have in one way or another been in conflict with the law, that is to say, only twenty-six out of the eighty-three were first offenders. If it were possible to prevent the first offender from repeating his offense we could reduce the volume of such crimes in Maine more than two-thirds. The parole law is one of the most effective means to this end. No one is released on parole until arrangements have been made for such useful and honorable employment as he is capable of performing. Instead of being released unconditionally at the expiration of a full sentence, without money, employment or friends and in a situation furnishing a strong temptation to engage in further crime, the prisoner on parole is released in the care of a parole agent, who acts as his friend and adviser, and enters at once upon remunerative employment. The parole law has demonstrated its efficacy as a deterrent of crime, the percentage of recidivism in the case of persons released on

parole being much smaller than among those unconditionally released at the end of definite sentences.

The Legislature of 1919 authorized the employment of a State Probation Officer or parole agent and Mr. F. Morris Fish was elected to this position, assuming his duties in October of that year. He has met with marked success and we believe that the operation of this law has now been placed upon a satisfactory basis.

During the year ending June 30, 1920, applications for parole were received from sixty-nine inmates of the prison and one was taken from the table, making seventy applications considered. Of the seventy considered forty-nine were paroled, eighteen denied, three left on the table for further investigation and later action. Of the forty-nine paroled thirty-nine are still out on parole, six have received their absolute discharge and four have been returned to the prison for violations of the conditions of their parole. Of the thirty-nine out on parole three are violators.

Since the Indeterminate Sentence Law became effective (July, 1913) two hundred and ninety-seven prisoners have been paroled. Of this number fifty are out on parole, forty-eight were removed from the list of parole violators by vote of the Prison Commissioners at their meeting held June 4, 1919, six have died, thirty-two were returned to prison and one hundred and sixty have received their absolute discharge, having faithfully complied with the terms of their parole. Of the fifty out on parole at the present time ten are violators.

The members of the Commission have visited the several county jails during each of the two years covered by this report and have made such suggestions for improvement to those in charge as seemed appropriate. The duty of making inspections of the jails also devolves, under the law, upon the members of the State Board of Charities and Corrections and detailed statements of the conditions observed in the several jails have been made in the report of that Board. In all of the recommendations made by the

State Board of Charities and Corrections in connection with the county jails the members of this Commission have concurred, so that it is not necessary for us to submit a separate report in this connection.

EDWARD W. WHEELER,  
LESLIE BOYNTON,  
FRANK H. HARGRAVES,

## WARDEN'S REPORT

*To the Board of Prison Commissioners:*

GENTLEMEN: I herewith submit my annual report for the two years ending June 30th, 1920.

The Prison Commissioners in their report have so clearly stated what the situation is here, what our needs are, and what we have accomplished in the past two years, that it is unnecessary for me to make any recommendations along these lines. I do want to join with the Prison Commissioners in urging upon this in-coming Legislature the necessity of having an appropriation for a new cell block.

The conditions have been very unusual for the past two years and have made it very hard for us in our different manufacturing departments, but we have been very fortunate, and the net profits of the Maine State Prison have been more by several thousand dollars than ever before.

The total number of prisoners in the Maine State Prison is 171, the smallest number there has been here for a great many years. The health of the prisoners has never been better than at the present time.

The two farms we bought in Warren were a good investment for the State. We had about twenty-five acres under cultivation last year and will have about twenty-five acres under cultivation next year. We have about fifty cows on these farms. Besides furnishing all the milk we need at the Prison, the balance goes to the creamery.

I beg to express my appreciation for the assistance and helpful suggestions I have received from the hands of the Prison Commissioners, Messrs. Wheeler, Boynton and Hargraves; and in closing I wish to thank the overseers and officers of the Institution in their co-operation in making the year a successful one.

Respectfully submitted,

F. J. HAM, *Warden.*

## CHAPLAIN'S REPORT

*To the Board of Prison Commissioners:*

GENTLEMEN: In submitting this report to you I wish to express my thanks to Almighty God for His interest and care, for since our last report to your honorable body we have passed through one of the most trying experiences that any board of officials of this institution ever knew.

When the influenza gained a footing within the prison limits last October there were 200 convicts on the roll, 161 of whom were victims of that dread disease, and notwithstanding they received the best care and attention possible—under the circumstances—16 died and in addition two others have died with tubercular trouble. The remains of seven of these have been buried in “God’s Quarter Acre” on the south slope of the prison lot just outside the prison walls; the remains of all the others have been cared for by their relatives or friends.

It took us some time to recover from this scourge but early in November we got re-adjusted in the various departments of our work and from that time we have carried on the work with our accustomed regularity.

When we re-opened the Chapel services the first Sunday in November—we had no services at all in the Chapel during October—we introduced new singing books, “Songs for Service,” and for several Sundays we had a leader from Rockland to aid us; his services were very helpful, and had we not been limited for funds he would have continued longer.

We have been assisted from time to time by speakers from outside who have contributed of their talents and gifts to make the religious exercises helpful and uplifting.

The men have shown their appreciation of these things and manifested their desire to help, as well as to be helped, by contributing of their own scanty resources to the work of the Red Cross, Salvation Army, and in buying Liberty Bonds and War Savings Stamps.

In this connection I wish to say that the interest the Salvation Army and the W. C. T. U. have taken in the convicts (the former by sending speakers to address the men, and the latter by sending flowers to all and special dainties to the women confined here), have greatly cheered the hearts of all. The work that the Salvation Army has done by way of helping the men on parole to find work, and a place to board when first going out, I feel should not go unnoticed. I wish the churches would manifest a like interest, for it is my conviction that if they did there would be a much smaller percentage who would get into trouble the second time.

The books in the prison library have been thoroughly overhauled, repaired, and re-numbered, new catalogues printed and some additions made through gifts from the men, also a donation of 50 volumes from Mr. and Mrs. B. U. Adams of Thomaston, Maine.

Friends in Thomaston, Rockland and vicinity have contributed generously of magazines, and good papers during the year, so with the number of magazines (18) the state furnishes, the fifty copies of daily papers, taken by the men, and the weekly papers and periodicals sent in by friends, they are very well supplied with good reading matter.

During the year it was considered wise in addition to the money taken from letters, for all moneys taken from the men on coming in to the prison, and all given to them by friends should be turned over to the Chaplain and reported by him to the Warden's office; this has added somewhat to the care and labor of my department.

The rule of the office relative to correspondence is that each convict may send out two letters per week, and receive as many as his friends may see fit to send in. We have tried to hold to this rule, though there have been a few cases which seemed to demand a little larger correspondence. In such cases the rule has been elastic and so more than 25,000 letters have passed under the censor's eye, and \$4,500.00 turned over to the care of the Warden, since our last report. This amount has come in sums ranging from one cent to five hundred dollars.

When we reopened the school after the sickness pre-

viously mentioned we made arrangements to give the men two hours per week in the school room instead of one hour as heretofore; the change has proven a great incentive to the men to apply themselves more closely and as a result more satisfactory work has been accomplished. The school was in session from November 1 to May 31, four days in each week. Thus far only the common branches have been taught. We are contemplating adding higher branches, as there are some who would like to have advanced work.

The men for the most part are interested in their work and do the best work of which they are capable. The greatest benefit, however, of the prison school is experienced by those who come to us unable to read or write. These men often make rapid progress and feel a deep appreciation of the opportunities offered them.

Many of them do not hesitate to say that ignorance was at the bottom of their crime. I feel confident that great good is being done by the prison school and shall be glad to enlarge its scope as much as prison conditions will allow. The discipline has been well nigh perfect and the spirit of all connected with it excellent. The following is the summarized report for the year 1918-1919.

Number of school sessions, 218.

Number in attendance at opening, 30.

Average attendance, 30.

Largest number at either session, 32.

Smallest number present at either session, 28.

Enrolled at close of school year, 31.

Some not enrolled are taking correspondence courses and are making a commendable showing in their rank.

I have encouraged the men who have received sums of money from various sources to deposit the same in the savings bank so when their time is up on going out they will have some to add to the meager allowance given by the state. At the present time there are 24 who have made deposits in the savings bank of Thomaston, Maine, and four out of town, with the understanding that the money is to remain in the bank until the convict has completed his time here.

Gentlemen, this will give you some idea of what I have tried to do in the department over which I have had the oversight during the past year. In closing I wish to thank all the officials who have so heartily co-operated with me in my work.

Respectfully submitted,

H. W. NORTON, *Chaplain, M. S. P.*

August 21, 1919.

## CHAPLAIN'S REPORT

*To the Board of Prison Commissioners:*

GENTLEMEN: I hereby present my report as Chaplain of the Maine State Prison, which must necessarily be brief as it only covers two months. I am much interested in the work and find the assistance and co-operation of the officers of the institution very helpful and encouraging.

### CHAPEL SERVICES

I have endeavored to make our Sunday services of a helpful character. Every third Sunday the service is in charge of Rev. Father Flynn, who also makes frequent visits to the prison and is always ready to respond to every call made upon him. The music under the direction of Mr. Otho Hatch is greatly appreciated by all. The religious exercises commence with a twenty-minute song service in which the inmates participate freely, and I venture to say that no church in the State of Maine has more attentive and orderly congregation. We often have the village pastors and other clergymen speak to the men Sunday morning.

### LIBRARY

We have a library of approximately 5000 volumes and this department is well patronized. About two hundred volumes have been added this year, the larger part of which came from the State Library. We make use of the stereopticon occasionally and every other Sunday afternoon, during the winter months, use the phonograph, which is a great favorite with the men.

About sixty daily papers and thirty Sunday papers are taken by the inmates, besides those sent by friends.

### THE PRISON SCHOOL

One of the most important departments, for the education that the prisoner gets here will enable him, when released, to become a more useful citizen, and to those who re-

main, to be able to read and write is of great advantage as well as a help to the prison discipline. During the fall of 1919 and up to March, 1920, the school was conducted under the direction of my predecessor, who was greatly interested in the work, and much credit is due him for the success of the school. In March, 1920, Chaplain Norton died. This necessitated closing the school, and as the new Chaplain did not assume his duties until May, it was deemed advisable not to reopen the school for the few weeks intervening between that time and the summer recess. Upon investigation, as carefully as possible the results accomplished during the last school year, I believe those in charge should be commended for their work. I am advised that the attendance was well maintained and that the interest and diligence of the men were manifest. Several new buildings are in course of construction at the present time. These operations have made the old school room unavailable. Therefore, it will be impossible to open the school until the new quarters are in readiness.

Trusting, as time passes we may find new ways of making this department of greater service,

Respectfully,

E. W. WEBBER, *Chaplain.*

## PRISON PHYSICIAN'S REPORT

Thomaston, Me., June 30th, 1919.

*To the Board of Prison Commissioners of the State of Maine:*

I hereby submit my annual report as Prison Physician for the fiscal year ending June 30th, 1919.

During this year we have witnessed the completion and occupation of the new wing of modern design, better conveniences and vastly improved sanitary conditions, for which we thank a generous state and wise administration. We know this is the beginning of a brighter era for Maine State Prison and that in a short time other needed buildings will be erected, including a suitable hospital for the care of the sick, the need of which was terribly emphasized during the great and destructable epidemic of influenza which landed upon us during September and October, attacking one hundred and sixty-five of its inmates and causing sixteen deaths. Besides its great severity and unusual fatality the above epidemic was remarkable here in two other ways, in that few of the older inmates were attacked and those who survived recovered perfectly in a short time and have suffered less from illness since, so that the amount of sickness during the remainder of the year has been a great deal less than usual. Another great improvement which we note with great satisfaction is the appointment by the State of a competent dentist with up-to-date equipment. I know of nothing more essential to the health and welfare of these inmates than the proper care of their teeth, and hope none will be neglected for want of time or money. I also note with satisfaction that the care of eye trouble is receiving better attention. Tuberculosis appears to have ceased its ravages, as I know of no active case at the present writing. Accidents during the year have been comparatively few and of a minor nature, treatments prompt and results entirely

satisfactory. Physical examinations of all the inmates is nearly completed and I expect to have a report ready very soon.

ALBERT P. HEALD, M.D., *Prison Physician.*

Thomaston, Me., June 30, 1920.

*To the Board of Prison Commissioners of the State of Maine:*

The following brief report of my services as Prison Physician for the period ending June 30, 1920, will convey to you the welcome fact that the prisoners under my medical care have suffered very little illness during above period, perhaps the least of any similar period during the history of the Institution. Epidemic sickness has not broken out in any form, and the general health of the inmates has been excellent. Digestive disturbances, which formerly gave much trouble, have nearly disappeared in recent years, a fact which I attribute in no small degree to the greatly improved condition of the teeth, which are under the care of a competent dentist. I am able to record very little disability from chronic ailments among the prisoners. Tuberculosis has been almost wiped from the records, and by transferring menacing cases to a sanitarium I believe we are doing a humane act to the patient, protecting his immediate associates, and shielding community and State from this terrible disease. Mental disease of a serious nature has been rare among the inmates, and while quite a few may be classified as psychopathic the records show that not over four have been sent to Augusta for more special treatment. Gonorrhoea among the newcomers has been rare and promptly cured, while a trace of syphilis has been rarely found among the blood specimens sent to the laboratory of hygiene at Augusta.

I believe the cooking is being well performed, that the diet is ample, and agreeing well with the prisoners. The greatly improved cells in the new wing are a luxury to the prisoners, and a source of satisfaction to all, and we hail the construction of new buildings now going on as a further promise of better days for prison life in Thomaston.

ALBERT P. HEALD, M.D., *Prison Physician.*
