# ANNUAL REPORT

July 1, 1936

Dr. Howard C. Hanscom, Director  
Bureau of Institutional Service  
Department of Health and Welfare  
Augusta, Maine

Dear Sir:

In presenting this report for the Fiscal year ending June 30, 1936 I expect to convey the thought that the Maine State Prison is still advancing and not going backward. It is a great personal pleasure for me to state that conditions at the prison, in general, are much better and this despite a larger population during this last period.

## PRISON POPULATION

With an average population of two hundred eighty-seven and seven tenths which was about twenty more than the previous year, housing conditions were a problem with only two hundred and eighteen cells. It is obvious that a condition existed that was not conducive to good discipline. Frankly it meant that an average of forty men had to be culled from the entire population of the prison to allow for sleeping accommodations for the remaining men. This on the face of it was one of our most serious problems; to select forty men from three hundred or more for trusties and to house them at night in a shop room unguarded, and the prison wall unguarded was to my mind an exaggerated error. I am thankful to say that this condition no longer exists. During the past year ample cell room has been added to take care of this surplus and without the expense of constructing new buildings. Room was found inside the present cell blocks for fifty-six additional cells. They have been installed and are now occupied. They are the latest maximum security type cell and were contracted for at a substantial saving over the last installation that was made at the prison. Taking into consideration the fact that there are always a certain number of men employed at the Prison Farm you can understand that we hope to have room enough for all that cannot be classed as trusties. This task was completed with prison labor under supervision of an engineer from the contractor and our own construction supervisor.

Including electric, plumbing work and heating installation, a factor that entered into this work that was pleasing to the management was that not a single injury occurred to an inmate during this construction, despite the fact that not a man in the crew working on this job had ever handled steel construction previous to this time. Altogether it is a satisfactory accomplishment and places the Maine State Prison among the Maximum Security Prisons of the country.

# MAINE STATE PRISON

## ESCAPE

There have been sixty or more men employed outside the Prison Walls on necessary vocations and of that number only one escaped. This man was a trusty employed as a helper on one of the prison trucks. Owing to existing conditions in the prison none have escaped from here.

## DISCIPLINE

This subject deserves consideration and deep thought as it is one of the great problems in any Prison. The condition existing in our Prison cannot be matched anywhere. There have been no serious infractions of any one rule in this prison for over a year, a record hard to equal. At the present time not a single man is confined in punishment and from the attitude of the inmates and their re-actions to their treatment there is little indication that this treatment will be necessary. The human element is at all times uppermost in the minds of the officials of this institution and it is our earnest desire to cure the patients that are sent to us. We strive to establish in the minds of these men the thought, by living example, that right living is by far the best living. Frankly the inmates have shown such responsiveness that we feel we are gaining our point and with no serious infractions of the rules we feel that good discipline is at its peak.

## RELIGIOUS ACTIVITY

This is carried on as it always has been and each Sunday inspirational services are held under the direction of Miss Bertha Luce a leader in her field. The interest shown in her meetings by the inmates is not alone due to the fact that she is an exceptionally fine violinist but the personal contact that Miss Luce gives to the inmates from the outside world and the fine co-operation of the Pastors from the different churches is of immeasurable value.

Catholic services are held the third Sunday of each month under the direction of the Prison Chaplin Rev. Father James A. Flynn. Father Flynn reaches not only the Catholic inmates but a great percentage of the Protestants as well.

## AMUSEMENTS

During the warm months outdoor recreations are urged and a fine Baseball team continues to be outstanding in this endeavor. Regular field day sports are in order during the Summer and Football in the Fall. During the colder months Motion Pictures are shown Sunday afternoon and holidays. Pictures selected by the officials. A central Radio control supplies the inmates a limited number of selected programs via ear phones, if they are in good conduct. Incidentally these privileges are deprived to all inmates violating the rules of the institution.

# ANNUAL REPORT

## EDUCATION

Without necessary funds to carry on a system of Education that is thorough we strive to give men that need it all of the help we can. Their response is gratifying to a degree.

## INDUSTRIES

The new Plate Shop where license plates and State Highway signs are manufactured is a growing industry. The lack of proper machinery is the only hindrance to a real source of income that will eventually make this institution more or less self-supporting. There is a definite need for replacement machines in several of the shops and this one is in greater need than the others. There is an unlimited scope to the business that can be done in this shop with proper machines. All types of signs constructed of metal can be manufactured here, parking signs, street name signs, advertising and commercial type signs of all kinds and sizes ranging from four inch by six inch up to forty by seventy inches.

In the Harness Shop the business has climbed back to the high peak it held several years ago and is now passing it. The increase in the number of horses continues and Maine State Prison harness is still among the leaders in it's field and is bound to hold it's own with out of State made harness.

Wood shop production is so great that we are forced to work a crew of men several nights each week in order to keep up with our orders. A diversified output taxes the shop and our several state departments keep us busy on all type of office furniture.

Auto truck bodies from half ton pick-up to ten ton van type are a regular output of this shop as well as a line of fully equipped house trailers, the latter being a new departure but very successful.

Automobile shop still continue to be one of our busiest industries and a satisfied customer is our best advertisement. This business is conducted in such a manner that it does not interfere with similar trades outside the Prison as the majority of work we do on cars not only painting but also body and fender and upholstery work is done for dealers and garages.

The Printing Department has accomplished a task of printing over a million pieces during the year. No credit is given this department through a peculiar set up but it deserves a lot. The suggestion that this department should be extended is still in order and we could handle more State work here at the prison.

# MAINE STATE PRISON

Mention should be made of our Mattress shop in which we make all the mattresses used here and also for several state institutions as well as many of the County Jails throughout the state. Also our furniture refinishing department where both modern and antique furniture is rebuilt, refinished and re-upholstered by expert workmen under supervision of a practical foreman.

Our Canning Department put up between nineteen and twenty thousand can of produce from the Prison Farm and these added to the immediate consumables are a great asset.

## AGRICULTURAL

During the year needed improvements have been made at the Prison Farm. Several new and modern pieces of machinery have been purchased to facilitate better crops. A new Hennerly constructed along United States Department of Agriculture specifications that houses three thousand hens. The egg production realized from this improvement is indication that with the small investment made the profit will be great. This building cost less than three thousand dollars and was erected by prison labor under supervision of the Prison building Supervisor. Also a new large tract of land has been cleared and will be under cultivation next year which will give the Prison added crop production.

## REPAIRS

Several new additions have been made throughout the prison such as tool room in the shops, new barber shop, new ventilating system in the bakery and kitchen, pipe repairs throughout the buildings and a great amount of work is being done on the houses owned by the Prison. Such as new foundations, floors, ceilings, etc. The houses are in very poor repair and considerable work must be done to keep them valuable to the Prison. A complete overhauling job has been accomplished on the Leighton property recently purchased by the prison and it will be a valuable asset to the Prison. A repair crew or maintenance crew has been established under the supervision of two expert workman and a vast amount of needed repairs are being carried on.

## RECOMMENDATIONS

Repairs to the East Cell Building must be made this coming spring. They are extensive in scope and will take several months in operation. All flashings on main Cell House have to be replaced and repairs to all roofs. All of the outside Buildings and houses of the Prison should be painted. New Pumping machines in the boiler-room and several new machines in the Plate Shop.

## ANNUAL REPORT

Our industries are not only a valuable asset to the institution but to the morale of the inmates as well. To be busy is to be contented and contentment is the greatest boon to good discipline. In all I feel that strides have been made in the direction of perfect progress.

In conclusion let me extend my sincere appreciation for the fine co-operative spirit that you, Doctor Hanscom and also Commissioner George W. Leadbetter have extended to me. I have profited greatly by following many of your suggestions and advices. I also wish to extend to my able assistant Alfred P. Chapman my sincere thanks for his part in our scheme of things also to all other employees for their loyal support and for their adjustment to my progress of procedure and for their devotion to duty.

Respectfully

EDWARD P. JOHNSON

Warden

# MAINE STATE PRISON

Dr. H. C. Hanscom, Director  
Bureau of Institutional Service  
Department of Health and Welfare  
Augusta, Maine

Dear Sir:

Annual report of Surgical and Medical activities for fiscal year July 1, 1935 to June 30, 1936, attached.

The general health of the inmates for the year has been far above standard. A new ruling that each new inmate receives immediate examination upon commitment has given us practical immunity from spread of any contagious disease by contact with the outside. The treatment of new and old cases of Syphilis has been carried on and all precautions necessary to protect non-infected inmates have been taken.

Thru the co-operation of the Warden and his staff this department has shown remarkable improvement.

Very truly yours,

F. G. CAMPBELL  
Prison Physician
